A student may elect to minor in physics by taking:

- PHY 105/105L University Physics I and University Physics Lab I
- PHY 106/106L University Physics II and University Physics Lab II
- PHY 251 Modern Physics I
- And three other PHY electives

Among the three PHY electives, PHY 257 Mathematical Methods in Physics is strongly recommended for students lacking mathematics courses beyond MAT 162, and at least one PHY elective must be at the 200 or 300 level. Modifications are subject to the Chair's approval in consultation with the department. Interested students should contact the chair prior to the fall semester of their junior year.
