

WADE Bulletin Board – Marijuana
PLEASE READ THIS BEFORE POSTING!

To build this bulletin board, take each answer sheet and put up on the bulletin board first. Then take the question sheet – fact or crap sheet – and staple it on top, only at the top of the sheet. This will allow the passersby to read the question and pull the sheet up to get the answer. Print out numerous Flip Up for the Answer sheets as you can place them wherever you want on the board to show students how to find the answers. Also, it might be best to use colored paper to make it more bright and fun!

The Share Your Story sheet and the Tell us how marijuana impacts you sheet should be posted with space for students to write in their answers. Provide a pen or marker by tying a long string or piece of yarn to a pen and taping the end of the string to the bulletin board. Maybe start it up by writing a few things yourself in marker. Write something like:

“When my friends smoke and they just sit around and do nothing. It seems like a very boring drug.”

“Pot makes me paranoid!!”

“I thought smoking made me a better writer so I would smoke before writing a paper. Turns out, although I get more creative ideas, it just takes me longer to write because it is hard to concentrate.” Or use something that makes sense to you to get the board started.

*Check up on the board to see what students are saying about marijuana. Use this information in conversations with students.

Post the resources page and use it if a student comes to you with questions.

The E-toke information would be best if you could create a sheet with rip-off tabs at the bottom that have the link listed on it so people can just rip off the paper that has the link on it. Please let me know if you have questions regarding this.

Please let me know if you have any questions or if you want specific information related to this topic to add to your bulletin board. Thanks so much.

Fact or Crap?

Pot can cause forgetfulness
and
reduced concentration.

FACT: Marijuana affects learning and memory processes.

This can make it very hard to study for a test since it makes it hard retain the information you learn.

Fact or Crap?

Pot reduces logical thinking and calculation skills.

FACT: Marijuana can impact the user's ability to perform complex tasks as well as logical thinking. This can interfere with academic work as well as job duties.

Fact or Crap?

Pot alters sensory perception.

FACT: Marijuana can give the user a sense of heightened sensitivity and a distorted sense of the passage of time. Hours can be lost being high.

**CRAP: 68% of SJU freshmen
have not smoked at all in the
last year.**

Fact or Crap?

55% of SJU freshmen have not smoked marijuana in the last year, not even once.
