2017-2018 Catalog
**GENERAL INFORMATION**

The provisions of this catalog describe programs and policies of the College of Arts and Sciences, the Erivan K. Haub School of Business and Professional and Liberal Studies and the Haub Degree Completion Program within Saint Joseph’s University as of time of publication. They are regarded as an irrevocable contract between the student and the University. The University reserves the right to change any provision or requirement at any time.

Saint Joseph’s University, a private liberal arts institution for men and women, founded by members of the Society of Jesus in 1851 and chartered by the Commonwealth of Pennsylvania in the following year, has been conducted ever since by the Jesuits as a Catholic educational institution in the Ignatian tradition.

Saint Joseph’s was recognized as a university by the Secretary of Education of the State of Pennsylvania on July 24, 1978. The corporate charter was formally changed to reflect university status on December 27, 1978.

**Location**

Situated on the western boundary of Philadelphia, Saint Joseph’s one hundred and fourteen acre campus combines accessibility to the city with the proximity to the Main Line. In this urban-suburban environment, students share in the educational, cultural, and entertainment resources of a great metropolitan area. Students, faculty and staff alike enjoy the Philadelphia Orchestra, the Pennsylvania Ballet, the Philadelphia Museum of Art, the Barnes Foundation, the Pennsylvania Academy of Fine Arts, the Franklin Institute, the University Museum, the Free Library, theatre, world class dining and major league baseball, football, basketball, and hockey. The city itself is at once a museum of American history and culture and a laboratory for contemporary economics, sociology, politics and religion.

**History**

On the morning of September 15, 1851, some thirty young men gathered in the courtyard outside Saint Joseph's Church, located in Willing's Alley off Walnut and Fourth Streets and one block from Independence Hall. After attending High Mass and reciting the Veni Creator in the church, these young men were assigned to their classes in a building adjacent to the church. That September morning marked the beginning of a rich and exciting history for Saint Joseph’s University.

As far back as 1741, a Jesuit College in Philadelphia had been proposed and planned by Rev. Joseph Greaton, S.J., the first resident pastor of Saint Joseph’s Church. The suppression of the Jesuits (1773-1814) and lack of human and financial resources delayed for over a hundred years the realization of Fr. Greaton’s plans for a college. Credit for founding the college is given to Rev. Felix Barbelin, S.J., who served as its first president. He, along with four other Jesuits, formed the first faculty of Saint Joseph’s College. Before the end of the first academic year, the enrollment rose from fewer than forty to ninety-seven students. In the following year (1852), when the college received its charter of incorporation from the Commonwealth of Pennsylvania, the enrollment grew to 126 students.

In January, 1856, Saint Joseph’s College moved to a more spacious site on the fashionable Filbert Street. Due to financial difficulties and the serious illness of the college’s second president, the college returned to its Willing’s Alley location in 1860. Shortly thereafter, the civil strife between the North and South became the first of many wars that would greatly diminish the college’s enrollment. Through the Civil War and post-bellum years, Saint Joseph’s College struggled to remain in existence.

With the purchase in 1866 of a city block between Seventeenth and Eighteenth Streets fronting on Stiles Street as a new site for the college, its future began to look brighter. Rev. Burchard Viliger, S.J., one of the original members of the college faculty, became its president in 1866. It was during his tenure that new college buildings, made possible largely through a generous bequest from the estate of Francis Anthony Drexel, were constructed on the Stiles Street location.

A sporadic but continuing growth, both in student enrollment and academic excellence, is recorded for the new life of Saint Joseph’s College from September 2, 1889, when the college moved from Willing’s Alley to Stiles street, until 1927, when a still larger campus was judged necessary.

In November 1922, an ambitious building fund campaign to raise $1,000,000 was organized by Rev. Matthew Fortier, S.J. His work in this difficult undertaking was successful and the pledges did exceed that goal, but the actual contributions did not. Subsequently, Saint Joseph’s College was able to purchase twenty-three acres in a beautiful residential area at the western edge of the city. Construction of a handsome building in modern Collegiate Gothic architectural style was begun in November 1925. Its dedication took place on November 14, 1927. From that time to the present, the location of Saint Joseph’s has been 54th and City Avenue.

During the Second World War, the college’s enrollment was again greatly reduced. Following the war, aided by the “G.I. Bill of Rights,” enrollment grew rapidly. In 1943, an Evening College was founded. It was also after the war that Saint Joseph’s acquired several spacious homes adjacent to the campus, which were converted to its first residences for students.

Through the decade of the sixties, Saint Joseph’s experienced unprecedented physical growth. Five more properties were added to the campus including the nine-acre estate of Margaret Gest, a Jesuit faculty residence, the Post classroom building, a science center, the Drexel Library building, a six-story student dormitory and expansion of the Student Center. All enhanced the modern facilities of the campus.

In the fall of 1970, the undergraduate day college opened its doors to women, bringing to an end its tradition as an all-male institution. Saint Joseph’s was recognized as a university by the Secretary of Education of the Commonwealth of Pennsylvania on July 24, 1978. The corporate charter was formally changed to reflect university status on December 27, 1978. Shortly thereafter the University added a College of Business and Administration to complement the College of Arts and Sciences, and it also expanded graduate programs. At the same time, Saint Joseph’s built a new Student/Sports Recreation Complex. The need for a larger library prompted the expansion of the University’s Drexel Library into a Library/Learning Resources Center. The campus was enlarged to 49 acres with the purchase of Saint Mary’s and Bronstein halls.

The last decade has marked an era of significant change in student enrollment; development of new undergraduate and graduate programs in all three colleges; integration of state-of-the-art technology of every kind, in the classroom and throughout the campus; upgrading of science laboratories; hiring of new faculty; and new campus construction.

Among the most important building projects undertaken are the following:

- the Chapel of St. Joseph;
• the McShain Student Residence and its footbridge traversing City Avenue and linking the city and suburban campuses;
• Mandeville Hall, home of the Erivan K. Haub School of Business;
• three large new student residence halls and a parking garage;
• and a new boathouse on Philadelphia’s famed Kelly Drive.

In the summer of 2005, the University agreed to purchase the Merion campus of neighboring Episcopal Academy. The acquisition added 38 acres containing 52 classrooms, eight laboratories, 113 offices, and 14.5 acres of playing fields. Subsequent to the announcement of the agreement, alumnus James J. Maguire ’58 donated $10 million to help fund the purchase, and this section of the university is known as the Maguire Campus. Maguire’s gift was later matched by a donation of the same amount by Brian Duperreault ’69; the two donations are the largest alumni gifts in Saint Joseph’s history.

External and peer review are also indicators of institutional progress and the awarding of a Phi Beta Kappa chapter to the university and AACSB accreditation in both business and accounting for the Haub School of Business augur well for the future of Saint Joseph’s.

**Mission Statement**

As Philadelphia’s Jesuit Catholic University, Saint Joseph’s University provides a rigorous, student-centered education rooted in the liberal arts. We prepare students for personal excellence, professional success, and engaged citizenship. Striving to be an inclusive and diverse community that educates and cares for the whole person, we encourage and model lifelong commitment to thinking critically, making ethical decisions, pursuing social justice, and finding God in all things.

**Colleges and Schools**

The University is organized as follows:

- **The College of Arts and Sciences**, which offers the traditional undergraduate programs leading to the degrees of Bachelor of Arts or Bachelor of Science, a flexibly-structured program in Professional and Liberal Studies in the Arts and Sciences leading to bachelor and associate degrees, and graduate programs leading to the degrees of Master of Arts, Master of Science and Doctor of Education.

- **The Erivan K. Haub School of Business**, which offers traditional undergraduate programs leading to the degree of Bachelor of Science in Business Administration, a flexibly-structured Haub Degree Completion program leading to a bachelor degree or associate degree, and graduate programs leading to the degrees Master of Business Administration and Master of Science.

**Accreditations, Approvals, and Memberships**

Saint Joseph’s University is approved by the Commonwealth of Pennsylvania Department of Education. It is accredited by the Middle States Commission on Higher Education:

- Middle States Commission on Higher Education
  - 3624 Market Street
  - Philadelphia, PA 19104
  - 267-284-5000

The Middle States Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation. The Haub School of Business and its Accounting program are accredited by the AACSB—The Association to Advance Collegiate Schools of Business. The Chemistry Department is on the approved list of the American Chemical Society. The Teacher Education program was granted Program Approved Status by the Pennsylvania Department of Education and is recognized by the New Jersey Department of Education for issuance of certificates.

The University is also a member of the American Council on Education, the Association of Jesuit Colleges and Universities, the National Catholic Educational Association, the National Association of Independent Colleges and Universities, the Pennsylvania Association of Colleges and Universities, the American Library Association, the Association of Liberal Arts Colleges of Pennsylvania for the Advancement of Teaching, the American Association of Colleges for Teacher Education, and the Middle Atlantic Association of Colleges of Business Administration. The Haub School of Business is also a member of Beta Gamma Sigma, the honor society of business programs accredited by AACSB International.

**Student Disability Services**

In accordance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act (ADA) of 1990, the Office of Student Disability Services coordinates support services and recommends reasonable academic adjustments based on appropriate documentation and the needs of the student. The Office is responsible for promoting access to facilities and programs, ensuring equal educational opportunities, acting as an information and referral source, and serving as a liaison between faculty and student.

The office of Student Disability Services is located in:

- Bellarmine G10
- 610-660-1339
- TTY 610-660-1620
- sds@sju.edu

Visit the website: sju.edu/sds

**Veterans Services**

The SJU Office of Veterans Services is dedicated to serving the unique needs of our veterans, spouses and dependents. We are a nationally recognized “veteran friendly” university, as well as a full participant in the Post-9/11 GI Bill and Yellow Ribbon programs. Our mission is to create a welcoming environment for veterans and their families, and to ensure veterans gain access to all eligible federal, state and local programs and services. We are located in Mandeville Hall, Suite 206. Additional information is available on our website at www.sju.edu/veterans.

**Non-Discrimination Policy**

In compliance with applicable law and its own policy, Saint Joseph’s University is committed to recruiting and retaining a diverse student and employee population and does not discriminate in its admission of students, hiring of employees, or in the provision of its employment benefits to its employees and its educational programs, activities, benefits and services to its students, including but not limited to scholarship and loan programs, on the basis of race, color, religion, national origin, age, sex/gender, marital status, ancestry, sexual orientation, medical condition, physical or mental disability, veteran status or any other basis prohibited by applicable law.

Questions or concerns regarding the University’s equal opportunity policies and programs should be directed to the University’s Affirmative Action/Equal Opportunity Officer, (610) 660-3336.

As provided by the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act of 1998, Saint Joseph's University through its Department of Public Safety, annually provides notice and makes available copies of the Annual Security Report, to the campus community, prospective students, employees and the public. Each Security Report includes statistics for the past three years concerning crimes and incidents (whether they occurred on campus, in off-campus building and property owned or controlled by the University, or on public property adjacent to campus) reported to campus security authorities. Each Security Report also provides campus policies and practices concerning security – how to report sexual assaults and other crimes, crime prevention efforts, policies/laws governing alcohol and drugs, victims’ assistance programs, student discipline, university resources, and other matters. The Security Report, which also includes information about the Department of Public Safety and Security, is publicly available electronically or by hard copy in the following ways:

- electronically: https://www.sju.edu/int/resources/security/annualreport.html
- or by telephone request to the Department at 610-660-1111
- or stopping by the Department’s Office on campus.

In addition, as provided by the Campus Sex Crimes Prevention Act, the Philadelphia and Lower Merion Sheriffs’ Offices maintain a Megan’s Law database of sex crime offenders: http://www.pameganslaw.state.pa.us/

Confidentiality of Student Records

The University’s policy with respect to the confidentiality of and access to student records is in conformity with the relevant state and federal regulations.

The Family Right and Privacy Act of 1974 grants eligible students the right to inspect and review certain education records, and safeguards the student against improper or unauthorized disclosure of such education records or personally identifiable information contained therein.

A detailed statement of Saint Joseph’s policy, including a description of education records kept and the administrative officers responsible for them, a procedure for initiating inspection and review, and a procedure for challenging information in such records, is available from the Registrar’s Office.

Complaints with respect to this policy or its administration may be registered with:

Family Policy Compliance Office
United States Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5901

Student Life

Committed to our Catholic Jesuit tradition and guided by our Ignatian values, we empower our students to create a supportive and transformative educational experience. We provide challenging opportunities for the holistic development of students so that they may become servant leaders who discern goals, focus on social justice, appreciate diversity and lead lives of faith and purpose. http://www.sju.edu/studentlife

Undergraduate Level Grades

The following system of grades, with their grade point equivalent in parenthesis, is used in all courses offered by the University:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Point</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
<td>Excellent performance in all or most aspects of the course</td>
</tr>
<tr>
<td>A-</td>
<td>3.7</td>
<td>Excellent performance in many aspects of the course</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
<td>Very good performance in all or most aspects of the course</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
<td>Good performance in all or most aspects of the course</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
<td>Good performance in many aspects of the course</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
<td>Acceptable performance; more than adequate performance in some aspects of the course</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
<td>Acceptable performance in all or most aspects of the course</td>
</tr>
<tr>
<td>C-</td>
<td>1.7</td>
<td>While acceptable overall, course performance is inadequate in one or more areas</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
<td>While acceptable, course performance is inadequate in several areas</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
<td>Meets minimal performance standards required for passing</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
<td>Failure; overall performance has not met the basic standards of the course</td>
</tr>
<tr>
<td>P</td>
<td>Pass</td>
<td>No grade points. Credit. The grade P carries credit but is not included in the calculation of the grade point average.</td>
</tr>
<tr>
<td>NP</td>
<td>No Penalty</td>
<td>No grade points. No credit. The non-passing grade NP carries no credit and does not affect the calculation of the grade point average.</td>
</tr>
<tr>
<td>Grade</td>
<td>Description</td>
<td>Details</td>
</tr>
<tr>
<td>-------</td>
<td>-------------</td>
<td>---------</td>
</tr>
<tr>
<td>NG</td>
<td>No Grade</td>
<td>A grade that is only used by the University Registrar to indicate that no grade has been submitted by the instructor. Just as with an I or incomplete grade, this grade will automatically turn to an F grade, if it is not resolved within four weeks from the last day of the final examination period for the semester in question.</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress</td>
<td>A temporary grade assigned to all students of a given course that extends meeting requirements beyond the grading period for a traditional semester. Other grades on the scale will be assigned by the appropriate faculty member at the conclusion of the given course or within 180 days from the initial issuance of the IP grade. At that point, the University Registrar is instructed to change all outstanding IP grades to F. Extensions may only be granted by the Dean of the college through which the course is offered.</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawal</td>
<td></td>
</tr>
</tbody>
</table>

**Note:** The image is not clear enough to transcribe accurately. It appears to contain a table with grades and descriptions, but the details are not readable.
Administrative Withdrawal

equivalent to W; given by the Dean of the college to which the student belongs in consultation with the University Registrar or with the Vice-President/Associate Provost of Student Life in selected involuntary cases, or both, following consideration of exceptional situations where a standard withdrawal from all courses is or was not possible. Students who must withdraw from the university after the end of the last day to withdraw should consult with their academic advisors for appropriate procedures, justification, and documentation to request an administrative withdrawal. Further, Administrative withdrawals are approved only in circumstances with sufficient documentation of impacted academic performance because of medical illness, death or critical illness of an immediate family member, or military service, or when it is deemed that the University can no longer provide education services to a given student (involuntary withdrawal). Administrative withdrawal petitions based upon extraordinary circumstances are only considered for all courses in a semester (not selected courses) and are only considered for courses in the calendar year immediately preceding the date of the petition. Petitions for withdrawal from a second successive semester based on the same circumstances will not be approved.

Incomplete

A temporary grade which may be assigned when a student has permission of the instructor to complete requirements within a short time after the end of the course. (This grade is not used when a student’s work is qualitatively deficient.) The I grade must normally be resolved within four weeks of the last day of the final examination period for the semester in question. I grades may not appear on a final record. At the end of the stated period unresolved incomplete grades become Failures. Extensions may be granted only by the Dean of the appropriate college.

Audit

No grade points. No credit.

Graduate Level Grades

The following system of grades, with their grade point equivalent in parenthesis, is used in all courses offered by the University:

A 4.0 Distinguished; exceptional performance in all aspects of the course

A- 3.7 Exceptional performance, but somewhat less than that rated as A

B+ 3.3 Very good; meritorious work; exceptional performance in several aspects of the course; notably above average expected of students
<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Point</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>3.0</td>
<td>Good; sound performance in all aspects of a course; completely fulfilling and satisfying the requirements of the course</td>
</tr>
<tr>
<td>B-</td>
<td>2.7</td>
<td>Good performance in many aspects of the course</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
<td>Acceptable performance; more than adequate performance in some aspects of the course</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
<td>Passing; marginal work, acceptable, sound performance in some aspects of the course, but below the level of expected competence in other areas</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
<td>Failure; not evidencing significant grasp of subject matter or techniques; failure remains on record even if course is repeated and the original grade still affects the cumulative average. No grade points. No credit. Failure remains on record and as part of GPA even if course is repeated</td>
</tr>
<tr>
<td>P</td>
<td>Pass</td>
<td>No grade points. Credit. The grade P carries credit but is not included in the calculation of the grade point average.</td>
</tr>
<tr>
<td>NP</td>
<td>No Penalty</td>
<td>No grade points. No credit. The non-passing grade NP carries no credit and does not affect the calculation of the grade point average.</td>
</tr>
<tr>
<td>NG</td>
<td>No Grade</td>
<td>A grade that is only used by the University Registrar to indicate that no grade has been submitted by the instructor. Just as with an I or incomplete grade, this grade will automatically turn to an F grade, if it is not resolved within four weeks from the last day of the final examination period for the semester in question.</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress</td>
<td>A temporary grade assigned to all students of a given course that extends meeting requirements beyond the grading period for a traditional semester. Other grades on the scale will be assigned by the appropriate faculty member at the conclusion of the given course or within 180 days from the initial issuance of the IP grade. At that point, the University Registrar is instructed to change all outstanding IP grades to F. Extensions may only be granted by the Dean of the college through which the course is offered.</td>
</tr>
<tr>
<td>W</td>
<td>W</td>
<td>Withdrawal</td>
</tr>
</tbody>
</table>
**General Information**

**Administrative Withdrawal**

Equivalent to W, given by the Dean of the college to which the student belongs in consultation with the University Registrar or with the Vice-President/Associate Provost of Student Life in selected involuntary cases, or both, following consideration of exceptional situations where a standard withdrawal from all courses is or was not possible. Students who must withdraw from the university after the end of the last day to withdraw should consult with their academic advisors for appropriate procedures, justification, and documentation to request an administrative withdrawal. Further, Administrative withdrawals are approved only in circumstances with sufficient documentation of impacted academic performance because of medical illness, death or critical illness of an immediate family member, or military service, or when it is deemed that the University can no longer provide education services to a given student (involuntary withdrawal). Administrative withdrawal petitions based upon extraordinary circumstances are only considered for all courses in a semester (not selected courses) and are only considered for courses in the calendar year immediately preceding the date of the petition. Petitions for withdrawal from a second successive semester based on the same circumstances will not be approved.

**Incomplete**

A temporary grade which may be assigned when a student has permission of the instructor to complete requirements within a short time after the end of the course. (This grade is not used when a student’s work is qualitatively deficient.) The I grade must normally be resolved within four weeks of the last day of the final examination period for the semester in question. I grades may not appear on a final record. At the end of the stated period unresolved incomplete grades become Failures. Extensions may be granted only by the Dean of the appropriate college.

**Audit**

Audit; see Audit Students

---

**Pass/No Penalty**

Certain courses, particularly those requiring completion of a specified assignment or attainment of a specified level of skill, may be designated as Pass/No Penalty courses. The grading basis must be established and publicized no later than the beginning of the registration period and must apply to all students in the course. All such courses require the approval of the relevant department chair and the appropriate Dean.

**Pass/No Penalty Course Grade Option (Undergraduate Level)**

In order to encourage students to challenge their interests and limitations in areas outside their chosen field of study, the University has a Pass/No Penalty grade option for students. This provision allows students the ability to select certain courses in which they are registered to be taken on a Pass/No Penalty basis for grading. When a student opts for this basis in accord with established stipulations, the final grade will result in no effect on the student’s grade point average (GPA). However, credits earned will be awarded if a passing grade is attained. Also, a standard passing grade submitted by an instructor for such students will be converted to the grade of P on the student’s transcript and a failing grade will be converted to NP by the Registrar’s Office upon review of the
final grades for the course in question. The description of these grades and their meaning and usage are described in the appropriate section.

Students may opt to take a course on this basis as long as the following conditions are met:

- The course selected is a free elective, not counting in any way toward the student’s general education requirement (GER)/program (GEP), or prescribed major or minor program requirements.
- Students are only permitted to take 2 (two) such courses under this option during their career at Saint Joseph’s, and no more than 1 (one) such course in a given semester.
- The student and the course selected are on the undergraduate level and the student has attained junior or senior status at the university.

In addition to the above stipulations, students are required to submit their request to the Registrar’s Office (BL 106) by the conclusion of the add/drop period for that term. Once accepted by Registrar’s Office personnel, the student accepts responsibility for the course meeting the stated eligibility requirements. Upon submission of the request, the Pass/No Penalty option cannot be reversed. Questions regarding this option may be directed to the Registrar’s Office.

**Grade Point Average (GPA)**

The grade point average is the ratio of the total grade points (sum of products of course credits and grade points for each course) earned at Saint Joseph’s University to the total credits attempted at Saint Joseph’s University (including grades of F but excluding grades of P, NP, I, IP, NG, X, and W). Only courses taken at Saint Joseph’s after matriculation are included in this calculation, even if transfer credit has been given.

**Key to Course Codes**

The following list identifies the abbreviations used for course areas. Where the area does not coincide with the name of the department or program, the department or program name is indicated in parentheses.

### Undergraduate Course Numbers

At the undergraduate level, the following types of course offerings are available across many disciplines and the numbers across from them classify each group appropriately:

- **Freshmen Seminar (New GEP)**
  - 150 (satisfies GEP FYS requirement; special topics will be presented in most academic departments offering this course)

- **Cooperative Education**
  - 488, 489 & 490

- **Internship**
  - 490, 491

- **Special Topics**
  - 170, 270, 370 or 470 (can be repeated for credit, topic will vary when offered)

- **Independent Research**
  - 493, 494

- **Lab Courses**
  - Add an “L” to the end of the number of the course to which the lab corresponds wherever possible (e.g. CHM 101 & CHM 101L)

- **Capstone (only as required by some)**
  - 495

- **Transfer Courses without SJU equivalent**
  - 196 to 199, 296 to 299, 396 to 399, 496 to 499 (used for transfer articulation where course transferring in is not part of the SJU catalog of offerings)

Course numbers for remaining courses are left to the department’s discretion. Some additional notes about certain undergraduate course types and offerings:

**Independent Study:** Special topic independent study courses can be offered using the Special Topics numbers outlined above. An independent study for an existing course can use the existing number. There is no need for special independent study numbers.

### Graduate (Masters Coursework)

Due to the large numbers of graduate catalog entries in certain areas of the university, it has been determined that graduate course numbers will follow this convention which is a modification of that approved by academic governance:

1. **500s:** Lower-level graduate courses.
2. **600s & 700s:** Upper-level graduate courses.
3. **800s:** Courses open only to doctoral students.

Curriculum at the graduate level is typically divided along the lines of foundation, core, and major or specialization coursework. Some programs have a thesis/research course, some do not. Some programs have a capstone course, some do not. These items are defined as follows:

**Foundation:** that part of a graduate program that may be waived given a student’s prior undergraduate or graduate education. Waivers are granted at the time of admission to a given program. Transfer credit is not awarded for Foundation courses. Foundation courses cover fundamental concepts to the specific discipline. Foundation courses are not counted in the minimum credits needed to graduate.
Core: that part of a graduate program required of all students pursuing the degree. Core courses provide additional depth beyond foundation work for fundamental concepts in the specific discipline.

Major/Specialization: that part of a graduate program that allows the development of expertise in a specific area of interest.

Thesis/Research: a course designed to allow the student to pursue independent research with a faculty member in a specific area of interest within the discipline. Often, it serves as a prelude to doctoral study.

Capstone: a course that serves as the culmination of the academic program, pulling together concepts from across the entire discipline.

At the graduate level, the following numbers are proposed to classify each group and selected other course types appropriately:

<table>
<thead>
<tr>
<th>Course Type</th>
<th>Number Range</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foundation</td>
<td>500 to 549</td>
<td></td>
</tr>
<tr>
<td>Core</td>
<td>550 to 599</td>
<td></td>
</tr>
<tr>
<td>Major/Specialization</td>
<td>600 to 785</td>
<td></td>
</tr>
<tr>
<td>Special Topics</td>
<td>770</td>
<td></td>
</tr>
<tr>
<td>Internship</td>
<td>791 &amp; 792</td>
<td></td>
</tr>
<tr>
<td>Thesis/Research</td>
<td>793 &amp; 794</td>
<td></td>
</tr>
<tr>
<td>Capstone</td>
<td>795</td>
<td></td>
</tr>
<tr>
<td>Lab Courses</td>
<td>Add an &quot;L&quot; to the end of the number of the course to which the lab corresponds wherever possible (e.g. BIO 500L)</td>
<td></td>
</tr>
<tr>
<td>Transfer Courses without SJU equivalent</td>
<td>796 to 799 (graduate programs have transfer credit limitations; numbers are not used for regular SJU offerings)</td>
<td></td>
</tr>
</tbody>
</table>

Some additional notes about certain course types and offerings:

Independent Study: Special topic independent study courses can be offered using the Special Topics numbers outlined above. An independent study for an existing course can use the existing number. There is no need for special independent study numbers.

Graduation Requirement: Pennsylvania Department of Education regulations stipulate that a master’s degree must be comprised of a minimum of 30 credits. Certain SJU programs have a minimum of more than 30. Commonly accepted academic protocol indicates that Foundation courses are not part of the announced minimum number of credits required to graduate. Foundation courses, if required, add to the student’s number of credits required to graduate.

Section Naming Conventions
In order to readily identify different types of offerings, the following conventions be used when naming certain sections.

<table>
<thead>
<tr>
<th>Section Type</th>
<th>Naming Convention</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Undergrad Day Program</td>
<td>starts with &quot;D&quot;</td>
<td>&quot;D01&quot;, &quot;D02&quot;, etc.</td>
</tr>
<tr>
<td>Prof. &amp; Liberal Studies</td>
<td>starts with &quot;P&quot;</td>
<td>&quot;P01&quot;, &quot;P02&quot;, etc.</td>
</tr>
<tr>
<td>Graduate/Doctoral Programs</td>
<td>starts with &quot;G&quot;</td>
<td>&quot;G01&quot;, &quot;G02&quot;, etc.</td>
</tr>
</tbody>
</table>

Off-Campus Sections starts with "X" "XUR" - Ursinus, "XEN" - Einstein, "XSD" - Southeast Delco, N. B - Additional site abbreviations will be made by Registrar personnel as the schedule develops -- the codes will be on our website

Independent Study Sections starts with "IS" "IS1", "IS2", etc.

Honors starts with "HN" "HN1", "HN2", etc.

On-Line starts with "OL" as above

Hybrid starts with "HY" as above

Service Learning starts with "SL" as above

N.B. -- Additional abbreviations will be made as the schedule develops and will be posted comprehensively on the Registrar’s Office webpage.
Policies and Procedures

College of Arts and Sciences
Eri van K. Haub School of Business

Academic Policies and Regulations

Students are expected to be familiar with the policies and regulations summarized below and with any supplementary or modified policies and regulations which may be promulgated during the academic year. More detailed information is available from faculty advisors, department chairs, or the offices of the Deans.

Degrees and Requirements

The University offers three undergraduate degrees: the Bachelor of Arts, the Bachelor of Science and the Bachelor of Science in Business Administration. The degree awarded is determined by the student’s major field. The ordinary requirements for the degree include the completion of the number of courses specified by the major with a cumulative grade point average of 2.0, along with the satisfaction of the General Education Program and the approved requirements for the major field. The ordinary residence requirement for a degree at Saint Joseph’s University is twenty courses. Except where an approved degree program or an approved plan of acceleration provides otherwise, the last ten courses must be completed at Saint Joseph’s.

From the several hundred courses offered, students, in consultation with their faculty advisors, select those which best serve their educational need and meet the requirements for the degree. A repeated course, even when the student receives a passing grade on both occasions for the course, counts as only one course of those required for graduation. The student is responsible for planning a program of courses that satisfies all degree requirements.

Definition of a Course

For the purpose of fulfilling curricular requirements, a course is any semester unit to which a value of three credits or more is assigned. A laboratory associated with a course is not considered a separate course, even when it carries a separate course number and grade. Audit (non-credit) courses do not fulfill any requirement. The successful completion of at least 40 such courses is required for graduation.

Change of Grade

Requests by teachers for changes in grade must be submitted to the Registrar in writing within thirty days after the last examination date of the semester. Regular semesters are considered to be the fall and spring semesters. Requests by teachers for changes in grade after this time must be submitted in writing to the appropriate Dean, with reasons. Only in exceptional circumstances will such changes be permitted.

Grade Reports

Grades are available to all students at the end of each semester. The university has made grades available via the web. Quarterly grades, for freshmen are distributed through academic advisors; upperclassmen will be able to access their Quarterly grades through the web. Quarterly grades are not recorded but are issued solely to advise students of their academic progress. NG (no grade) is not a permanent grade and is assigned in those infrequent instances when a faculty member is late in returning grades or has not recorded a grade for a given student, for any reason.

Course Expectation Form (Syllabus)

In the first class meeting of a course, the teacher should distribute a written course expectation form explaining the nature of the course; the course goals, including those pertaining to assessment; the source materials, the sequence of topics or themes, assignments; the frequency and nature of tests (or other modes of evaluation); attendance policy; the university policy on academic honesty; the policy for accommodations for students with disabilities; and other policies of the discipline, unit or institution pertinent to the class.

Examinations

Students are required to take a written examination in each subject during the scheduled examination period at the end of each semester. However, with the approval of the department chair, an instructor may exempt from the final examination all students who have earned the grade of A in the course. Individual teachers who wish to substitute an alternative mode of evaluation for the final examination must submit a specific request in advance through their department chair for the approval of the appropriate Dean. The published course expectation form must include information on the alternative mode selected.

Dropping or Adding Courses

A student may add or drop a course during the add/drop period, usually the first week of class each semester, with approval of the academic advisor. Addition of an approved sixth course will require payment of an additional fee (see Student Expenses). Changes of section are permitted during the add/drop period and do not require approval of the academic advisor. Students normally log onto The Nest to perform all registration transactions, provided they have received the proper PIN from their advisor. In no case will dropping a course be permitted in contravention of penalties imposed through the University’s Academic Honesty Policy.

Withdrawal from Courses

A student dropping a course during the add/drop period will not have the course listed on his or her official record. A student who wishes to withdraw after the add/drop period must obtain approval from her/his academic advisor no later than the Last Day to Withdraw for the respective term and program as stated in the Academic Calendar. A request to withdraw past this day requires an extraordinary and unusual reason and the approval of the respective Associate Dean overseeing the student’s major. More explicitly, a regular withdrawal requires only the approval of the student’s advisor while an extraordinary withdrawal past the Last Day to Withdraw requires the approval of the Associate Dean of the student’s major. In no case will withdrawal be permitted after the last class day of the semester or in contravention of the penalties imposed through the University’s Academic Honesty Policy. http://www.sju.edu/int/resources/sdfs/about.html provides a website for students to locate forms and information on course withdrawals.

Audit

Audited courses appear on the students’ grade reports and on the official record with the grade X. Students must petition the appropriate Dean to be permitted to take a class on an audit basis. The appropriate Dean may allow a student to change from credit to audit status no later than the withdrawal deadline for the semester, but not to avoid penalties imposed through the University’s Academic Honesty Policy. The reverse change, from audit to credit status, however, is not permitted.

Pass/No Penalty Courses

Certain courses, particularly those requiring completion of a specified assignment or attainment of a specified level of skill, may be designated
as Pass/No Penalty courses. The grading basis must be established and publicized no later than the beginning of the registration period and must apply to all students in the course. All such courses require the approval of the relevant department chair and the appropriate Dean.

Pass/No Penalty Course Grade Option
In order to encourage students to challenge their interests and limitations in areas outside their chosen field of study, the University has a Pass/No Penalty grade option for students. This provision allows students the ability to select certain courses in which they are registered to be taken on a Pass/No Penalty basis for grading. In these cases, the final grade will have no effect on the student’s grade point average (GPA). However, credits earned will be awarded if a passing grade is attained. A standard passing grade submitted by an instructor for such students will be converted to the grade of P on the student’s transcript and a failing grade will be converted to NP by the Registrar’s Office upon review of the final grades for the course in question. The description of these grades and their meaning and usage are described in the appropriate section of this catalog.

Students may opt to take a course on this basis as long as the following conditions are met:

- The course selected is a free elective, not counting in any way toward the student’s general education requirements, or prescribed major or minor program requirements. Further, students are only permitted to take 2 (two) such courses under this option during their undergraduate career at Saint Joseph’s, and no more than 1 (one) such course in a given semester.
- The student and the course selected are on the undergraduate level and the student has attained junior or senior status at the university.

In addition to the above stipulations, students are required to submit their request to Hawk Central (BL 121) by the conclusion of the add/drop period for that term. Once accepted by Hawk Central personnel, the student accepts responsibility for the course meeting the stated eligibility requirements. Further upon submission of the request, the Pass/No Penalty option cannot be reversed. Questions regarding this option may be directed to Hawkcentral@sju.edu.

Attendance Policy
The course expectation form shall include a clear statement on attendance policy, specifying the maximum number of absences permitted in the course. If there is no notice to the contrary, students may assume that a policy of unlimited cuts prevails. While a teacher in a course with an unlimited cut policy may not use unannounced examinations as a means of enforcing attendance, students are responsible for the timely performance of all class assignments, including examinations. When students are required to absent themselves from class to participate in a University-sponsored activity, the director of the activity shall give written notice to the instructor in advance.

Courses outside the Colleges
Matriculated students may be permitted to take courses for degree credit in other two or four-year colleges and institutions only with written approval from their Dean. Unless an approved degree program provides otherwise, no more than six such courses (of the forty required) may be credited toward the degree. By prior arrangement with their Dean, students engaged in study abroad or in an approved exchange program may be granted degree credit for a maximum of ten courses. For students who have received academic suspension under the Academic Honesty Policy, no credits for courses taken during the time of suspension will be accepted toward graduation requirements. Students on leave of absence from the university may not receive credit for courses taken elsewhere during the leave of absence.

Satisfactory Academic Progress
The standard academic program in the day colleges at Saint Joseph’s University calls for students to progress toward their degree in eight regular (fall and spring) semesters in which five courses are taken each semester. Following such a program a student will have completed 40 courses, which should represent a minimum of 120 credits, by the end of the eighth semester. Transfer students must take a minimum of 20 courses at Saint Joseph’s University.

Satisfactory academic progress at Saint Joseph’s University requires students to earn a minimum of 24 credits in at least eight courses in each school year, beginning in September and ending in August.

It is the policy of the University to allow for a ninth and sometimes a tenth semester if significant reasons or a change in major justify such an extension. Permission for a ninth or tenth semester will ordinarily be obtained from the associate academic Dean of the appropriate college. The Deans of the Colleges reserve the right to consider special cases differing from the above statement.

Students who receive federal, state, or University aid need to maintain satisfactory academic progress in order to keep their eligibility. Evaluation of a student’s academic progress to determine financial assistance eligibility will be made at the end of the spring semester. Students not meeting criteria for satisfactory progress will be informed in early summer that their current academic record disqualifies them for financial assistance.

Students should not assume that Saint Joseph’s University would necessarily recommend and/or award financial assistance for more than eight semesters. Students intending to complete their degree program in more than eight semesters should first consult with the appropriate academic Dean and the Student Financial Services Office.

In addition to the quantitative parameter of twenty-four (24) earned credits within each academic year as a requirement for retaining financial assistance, Saint Joseph’s University also adheres to the qualitative parameter defined as follows:

Utilizing the academic probation structure as described in this Catalog, the recommendation of the Board on Student Academic Review and approval of the appropriate Dean to impose an academic dismissal on a student automatically includes the termination of financial assistance by the University. Under no circumstances will a student be eligible for financial assistance beyond the second consecutive academic probation.

Academic dismissal is mandatory if the student has not achieved the required cumulative grade point average at the end of the second academic probation. The Board on Student Academic Review may recommend the continuation of a second academic probation only for a student who has completed six semesters of study or for a student who has changed his/her major during the second probation. Academic dismissal may also occur after the first probation if sufficient improvement in studies has not been shown. In rare instances academic dismissal may be given without any previous probation if the student’s academic standing is so poor that academic probation would not be in the student’s best interest.
The qualitative parameter for financial assistance is linked to the academic dismissal procedures of the University. Since these judgments involve issues of academic qualifications and performance as well as federal and state regulations concerning financial assistance, decisions about the loss of financial assistance will be made jointly by the Student Financial Services Director and the appropriate academic Dean, acting on the recommendation of the Board on Student Academic Review.

**Class Standing**

Separate from the notion of "Satisfactory Academic Progress" is a student's class standing. Advancement through the freshman, sophomore, junior and senior levels is predicated on the number of semesters completed and hours earned toward completion of the degree program. Normally, eight semesters are required to finish a baccalaureate degree program. Hence, class standing at Saint Joseph's is based on the following scale for candidates in the day division:

<table>
<thead>
<tr>
<th>Class Standing</th>
<th>Credit Hours Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>fewer than 24</td>
</tr>
<tr>
<td>Sophomore</td>
<td>24 to 53</td>
</tr>
<tr>
<td>Junior</td>
<td>54 to 83</td>
</tr>
<tr>
<td>Senior</td>
<td>84 or more</td>
</tr>
</tbody>
</table>

Please be advised that completion of a semester means that grades for courses have been issued. Semesters and courses in progress are not semesters earned. Questions about class standing may be directed to Hawkcentral@sju.edu.

**Sixth Course**

Although the usual load is five courses, students with superior records (normally 3.3 GPA) may petition the Dean of the appropriate college for permission to carry a sixth course. No student may carry more than six courses in any semester. Additional tuition is charged for this overload.

**Professional and Liberal Studies Courses**

Day students wishing to register for Professional and Liberal Studies (PLS) courses must obtain permission from the chair of the department in which the course is offered. A dean's signature is not required. Juniors and seniors may take a maximum of two PLS courses per year. Sophomores are generally discouraged from taking PLS courses, although exceptions can be made at the discretion of the appropriate department chair. Freshmen may not take PLS courses. Day student enrollment in PLS courses is limited to 20% of the class; someday students who wish to take a specific PLS class may be unable to enroll if the 20% capacity has already been reached.

Day students in CAS who wish to take evening classes in HSB need special permission from department chairs or the Associate Dean of HSB, depending on the department. They should discuss with their academic advisor, prior to registering for the course, how the course(s) fits into their overall academic plan.

**Course Deficits and Academic Deficiencies**

Although the Deans may occasionally permit students to carry a sixth course to remedy deficits in their programs, course deficits and academic deficiencies are ordinarily made up in summer and intersession terms at Saint Joseph's. Only students who live beyond reasonable commuting distance or whose programs require courses not offered in any of the summer sessions at Saint Joseph's may, on the recommendation of their faculty advisors, be granted their Dean's permission to take courses at other institutions. Students normally seek permission to register for summer courses at other institutions during the pre-registration period of the spring semester.

**Early Graduation/Acceleration**

While the normal degree program requires eight semesters' attendance, students may seek the Dean’s approval for an accelerated program.

Extraordinary academic achievement on the pre-college level, through Advanced Placement and similar programs, may, at the discretion of the appropriate Dean, significantly reduce the normal semester requirement. Students should request the Dean's evaluation of their pre-college work before the end of the freshman year.

Other superior students may, for sound academic reason, request permission to accelerate their degree programs. Such acceleration is limited to ten courses or one academic year. After consultation with their faculty advisors and department chairs, interested students petition their Dean, ordinarily in the spring semester of the sophomore year but not later than the fall semester of the junior year, to approve a plan of acceleration. If the plan of acceleration includes summer session courses, not more than three courses may be scheduled for any one summer. The normal limitation of five degree courses in other institutions applies to accelerated programs. Transfer students with five courses or more in other institutions are not eligible for program acceleration.

**Delayed Graduation**

Students may request their Dean's permission to extend their degree program beyond the normal eight semesters. Extensions beyond ten semesters are granted only for extraordinary reason.

**Eligibility for walking in the Commencement Ceremony.**

Students with no more than 2 classes remaining at the end of the spring semester, and in academic good standing, may walk at graduation.

*Good standing for UNDERGRADUATE students is a cumulative GPA of at least a 2.0.*

*Good standing for GRADUATE students is a cumulative GPA of at least a 3.0.*

Special approval is required from the appropriate college Dean for students needing more than 2 courses, and/or not in good academic standing.

**Transfer Credit and Transfer Students**

To qualify for a degree, students transferring from another college or university or the Professional and Liberal Studies of Saint Joseph's or who took college level classes while in high school must fulfill the General Education Program and department requirements, either by transfer credit or by courses completed in the day colleges.

For freshman/transfer students:

In order for credit to be awarded, Saint Joseph's requires the course must meet the following criteria:

- Taken through a regionally accredited college or university
- Earned 3.00 credit hours or higher and the grade of "C" or better
- Taught by a member of the college faculty
- The course must have been open to enrollment by and graded in direct competition with regularly matriculated students attending that college
- The course cannot supplement high school graduation requirements
Final determination of transferable college-level credit is awarded by the deans’ offices.

**Please note:** Students must submit all materials by the end of the academic year of initial enrollment in order for the course to be applied to the SJU Degree. All incoming freshmen students must complete a Transfer Credit Request Form requiring the above criteria be verified by the college or university Registrar’s Office. All students must also submit an official college transcript and course description or syllabus for evaluation.

Incoming freshmen, students who receive a high school diploma in the same year as they enroll, may transfer a maximum of 18 earned college level credits or 6 courses achieved in the areas of Dual Enrollment/Diocesan Scholars/College Credit/Online/AP/IB.

### Residence Requirement

The ordinary residence requirement for a degree at Saint Joseph’s University is twenty courses. Except where an approved degree program or an approved plan of acceleration provides otherwise, the last ten courses must be completed at Saint Joseph’s.

### Summer Courses

Degree credit is granted for courses taken in summer sessions through the Professional and Liberal Studies and the Haub Degree Completion Programs only when the student has secured in advance written permission from her/his academic advisor. Summer school courses that are a part of the GEP or major course requirements must be taken at Saint Joseph’s University unless the course is not being offered that summer and is necessary for a student to maintain normal academic progress or the proper sequence of courses in his or her major field of study. Such courses, as well as elective courses, must be taken at an approved institution.

The approved uses of summer session courses for matriculated students are as follows:

- to make up academic deficiencies, i.e., courses failed or not completed during a regular semester;
- to make up course deficits, i.e., additional courses needed as result of change of major, or, in some instances, transfer;
- to enrich the student’s educational program; or
- To reduce the student’s course load in an ensuing semester.

Permission to register for summer courses does not constitute permission to accelerate a degree program. For all students registered in CAS and HSB, the maximum number of courses allowed for any one summer will normally be two. For exceptional reasons, the Dean may grant permission for a third course. Registration and payment for summer courses are governed by the regulations and procedures of the summer sessions.

### Academic Advising

**Academic Advising in the College of Arts and Science**

The academic advising functions in the College of Arts & Sciences are shared between faculty advisors and the staff of the CAS Advising Support Center. In this shared model, faculty advisors and the Advising Support Center have distinct roles in the advising process, but they work collaboratively to help students to be academically successful and to benefit fully from the collegiate experience.

Faculty advisors have the primary role in providing students with information about courses, the requirements of their major, graduate education, and careers. They also serve as mentors and guides in the intellectual development of students. The Advising Support Center (ASC) has the supporting role of providing students with information about the General Education Program (GEP), declaring a major, course registration, and college and university academic policies and procedures. The ASC can assist students in identifying the forms needed to change majors, to add or drop a course, to withdraw from a course, and it can also provide information about important advising and registration deadlines.

Incoming first-year students who have declared a major are assigned an advisor in their major. Incoming first-year students who are undeclared are usually assigned an advisor in their division or unit (Education, Humanities, Natural Sciences/Math/Computer Science, or Social Sciences). Once they have declared a major, these students will be assigned to a faculty advisor in that major. Transfer students are assigned a faculty advisor in their major.

All students are encouraged to develop an ongoing relationship with their advisors and to be in contact with them during the school year, either during the advisor’s posted office hours or at some other mutually convenient time. First-year students are required to meet with their advisors twice each semester—to view and discuss mid-semester grades and to receive approval of course selections for pre-registration for the following semester. Sophomores, juniors, and seniors are required to meet with their advisors once each semester for pre-registration for the following semester; they are also encouraged to meet with their faculty advisors at other times to discuss their academic progress and future plans for graduate school or careers. Any change of major requires consultation with the chair/director of the student’s current major and the chair/director of their prospective major as well as approval of the relevant associate dean.

In the second semester of junior year, students are responsible for making an appointment with their faculty advisor to review course requirements completed and course requirements not yet fulfilled for their bachelor’s degree. Such a review is necessary to ensure that the proper set of courses will be taken in the senior year and that graduation can occur at the expected time. Although faculty advisors and the ASC provide information and counsel, it is ultimately the student’s responsibility to ensure that he/she has completed all of the requirements for his/her major and/or minor.

The CAS Advising Support Center is an especially important resource for assisting students in navigating the transition to Saint Joseph’s University and in understanding the registration process. First-year students, in particular, are expected to participate in advising workshops that might be offered by the Center prior to registration for spring classes. In addition to covering important topics like academic planning for the GEP and registration procedures, such workshops can also provide an introduction to special programs, academic support services (such as the Learning Resource Center, the Writing Center, etc.), other resources (such as the Career Development Center), and other academic opportunities available at Saint Joseph’s University. Students may direct questions to Dr. Celina Gray, Director of the CAS Advising Support Center, at cgray@sju.edu.

**Academic Advising in the Haub School of Business**

In the Haub School of Business (HSB), academic advising functions are shared between faculty advisors and the staff in the William F. Leahy Advising Center (LAC). In this shared model, faculty advisors and the LAC have distinct roles in the advising process but work collaboratively to
help students successfully transition to college and benefit fully from the collegiate experience.

The LAC is a primary resource for general advising questions, especially during the first two years of college when students are mastering the course selection and registration process, navigating the transition to Saint Joseph’s University, and making decisions about their major. As a way to orient students to the Haub School of Business, all first-year students are required to participate in an advising session (i.e., HSB Advising 101) prior to registering for spring classes. These sessions cover essential topics including academic planning for the General Education Requirement (GER) and the new General Education Program and Business Foundation courses, course selection and registration procedures, and an introduction to special programs, resources, and academic opportunities available at Saint Joseph’s University.

Every student in the HSB also has a faculty advisor whose role focuses primarily on mentoring and academic/career planning. Each student who has declared a major is assigned a faculty advisor from the department in which they are majoring and will work with his/her advisor to plan a curriculum and explore potential career opportunities. Each undeclared student will be assigned to an HSB faculty advisor and will work with his/her advisor to explore possible majors and to develop educational and career goals. Students may direct questions to Timothy Higgins, Director of the William F. Leahy Advising Center, at thiggins@sju.edu.

The Office of Student Success

By supporting students as they face obstacles associated with college life, the Office of Student Success & First Year Experience assists students in making connections with campus resources and provides coaching on strategies for having a positive transition to college and an enjoyable experience at SJU.

Every SJU student is fully capable of earning a degree from Saint Joseph’s University. At times, students experience difficulties: academic, emotional, social, health-related, family emergencies, and disciplinary actions. There are many resources on campus available to support our students, and the Office of Student Success is here to help.

The Office of Student Success is located in:

G10 Bellarmine Hall
610-660-2956
success@sju.edu
or visit the website sju.edu/studentsuccess

Academic Probation, Suspension and Dismissal

A cumulative grade point average of 2.0 is the minimum required for a bachelor’s degree from Saint Joseph’s University. Students with a grade point average below 2.0 (cumulative or semester) at the end of any semester will be cautioned that their level of performance may be insufficient to satisfy the requirements for graduation.

At the end of the fall or spring semester, students who have a cumulative grade point average below the minimum level indicated in the table below will be automatically recommended for academic dismissal. The advisor is notified as well, and the student is informed of his or her options and is required to meet with his or her advisor.

Students may appeal academic dismissal in writing (after both semesters) or in person in front of BOSAR by a date to be set by the Associate Deans in consultation with the Registrar, which can then recommend they be:

• placed on academic probation
• suspended from Saint Joseph’s University, or
• dismissed from Saint Joseph’s University

At the end of the second semester and following, students who have a cumulative grade point average below the minimum level indicated in the table below will be reviewed by BOSAR, which could lead to a recommendation for academic probation, suspension, or dismissal. The advisor is notified as well, and the student is required to meet with their advisor.

If students are on probation for any four semesters they will be summoned by the Board of Student Academic Review.

<table>
<thead>
<tr>
<th>Semester completed</th>
<th>Minimum GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>At the end of the 1st semester</td>
<td>1.8</td>
</tr>
<tr>
<td>At the end of the 2nd semester</td>
<td>1.8</td>
</tr>
<tr>
<td>At the end of the 3rd semester</td>
<td>1.8</td>
</tr>
<tr>

</tr>
<tr>
<td>At the end of the 7th semester</td>
<td>2.0</td>
</tr>
</tbody>
</table>

Transfer students are required to maintain the minimum GPA for the semester level to which they are assigned. Courses at other institutions for which they received academic credit at SJU upon transferring and which contribute to their SJU cumulative grade point average are included in these calculations.

Academic Probation

Students who fail to maintain the required grade point average or an acceptable level of progress toward the degree are placed on probation by their Dean, acting on the recommendation of the Board on Student Academic Review. A student on probation is required to report to the Dean, who may prescribe appropriate remedial measures, and is not permitted to register for more than five courses a semester. (If circumstances warrant, the Dean may require a student on probation to limit his/her course load to four with no reduction in tuition.)

Ordinarily, the period of probation will extend one semester, during which time the student must show sufficient improvement to raise his/her GPA above the minimum level. In extraordinary cases, one additional semester of probation may be allowed by the Board on Student Academic Review if the improvement during the first probationary semester indicates that the student will probably reach the necessary level by the end of the second probationary semester. A student may be permitted as many as three semesters of probation, provided that no more than two are consecutive.

A student on academic probation is ineligible to participate in major extracurricular activities, including intercollegiate athletics, or to serve as officer or director of any student activity.

Academic Suspension

A student who is showing slow improvement in his/her level of performance or rate of progress during this period of probation may be subject to academic suspension by the appropriate Dean on the recommendation of BOSAR. While a student is normally granted at least one academic probation before suspension, the Board on Student Academic Review may recommend academic suspension without any probation when the student’s cumulative grade point average is so low.
that BOSAR determines an academic probation would not be in the student’s best interest. A student who has been placed on suspension by the appropriate Dean may return to Saint Joseph’s University only after being away for one semester but not more than four semesters.

**Academic Dismissal**

A student who fails to make sufficient improvement in his/her level of performance or rate of progress during the period of probation (or after coming back from suspension) may be subject to academic dismissal by the appropriate Dean.

While a student is normally granted at least one academic probation (or suspension) before dismissal, the Board on Student Academic Review may recommend academic dismissal without any probation or suspension where the student’s cumulative grade point average is so low that BOSAR determines an academic probation and/or suspension would not be in the student’s best interest. A student who has been academically, dismissed may not be a student at Saint Joseph’s University in the future without formally re-applying to the University.

**Academic Forgiveness**

In extraordinary circumstances, BOSAR has the authority to recommend to the appropriate Dean that the student receive academic forgiveness, expunging all the student’s grades from the most recent semester from their academic transcript. This policy cannot be used to expunge some or all of the grades from any previous semester (other than the most recent one) or to expunge only some but not all of the grades from the most recent semester.

**Composition of Board of Student Academic Review**

The Board of Student Academic Review (BOSAR) shall consist of:

- two (2) Associate Deans, one from each college (College of Arts and Sciences and Haub School of Business). One of the Associate Deans should serve as Chair and the other Associate Dean as co-Chair
- four (4) faculty members representing each of the four divisions of the University,
- one (1) student member.

**Honors at Graduation**

Honors at graduation will be awarded for grade point averages in all subjects as follows:

<table>
<thead>
<tr>
<th>Honor</th>
<th>Grade Point Average</th>
</tr>
</thead>
<tbody>
<tr>
<td>summa cum laude</td>
<td>3.85</td>
</tr>
<tr>
<td>magna cum laude</td>
<td>3.70</td>
</tr>
<tr>
<td>cum laude</td>
<td>3.50</td>
</tr>
</tbody>
</table>

Averages for honors will be computed on the basis of work completed at Saint Joseph’s in CAS and HSB only. To be eligible for honors at graduation, students must complete twenty courses in CAS and HSB.

**Dean’s List**

Students who achieve a grade point average of 3.5 for a semester in which they complete at least 15 credits, all at Saint Joseph’s University, and have no grade below B will be included on the Dean’s List.

**Phi Beta Kappa Society**

Phi Beta Kappa was established in 1776 as a philosophical society. Eventually, it evolved into the paramount honor society for the liberal arts in America. Its major goal is to support, foster, and recognize the excellence of liberal arts scholarship in the institutions of higher education in America. There are presently 262 chapters in the United States; the Saint Joseph’s University chapter was established in 2001. The chapter is sheltered by the University and consists of the faculty and staff members who are members of the Society. These members carry on the business of the chapter and elect the student members each year.

Student members are elected in the second semester of the junior or senior year primarily on the basis of broad cultural interests, scholarly achievement, and commitment to the intrinsic value of learning. Eligible students must present a program including not less than 90 credit hours of liberal studies among the 120 or more credit hours required for the bachelor’s degree. In addition, they must have completed at least three full semesters of work (45 credit hours) in residence at Saint Joseph’s University and be fully registered, as a full time student, for the fourth semester. They must have obtained the minimum grade point average (at Saint Joseph’s University) specified by the chapter. While this may vary slightly from year to year, usually it is 3.75 for juniors and 3.5 for seniors.

Liberal studies shall be considered to be those designed principally for knowledge or understanding or appreciation of the natural and social world in which we live. Grades earned in applied or professional work may not be counted in computing the liberal arts hours or the grade point average for eligibility. Applied and professional work shall be understood to include all training intended to develop skills or vocational techniques; this work often leads to licensure or certification. Such courses generally are taken by students who are preparing for a specific type of job. Examples of courses not recognized by the national office of Phi Beta Kappa under the heading of "liberal studies" would be those in business administration, accounting, education, journalism, library science, military science, applied physical education, speech, applied art, applied music, social work, applied communication, and computer science.

Weight will be given to the breadth of the program of each candidate as shown by the number and variety of courses taken outside of the major. Weight will also be given to the balance and proportion of the liberal arts in the student’s degree program as a whole. Students who have violated the academic honesty policy of the University will not be eligible for membership.

Students who complete their college studies at the end of the summer session or at the end of December, shall be considered for membership during the following spring.

Election to membership in Phi Beta Kappa is wholly within the discretion of the local chapter, subject only to the limitations imposed by the Constitution and By-Laws of the Chapter. No right to election shall adhere to any student solely by reason of fulfillment of the minimum grade point average for election to “membership in course,” and no reason need be given for non-election.

**Beta Gamma Sigma**

In the spring of 1907, a group of commerce students at the University of Wisconsin received permission from the faculty to organize a commerce honor society, which they called Beta Gamma Sigma. The purpose of the Society was to encourage and reward scholarship and accomplishment in the field of business studies among commerce students at the University. At about the same time, students at the University of Illinois and the University of California felt the need for such an organization on their campuses and respectively organized Delta Kappa Chi (1910) and The Economics Club (1906). In 1913, having become aware of their coexistence and common purpose, representatives of the three societies
met at Madison, Wisconsin, to consummate a merger which made Beta Gamma Sigma into a national organization.

Action was initiated in 1919 to establish Beta Gamma Sigma as the only scholastic honor society recognized by the American Assembly of Collegiate Schools of Business (AACSB). This organization, which was renamed AACSB International - The Association to Advance Collegiate Schools of Business, includes in its membership collegiate schools of business that meet high standards of eligibility required of accredited member institutions with respect to curricula, teaching staff, teaching loads, library and laboratory facilities. Beta Gamma Sigma amended its constitution in 1921 to restrict the installation of new chapters to collegiate schools of business which are accredited members of AACSB International.

The Mission of the International Honor Society Beta Gamma Sigma is to encourage and honor academic achievement in the study of business, to foster personal and professional excellence, to advance the values of the Society, and to serve its lifelong members.

Honor Societies
Distinguished achievement is also recognized by admission to Alpha Sigma Nu, national Jesuit honor society, and the following more specialized national honor societies:

• Upsilon Pi Epsilon (Computer Science),
• Omicron Delta Epsilon (Economics),
• Alpha Upsilon Alpha (Education),
• Kappa Delta Pi (Education),
• Delta Phi Alpha (German),
• Phi Alpha Theta (History),
• Pi Mu Epsilon (Mathematics),
• Phi Sigma Iota (Modern Languages/Classics),
• Sigma Xi (Student Research),
• Phi Sigma Tau (Philosophy),
• Sigma Pi Sigma (Physics),
• Pi Sigma Alpha (Political Science),
• Alpha Epsilon Delta (Premedical),
• Psi Chi (Psychology),
• Alpha Kappa Delta (Sociology),
• Sigma Delta Pi (Spanish), and
• Theta Alpha Kappa (Theology).

Independent Study/Directed Readings, Research Tutorials
Students who have completed four regular semesters with an overall grade point average of 3.0 (or cumulative average of 3.4 or higher for courses in the major field) may, with the prior approval of the chair of their department, register each semester for one upper division course in the major field (or a closely related field) to be taken in the Independent Study/Directed Readings or Research/Tutorial format. Such courses are offered to enrich the student's major program and not as a special arrangement to facilitate a student's fulfillment of course or credit requirements. Additional conditions are described in Guidelines for Directed Readings, Independent Study, and Similar Courses issued by the appropriate Dean’s Office.

Second Major
Qualified students may request permission to pursue a second major for sound academic reason. Such a request requires the approval of the chair of the secondary major department and of the appropriate Dean. Certification of completion of requirements for the second major will be the responsibility of the chair of the secondary major department. The final transcript will record the completion of the second major. The degree granted will be the degree appropriate in the primary major. Two separate degrees will not be granted to students who complete a second major.

Second Degree
Students who have earned one bachelor’s degree may request permission to study for a different bachelor’s degree. Applications for a second degree require the approval of the major department and the appropriate Dean. Candidates for a second degree must meet all ordinary degree requirements, but courses applied toward a first degree may be applied toward a second degree, as if the candidate were a transfer student, but at least ten additional courses must be taken for a second degree. Holders of bachelor's degrees are advised that a second degree is rarely, if ever, required for certification or pre-professional qualification. Specific course requirements for certification or pre-professional qualifications can usually be met by enrolling in the required courses as an adjunct student. Many institutions offer graduate credit for courses which may be applied toward certification requirements.

Special Program
A set of requirements leading to a specific objective secondary to the degree, either vocational or liberal, with the required courses simultaneously satisfying degree requirements, constitutes a Special Program. A minimum of eight courses and two disciplines are necessary for a Special Program. Completion of a Special Program is noted on the student's permanent record.

Minors
Students may have a minor listed on their permanent records in areas where the department has approved one or an interdisciplinary program. For a minor, at least 18 credits in the specified area must be obtained. Students choosing a minor must seek the approval of the chair in the department of the minor no later than the last day of the add/drop period of their seventh semester. Students should also be aware that their choice of a minor may be restricted based on their major or primary area of study. The Minor form can be accessed at http://www.sju.edu/int/resources/hawkcen.

Advisory Options
Advisory Options constitute a list of suggested courses which provide an integrated focus, concentrating electives, GEP courses, or major courses in such a way as to attain some specific education objective. Courses required for the option simultaneously satisfy degree requirements. Such courses are usually, but not always, offered in a specific department.

Withdrawal from the University
Before an undergraduate day student withdraws from Saint Joseph's University, they should consult with their academic advisor. To complete the withdrawal process, students will submit the withdrawal form and have an exit interview with a staff member from the Office of Student Success. To begin the withdrawal process, contact success@sju.edu or call 610-660-2956.
**Leave of Absence**

A Leave of Absence is for students who are taking time off from their formal education, with the intent to return to SJU. Students may not take classes at another institution and transfer those credits back to SJU while they are on a LOA. When approved by the appropriate Advising Center, a LOA is granted for one semester and may be renewed once for a consecutive semester or a total of 2 LOAs during a student’s time at SJU.

Students on a LOA are reported to lenders and loan service agencies as “not enrolled” and the student needs to contact lenders for information on possible repayment requirements.

To access the form:
http://www.sju.edu/int/academics/centers/casadvising/forms/leavewithdraw.html

**Transcripts**

Students may obtain transcripts of their grades provided their financial obligations to Saint Joseph’s have been fulfilled. Official transcripts bear the signature of the Registrar and the seal of the University; they are sent, on request of the student, directly to other institutions or organizations. A fee is charged for transcripts. To order an official copy of your transcript:

https://www.studentclearinghouse.org/secure_area/Transcript/to_bridge.asp

**Commencement and Diplomas**

Students who will complete requirements for a degree in a given semester must apply for graduation at the time specified by the Registrar. Commencement exercises are held annually in the spring. Diplomas are issued three times a year, on September 15, January 15, and on the date of the Commencement exercises. Students receiving diplomas in September or January are invited to participate formally in the Commencement exercises of the following May. Diplomas will be mailed to the student’s home address approximately six weeks following the graduation dates above. The form is located under student records and payments: http://www.sju.edu/int/resources/hawkcentral.
The General Education Program

The General Education component of the curriculum at SJU enables students to examine the principal issues and achievements of the major fields of human learning, provides an opportunity to master skills required for more advanced study, and gives them students freedom to pursue further studies in areas in which they find an interest, to experiment with previously unexplored areas, or to enter a chosen field of study.

The Major Concentration component offers the opportunity for that deepened knowledge of a special area which is an essential characteristic of a full education and also provides a basis for an effective career or for study in graduate or professional school.

The curriculum is designed such that all graduating undergraduate students can meet the following goals:

1. Communication: Students will communicate effectively through written and oral modes of expression across academic, professional, and social contexts using appropriate technology.

2. Critical Thinking and Inquiry: Students will think critically and construct reasoned arguments to support their positions using skills appropriate to the context, such as deductive reasoning, scientific inquiry, quantitative reasoning, aesthetic judgment, or critical examination of form, style, content and meaning.

3. Ethics, Social Justice, and Ignatian Values: Students will assess and respond to ethical and social justice issues informed by Ignatian values and other theoretical frameworks.

4. Diversity: Students will engage respectfully, in a local and global context, with diverse human beliefs, abilities, experiences, identities, or cultures.

5. Discipline or Program Specific Competencies: Students will acquire the essential knowledge and skills to succeed and make well-reasoned judgments personally, professionally, and in their chosen area(s) of study.

6. Jesuit Intellectual Tradition: Students will examine forces that have shaped the world they have inherited through instruction in the Ignatian educational tradition which includes the study of the humanities, philosophy, theology, history, mathematics, and the natural and social sciences.

Listed below are the specific requirements for the GEP curricula.

For the Adult Undergraduate GEP please see here (p. 51).

General Education Program (GEP)

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive.

Overlay requirements are part of the forty-course requirement.

GEP Signature Courses

One Faith and Reason Course

This requirement can be satisfied by any course certified as a "Faith and Reason" course, provided that the course is not at the same time being used to satisfy a GEP Variable or Integrative Learning requirement. Faith and Reason courses provide students with appropriate intellectual and epistemological frameworks for exploring both the tension and cohesion of faith and reason in the contemporary world. Moral Foundation (PHL 154) and Faith, Justice, and the Catholic Tradition (THE 154) are prerequisites.

One First-Year Seminar Course (This course must be taken in the first year, either fall or spring semester).

The First-Year Seminar is designed to introduce students to the adventures of learning in a college context. The challenge and excitement of intellectual exploration of a topic of shared interest is its prime purpose. Its only prerequisites are a genuine interest in the topic and a willingness to contribute to the success of the course through diligent individual effort and enthusiasm. First-Year Seminars, which are limited in enrollment size, focus in depth on a question or topic of disciplinary or interdisciplinary interest. By means of its specific focus, the seminar will explore the thinking, research, and writing practices in a particular field(s). Discussion based on careful reading of texts, writing assignments, both reflection and research types, and in-class student presentations will be supplemented, as appropriate, with activities including guest lecturers, museum trip, attendance at local cultural events and or field excursions.

The first year seminar is specially designed for and open to freshmen, thus all freshmen should take a first year seminar during one of their first or second semesters at SJU. However students who fail to successfully complete a First Year during one of their first two semesters at SJU will be required to take an additional Philosophy or Theology/Religion Studies course as a replacement for the FYS. This replacement course cannot count for any other major or GEP requirement.

Note: For non-transfer students, these six signature courses must be completed at SJU. Transfer students may use transfer credits to meet Signature Core requirements if course equivalency is approved by the CAS Dean's Office. Transfer students are exempt from the First-Year Seminar requirement.

Variable Courses

Please note students may earn AP credit and/or use transfer credits to meet these requirements. Students must take approved courses in the following areas:

- One Art, Music/Theatre/Film, or Literature Course
• One Mathematics-Beauty Course
• One 4-credit Lab-Based (or two 3-credit lecture only) Natural Science Courses
• Non-native Language Requirement (1-2 courses at the appropriate level, depending on language placement)
• One Social/Behavioral Science Course
• One Philosophical Anthropology Course (Pre-requisite PHL 154)
• One Religious Difference Course
• Writing Requirement (ENG 101 or AP credit)

**Integrative Learning**

This component includes three courses determined by a student’s primary major department or program. These courses must be College of Arts and Sciences courses outside of the major department. The Integrative Learning component aims to foster integration of the major with general education. The Integrative Learning component requirement is in addition to GEP Signature and Variable requirements.

**Electives**

Except for students majoring in Education, all students will have no fewer than six free elective courses.

**GEP Overlay Courses**

Students take one Ethics-intensive course, one Writing-Intensive course, and one course from any of the following three areas of Diversity, Globalization or Non-Western Studies. Courses may be certified in multiple overlay areas.

**Diversity**

Diversity courses analyze the construction and maintenance of social categories such as race, class, religion, sexual orientation, gender, age, ability as well as the material, political, economic, social and ethical consequences of these identities. Each diversity course employs theoretical frameworks that provide sustained analytical inquiry. Each course emphasizes the ways in which social categories overlap and interact to produce multiple identities and attend to the complex consequences of these intersections. Diversity courses are not purely empirical, though they contain empirical components; rather, they are critical-seeking to account for and understand the significance of such social categories and, where appropriate, to investigate methods of challenging social institutions that promote injustice.

**Globalization**

Courses in this area will address the theoretical foundations (economic, political, historical, cultural, environmental and ethical) of the international framework that is increasingly linking countries, cultures and peoples around the world. These courses will examine the ways in which global processes and interactions among nation states, societies, international organizations and individuals shape human experience, both in the past and present. These courses will focus on the forms of interaction and interdependency among the world’s peoples and the social structures that bring us closer to one another.

**Non-Western Areas Studies**

In identifying courses in this category, the "West" is used primarily in its cultural sense. This broad usage extends beyond the narrow geographical boundaries of "western Europe". These courses therefore focus primarily on cultures different from those emphasized in courses on "Western Civilization". Non-Western Area course do have a geographical component because they concentrate on the language, culture, history, society, economics and politics of one or more region outside of North America and Europe. These courses emphasize understanding a region and its cultures on their own terms and from the perspectives of their own peoples rather than in the context of the West or as part of global comparative systems. This may also include appropriate language courses above the intermediate level. The Diversity, Globalization, or Non-Western Studies overlay requirement may be satisfied by any approved course outside of the Signature Common Core and Faith and Reason. If so certified, any GEP Variable course, any Integrative Learning course, any First Year Seminar, any Concentration or Major course, or any Free Elective can satisfy this requirement, with the following exception: A course taken for Religious Difference GEP Variable credit may not at the same time count for Diversity, Globalization, or Non-Western Studies overlay credit.

**One Ethics Intensive Course**

Ethics-intensive courses evaluate ethical issues in a particular discipline or field. Such critical evaluation requires applying to the disciplinary material some of the theoretical frameworks and conceptual tools that students have acquired in their signature/core courses. Ethics-intensive courses will thus push beyond professional ethics (where "the good" is determined only by the rules of the discipline or field) and will rigorously investigate the subject matter of a course in light of more fundamental moral values and ethical principles (e.g., justice, human dignity, vocation, beneficence, utility, double effect, proportionality). Through this study, students will come to a deeper understanding of a moral life and will be enabled to better act with self-agency in their lives beyond. This requirement can be satisfied by any approved course outside of the Signature Core. If so certified, any GEP Variable course, any Integrative Learning course, any Concentration or Major course, or any Free Elective can satisfy this requirement. (pre-requisite PHL 154)

**One Writing Intensive Course**

Writing is a means of communication and a skill that develops with structured practice. It is grounded in the foundations of proper punctuation, grammar and thesis statement and development. This course will push beyond professional ethics (where "the good" is determined only by the rules of the discipline or field) and will rigorously investigate the subject matter of a course in light of more fundamental moral values and ethical principles (e.g., justice, human dignity, vocation, beneficence, utility, double effect, proportionality). Through this study, students will come to a deeper understanding of a moral life and will be enabled to better act with self-agency in their lives beyond. This requirement can be satisfied by any approved course outside of the Signature Core. If so certified, any GEP Variable course, any Integrative Learning course, any Faith and Reason course, any Concentration or Major course, or any Free Elective can satisfy this requirement. (pre-requisite: ENG 101).
SPECIAL PROGRAMS

Center for International Programs

The Center for International Programs (CIP) is strongly committed to internationalization and globalization – on the Saint Joseph’s University campus and elsewhere. The office provides information and services to incoming international students and students who wish to study abroad on a short-term or long-term academic program. The CIP also assists with the implementation of new international education initiatives and the support of the University’s International Travel Policy.

The CIP is located at 183 Bala Place (across from Lannon Hall) and the office hours are Monday through Friday, 9am to 5pm. Please visit the website for more information: http://internationalprograms.sju.edu/.

SJU Faculty-Led Study Tours

Each year, in conjunction with SJU faculty, the Center for International Programs offers a series of campus-based classes that have a travel component as one of their requirements. While class takes place on campus during the fall or spring semester, the actual travel portion occurs during the January intercession, spring break, or in the summer months. Each year, course offerings and destinations vary. (Recent study tour destinations included: Germany, Spain, Italy, Morocco, Cuba, Nicaragua, Belize and Panama. Students earn three credits for participating in these courses. Please note that the running of these programs is contingent on meeting sufficient enrollment requirements. Additional information about SJU study tours can be found on the CIP website: http://internationalprograms.sju.edu/.

SJU Summer Study Abroad

A SJU Summer Program is a month-long academic course offered by SJU faculty during the summer. The course is held in one of four locations:

• China,
• Greece,
• Rome or
• Chile (description of each to follow).

Academic learning takes place on-site, with required pre-departure meetings and assignments to help prepare students for the immersion experience. Summer Programs are designed to give students a longer immersion experience to other countries and cultures than Study Tours. Any student who is not on academic or disciplinary probation and is in good financial standing with SJU may apply for a SJU summer study abroad program, provided that s/he has received academic advisor approval and has met course pre-requisites. There is no GPA requirement; however, students must be in good academic standing. CIP also recommends that students meet with their academic advisor to make sure that they have met course pre-requisites (if applicable) and to talk about GEP or academic program requirements. Please note that the running of these programs is contingent on meeting sufficient enrollment requirements. For application information, please visit the CIP website: http://internationalprograms.sju.edu/.

SJU Summer Program in Greece: The SJU Summer Program in Greece takes place on the Greek island of Syros. Excursions are also typically offered in Athens, Santorini, and Crete. Students may enroll in one or two courses offered by SJU faculty and earn 3-6 credits. Students live in a neoclassical villa on Syros, in a hotel in Athens, and in a monastery in Santorini. Courses offered change from year to year. Previous courses have included Theology, Politics, History, and Psychology. (Summer only, four weeks, typically late May to late June.)

SJU Summer Program in Rome: The SJU Summer Program in Rome program takes place in the heart of Rome with several cultural visits planned in addition to two weekend excursions that typically include Florence/Pompeii and Sorrento/Capri. Students may enroll in one or two of the courses offered and there may be up to four courses offered each summer in a variety of disciplines. In the past, courses have included Italian, Classics, Psychology, Business, and Economics. Students, faculty, and coordinators reside at fully furnished apartments through The American University of Rome (AUR) and classroom space is provided on campus along with access to the AUR computer lab and library. (Summer only, four weeks, typically in the month of July.)

SJU Summer Program in China: The SJU Summer Program in China is tentatively scheduled to take place at the Beijing Center. Site visits to Luoyang, Xi’an and Hangzhou as well as a weekend trip to Shanghai are planned as part of the itinerary. Students may enroll in one or two classes. Previous courses have included History, Business, Theology, and Decision Sciences. (Summer only, four weeks, typically late May to late June)

Non-SJU Summer or Winter Study Abroad

Saint Joseph’s University students who wish to earn academic credit through participation in an external (i.e., not facilitated by SJU) winter (J-term) study abroad program must apply through the CIP’s online application system by the appropriate deadlines (March 15th for summer study abroad and October 15th for winter study abroad). As part of the application process, students will be required to obtain course approvals and seek the support of their Academic Associate Dean. Before beginning an application, however, we strongly advise students to carefully research program options. Students can browse through the brochures available in the CIP office, meet with the Study Abroad Advisor, or they can research programs independently. It’s important to also note the following policies related to non-SJU winter study abroad:

• Students of all levels (freshmen through seniors) are eligible to apply for approval to participate on a non-SJU winter/summer program.
• Students must have a minimum cumulative GPA of 2.5 in order to be eligible for this type of study abroad. However, students may find that many programs have a higher GPA requirement that they will also need to meet.
• The student is responsible for submitting appropriate application materials and payments directly to the program that he/she decides to apply into, and SJU financial aid will not transfer.
• Credits earned through the non-SJU summer/winter abroad program will be considered transfer credits and the grades earned will not be posted on the SJU transcript.
• Credit will only be granted if the student has earned a grade of C or above.

Semester or Year Abroad

Saint Joseph’s University has carefully selected 29 semester abroad program options in countries all around the world, including some programs with a Jesuit connection, programs with an experiential learning component such as an internship or service-learning, and options where SJU students can take classes alongside local students. Students should review all program options on the CIP website and schedule an advising meeting with a CIP staff member before beginning
an application. Students are also encouraged to consider a full year of study abroad.

**Petitioning for a Non-approved Program:** Saint Joseph's University students who wish to attend a university or study abroad program that is not currently affiliated with or approved by SJU and therefore not recognized for academic credit must petition the Center for International Programs through the on-line application system. Please note that this is only an option for students who have specific academic needs that cannot be met on any of the current Saint Joseph's approved programs; petitions for programs that are largely duplicate to, or are in enrollment competition with, existing Saint Joseph's programs, reciprocal university exchanges, or recognized affiliated programs in the same city or country are not normally approved.

As part of the application process, students will be asked to request a recommendation from their Academic Advisor. Therefore, before preparing a petition, the student should consult with their Advisor to discuss their specific interest in study abroad and how the experience will fit into their academic program. This is also a good time to discuss possible course selection and planning. It is also suggested that the student discuss a "backup plan" with their Academic Advisor (and the Study Abroad Advisor) in the event the petition is not approved. A committee reviews completed petitions and makes a recommendation to the CIP to either approve or reject the petition on a first come, first serve basis. Petitions are judged on the merit of the student's academic objectives in relation to specific study abroad opportunities for which they are seeking approval, and petition students are expected to have superior grades and sound academic preparation.

If the student's petition is approved, Saint Joseph's University will administer their study abroad program in the same way as an approved program.

**Eligibility:** SJU students are eligible for a semester abroad during the second semester of their sophomore year, all or part of their junior year or their senior year (with permission of the Associate Dean). Students must be in good academic and financial standing with Saint Joseph's University at the time of application and maintain that good standing throughout the process. There is a minimum cumulative GPA of 2.5, though many of our affiliated programs have a higher GPA requirement, some up to 3.0.

Although CIP can advise students on making an appropriate program selection and assist them through the application process, our approval does not guarantee admission into a particular study abroad program or foreign institution. Students are responsible for understanding and meeting the regulations, requirements and deadlines specific to the program of their choice.

**Applying:** Students must apply through the on-line application system and receive approval from the Center for International Programs (CIP) in order to study abroad. Application deadlines are typically March 1st for the fall semester and October 1st for the spring semester; however, the CIP may adjust these deadlines (in advance and with notice) if necessary. In the event of a larger than anticipated applicant pool, the Center for International Programs may not be able to approve all study abroad applications. Complete applications from eligible students will be approved on a first come, first serve basis. For this reason, early applications are strongly advised. Students who apply by the deadline but are not approved due to space will be placed on a waitlist. In the case of withdraws, priority will then be given to Saint Joseph's University students, students with no prior study abroad experience and students with exceptional, academic circumstances that may prevent them from studying abroad in a future semester. Some examples include (but are not limited to) class standing and major.

All other students not approved for the semester of their choice will be given priority for the following semester. Deferred applications will be approved pending an academic and disciplinary check during the following semester.

**Senior Approval:** Students who wish to study abroad during the fall or spring semester of their senior year must discuss their plans with their Academic Advisor, notify the Registrar's office, and obtain the approval of the Associate Dean for their College.

**Length of Stay:** Students can apply for an academic semester (fall or spring) or a full year abroad. Only in special circumstances (and with prior approval from the CIP, the Vice President/Associate Provost and the student's Academic Associate Dean) will a student be permitted to spend a third semester abroad. Students interested in studying abroad for more than one year should make an appointment with the Study Abroad Advisor prior to any planning and before beginning an application.

**Fees and Financial Aid:** Saint Joseph's University students who wish to study abroad for a semester and receive credit toward their Saint Joseph's degree will remain registered at SJU and pay SJU full-time, day tuition plus a $100 Continuing Registration Fee. Students will also be asked to submit a $300 confirmation deposit, which will be credited towards the student's total SJU tuition/Continuing Registration Fee expenses. Saint Joseph's University will then pay the overseas program for the tuition portion of the program. Students will be responsible for all non-tuition fees associated with the program they will be attending. Please visit the Center for International Programs website to review estimated costs for each of our approved, semester abroad programs.

All forms of financial aid can be applied to Saint Joseph's approved semester abroad programs. This includes Saint Joseph's grants, loans, scholarships, and state and federal awards, such as Pell Grants and Guaranteed Student Loans. A financial aid package for a student participating on a Saint Joseph's approved program will be based on the specific costs of the program in which the student will be studying. The following expenses will be included when calculating a student’s financial need: tuition and fees, room and board, books, airfare for round-trip ticket and miscellaneous expenses such as local transportation, police registration fees, immunizations and any health insurance required by the host country. Students may not use any of their financial aid towards a petition program that is not approved by the committee.

**Family Tuition Benefits, FACHEX and Tuition Exchange:** Students who are receiving SJU family tuition benefits will be able to use these tuition scholarships toward their study abroad experiences. Family Tuition Benefit is available only for courses taken as part of a bachelor's or master's degree program. Travel and expenses (other than tuition) for overseas programs, study abroad or other credit work at locations away from the main campus are not covered by the Family Tuition Benefits program.

Students who are the children of employees at other colleges/universities who are receiving scholarships through FACHEX and the Tuition Exchange Program may use these awards toward any approved study abroad program through Saint Joseph's University. For more information about FACHEX and the Tuition Exchange Program, please contact the Financial Assistance Office at 610-660-2000.
Credit Toward Graduation: Credit will be given towards graduation for all appropriate courses taken on SJu programs or approved programs abroad. Students must, however, get all courses approved following the instructions provided by the CIP. All courses (including credit-bearing internships) must be taken on A-F basis; pass/fail is not an option. Grades are reported on the Saint Joseph’s University transcript and count toward the student’s overall GPA.

Program Requirements: Students are required to maintain full time enrollment, attend class regularly and comply with all program regulations and individual course requirements in any program they choose. Students who leave the program before it is officially over will not receive credit for their work.

University Refund Policy: Students who choose to withdraw from the study abroad program must immediately notify the Center for International Programs through the on-line application portal. Only that portion of the student’s tuition and fees, which have not been committed on their behalf to the University and/or any third party at the time of cancellation, will be refunded to the student. If the student withdraws from the program before paying tuition and fees, the University will bill the student for commitments made on their behalf to the University and/or any third party. The student will be financially responsible for any such costs incurred, per the terms of the Semester Abroad Academic and Disciplinary Waiver in the on-line application.

Fellowships

The Fellowships Office offers guidance and advice to fellowship and scholarship applicants already enrolled in the College of Arts and Sciences, the Erivan K. Haub School of Business, Professional and Liberal Studies and the Haub Degree Completion Program. In the majority of cases, these fellowships and scholarships are given by off-campus granting institutions or foundations, such as the Fulbright Program, the Barry M. Goldwater Excellence in Education Foundation, the Harry S. Truman Scholarship Foundation, or the Rhodes Scholarship Fund. The Fellowships Office works closely with fellowship/scholarship applicants in every step of the application process, from discerning which fellowships/scholarships best suit their needs to discussing and implementing the steps that need to be taken along the way. For more information, contact:

Mark Reynolds
Director of Fellowships

mreynolds@sju.edu. (mreynolds@sju.edu)

Health Professions

Admission to Schools of the Health Professions

Students preparing to enter a doctoral level program in the health professions such as medicine or dentistry typically major in one of the natural sciences. It is also possible to major in humanities and social science areas and still fulfill the minimum requirements for all health professional schools, however students need to show proficiency in the natural sciences to be a strong candidate for admission. The minimum course requirements for most medical, dental, optometry, veterinary, and podiatry schools include one year each of biology, general chemistry, organic chemistry, and general physics, all with labs. Additionally, a semester of coursework in biochemistry, statistics, and calculus is strongly recommended or required by most health professional programs. Although schools establish these minimum science requirements for admission, it is strongly recommended that students take additional advanced level science courses to enhance their background and to show that they can manage advanced science work. Courses that explore the sociological, psychological, philosophical, and ethical aspects of healthcare delivery—the human dimension—are also strongly encouraged.

The twelve-member Health Professions Advisory Committee reviews the credentials of students applying to health professional schools and provides the composite letter of evaluation from the University.

Saint Joseph’s also offers linkage programs with Thomas Jefferson University for various allied health programs including Nursing, Physical Therapy, Occupational Therapy, Medical Laboratory Sciences, and Radiologic Sciences. Each of these programs have specific admissions criteria so interested students should contact the Health Professions Advisor for more details. The Health Professions Advisor counsels students on course selection, preparation for the MCAT and other standardized admission exams, and procedures to follow when applying to health professional schools. For more information, contact:

Service-Learning Program

Integral to the mission of Saint Joseph’s University, Service-Learning challenges students to combine traditional academic coursework with community service experiences. The student engaged in Service-Learning works in two classrooms, one here at the University and the other in the city of Philadelphia. Classroom lectures, texts, assignments and critical reflection on social justice issues are enhanced by the service commitment of three hours per week with community partner schools and agencies that relate to course material.

Service-Learning courses are offered in both the College of Arts and Sciences and the Haub School of Business. A unique Freshman Service-Learning Program engages first year students through a two course sequence embedded in General Education courses for an entire academic year. Upper-class students can enroll in semester-long course offerings in their major, minor or general education requirements. A team of staff and student leaders assist the faculty in the recruitment, placement and orientation of students enrolled in Service-Learning courses. To learn more about the Service Learning Program and a current list of open courses, please visit www.sju.edu/servicelearning or contact the Faith-Justice Institute.

Faith-Justice Studies Program

Program Description

The Faith-Justice Studies program is an interdisciplinary, self-designed curriculum that enables students to integrate their major area of study with inquiries into social justice and faith issues. With the assistance of the Faith-Justice Studies minor program, the student determines a sequence of six courses that address faith and social justice issues. For more information please visit http://www.sju.edu/faithjusticestudies.

Faith-Justice courses must fit one or more of the following criteria:

- Engage students directly with the “sufferings of the poor” and explore the call, not only to serve them, but also to stand in solidarity with them.

Special Programs
• Invite students to analyze institutions social structures and to question prevailing systems of thought or action which systemically contribute to modern-day social problems (poverty, racism, human rights violations, violence).
• Challenge students to consider existing social values and priorities in light of Gospel values and faith-based traditions of social justice.

Faith-Justice Studies Minor
For the Faith-Justice Minor requirements please see here (p. 266).

The Washington Center Internship Program
Through The Washington Center for Internships and Academic Programs (TWC), Saint Joseph’s University offers a unique experiential learning program for students interested in semester-long and summer internships in Washington D.C. TWC is a nonprofit, nonpartisan educational organization that provides integrated academic and work experience aimed at preparing students for careers in private, public, and related professions.

As participants in the program, students spend a semester or a summer in our nation’s capital where they gain valuable career experience working as an intern, taking a class specific to their major and professional field of interest, and engaging in a Leadership and Service Forum, all while retaining full-time SJU status. The program is open to all majors and disciplines, runs year-round, provides guaranteed housing in a state-of-the-art facility, and includes training in leadership and professional skill-building.

TWC offers a variety of internships through hundreds of private, public, and non-profit organizations, and students are able to choose from seven different professional tracks that cater to their interest and career aspirations:

• Advocacy, Service & Arts
• Business & Global Trade
• International Affairs
• Law & Criminal Justice
• Media & Communications
• Politics & Public Policy
• Science, Technology & Society

Recent SJU student internship placements include:

• The State Department,
• TeachAmerica,
• Pan American Health Organization Foundation,
• Center for Security Policy,
• Department of the Interior,
• Federal Trade Commission,
• Peace Corp,
• Metropolitan Police Department,
• Amnesty International,
• and many private law firms, think tanks, lobbying firms, and congressional offices.

To learn more about The Washington Center Internship Program at SJU, contact Dr. Becki Scola, the campus liaison/coordinator, at bscola@sju.edu, or visit http://www.sju.edu/centers/washington-center.

Office of International Students and Scholars
ISS is responsible for meeting the needs of international students from the time they apply until they graduate. ISS serves as the primary advising office for non-academic issues for international students. Areas of assistance for international students include:

• Initial issuance of the I-20 form to apply for a student (F-1) visa
• Issuing the DS-2019 form to apply for an exchange visitor (J-1) visa
• Organizing orientation for international students and other cross-cultural activities
• Signing immigration documents for travel in and out of the United States
• Assisting with change of status applications to F-1 status
• Processing the immigration paperwork for off campus work permission requests
• Helping with social security and driver’s license applications
• Assisting international students in acclimating to SJU and Philadelphia

The Office of International Students and Scholars is located in the Campion Student Center, room 217, and is open Monday through Friday, 9am to 5pm. Please visit the website for more information: sju.edu/iss.
COLLEGE OF ARTS AND SCIENCES

Arts and Sciences Leadership

Dean: Shaily Menon, Ph.D.

Associate Dean, Education Division: John Vacca, Ph.D.

Associate Dean, Humanities Division: Shawn M. Krahmer, Ph.D.

Associate Dean, Mathematics Natural Science & Computer Science Division: Jean M. Smolen, Ph.D.

Associate Dean, Social Sciences Division: Matthew J. Anderson, Ph.D.

Executive Director, Graduate Arts and Sciences: Mary Ellen Hickes, M.A.

CAS Advising Support Center
Director: Celina Gray, Ph.D.
Assistant Director: Quanda Garrison, M.B.A.

Professional and Liberal Studies Advisor Center
Director: Maria Beazley, M.A.
Assistant Director: Marita Hurst, M.Ed.

Mission

As the intellectual heart of Jesuit education at Saint Joseph's University, the College of Arts and Sciences invites students into a community of life-long learners who lead by example, living purposefully for the greater glory of God in service to and with others. To this end, we expand minds, advance knowledge, nurture humane values, and inspire imaginations.

Degrees and Certificates

The College of Arts and Sciences offers the following degrees and certificates:

Degree-Granting Programs:
Associate's Degree (A.D.)
Bachelor of Liberal Studies (B.L.S)
Bachelor of Arts (B.A.)
Bachelor of Science (B.S.)
Master of Arts (M.A.)
Master of Science (M.S.)
Doctor of Education (Ed.D.)

Non-degree Programs:
Certificate of Proficiency (C.P.)
Post-Baccalaureate Certificate (P.B.)
Post-Masters Certificate (P.M.)

Undergraduate Day Programs

Majors:
The following majors are offered in the Undergraduate College of Arts and Sciences:

- Actuarial Science (p. 54)
- Art (p. 64)
- Asian Studies (p. 75)
- Autism Behavioral Studies (p. 78)
- Biology (p. 85)
- Chemical Biology (p. 100)
- Chemistry (p. 102)
- Communication Studies (p. 129)
- Computer Science (p. 134)
- Criminal Justice (p. 145)
- Early Childhood/Elementary Education (PreK-4) (https://academiccatalog.sju.edu/arts-sciences/education-unit/elementary-education-pk-4)
- Economics (p. 156)
- Elementary/Middle Education (4-8) (https://academiccatalog.sju.edu/arts-sciences/education-unit/middle-years-education-4-8)
- English (p. 239)
- Environmental Science (p. 260)
- Francophone Studies (p. 347)
- French (p. 348)
- German (p. 349)
- History (p. 288)
- Information Technology (p. 141)
- Interdisciplinary Health Services (p. 284)
- International Relations (p. 301)
- Italian (p. 350)
- Italian Studies (p. 309)
- Linguistics (p. 309)
- Mathematics (p. 316)
- Music (p. 361)
- Philosophy (https://academiccatalog.sju.edu/arts-sciences/%20https://nextacademiccatalog.sju.edu/arts-sciences/philosophy)
- Physics (p. 389)
- Political Science (p. 396)
- Psychology (p. 408)
- Religious Studies (p. 447)
- Secondary Education (7-12)* (https://academiccatalog.sju.edu/arts-sciences/education-unit/secondary-education-7-12)
- Sociology (p. 424)
- Spanish (p. 352)
- Special Education (PreK-8)* (p. 233)
- Theatre and Film (p. 362)
- Theology (p. 434)

Minors

Students may obtain a minor in most majors and in the following interdisciplinary programs:

- Africana Studies (on hiatus)
- American Studies
- Animal Studies
- Art History
- Behavioral Neuroscience
- Chinese Language and Culture
- Creative Writing
- Educational Studies
• Environmental and Sustainability Studies
• Faith Justice Studies
• Film Studies
• Gender Studies
• Interdisciplinary Health Care Ethics
• Journalism
• Justice, Ethics, and the Law
• Latin American Studies
• Medieval, Renaissance, and Reformation Studies
• Music Industry
• TESOL (Teachers of English to Speakers of Other Languages)
• Theatre Studies
• Theology and Religious Studies

Adult Undergraduate Programs
Bachelor of Liberal Studies Degree
Majors in:

• Criminal Justice Studies (p. 151)
• Early Childhood/Elementary Education Pre-kindergarten-4th grade (p. 204)
• English and Professional Writing (p. 253)
• General Studies — concentrations in:
  • Autism Studies (online) (p. 270)
  • Humanities (p. 272)
  • Professional Studies (traditional (p. 269) and online (p. 269))
  • Social Sciences (p. 270)
• Health Administration (p. 280)
• Organizational Development and Leadership (https://academiccatalog.sju.edu/arts-sciences/organizational-development-leadership-bls)
• Psychological Studies (p. 417)

Associate Degree
• Major in Liberal Arts (p. 53) (Please note: As of Spring 2017, applications are no longer being accepted for this program).

Certificate Programs
• Certificate of Proficiency offered in Autism Studies (p. 80)
• Post-Baccalaureate Certificate in Autism Studies (p. 81)
• Post-Baccalaureate Certificate in Pre-Health Science. (p. 287)

Graduate Program Offerings
Doctor of Education (Ed.D.)

Interdisciplinary Doctor of Education Leadership (Ed.D.)

Major: Educational Leadership
Concentrations:
Basic Education K-12
Basic Education K-12 & Superintendent’s Letter of Eligibility
Higher Education

Master of Arts and Master of Science Degrees

Biology M.A (p. 96). & Biology M.S (p. 97).

Major: Biology

Computer Science M.S.

Major: Computer Science (p. 142)
Concentrations:
General
Web and Database Technologies
Cybersecurity

Criminal Justice M.S.

Major: Criminal Justice (p. 151)
Concentrations:
Behavior Analysis
Behavior Management
Federal Law Enforcement
General
Homeland Security
Intelligence and Crime Analysis

Education M.S.

Majors:
Early Childhood/Elementary (https://academiccatalog.sju.edu/arts-sciences/education-unit/msed-education-early-childhood-education-pk-4)
Education PreK-4

Major: Educational Leadership (p. 226)
Concentrations:
Curriculum Supervisor
General
Principal Certification
Supervisor of Special Education

Major: Elementary Education/Middle School 4-8 (https://academiccatalog.sju.edu/arts-sciences/education-unit/msed-elementary-middle-years-education-4-8-certification)
Concentrations:
Language Arts
Mathematics
Mathematics & Language Arts
Mathematics & Science
Mathematics & Social Studies
Science
Science & Language Arts

Major: Instructional Technology Specialist (p. 229)

Major: Professional Education (Non-Certification) (p. 162)

Major: Reading Specialist PK-12 (p. 229)
Concentrations:
English as a Second Language Endorsement

Major: Secondary Education 7-12 (https://academiccatalog.sju.edu/arts-sciences/education-unit/msed-secondary-education-7-12-certification)
Concentrations:
Biology
Chemistry
Citizenship Education
English
General Science
Mathematics
Physics

**Major:** Special Education PreK-8 (p. 235) or 7-12 (https://academiccatalog.sju.edu/arts-sciences/education-unit/special-education-7-12-certification)

**Concentrations:**
- Autism Spectrum Disorder Endorsement
- General
- Wilson Reading Program

**Major:** Teacher of the Deaf and Hard of Hearing PK-12 (p. 206)

**Major:** Special Education (without certification) (p. 231)

**Concentration:** Behavior Analysis

**Health Administration M.S.**

**Major:** Health Administration (p. 281)

**Concentrations:**
- General
- Informatics
- Organization Development & Leadership

**Health Education M.S.**

**Major:** Health Education (p. 282)

**Concentration:** Behavior Analysis

**Organization Development and Leadership M.S.**

**Major:** Organization Development and Leadership (p. 365)

**Concentrations:**
- Adult Learning & Training
- Organization Psychology & Development
- Organizational Dynamics & Leadership

**Psychology M.S.**

**Major:** Psychology (p. 417)

**Mathematics Education M.S.** (without certification)

**Major:** Mathematics Education (p. 322)

**Writing Studies M.A.**

**Major:** Writing Studies (p. 256)

**Non-Degree Programs**

Behavior Analysis (Major: Criminal Justice) Post Masters Certificate

**Graduate Education/Administrative Certification Preparation Programs**

- Autism Spectrum Disorder Endorsement
- Instructional Technology Specialist
- Principal Certification
- Secondary Education 7-12
- Special Education Pre K-8 or 7-12
- Supervisor of Special Education
- Superintendent’s Letter of Eligibility
- Teacher of the Deaf and Hard of Hearing PreK-12
- Wilson Reading Program

1 Requires choice of concentration.

*See concentration listings under master’s program listings. Concentrations are a coordinated grouping of graduate courses, representing a sub-specialization or emphasis within a major field available for students majoring in that discipline.*
GRADUATE COLLEGE OF ARTS AND SCIENCES

Graduate College of Arts and Science
Dean: Shaily Menon, Ph.D.

Associate Dean, Education Division: John Vacca, Ph.D.
Associate Dean, Humanities Division: Shawn M. Krahmer, Ph.D.
Associate Dean, Mathematics Natural Science & Computer Science Division: Jean M. Smolen, Ph.D.
Associate Dean, Social Sciences Division: Matthew J. Anderson, Ph.D.
Executive Director, Graduate Arts and Sciences: Mary Ellen Hickes, M.A.

Mission
Graduate programs within the College of Arts and Sciences are at the heart of the mission of Saint Joseph's University, and reflect the expansive nature of our educational philosophy. We offer a doctoral program, 15 master’s degrees and non-degree programs to help students achieve academic growth and personal advancement.

Admission, Registration and Enrollment Policies
The College of Arts and Sciences encourages applications from a diverse population and values diversity in our graduate programs. Admission to a graduate program is made by the Graduate Program Directors and Academic Department Committees. The basis of admission includes a variety of information submitted as part of the student’s application file. Admissions committees consider factors such as students’ academic qualifications, research and work experiences, professional goals and skills, match with program objectives and professional qualifications, and the number of openings available in the program.

Admission to all graduate programs within the College of Arts and Sciences is competitive. Applicants should note that meeting the minimum requirements does not guarantee admission to a graduate program. Applicants are evaluated with respect to university and departmental requirements and with respect to the pool of available applicants.

Contact Information:
Graduate Studies
College of Arts and Sciences
Saint Joseph’s University
5600 City Avenue
Philadelphia, PA 19131
Telephone: 610-660-3131
Fax: 610-660-3230
Email: gradstudies@sju.edu

Graduate Program Admission Requirements
The minimum requirements are:

For Master’s Degree Candidacy:
A bachelor’s degree (based on a four-year curriculum) conferred from a regionally accredited college or university. Grade point average, testing requirements (if required by program), and academic criteria pertain as specified by the program for which you are applying.

For Doctoral Candidacy:
Admission to the doctoral program requires that students must have obtained the equivalent of a bachelor and master’s degree from a regionally accredited institution or its international equivalent, before the start of the term for which the student is admitted.

For Post Master’s Certificate Candidacy:
The Post-master’s certificate offers continuing education for graduates who have earned a bachelor’s and master’s degrees and follow the same grade point average and application requirements as a master’s degree.

For Graduate Teacher or Education Administrative Certification or Endorsement Candidacy:
This is a non-degree program following the same admission requirements as the master’s degree.

Application Instructions
Domestic candidates (U.S. Citizens, Permanent Residents, Refugees & Asylees) and international non-citizen candidates must complete and submit the online graduate application, http://www.sju.edu/gradapply along with all required credentials, supporting documents, and the required application fee paid within the online application form. Ed.D. candidates are required to pay a $100 application fee.

Applicants for master’s or certificate program admission must possess a bachelor’s degree from a regionally-accredited institution and must provide evidence of their ability and preparedness necessary for the satisfactory completion of graduate work. Domestic students who have received degrees from outside the United States should review our International Admissions section below for information on required documentation. All documents submitted in support of an application will become the property of the University and are not returnable.

Specific requirements differ among the programs, and students are advised to consult the appropriate program requirements listed in each program section.

Application Deadlines
The majority of graduate programs offered by the College of Arts and Sciences offer admission on a rolling basis. Under rolling admission, candidates are invited to submit and complete their applications to the university any time before the start of the term.

The academic departments and the Graduate Program Director will then review the application and notify the applicant of their decision within two weeks from the time the application is rendered complete. However, due to time constraints and availability of appropriate courses, we suggest that students complete their applications by the priority consideration dates listed below.

Domestic Students
• Domestic applicants are recommended to submit their application 30 days before the department/program deadline.
International Students
• International applicants residing outside the US will require an F-1 Visa. They are recommended to apply for the F-1 visa 90 days days in advance of the first day of classes.

Programs with Special Admission and Enrollment Deadlines
Programs with Fall Semester Admission Only
M.S. Psychology
All applicants to the M.S. Psychology program must complete their application by March 1st with rolling admissions after that pending space availability. The M.S. Psychology program admits and enrolls new students in the fall semester only.

Interdisciplinary Doctor of Education Program for Educational Leaders (IDEPEL), Ed.D.
Applicants for the IDEPEL Ed.D. program must complete their application by June 15 with admission after that pending cohort space availability. The Ed.D. in Educational Leadership admits and enrolls students on a cohort schedule which begins each fall semester.

Programs with No Summer Term Admission
The following programs do not offer new student admission in the summer term
• M.A. Biology (fall and spring admission only)
• M.S. Biology (fall and spring admission only)
• M.S. Computer Science (fall and spring admission only)

Please visit the individual program sections in the academic catalog for further information on restrictions and required admissions documents.

Application Process & General Requirements
• A completed graduate application with all supporting documents as required by the program you are seeking admission.

All programs require the following documents. Please see program of study for any additional specific requirements.
• Completion and submission of an online application form: http://www.sju.edu/gradapplynow
• Required uploads of curriculum vitae/professional resume, personal statement, and names and emails of providers of letters of recommendation.
• Official transcripts from all previous institutions where college level coursework was taken (undergraduate and graduate).

Mailing address for application documents:
Saint Joseph’s University
Enrollment Operations
5600 City Avenue
Philadelphia, PA 19131

Admission Decisions
The final admission decision is made by the graduate program admission committee or program director. The Graduate Studies Office helps to process your application materials and when your application is complete it sends them to the program for review by the faculty. Admission decision letters are sent from the graduate program.

Admission Notification and Enrollment Confirmation
Applicants who are offered admission can expect to receive notification of their decision by email. The email includes an SJU student ID, instructions on confirming enrollment and information about first-time registration. Unless indicated otherwise in the offer email, applicants have up until the start of the term in which to accept, decline, or defer the offer of admission by confirming enrollment through the following website: www.sju.edu/confirm. Unless a deferral is granted (see below), each graduate program offers admission with the expectation that students will enroll in courses in the semester for which they are admitted.

Deferral of an Offer of Admission
Admitted students may decide to defer admission into a program for up to one year from the semester for which they were admitted. Admitted students cannot defer admission once they have registered for a course in a graduate program. Financial aid, scholarship, and graduate assistantships are not automatically deferred. Please inquire with the Graduate Studies Office before requesting a deferral.

Students with deferred admission status who wish to extend their deferral beyond the initial one-year period must submit a written request to Graduate Studies Office by emailing gradstudies@sju.edu.

The decision to grant a deferral beyond the one-year time period is at the discretion of the Graduate Program Director and the Academic Department. Students with deferred admission status who have requested an extension of their deferral will be notified via email as to whether their request has been approved or denied.

Students with deferred admission status cannot register for courses. Students with deferred admission status who wish to change their deferred status—for example, to enroll in a course before their official period of deferment expires or to withdraw their application from a program completely—should contact both their graduate program director and the Office of Graduate Studies.

Graduate Program Admission Decisions
AF—Accept Full
Student’s application is complete and the student is fully admitted. Any registration holds have been removed allowing registration through program completion.

AV—Accept Provisional Status
Provisional admission status is a temporary status awarded for one semester to applicants whose previous academic record shows academic potential but contains certain deficiencies or who lack certain prerequisites. A student accepted for this status must demonstrate the ability to do graduate work at a high level of achievement at Sju before being considered for full graduate standing.

Provisionally admitted students are required to complete two courses of graduate work with a minimum earned GPA of 3.0 or better or in the case of a full-time student, the first semester of work with three courses with earned grades of B or better. This is a temporary classification in which a student may remain for one semester following admission and no longer. If the conditions of the provisional admission are not met within this time, it may result in termination from the academic program.

AC—Accept Conditional Status
This classification is used in the following two scenarios:
Admission for Undergraduates in a Final Semester
Applications from undergraduate students who have yet to complete course work for their bachelor's degree will only be processed if the student is in his/her final semester of undergraduate study. Admission to graduate programs for these students will be on a conditional basis, and the student will be required to furnish a final transcript for their undergraduate work documenting degree conferral by the first day of the semester. The final transcript will be reviewed by the graduate program department in which the student has conditionally been admitted, and if acceptable, the student's admission status will be changed to full admission standing.

Incomplete Application
Student’s application is not complete, but he/she is allowed to register for up to 6 credits in the first semester. Typically, at least an application form and unofficial transcript have been received. A registration hold is activated after the initial semester if the file is not complete and admission status is not updated to full admission (via the Registrar’s office).

RE—Rejected/Not Accepted - Applicant has been denied. Please note that the graduate program is not required to provide applicants explanations concerning admission decisions.

Graduate Non-Degree Credit Admission (Isolated Credit and Visiting Students)
Graduate non-degree applicants may enroll in graduate-level coursework for professional development, certification, and personal enrichment. Under this classification, students are admitted to the University, but not to a specific degree-granting, graduate program. Non-degree or isolated credit applicants must complete the online graduate application process.

Non-degree students are not eligible to take graduate courses in all programs. Non-degree students should seek the permission of the Graduate Program Director in the department offering the course(s) before applying. A maximum of 6 credit hours of coursework taken as a non-degree student may apply toward the credit requirement of the degree program.

Requests for degree credit for courses completed as a non-degree student are considered for admission to a graduate degree program. All non-degree course work accepted for degree credit must be approved by the program director of the student’s department.

Credit earned while enrolled in a graduate certificate program may be transferred into a degree program with the approval of the unit offering the degree program.

Special Admission Policies
Re-admission for Previously Enrolled Students.
A graduate student who has not completed a program of study and has not met the College’s continuous enrollment policy retains active student status for three semesters from the date of last enrollment. Graduate students who are enrolled in a degree-seeking program and no longer have active student status must submit a new application form.

Please contact the Graduate Studies Office for more information, gradstudies@sju.edu

Applying to More Than One Program
If an applicant chooses to apply to more than one graduate program, the applicant must submit a separate application for each program. Applicants pursuing this are required to contact the Graduate Studies Office to have application materials applied to more than one application. Applicants may be required to submit additional materials based on each program’s admission requirements.

Transfer of Credit: Graduate Level
Request for the evaluation of graduate transfer credit must be made at the time of application or admission. Only students admitted into a master’s program of study may be evaluated for transfer of credits. With the approval of the Graduate Program Director, students may transfer up to six hours of graduate-level work into graduate programs that are 30 credits or more in length.

Course credit may be transferred only from graduate programs at regionally accredited institutions and only courses with a grade of B or better may be transferred. Courses with grades of B- or lower will not be evaluated for transfer. Course credit may not be transferred into graduate certificate programs or the doctorate of education (Ed.D.) program.

Applicants must submit an official transcript, course description, and syllabus. Courses taken more than five years prior may not be accepted for transfer credit unless approved by the academic department. Continuing education credits will not be considered for transfer credit.

Admission to New Program of Study Following Graduation/Degree Program Award or Completion
Directly following the award of a degree or completion of the program, a student’s record will be inactivated to prevent further registration under the completed program record.

Students in both cases will be required to resubmit a new online application form with a new personal statement to be eligible to register for courses. Transcripts, letters of recommendation and testing (e.g. GRE, TOEFL, IELTS) scores less than five years old that are on file at the University may be transferred to the new application. Students applying for readmission should contact the Graduate Studies Office for additional instructions: gradstudies@sju.edu or 610-660-3131

Readmission After Withdrawal or Dismissal
When seeking readmission, students who have voluntarily withdrawn from the University are required to reapply. Students who have been dismissed from a Graduate Arts and Sciences program due to failure to meet academic progress or because of an academic integrity violation may not reapply to their previous program or any other graduate program offered by the College of Arts and Sciences.
Admission of SJU Undergraduates to Fifth Year Master’s Programs

Admission must be approved by the department in which the master’s degree is sought. A student must be enrolled as an active Saint Joseph’s University undergraduate student at the time of application to be considered. Please reference the academic program description for more information on fifth-year application and requirements.

Return of Application Documents

All documents submitted in support of a graduate application will become the property of the University and are not returnable.

International Student Admission Policy

Application Instructions

International students (seeking or holding non-immigrant visas) intending degree-seeking study must complete the online graduate application, along with all required credentials, supporting documents, and the required $35 USD application fee directly to the Enrollment Operations Office.

Saint Joseph’s University
Enrollment Operations
5600 City Avenue
Philadelphia, PA 19131

To be admitted to a master’s degree or program, students must submit a formal application. At minimum, this will include:

- The Online Application Form
- Personal Statement
- CV or Résumé
- Two signed letters of recommendation
- Official transcripts from all post-secondary institutions attended translated into English or a comprehensive course-by-course evaluation from an authorized international credential agency
- $35 USD application fee
- Evidence of English Language Proficiency
- Any additional required documents as specified by the applicant’s graduate program.

International applicants will receive an admissions decision only after all of the required documents have been received.

All documents submitted in support of an application will become the property of the University and are not returnable.

Suggested application deadlines for international students residing outside the United States who will require the processing of an I-20 form and to secure an F-1 or J-1 visa are as follows:

International Applicant Priority Deadlines for Submitting an Application who reside outside the U.S. and require an F-1 visa:

- Fall (August): July 15
- Spring (January): November 15

International applicants currently residing in the United States and if admitted are seeking to transfer visa status should consult with the Office of International Students and Scholars. For more information on eligibility, email: internationalstudents@sju.edu

Application Term Restrictions: Summer Admission

Graduate programs within the College of Arts and Sciences do not offer admission to international applicants for the summer term because graduate programs do not support full-time enrollment status during the summer terms.

Application Program Restrictions: Graduate Education Programs

Due to state regulations for teacher certification, international students (non-citizens) are not eligible to apply to the following graduate programs:

M.S. or Certification

- Art Education K-12
- Autism Spectrum Disorder Endorsement
- Foreign Language K-12
- Elementary Education PK-4
- Elementary/Middle Education 5-8
- ESL Endorsement
- Secondary Education 7-12
- Reading Specialist
- Special Education
- Wilson Reading Program
- Curriculum Supervisor
- Principal Certification
- Superintendent’s Letter of Eligibility

Credential/Document Evaluations

International applicants are not required to submit international credentials evaluation. An evaluation may be performed by the University. However, applicants who already possess or wish to obtain a course-by-course evaluation of their transcripts from an authorized international credential evaluation service are directed to submit this in place of original transcripts.

Applicants may elect to use an authorized credential evaluation agency for an evaluation of their academic credentials, an assessment of the overall grade point average, and a course-by-course evaluation. The official course-by-course evaluation should be sent to the Enrollment Operations instead of academic transcripts. Evaluations should be sent by the agency to:

Saint Joseph’s University
Enrollment Operations
5600 City Avenue
Philadelphia, PA 19131

Because fees and documents required for evaluation may vary by agency, applicants are encouraged to contact the agencies directly for additional information.

The following is a sample list of recognized credential evaluation agencies:

World Education Services, Inc.
Bowling Green Station
PO Box 5087
New York, NY 10274-5087
Telephone: 212-966-6311
Fax: 212-739-6100
but not limited to:

the following requirements will satisfy English language proficiency

Demonstration of English Language Proficiency by Non-native-speaking Applicants

Students are required to provide evidence of English proficiency if their spoken native language is not English. Fulfillment of any one of the following requirements will satisfy English language proficiency requirements.

- Submission of one of the following: TOEFL paper-based score of 550, a computer-based score of 213, or an internet-based score of 80. An IELTS score of 6.5 is also acceptable.
- Possession of a bachelor’s or master’s degree equivalent from a recognized institution located in a country where English is the native language.
- An earned bachelor or master’s degree from a college or university in the U.S.
- Citizenship from a country in which English is recognized as a national language.
- Successful completion of Level 112 of the Intensive program at an approved ELS Center accompanied by a letter of recommendation from the Academic Director. To find a list of approved ELS centers visit www.els.edu (http://www.els.edu).

Graduate Program Directors and admission committees reserve the right to require additional evidence of English language proficiency included but not limited to:

- An in-person or telephone interview (for example, via Skype) with a faculty or admission committee member
- A writing sample certified to be the applicant’s own work

Student Visa Status

International students applying for F or J visa status must also submit:

- Proof of their ability to meet their financial obligations while pursuing graduate studies at the University in the form of a letter from a bank stating that sufficient funds are available to finance all educational and living expenses for the first year of study.
- A letter of financial support signed by the sponsoring person or agency.
- Official test scores – English Language proficiency for all non-native speakers of English.
- GRE test scores are required for MA/MS-Biology and MS-Psychology programs only.

The I-20 immigration form, necessary for securing an F-1 visa, or the DS-2019 form, necessary for securing a J-1 visa, is issued by the Office of International Students and Scholars only to a student who has been accepted to the University and provides current documentation of financial support, as required by US immigration authorities. International graduate students in F and J status must maintain full-time enrollment (9 credits) during both the fall and spring semesters.

The University observes all regulations of the student’s home country regarding foreign exchange.

All F-1 and J-1 international students must register for the student health insurance plan or show evidence of alternate, equivalent coverage. In most cases the plan provides coverage for one year beginning in late August. Students can obtain an insurance application form which must be completed and returned to the Office of International Students and Scholars. International students in any other immigration status can pick up an application from the Office of International Students and Scholars and return it with payment directly to the insurance company.

Individuals on a B non-immigrant visa (both B-1 business and B-2 pleasure visitors) are prohibited by immigration regulations from enrolling in a course of study while holding B status. They must first be granted a change to the appropriate student status by US Citizenship and Immigration Services (USCIS). Otherwise, the non-immigrant would be considered to be in violation of B status.

The F-2 spouse of an F-1 student may not engage in full-time study. An F-2 child may only engage in full-time study if the study is in an elementary or secondary school. The F-2 spouse and child may engage in study that is a vocational or recreational in nature. To pursue any other type of studies, the F-2 must first be granted a change to the appropriate student status by US Citizenship and Immigration Services (USCIS). Otherwise, he/she would be considered to be in violation of F-2 status.

The Center for International Programs does not consider part-time or full-time coursework leading to a degree to be a vocational or recreational in nature.
Academic Policies and Procedures

Classification of Students

Matriculated Students
Students who have met all admission entrance requirements and are accepted with full standing into a degree program are classified as matriculated students.

Non-degree/Isolated Credit Students
Students who have not been formally accepted into a graduate program may be allowed by the appropriate graduate director to take courses as isolated credit students. Normally, no more than two graduate courses taken under this classification may be applied to a degree program. Students seeking to apply for isolated credit status are subject to the same admission standards as degree-seeking applicants.

Visiting Students
Students in good standing in a graduate program at another accredited educational institution may take graduate courses on a visiting student basis if they provide a letter from the head of the graduate program of their degree-granting school stating that they are in good standing and that the institution will accept the course for credit. Visiting students must complete a graduate school application and pay the appropriate application fee.

Enrollment Status: Full-Time vs. Part-Time
The University defines full-time graduate student status as enrollment for nine (9) or more credits; part or half-time graduate student status is defined as eight (8) or fewer credits in a semester. The minimum number of credits a graduate student must be enrolled in to be eligible to apply for loans under the federal financial aid system is six (6) credits per semester or term.

Immigration law requires that international students be enrolled at the full-time status in the fall and spring semesters.

Grading System
Please refer to the General Information and Graduate Level Grades. Note: The SJU Graduate Grading Scale was changed effective in the Fall 2016 semester.

Academic Advising
The Graduate Program Director of each academic program is responsible for the academic administration of the unit graduate program(s) and academic advising and mentoring of students. A listing of Graduate Program Directors is available on the SJU web by visiting http://www.sju.edu/int/academics/cas/grad/advising.html

DegreeWorks Advisement Tool
DegreeWorks is an accessible and user-friendly advisement tool. It provides students and graduate program directors/advisors with an organized outlook degree plan evaluation. It is aimed to help the student progress through his or her degree plan efficiently. DegreeWorks compares the student’s academic history with the degree requirements outlined in the University catalog. You can use it to track your academic progress toward a degree, review the requirements you have completed and plan the courses you can take to complete your remaining requirements.

DegreeWorks provides students with access to their unofficial degree audit which lists information regarding their current program(s) of study including institutional requirements, general education requirements, major requirements and concentrations.

When using DegreeWorks, students will be able to:

• See degree requirements for their major(s), minor(s) and concentrations (where applicable)
• See how completed courses and courses in progress apply to degree requirements
• Identify courses needed to complete their degree
• View their grades and academic standing
• Create What-If audits to view requirements if intending to change current curriculum
• Estimate how many semesters it will take to graduate
• View how transfer credits are used to satisfy degree requirements

Important Note: DegreeWorks is designed to aid and facilitate academic advising, but is not intended to replace individual academic advising sessions. DegreeWorks is neither an official academic transcript nor an official notification of completion of degree requirements.

Students should view DegreeWorks throughout the academic year.

• Before you meet with your graduate program director or academic advisor to discuss registration for an upcoming semester.
• After you register to ensure that the courses you selected applied to your degree requirements.
• After your grades for each semester are posted.
• Any time you make a change to your schedule.

DegreeWorks is accessible by logging into the student self-service portal, the SJU Nest, nest.sju.edu.

All questions regarding DegreeWorks for a specific program should be directed to the student’s Graduate Program Director.

Academic Standing

Good Academic Standing
Good Academic Standing is defined as:

• Students enrolled in master’s or non-degree programs who maintain a 3.00 or above cumulative GPA, as calculated at the end of the Fall, Spring, and Summer terms.
• Students enrolled in the doctoral program who maintain a 3.50 or above cumulative GPA, as calculated at the end of the fall, spring, and summer terms.

Academic Levels of Progress
The College of Arts and Sciences maintains a variety of degree-granting programs at the graduate level. As a result, some graduate programs define the parameters for retention, probation, and dismissal differently, as indicated below.

This policy described below defines the minimum academic levels of progress used to determine academic standing for graduate students in the College of Arts and Sciences and explains standards and processes to address situations of academic probation, dismissal, and appeal.
Master’s Degree & Certificate Level Programs

Academic Standing
Graduate students are expected to maintain a 3.00 or higher term and cumulative grade-point average (GPA), as calculated at the end of the fall, spring, and summer terms.

Graduation
Graduate students must achieve an overall grade point average (GPA) of at least 3.00 in graduate courses taken at Saint Joseph’s University to graduate.

Provisional Admission & Academic Standing and Retention
If a student has been provisionally admitted to a program and fails to meet the requirements necessary for regular admission into a program, he/she may be denied regular admission to the program without a probationary period. Please refer to the Provisional Admission policy for more information.

Satisfactory Academic Progress (SAP)
In addition to the academic levels of progress outlined in the Policy, graduate financial aid recipients are also required to meet the standards outlined in the Satisfactory Academic Progress (SAP) policy.

Satisfactory academic progress for financial aid recipients enrolled in degree programs is assessed annually at the conclusion of the spring semester. For eligible programs of one academic year or less, SAP is evaluated at the conclusion of the fall and spring semesters. Failure to maintain satisfactory academic progress will result in cancellation of financial aid awards and the subsequent repayment of the funds already received. Please visit www.sju.edu/hawkcentral for more information.

Academic Probation
Graduate College of Arts and Sciences master’s degree and certificate program students are placed on academic probation when their cumulative GPA falls below 3.00.

At the end of each semester or term, the University Registrar will notify the students who are either placed on academic probation or are academically dismissed via email. Probation notices will direct students to meet with their designated graduate advisor at the beginning of the probation period to create an academic improvement plan.

Graduate students placed on academic probation are given a maximum of two probationary semesters to raise their cumulative GPA to the minimum standard of 3.00. At the end of the semester or term in which probation was issued, the University Registrar will notify students when they are placed on continued academic probation or are academically dismissed.

Continued Academic Probation- Second Probation
When placed on academic probation, graduate students are given one probationary semester to raise their cumulative GPA. The graduate student has to achieve an overall GPA of 3.00 to be taken off probation, regardless of progress made during the probationary semester. Failure to do so will result in the student being placed on continued or second academic probation. If the overall GPA remains below 3.00 after a second probationary semester, the student may be academically dismissed.

Students on academic probation may be asked to repeat the course(s) that caused the cumulative GPA to drop below 3.00. The course(s) should be taken within the next two terms of enrollment after the academic probation status is applied. The Graduate Program Director will make this determination as part of the student’s performance improvement plan.

Academic Dismissal
The University reserves the right to refuse the privilege of further attendance to graduate students who fail to meet minimum academic requirements with or without a probationary period.

The University also reserves the right to change the requirements for retention and graduation for graduate or doctoral students, and every candidate for a degree or certificate program shall be held in compliance with changes, as far as the remaining portion of her or his course of study is affected.

Changes to the Academic Standards Policy
Effective fall 2016, all graduate programs in the College of Arts and Sciences will follow a minimum cumulative GPA standard for assessing retention, probation, dismissal and graduation standards.

If a graduate student’s cumulative GPA is below a minimum retention scale after one semester or remains below the required 3.00 minimum after a probationary period and the student fails to meet other requirements, he or she will be permanently dismissed from the University. Academically dismissed students are not eligible to enroll in coursework without an approval of reinstatement.

Levels of Academic Standing
Certain graduate programs in the College may have more stringent retention and dismissal standards. Students enrolled in these programs should consult with their program advisors for retention and graduation requirements.

Interdisciplinary Doctor of Education Program for Educational Leaders (IDEPEL)
All courses and requirements for the doctoral program must be completed within seven years from the first semester of enrollment in the program. Good Academic Standing is defined as a cumulative GPA of 3.50 or higher.

Master of Science in Psychology
Students enrolled in this program who receive two final course grades of C+ or below will be dismissed from the program.

Maximum number of Grades of C+ or Below
In addition to maintaining a 3.00 GPA for good standing and graduation, there is a maximum number grades of C+ or below that students may earn over the duration of their graduate programs.

Certificate Programs and Graduate Teacher & Administrative Certifications
Students enrolled in a certification bearing program requiring 16 or fewer credits who receive one final course grade of C+ or below will be dismissed from the program.
Students enrolled in a certificate or certification program requiring 18-30 credits who receive two final course grades of C+ or below will be dismissed from the program.

**College of Arts & Sciences Master’s Degree Programs (M.A. & M.S.)**

**30-36 credits**

Students enrolled in master’s programs requiring between 30-36 credits who receive a final course grade of C+ or below for three graduate courses (9 credits) will be dismissed from the program.

**42-48 credits**

Students enrolled in master’s programs requiring 42-48 total credits who receive four grades of C+ or below or (12 credits) will be dismissed from the program.

**Exceptions: IDEPEL Ed.D. and the M.S. in Psychology**

**Appeal of Academic Dismissal**

A formal written appeal may be submitted to the Graduate Program Director by a student based upon one or more of the following grounds:

- Violation of official policy or procedural error by academic or administrative personnel
- Special mitigating circumstances beyond the student’s control affecting the student’s academic progress.

These include the following circumstances that could prevent the student from completing the course satisfactorily:

- A severe illness or other debilitating condition
- A student who is primary care provider for a sick, injured, or needy person in family or friend circle
- The death of a family, friend or someone in his/her relationship circle
- The active duty service as a member of the National Guard or the armed forces of the United States.
- The change of the student’s work schedules beyond the control of the student.
- Other good cause as determined by the Dean of the College or his or her designee.

**Note:** Poor performance in coursework, poor work/study habits, missed deadlines, or change of major or concentration are not appropriate grounds for appeal.

A student submitting an appeal based on mitigating circumstances are also required to provide specific evidence in support of the issue or event that impaired the student’s academic progress.

The student must also provide objective documentation about the events or situations and their subsequent impact on his or her learning.

**Document Examples:**

- Newspaper notice, copy of death certificate or obituary
- Physician’s letter explaining a medical condition and its effects or medical records
- Photos, witness statements, a copy of police report, etc.
- Court documents, bail documents, letter from a lawyer, police, reports, etc.
- Clinic notes, prescription receipts, doctor notes are not considered sufficient documentation.

Students are not required to appear in-person for a formal appeal hearing.

**Time Frames for Academic Dismissal Appeal Review**

The Graduate Program Director should receive the formal written appeal within the dates listed on the dismissal notification communication.

Typically, the formal appeal should be concluded within ninety days of the date it was received by the Graduate Program Director.

**Note: A student’s Graduate Program Director is the single point of contact for all levels of academic appeal. A student with an active appeal should communicate with the Graduate Program Director only unless otherwise directed.**

Students who have been academically dismissed and have an active appeal are prohibited from registering for courses for a future term or semester.

**Graduate Dismissal Appeals Process**

**First Level Review**

Submitted academic dismissal appeal forms will be reviewed by the Graduate Program Director and Department Chair. The reviewers will make a decision to either recommend or reject the appeal. Recommended appeals will be forwarded to the second level of review. Appeals with a rejection status will be considered final, and the dismissal action will stand. The Graduate Program Director will notify the student in writing of the decision.

**Second Level Review**

If recommended for a second level of review by the academic department, an active appeal will be reviewed by the divisional Associate Dean. The Associate Dean will make a decision to recommend or reject the appeal for further consideration for the third level of review.

**Third Level Review**

The College of Arts and Sciences Graduate Appeals Reviews Committee headed by the Dean of the College constitutes the final level of review of an academic dismissal appeal. If an appeal is approved, the student may be considered for reinstatement to a graduate program with probationary standing.

If an appeal is denied, the dismissal action will stand. Students who have been dismissed from a Graduate Arts and Sciences graduate program due to failure to meet academic standards or because of an academic integrity violation may not reapply to any graduate program within the College of Arts and Sciences.

**Student Point of Contact during the Appeals Process**

At all phases of the appeal review policy, the student’s Graduate Program Director will serve as the point of contact for the student. Students will be notified by letter about the outcome of their appeal.

**Reinstatement**

Students who are approved for reinstatement will be placed on academic probation and must return to good academic standing within one semester or term.

Students approved to resume their current program of study may be required to repeat the course(s) with earned grades that caused their cumulative GPA to drop below 3.00. See course repeats policy. Please
reference the Course Repeat Policy under the policy section, Course Load, Course Overload & Course Repeat.

Additional conditions may be placed on students who have been approved for reinstatement including, but not limited to, referrals to learning resources support or tutoring, enrollment in the appropriate course(s), etc.

Reinstated students who fail to meet the specified criteria of the academic performance improvement plan, and/or do not attain a cumulative GPA of 3.00 or higher, or who obtain a term GPA of below 3.00 during the probation term will be academically dismissed without possibility of a second appeal or reinstatement.

Master’s Degree and Non-Degree Programs

Doctor of Education, Ed.D.

A student enrolled in the doctoral program must maintain a GPA of 3.50 to remain in the Ed.D. IDEPEL program. A GPA of 3.50 is required for students to be eligible to take the comprehensive examination. During the three years of coursework, in the event that a 3.50 GPA cannot be attained by the end of the three years of coursework, the student will be dismissed from the program.

Satisfactory Academic Progress (SAP Appeal)

Students who do not make satisfactory academic progress due to numerous course withdrawals, lack of continuous enrollment, or grades below B may no longer be eligible for Federal Financial Aid and will receive notification from Student Financial Services informing them of their option to file an SAP appeal. The student must file an SAP Appeal form with the Graduate Studies Office before an academic plan can be contemplated, and the appeal must be based on extenuating circumstances. The appeal will be reviewed to determine if an academic plan would allow the student to return to good standing. For a student’s appeal to be considered, the appeal must be submitted within a specified start of the traditional semester for which the student is requesting Federal Financial Aid and include the following: documentation of the extraordinary circumstances that led to the failure to meet the standards and the changes that will allow the student to return to good standing. Extenuating circumstances may include loss of job, a major financial life event, personal illness, illness or death of family member, or other special circumstances.

Grievance Procedure

Any student who has a concern regarding an academic matter may seek assistance. The procedure for resolving academic program concerns (see note of grade appeal process below) begins with the course instructor. A student who has a concern about a final course grade should first consult the grade appeal process in the following section.

If the student is not satisfied with the response or resolution achieved at this first level, or if speaking with the faculty member presents a conflict of interest for the student, the student should proceed to speak with his/her Graduate Program Director. If the student is not satisfied with the response or resolution achieved through the Graduate Program Director, the student should proceed to speak with the Department Chairperson.

If the student is still not satisfied with the response or resolution achieved through the Department Chair, or if speaking with the Department Chair presents a conflict of interest for the student, the next step is to request a review of the concern in writing to the Associate Dean. All requests to present a concern to an Associate Dean must be first summarized in writing in the form of a petition by the student and submitted to the attention of the Graduate Studies Office via email to gradappeals@sju.edu

A decision on a grievance by the College Dean represents a final level of review. At all stages of the process, the Graduate Program Director or representative designated by the Dean’s Office will serve as the point of contact for the student filing the complaint.

Grievance Non-Academic or Request for Assistance

Students are directed to consult with the Director of Adult Student Life, adultstudentlife@sju.edu, who serves as the ombudsperson and may assist students with referral and help to direct and resolve student concerns.

Appealing a Course Grade

The instructor for a course has the responsibility for setting the requirements for a course and making an evaluation of students’ work. Once a grade has been given, the instructor is not free to change the grade unless the instructor indicates to the Registrar that an error was made in the original grade transmitted. If a student believes that an error has been made, he/she must take the initiative in bringing about the necessary correction before the conclusion of the semester or immediately following the semester in which the course was taken.

The normal procedure for requesting a correction would be through direct discussion between the student and the instructor. If redress cannot be attained through such discussions, the student may next appeal to the Graduate Program Director. If resolution cannot be attained through appeal, the student may next appeal in writing to the Department Chair. All requests to present a concern to an Associate Dean must be first summarized in writing in the form of a petition by the student and submitted to gradappeals@sju.edu

Leave of Absence

Under special circumstances (illness, family hardship, work or military service, etc.), a student may request a leave of absence from his/her graduate program. Students are not permitted to enroll at another institution while under a leave of absence status.

Two years is the maximum time permitted for a leave of absence (LOA). After a two-year period, the student will be deactivated and will be required to re-apply to be considered for reinstatement to a program. Students are required to submit a completed ‘Graduate Leave of Absence’ form available at www.sju.edu/hawkcentral

Withdrawal Policies

Withdrawing from a Course or All Courses in a Semester

An approved leave of absence does not automatically cancel a student’s registration for courses. If enrolled for the term(s) included in the approved Leave, a student must drop/withdraw his/her registration(s). Failure to do so will result in billing and assigned grades for the term(s). Students are encouraged to complete the course withdrawal form available at www.sju.edu/hawkcentral. Students who have borrowed federal financial aid in the form of graduate loans are strongly advised to consult with an SJU Hawk Central Financial Aid representative to discuss how canceling registration through add/drop or withdraw will impact a student’s account and ability to re-enroll in a future term.

Hawk Central
Student Records and Financial Services
Phone: 610-660-2000
Email: hawkcentral@sju.edu

Withdraws
It is strongly suggested that you seek counsel from your Graduate Program Director or Advisor before submitting:

- Selective Course Withdraw - Withdrawing some but not all of your currently enrolled courses. Please complete the course withdraw form available on the www.sju.edu/hawkcentral and submit to hawkcentral@sju.edu.
- Withdraw from all Courses in a Semester - Please complete the course withdraw form for each course and submit to hawkcentral@sju.edu. If you will be taking a leave of absence, please complete the Leave of Absence form and submit this to hawkcentral@sju.edu.
- Total withdraw/Not returning to the University - Total withdraw from all courses with no definite plans to return to Saint Joseph's University. Please complete the withdraw form and student withdraw form available on the website: www.sju.edu/hawkcentral.
- Extraordinary or retroactive withdraw - Initiating the withdraw process after the withdrawal deadline due to exigent circumstances. Please complete the extraordinary withdraw form available on the website: (http://www.sju.edu/hawkcentral).www.sju.edu/hawkcentral

Dropping or Withdrawing from a Course
Dropping and/or withdrawing from a course can have financial and academic implications that should be taken into consideration when making this decision.

Changes in financial aid rules and veterans education benefits have further complicated the course withdrawal process; only trained representatives have the knowledge to help students make the best decision(s)—financially and academically.

Before dropping or withdrawing from a course, we suggest you speak to a financial aid representative from the Hawk Central Student Service Center, hawkcentral@sju.edu or (610) 660-2000.

Total Withdraw from the University:
A student may elect to file a total withdraw from a graduate program of study at Saint Joseph's after any outstanding tuition debt has been settled, and he/she is not liable for dismissal because of an academic violation or disciplinary action. Students are required to submit a completed "Graduate Arts and Sciences Withdraw from University" form to the Graduate Arts and Sciences Office at gradstudies@sju.edu.

Administration Withdrawal
Graduate students may be administratively withdrawn from the University, after due notice, for an academic or disciplinary action or failure to satisfy overdue financial obligations or to comply with administrative requirements of the University.

Registration and Student Record Policies
Course Load, Course Overload & Course Repeat

Course Load
Full-time graduate students are those who enroll for nine or more credits each semester. Part-time graduate students are those who enroll for less than full-time each semester as previously defined. A student who is employed full-time is encouraged to take two courses (6 credits) each semester, and must receive permission from the student’s Graduate Program Director before registering for three or more courses.

Course Overload
Requests to enroll in five courses (15 credit hours) in a fall or spring semester from a full-time graduate student with a cumulative grade point average (GPA) below 3.50 will not normally be approved. All graduate course overloads must be approved by the Graduate Program Director and Associate Dean. No overload requests will be considered for the summer term. Certain graduate programs restrict students from registering for more than 3 courses or 9 credit hours in the summer terms. Students enrolled in a first semester of graduate study are not granted permission to take course overloads.

Course Repeat
A graduate student may voluntarily repeat one course while enrolled in a program, and it can only be a course in which a grade of C or below was received. The course may be repeated only once.

Courses that students are required to repeat as part of their academic probation or reinstatement do not count as “voluntarily” repeated courses. When a course is repeated, both the original and repeated grade appear on the academic record; both grades will be used in calculating the grade point average. Course credit may be applied toward degree requirements only once, even if a course is repeated.

Continuous Enrollment
Continuous enrollment is defined as registering for a minimum of three (3) credits in at least one semester per academic year (fall, spring, summer).

This includes the three credit hours of graduate credit that are required for registration during the semester in which degree requirements are complete until the degree is attained or status as a degree-seeking graduate student is completed or terminated.

Student Record Deactivation: Non-Continuous Enrollment
After three consecutive semesters of non-attendance, a student’s record will be inactivated. Students with inactivated records should contact the University Registrar, hawkcentral@sju.edu or consult with the Graduate Program Director. Students who do not comply with the continuous enrollment policy will be required to apply for readmission after a two-year period.

Changing Graduate Program or Adding a Major Concentration
Active students in good academic standing may elect to change the program or add a major concentration (if applicable).

Acceptance into a new program of study is not guaranteed; the student must meet all eligibility requirements of the desired program and may be directed to submit an admission application. The student should also contact the Graduate Program Directors of both the previous and the desired program to review the student’s candidacy to the new program and to complete a program change form.

Students should also note that although the grades for courses taken in the previous program might not count towards graduation in the desired program, a student’s grade point average is cumulative. That...
is, the grades received in the first program will remain on the student’s transcript and will count towards the student’s cumulative GPA record.

**Double Counting of Courses**

Any student wishing to matriculate into another Saint Joseph’s University graduate degree or enroll in the second program of study is advised that, for each additional degree to be awarded, a maximum of 6 credits of graduate work at the 560 or above will be transferred.

**Cancellation of Courses**

The University reserves the right to cancel a course for which there is insufficient enrollment. When such a cancellation becomes necessary, students will be notified in advance and given the choice of receiving a full refund or enrolling in another available course without penalty.

**Time Limit & Graduation Policy**

**Degree Time Limitation**

After the establishing of degree candidacy, a maximum of five years will be allowed for the completion of the degree requirements. Under extenuating circumstances, a student may request an extension of this time frame.

The Doctor of Education has a separate policy for time limit based on coursework and dissertation requirements. There is a ten (10) year time limit for completion within the Ed.D. program. Each student is expected to make academic progress toward the degree or certificate to remain in good standing. A student who elects to take a leave of absence must complete a Graduate Leave of Absence University Form to the University Registrar’s Office, hawkcentral@sju.edu

**Requesting a Program Extension for Time Limit**

Graduate students in the College of Arts and Sciences are required to complete all degree requirements within five years. The Doctorate of Education has a separate policy for time limit based on coursework and dissertation (See doctoral handbook for more information).

Extensions beyond this limit may be made only with the Graduate Program Director’s recommendation and the approval of the Academic Department Chair, and then only for unusual and extraordinary circumstances. Students are required to contact their Graduate Program Director and submit in writing a request for an extension.

**Filing an Intent/Apply to Graduate Form**

Students who will complete all of the requirements for a degree in a given semester must submit a completed Apply-to-Graduate Form within the time specified under Academic Calendar. Failure to complete the application will result in student records being incomplete, and the awarding of the degree will not be recorded as part of the official record.

The Apply to Graduate form is located within The Nest (nest.sju.edu) the self-service student web portal, under Classes & Registration.

**Program Completion for Certification and Post Master’s Certificate Program**

Students enrolled in graduate level education certification preparation programs or certificate programs should seek instructions for application of completion from their academic program director.

Students who are completing graduate teacher and educational administrative certifications may request an official transcript to denote completion of a preparation program. Contact the Office of Accreditation and School Partnerships for additional information on submitting an application to the Pennsylvania Department of Education. Please contact the Education Unit Office of Accreditation, Certification and School Partnerships for more information on state certification processing and approvals.

Students enrolled in the Post Master’s Certificate program in Criminal Justice; Behavior Analysis should contact the Graduate Criminal Justice Office for information on applying to receive a certificate.

**Doctoral and Master’s Degree Conferral Verification and Diplomas**

Diplomas are issued three times a year—on September 15, January 15, and on the date of the Commencement exercise in May. Diplomas are mailed to students typically 8-10 weeks following the degree conferral date.

Commencement exercises are held annually in the spring (May). Graduates who earned their degrees in summer (September), fall (January), or are anticipated to complete a degree in spring (May) are eligible to participate in commencement exercises. Only students enrolled in master’s degree, or the doctoral degree program are invited to participate in commencement exercises.
UNIVERSITY ADULT
(PLS) PROGRAM IN THE
COLLEGE OF ARTS AND
SCIENCES

Dean: Shaily Menon, Ph.D.
Associate Dean, Education Division: John Vacca, Ph.D.
Associate Dean, Humanities Division: Shawn M. Krahmer, Ph.D.
Associate Dean, Mathematics Natural Science & Computer Science Division: Jean M. Smolen, Ph.D.
Associate Dean, Social Sciences Division: Matthew J. Anderson, Ph.D.
Executive Director, Graduate and Extended Studies: Mary Ellen Hickes, M.A.
Director, PLS Advising and Curriculum Planning: Maria Beazley, M.A.

PLS Advisor: Marita Hurst, M.Ed.

The College of Arts and Sciences Undergraduate Adult Program is known as the Professional and Liberal Studies (PLS) Program. Adult Education has been an integral part of Saint Joseph’s University since 1915, connecting the Jesuit tradition of academic excellence and service with the contemporary needs of adult learners. The PLS Program administers adult undergraduate Arts and Sciences degree programs, certificate programs, off-campus programs, summer session, January intersession, and non-credit offerings. PLS also works in partnership with select regional employers to provide quality programs that support the education and professional advancement of their employees. PLS has an administrative responsibility for undergraduate adult programs, with curricular and instructional decisions made by academic departments in the College of Arts and Sciences.

Mission

The Professional and Liberal Studies (PLS) program at Saint Joseph’s University embraces the experience of our diverse adult students and challenges them to adapt to the demands of a global society through engagement in an integrative curriculum built on a strong liberal arts foundation. The PLS community prides itself on sharing its Jesuit roots and Ignatian values of ethics, social justice, and care for the whole person. It is our vision for PLS students to further develop themselves as critical thinkers, skilled creators, and innovators within their professional and personal lives.

Student Profile

The College of Arts and Sciences PLS Program serves both full-time and part-time non-traditional-age students and part-time, traditional-age students who are pursuing their undergraduate education. Students enter PLS with or without having earned previous college credit. Some adult students enter PLS to complete a degree program after a delay from formal education. Work, family, and financial obligations influence the pace of adult and part-time students’ academic careers. Therefore, degree completion time varies. Other adult students have already earned undergraduate degrees and enroll in PLS for specific courses that will promote their professional advancement.

Degree and Certificate Programs

A list of programs offered through the PLS program can be found on the College of Arts & Sciences homepage (p. 32).

Degree and Certificate Programs

Bachelor degree requires successful completion of 40 courses and a minimum of 120 credits (see Curricula section). PLS students may also earn a Certificate of Proficiency or Post-Baccalaureate Certificate. The number of courses required varies depending upon specific certificate curriculum requirements. PLS students cannot graduate with more than one certificate or degree in the same field at the same time.

For further information regarding PLS Programs, please contact the PLS department at 610-660-1267 or email plsadmin@sju.edu.

Application Requirements (On-campus PLS students)

Applications for admission are reviewed once all application materials have been submitted. An admission decision is made within three to five business days. Students will receive official notification of their decision via email. Requirements are based on the amount of college credits that a student has already earned. Official transcripts are required of all applicants, with the exception of some visiting students. Failure to include all institutions at which an applicant was enrolled may invalidate the application. Students who have at least thirty transfer credits are required to submit an application (https://sju.edu/admission/adult-learner-admission/how-apply) and official college transcripts. If a student has no prior college experience or has earned less than thirty college credits, the following documents are required for admission: application (https://sju.edu/admission/adult-learner-admission/how-apply) official college transcripts (if applicable), official high school transcript with graduation date or GED test scores, personal essay of 250 – 500 words (topic available by contacting the PLS office), and one letter of recommendation. All documents submitted become the property of the University. Applications are considered incomplete until all official documents are received.

Application Requirements (Online PLS students)

For students applying to the Professional and Liberal Studies Online Degree Completion and Certificate programs, information is available at online.sju.edu.

Admission Policy for Academically Dismissed SJU Day Students

A Saint Joseph’s University day student who has not met the academic standards of the University (as determined by the Board of Academic Review and Dean of that school) and has been academically dismissed...
from the day program will not be considered for admission to the PLS Program for a period of at least one semester or full summer term following dismissal from the day program.

The PLS Program reserves the right to deny admission to any applicant who has a documented history of violating University rules and regulations or who has previously been expelled or suspended from the University.

Second Degree Candidates
Students who have earned a Bachelor of Science or Bachelor of Arts degree in a program requiring a minimum of 120 credits from a previous college or university and wish to pursue undergraduate studies to obtain a second degree may apply to the PLS Program to do so. PLS students completing a second degree are required to complete a minimum of 10 additional courses (30 credits) through PLS at Saint Joseph’s University, including any general education requirements not yet satisfied. PLS students are required to complete at least four upper division courses in their major at Saint Joseph’s University unless specifically waived by the appropriate Department Chair or Program Director (See Residency Requirement in the Academic Policies and Regulations section).

Visiting Students
Undergraduate students who attend other colleges or universities and are in good academic standing may enroll in classes at Saint Joseph’s University to transfer to their respective home institution. A visiting student application and letter from the student’s home institution indicating good academic standing are required. Visiting students who wish to take courses with prerequisites must submit official transcripts depicting the necessary prerequisite on that transcript. Under this classification, a visiting student may enroll in up to four total courses.

Isolated Credit / Non Matriculated Students
Non-degree applicants may enroll in up to four PLS classes prior to formally matriculating into a degree program. Under this classification, students are admitted to the University, but not to a specific degree granting program. No financial aid is available. A formal application and academic transcripts are required prior to being admitted as an isolated credit student.

Acceptance Policy
The decision regarding admission to the College of Arts and Sciences Professional and Liberal Studies Program is based on a review of application materials and any relevant information obtained by Admissions personnel. The University reserves the right to deny admission to an applicant who, for any reason, does not demonstrate the capabilities, qualities, skills or commitment believed to be essential for a student in Professional and Liberal Studies.

Disclosure
Saint Joseph’s University Professional and Liberal Studies Program, in accordance with Federal and State laws and regulations, does not discriminate on the basis of race, color, creed, religion, national origin, sexual orientation, sex, age, veteran’s status or handicap, in regards to treatment, access to, or employment in its program or activities. In compliance with the Americans with Disabilities Act (ADA), individuals with disabilities requesting accommodations should contact the Office of Student Disability Services at 610-660-1774.

Transfer Credits
A candidate for admission to a degree or certificate program with credits from another college must request official transcripts be sent to SJU from each college or university previously attended. Students may also be required to submit course descriptions for each course taken outside of SJU. In some instances, a syllabus also may be required.

International students must provide official transcripts from each high school and university previously attended, translated into English, and a course-by-course evaluation from an approved international credential evaluation service. Please see the section on International Students for further information.

Only grades of C or better from fully accredited colleges or universities will be considered for transfer. Students may transfer a maximum equivalent of 25 courses towards the bachelor’s degree in PLS at the time of admission. PLS students in a bachelor’s degree program are required to complete a minimum of 15 courses at Saint Joseph’s University, including at least four upper division courses in their major. PLS has articulation agreements with local and regional community colleges designed to facilitate the transfer process. PLS students may transfer the equivalent of 10 SJU courses towards an Associate Degree at the time of admission. A minimum of 10 courses must be completed at Saint Joseph’s University.

Please note that the following students may transfer the equivalent of 30 courses towards the bachelor’s degree in PLS at the time of admission: 1) students who are transferring from the SJU Day School, and 2) students who have earned a Bachelor of Science or Bachelor of Arts degree in a program requiring a minimum of 120 credits from a previous college or university and who are pursuing a second degree at SJU. These students are required to complete a minimum of 10 courses at Saint Joseph’s University through the PLS program.

Credits awarded by Assessment through American Council on Education (ACE). A student may be granted transfer credit for courses evaluated and approved for college credit by the American Council on Education (ACE). Listings of ACE approved courses and credit recommendations are contained in two publications: A Guide to the Evaluation of Educational Experiences in the Armed Forces and The National Guide to Educational Credit for Training Programs. Credits awarded are subject to the same policies as those of any other transfer credit.

Military Credits. Transfer credit may be granted for college-level coursework earned while in military service if it is recommended by the American Council on Education (ACE) and if the course meets the content equivalence of a three-credit course offered at Saint Joseph’s University. ACE recommendations for 1-credit courses may not be transferred to fulfill a three-credit course requirement. Credit is not awarded for Basic Training or for vocational/technical level recommendations. To initiate an evaluation of military credits, a student must request an official military transcript from their respective service branch. PLS students may access additional information regarding military transcripts and ACE evaluations at http://www.acenet.edu/militaryprograms/transferguide

Credits for Prior Learning
A student in good academic standing may be eligible to earn college credit for prior learning through CLEP (College Level Examination Program) or ELAP (Experiential Learning Assessment Program). A student cannot earn CLEP or ELAP credit for a course in which he or she is presently enrolled or for a course when he or she has completed a more advanced course in the same subject.
To be considered for CLEP or ELAP, a student must:

- be in good academic standing, and
- have more than 10 courses remaining in their degree program.

A student may not use a CLEP exam or ELAP portfolio review for credit if he or she has already transferred the maximum number of courses allowed.

**CLEP (College Level Examination Program).** Through CLEP, PLS students have the opportunity to earn college credit by achieving a passing score on exams in specific subject areas. CLEP (administered by the College Board) offers 33 exams in five subject areas, covering material generally taught in first or second year of college. Students must obtain approval from the PLS Advising Office before taking a CLEP exam in order to ensure the applicability of CLEP credits to a PLS program. A listing of exams and minimum required scores is available in the PLS Advising office.

**ELAP (Experiential Learning Assessment Program).** ELAP provides PLS students the opportunity to validate college level knowledge acquired through study, work and other life experiences. PLS offers a portfolio assessment process by which prior learning can be documented and assessed for credit. ELAP applicants may apply for portfolio assessment credits for experiences that are similar to the course content for a particular course.

It is the student’s responsibility in consultation with an academic advisor to identify courses for which he or she would like to document identification of appropriate courses. Portfolio assessment is not “an easy way to earn credits,” but rather a formal process that enables PLS students, through careful reflection and documentation, to prove learning equivalent to a SJU course.

Approval of all ELAP requests is at the discretion of each academic department. This process, including portfolio preparation and academic department/faculty review, may take approximately two to three months to complete. If the student is awarded formal credit as a result of the assessment, that credit will be recorded on the student’s permanent record as a transfer course with a grade of TR. ELAP applications may be made after a student has been fully accepted and enrolled in the PLS program.

**Academic Advising in PLS**

For most PLS students, advising is provided through the PLS Advising Office. Exceptions to this include those majoring in English & Professional Writing and Early Childhood/Elementary Education who also are assigned a faculty advisor within their academic department. Through the advising process, PLS advisors help students to:

- manage their transition to SJU;
- develop an academic plan for completing requirements for graduation;
- be aware of the various campus resources available including tutoring, The Writing Center, etc.;
- develop long range educational goals; and,
- identify opportunities and resources that will enrich their education.

Advising is available for current and returning students, in-person or over the phone, through one-on-one advising sessions. For more information regarding student advising please call 610-660-1267 or email plsadvising@sju.edu.

**Registration for Classes**

Prior to the opening of registration each semester, PLS and the Registrar’s Office will send email announcements regarding registration and the class schedule. This information will include specific instructions and procedures for registration. It is expected that students, with assistance from PLS Advising, will register for classes each semester independently through The Nest.

PLS students should review their Degree Works audit and read the catalog carefully before selecting courses to make sure they have the prerequisites or proper background for each course. Since the goal of education is academic progress, normally students should not register for a course when they have earned credit in a more advanced course in the same subject. Students enrolling in upper division courses who are unsure of the required background should consult with the PLS Advising Office (plsadvising@sju.edu).

All PLS students are encouraged to talk with a member of the PLS Advising Office and/or faculty advisor to review course selections prior to registration each semester. PLS students who are on academic probation are required to obtain approval for course selections prior to registration.

Students are not guaranteed seats in classes. Registration is on a first-come, first-served basis; therefore, students are encouraged to register at the earliest possible opportunity. When courses have filled to capacity, the student must go through the online class waitlist procedure to try for a second-chance seat in the class. If online waitlists are not used, a student may contact the Chair of the Department to see if an override into the closed class is possible.

**Academic Policies and Regulations**

**Degree and Certificate Requirements**

To be eligible for a degree or certificate, a student must complete the required number of courses and credits listed in the various curricula (See Curricula section). Students must complete 40 courses (minimum 120 credits) for a Bachelor’s Degree and 20 courses (minimum 60 credits) for an Associate Degree. Students may not graduate with more than one certificate or degree in the same field. Three credits represent a total of 42 instructional hours over the course of a semester.

**Residency Requirement**

The residency requirement for an Associate Degree is fulfilled by the satisfactory completion of at least 10 courses in the PLS program immediately preceding the date of graduation. The residency requirement for a Bachelor’s Degree is fulfilled by the satisfactory completion of at least 15 courses in the PLS program immediately preceding the date of graduation. Students who are pursuing a second Bachelor’s Degree and those who are transferring to PLS from the SJU Day School are required to complete at least 10 courses in the PLS program immediately preceding the date of graduation. The residency requirement may not be satisfied by credits earned through CLEP, ELAP (portfolio assessment), or courses completed elsewhere. PLS students must take at least four Upper Division courses (level as defined by each academic department) in their major (online or in classroom) through SJU to obtain a Bachelor’s Degree. Students must take at least one Upper Division course in their major for an Associate Degree.

Please be aware that once matriculated into the PLS Program, students are expected to complete all remaining courses at Saint Joseph’s University. Exceptions may be considered in extenuating academic circumstances by written request to the appropriate Associate Dean.
Second Major

Qualified PLS students may request permission to pursue a second major for sound academic reasons. Such a request requires the approval of the PLS Advising Office and chair or program director for the major. The student must meet all the prerequisites and other requirements for both majors. The final transcript, not the diploma, will record the completion of the second major. The degree granted will be the degree appropriate to the primary major. Two separate degrees will not be awarded to students who complete a second major.

Minors

Bachelor’s degree students may have a minor listed on their transcript. Approval from the program director or chair for the minor is required. At least one-half of the courses required must be taken at Saint Joseph’s University. For minor options and requirements, please see the Undergraduate Day Programs section of the Catalog.

Cancellation of Courses

The University reserves the right to cancel a course for which there is insufficient enrollment. When such a cancellation becomes necessary, students will be notified in advance and given the choice of receiving a full refund or enrolling in another available course without penalty.

Add/Drop

During the add/drop period at the beginning of each semester or 8-week module, students freely may make changes to their schedule through The Nest. A student who drops a course from their schedule during the add/drop period will not have the course listed on their official record. After the Add/Drop period has ended, a student who wishes to no longer continue in a course will need to submit a request to withdraw from the course. For add/drop dates, please see the University’s Academic Calendar.

Withdrawal from a Course (or courses)

A student who wishes to withdraw from a course after the add/drop period must do so by writing and completing the appropriate form no later than the withdrawal deadline date as established by The Registrar’s Office. Students are encouraged to discuss withdrawing from a course with their instructor prior to submitting a withdrawal form to the PLS Advising Office. Withdrawal from any course without completing the required paperwork will result in an F for that course and will lower a student’s grade point average. Students are permitted to withdraw from an individual course or from all courses. Grading and refund regulations apply only to the courses from which a student has officially withdrawn. For the refund schedule, visit the Hawk Central website at http://www.sju.edu/hawkcentral.

Extraordinary Withdrawal

Withdrawal from a course after the last day of the published withdrawal period requires documentation of an extraordinary and unusual reason. PLS students must submit an Extraordinary Withdrawal request form, documentation to support any extraordinary or unusual reasons for the withdrawal, and approval of the instructor to the PLS Advising Office for final approval by the appropriate Associate Dean. The avoidance of undesirable grades is not sufficient reason for an extraordinary withdrawal.

Should the general good of the University be involved, the University reserves the right to request the withdrawal of any student. Withdrawal is not permitted for the purpose of avoiding penalties imposed through the University’s Academic Honesty Policy.

Incomplete Grades (“I” on the Transcript)

The grade of Incomplete, noted as “I” on the grade report, is reported by an instructor to the Program Director or Department Chair and to the Registrar only under the following circumstances (all must apply):

1. The student has requested an Incomplete.
2. Course requirements have not been completed for reasons beyond the student’s control (e.g., illness or family emergency), and
3. The student has completed the majority of the work for the class, and the student can accomplish the remaining requirements within 30 days of the end of the class or reasonable time frame agreed upon by the instructor and student following issuance of the “I” grade.

Please note that if the work for the course is not completed by the agreed time, the “I” will convert to an F. A student may not be given an Incomplete grade if an incomplete from a previous semester is still outstanding.

In Progress Grades (“IP” on the Transcript).

The grade of “In Progress,” noted as “IP” on the grade report, indicates that the course spans more than one semester’s work. The final grade will be sent to the Registrar by the instructor upon completion of the course.

Grade Appeal

A PLS student who wishes to appeal the final grade in a course should first contact the instructor of the course in an attempt to remedy the situation. If after talking with the instructor the student still thinks that they have been inappropriately evaluated in the course, the student may make a written request for review to the Program Director or Department Chair, depending on the program of study. The written request must describe, in detail, the situation and reason for appealing the course grade. The program director or department chair will consult with the instructor and if a grade change is warranted, make a recommendation to the Associate Dean for approval.

Student Deactivation

After two years of non-attendance, PLS students will be deactivated and will be required to apply for readmission if/when they decide to return to their studies at SJU. To avoid deactivation, a student who is expecting to be away from their studies for a period of time is encouraged to request a leave of absence.

Leave of Absence

PLS students may request a leave of absence for up to two years. After two years, student will be deactivated and will be required to re-apply to be considered for readmission to a PLS program. Students are required to submit a completed PLS Leave of Absence /Withdraw from University form to the PLS Advising Office.

Withdraw from the University

A student may withdraw from their program and University provided any indebtedness to Saint Joseph’s has been settled and he/she is not liable for dismissal because of an academic violation or disciplinary action. Students are required to submit a completed Withdrawal from University form to the PLS Advising Office.
Minimum Standards for Graduation
A cumulative grade point average of 2.0 is the minimum required for a Bachelor’s Degree, Associate Degree, or a Certificate from Saint Joseph’s University. Students with a cumulative grade point average below 2.0 at the end of any semester will be notified in writing that their level of performance may be insufficient to satisfy the requirements for graduation.

Minimum Standards for Retention
PLS students are permitted to take courses at a rate that is appropriate and convenient for them, normally without incurring any penalties for delay in completing degree program requirements. Students pursuing Teacher Certification, however, are required to complete their certification within the time stipulated in departmental regulations.

Grades for PLS students are reviewed at the end of each 8-week module in the fall, spring, and summer semesters.

Bachelor’s Degree seeking PLS students with an SJU grade point average below the minimum requirement shown in the following table will be reviewed by the Academic Review Board for PLS, which could lead to a recommendation for academic probation, suspension, or dismissal. SJU grade point average is calculated by dividing quality points by GPA hours for courses completed at SJU. Failures are calculated into the GPA, but withdrawals are not.

<table>
<thead>
<tr>
<th>Semester completed</th>
<th>Minimum GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 60 credits</td>
<td>1.8</td>
</tr>
<tr>
<td>61-90 credits</td>
<td>1.9</td>
</tr>
<tr>
<td>&gt;90 credits</td>
<td>2.0</td>
</tr>
</tbody>
</table>

Please note that Degree seeking PLS students who, after attempting their first 12 credits at SJU, have a cumulative grade point average below 1.0 will be recommended for academic dismissal. They will be informed of the relevant policies, including the right to appeal their dismissal to the Academic Review Board for PLS (please see the section on Academic Dismissal for additional information).

Post-Baccalaureate Certificate Students with a GPA below 2.0 after attempting a minimum of 6 credits will be subject to academic probation. Students who are completing a Certificate of Proficiency are expected to consistently maintain a GPA of 2.0 or be subject to academic dismissal.

Academic Probation
PLS students who are not making satisfactory academic progress according to the standards listed above will be placed on academic probation. When on probation, a degree seeking student may be given 1-2 semesters (maximum of 15 additional credits) to raise his or her GPA to the required standard. In extraordinary cases, one additional semester of probation may be allowed by the Academic Review Board for PLS if the improvement during the first probationary period indicates that the student will probably reach the necessary level by the end of an additional probationary semester. If the student does not raise his or her GPA to the required level within this time frame, s/he will be subject to dismissal. Post-Baccalaureate Certificate students who are placed on academic probation will have up to 6 additional credits or one semester to raise his or her GPA to a 2.0. If the student does not raise his or her GPA to the required level, s/he will be subject to dismissal.

PLS students placed on probation are required to meet with their advisor and the Dean (or Dean’s representative) at the beginning of each semester to review their academic plan and discuss campus resources that will help ensure their academic success. A student on probation is limited to 2 courses per semester (unless full time enrollment is required for financial aid or other reasons) and must consult with an advisor prior to registering for courses through The Nest.

Students may lose their financial aid if they do not attain the required GPA after being placed on probation. In rare instances, the loss of financial aid may be stipulated without any previous probation if the student’s academic standing is so poor that academic probation would not be in the student’s best interest. Since these judgments involve issues of academic qualifications and performance, as well as federal and state regulations concerning financial aid, decisions about the loss of financial aid will be made jointly by the Director of Student Financial Services and Compliance and PLS acting on the recommendations of the Academic Review Board for PLS. See Satisfactory Academic Progress and Financial Aid for additional information. PLS students on probation making inquiries must address them to the Dean or Dean’s representative. For further information regarding financial aid, please contact Hawk Central.

Academic Suspension
A student who is showing slow improvement in their level of performance or rate of progress during this period of probation may be subject to academic suspension by the appropriate Dean on the recommendation of the Academic Review Board for PLS. While a student is normally granted at least one academic probation before suspension, the Academic Review Board for PLS may recommend academic suspension without any probation when the student’s cumulative grade point average is so low that it is determined that academic probation would not be in the student’s best interest. A student who has been placed on suspension by the appropriate Dean may return to Saint Joseph’s University only after being away for at least one semester but not more than two academic years. If a student wishes to return after two years, the student will be required to reapply for admission.

Academic Dismissal
A student who fails to make sufficient improvement in his/her level of performance or rate of progress during the period of probation (or after coming back from suspension) may be subject to academic dismissal by the appropriate Dean. While a student is normally granted at least one academic probation before dismissal, the Academic Review Board for PLS may recommend academic dismissal without any probation or suspension when the student’s cumulative grade point average is so low that it is determined that academic probation would not be in the student’s best interest. A student who has been placed on suspension by the appropriate Dean may return to Saint Joseph’s University only after being away for at least one semester but not more than two academic years. If a student wishes to return after two years, the student will be required to reapply for admission.

A student may also be dismissed or suspended from the University under the provisions of the Academic Honesty Policy (See Academic Honesty Policy section).
Satisfactory Academic Progress and Financial Aid

PLS students who are receiving federal, state, or University aid are required to maintain satisfactory academic progress (SAP) and also meet the Minimum Requirements for Retention in order to keep their financial aid eligibility.

SAP is reviewed after the spring semester each academic year. Both cumulative GPA and the ratio of credits earned to credits attempted are used to determine academic progress. Students not meeting criteria for satisfactory progress will be informed at the end of each spring semester that their current academic record disqualifies them for financial assistance. These students will be given the opportunity to file an academic plan with the Dean’s Office to be considered for financial aid for the coming academic year.

Below are the minimum GPA standards that undergraduate PLS students must maintain to be considered making satisfactory progress. Please note that these standards are in accordance with the PLS Academic Probation Policy.

Students must maintain the following cumulative GPA:

- 1.8 cumulative GPA up to 60 credits earned
- 1.9 cumulative GPA for 61-90 credits earned
- 2.0 cumulative GPA above 90 credits earned

In addition to maintaining the required GPA, PLS students must earn a passing grade in a minimum of 67% of overall credits attempted in order to be considered making satisfactory progress. For example, if a student registers for four courses, the student must earn a passing grade in at least three of these courses to meet this requirement. Please note that withdrawals are considered when calculating the ratio of credits earned to credits attempted. Although withdrawals do not impact GPA, they do negatively impact this measure of satisfactory academic progress.

If a student is not making satisfactory progress based on the criteria above, the student must submit an academic plan explaining the circumstances that led to the failure to meet the standards and the changes that will allow the student to be successful. The student should identify and provide documentation of any extenuating circumstances (e.g., loss of job, a major financial life event, personal illness, illness or death of family member, or other special circumstances) that may have hindered their ability to make satisfactory progress. The appropriate Associate Dean will review plan to determine if the student will be allowed to continue to receive federal financial assistance. For a student’s academic plan to be considered, it must be submitted by the first day of classes of the traditional full-term semester for which the student is requesting federal aid.

Class Status

Degree students with fewer than 24 credits completed are considered First year students; with 24 to 53 credits, Sophomores; with 54 to 83 credits, Juniors; with 84 or more credits, Seniors.

Dean’s List

The Dean’s List is published at the completion of each semester. PLS students working toward a Bachelor’s degree are eligible for this honor.

A PLS student must complete at least 30 credit hours through the Saint Joseph’s University PLS program before becoming eligible. A cumulative grade point average of 3.5 is required to achieve and to remain on the Dean’s List. A minimum of 6 credits must be completed during the semester to be eligible for Dean’s List. A failing semester grade in the current semester makes one ineligible for the list.

Commencement and Diplomas

PLS students who will complete all of the requirements for a degree in a given semester must submit a completed Graduation Application within the time specified under the Academic Calendar. If this application is not completed, the student’s records will not be closed, and the awarding of the degree will not be recorded on the official record. The Graduation Application can be found on The Nest under Student Records.

Commencement is held annually in the spring. Diplomas are issued three times a year—on September 15, January 15, and on the date of the Commencement ceremony, typically in May. Students receiving diplomas in September or January are invited to participate formally in the Commencement ceremony the following May.

Honors at Graduation

Honors at graduation will be awarded for SJU grade point averages in all subjects as follows:

<table>
<thead>
<tr>
<th>Honors</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>summa cum laude</td>
<td>3.85</td>
</tr>
<tr>
<td>magna cum laude</td>
<td>3.70</td>
</tr>
<tr>
<td>cum laude</td>
<td>3.50</td>
</tr>
</tbody>
</table>

Averages for honors will be computed on the basis of work completed at Saint Joseph’s University in the PLS program only. To be eligible for honors at graduation, students must complete at least 20 courses (60 credits) at Saint Joseph’s University in the PLS Program.

PLS Adult Degree Completion

General Education Program (GEP)

The General Education Program (GEP) at Saint Joseph’s University involves a distinctive liberal arts education in the Jesuit, Catholic tradition. General education is essential to the University’s mission, providing all students with the broad knowledge, essential skills, appreciation of diversity, and ethically informed perspective needed by those who would aspire to be “men and women for others.” The GEP ensures mastery of skills required for further study, exposes students to the principal achievements and problems of the major fields of human learning, and introduces them to new disciplines that they may or may not wish to pursue. The Major Concentration component gives depth in a particular field and is thus a preparation for an effective career or for graduate study in that field.
Free or general electives allow students to pursue interests, explore new fields, or to continue concentration in their major.

The General Education Program (GEP) applies to students who are completing a bachelor's degree through PLS.

The GEP is comprised of Signature Core, Variable Core, Integrative Learning courses and Overlays.

### Signature Core

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

### Variable Core

- One approved course in Art, Literature, or Music, Theater, Film.
- One course in the Natural Sciences (lab-based or lecture based) in biology, chemistry, environmental science, or physics.
- Two courses in Mathematics (MAT 101 or higher for PLS students).
- Two courses in a Non-Native Language (e.g., SPA 111-SPA 112) or two approved alternative courses in Literature in Translation, Linguistics, or Classics. With permission, international students or students whose native language is not English may take ESL 201 and ESL 202, Composition and Critical Thinking for Non-Native Speakers of English, in their first two semesters to fulfill their language requirement. Bilingual students may also be considered for a language exemption by the Department of Modern & Classical Languages.
- One course in the Social-Behavioral Sciences including Political Science, Economics, Sociology, and Psychology. Please note that some majors require a specific course.
- One course that is certified as a Philosophical Anthropology course.
- One course from Religious Studies or Theology that is certified as a Religious Difference course.
- ENG 101 Craft of Language.

### Integrative Learning Course

(2 courses required)

- Courses approved for ILC requirements will vary by major. Some majors have specific courses that must be taken.

### Overlays

Students admitted Summer 2016 or later to a BLS Program are required to complete at least one of the three GEP overlays:

1. Ethics Intensive
2. Writing Intensive, or
3. Diversity, Globalization, Non-Western Area Studies.

Please note that PLS students admitted prior to the Fall 2014 semester may have slightly different GEP curriculum requirements as communicated by the PLS Advising Office at the time of admission. Students are encouraged to contact the PLS Advising Office with any curriculum questions. PLS students who are completing degree requirements for a major offered through the Day School are required to complete the GEP for Day Students.
ASSOCIATE DEGREE
PROGRAM IN LIBERAL ARTS

Please note that as of Spring 2017, applications are no longer being considered for this program.

Learning Goals and Objectives

Goal 1. Identify and demonstrate decision making practices.

Objective 1.1 Students will describe in oral and written forms key theories and concepts.

Objective 1.2 Students will apply theoretical principles to solve real-world problems.

Goal 2. Apply critical and analytical skills to communication, writing, and problem solving in their chosen field.

Objective 2.1 Students will identify and defend a position as it applies to a posed case study scenario.

Objective 2.2 Students will identify strengths and limitations of major theoretical approaches for understanding specific real world issues.

Goal 3. Demonstrate an understanding of the Ignatian principles of social justice, ethics, and service to others in order to address the diverse needs of our society.

Objective 3.1 Students will identify pros and cons of specific public policies as they address relevant social and political issues.

Objective 3.2 Students will identify the influence of culture and race in current laws and public policies.

Goal 4. Value and respect the scientific approach to understanding natural phenomena.

Objective 4.1 Students will locate appropriate sources by searching electronic and print databases.

Objective 4.2 Students will use information from current research articles to write a persuasive or explanatory paper.

Major Concentration

Three courses offered in the College of Arts & Sciences. If the student is pursuing a Bachelor’s Degree, these selections should be guided by the requirements for the intended major.
**ACTUARIAL SCIENCE**

**Director**
- Regis

**Committee on Actuarial Science**
- Bobo
- DeLiberato
- Ha
- Klimberg
- Liebman
- Schellhorn

**Minor Advisor**
- Regis

**Undergraduate Majors**
- Actuarial Science (p. 54)

**Undergraduate Minors**
- Actuarial Science (p. 56)

**ASC 150 First Year Seminar (3 credits)**
This first year seminar course provides an introduction to the techniques actuaries use to forecast the future and quantify risk. Selected topics include time series analysis and statistical correlation, credibility theory, pricing insurance products and risk load, portfolio theory and asset allocation management. Students are also required to make a presentation on a topic of current interest in actuarial science. The course is taught in a computer classroom and students make extensive use of Microsoft Excel in the development of mathematical models. 
*Attributes: First-Year Seminar, Undergraduate*

**ASC 301 Actuarial Probability (3 credits)**
This course provides an introduction to the basic probabilistic principles of insurance and Risk Management. Selected topics are covered to enable the application of probability theory to solve problems found in insurance and risk management applications. A problem solving approach will be adopted to provide preparation to pass the first actuarial exam co-sponsored by the Casualty Actuarial Society (Part 1) and the Society of Actuaries (Part P). Prerequisite: MAT 321.
*Prerequisites: MAT 321*
*Attributes: Undergraduate*

**ASC 401 Financial Math - Actuarial Sci (3 credits)**
This course provides an introduction to the basic probabilistic principles of insurance and Risk Management. Selected topics are covered to enable the application of probability theory to solve problems found in insurance and risk management applications. A problem solving approach will be adopted to provide preparation to pass the first actuarial exam co-sponsored by the Casualty Actuarial Society (Part 1) and the Society of Actuaries (Part P). Students may not receive credit for both this course and FIN 493, depending on the content of the course. Please consult the Program Director.
*Prerequisites: MAT 162*
*Attributes: Undergraduate*

**ASC 402 Models of Financial Economics (3 credits)**
This course introduces basics of pricing and hedging (risk management) of financial derivatives. Major topics which will be discussed are: a put-call arbitrage, the binomial model for pricing European and American contingent claims, the continuous time model, Brownian motions, stochastic differential equations, Ito formula, Black-Scholes type equations, delta-hedging, exotic options, affine interest models, price zero-coupon bond, Monte Carlo simulation, variance reduction technique. This course will prepare students for the actuarial science examination in Model of Financial Economics which is co-sponsored by the Casualty Actuarial Society (Exam 3F) and the Society of Actuaries (Exam MFE). If time permits, the class will discuss the fundamental difference between Actuarial Pricing and Financial Pricing and how to combine them to price hybrid products such as Variable Annuities.
*Prerequisites: MAT 322 and ASC 401*

**Actuarial Science Major**

**Program Overview**
The Actuarial Science major seeks to build upon the Jesuit tradition of excellence, as embodied in the GEP, by giving students a strong analytical foundation with which to solve the problems encountered in the management of risk. The Actuarial Science major recognizes that success in the actuarial profession derives from the confluence of insightful business perspectives, rigorous analytical reasoning and a love of learning. The Actuarial Science major bridges the traditional distinction at Saint Joseph’s between the Haub School of Business and the College of Arts and Sciences. To be a successful actuary, analytical skills developed in mathematics and economics courses found in the College of Arts and Sciences must be combined with a strong business background utilizing Finance and Decision & System Sciences courses in the Haub School of Business. The Actuarial Science major is, of necessity, an inter-college and interdisciplinary program. The actuarial profession stresses the ‘love of learning’ component not only in word, but also in deed. Actuaries continue to learn throughout their careers and take great pride in passing the strenuous exams their profession requires for certification. The combination of liberal arts Jesuit values with analytical problem solving skills will uniquely position our graduates to assume leadership roles in the field of Actuarial Science.

In addition to the benefits afforded by the Jesuit liberal arts tradition at Saint Joseph’s, the Actuarial Science major has three goals specific to the actuarial profession: First is to maintain a high level of analytical training while providing the business perspectives and love of learning necessary for success in the actuarial profession. Second is to prepare students to take the first three actuarial exams. Third is to make certain that students’ performance in the three Validation by Educational Experience (VEE) courses is sufficient to receive VEE credit upon completion. Actuarial Science majors will thus be ideally poised to enter the actuarial profession.

**Goals and Learning Goals and Objectives for the B.S. in Actuarial Science Program**

**Goal 1:** Students will master the quantitative and analytical skills required to obtain an entry level position in the actuarial science profession.

**Objective 1.1:** Students will be able to apply and use the fundamentals tools of calculus and the principles of mathematical proofs to solve applied and theoretical mathematical problems.
**Objective 1.2:** Students will be able to demonstrate mastery of the computational skills used in probability theory as well as the use of discrete and continuous probability distributions to model various applications in the natural sciences, engineering, finance, insurance and the social sciences.

**Objective 1.3:** Students will be able to demonstrate understanding of concepts of financial mathematics and how these concepts are applied in the calculation of present and accumulated values of cash flows.

**Goal 2:** Students will have the knowledge to qualify for professional credentials awarded by the Society of Actuaries and the Casualty Actuary Society.

**Objective 2.1:** Students will be able to demonstrate their knowledge of macro and micro economics, corporate finance and statistical modeling and obtain VEE (validation by experience and education) credit from professional actuarial societies.

**Objective 2.2:** Students will know the content covered in the first three professional actuarial science examinations.

**Goal 3:** Students will develop strong communication and interpersonal skills.

**Objective 3.1:** Students will be able to compile oral presentations and written reports that integrate the best practices of technical writing, business and statistical terminology and critical analysis.

**Objective 3.2:** Students will be able to actively engage in guest lectures, team projects, campus events and career development workshops.

**Goal 4:** Students will attain a high level of proficiency in research methodology and computer technology.

**Objective 4.1:** Students will be able to conduct quantitative research, i.e. select appropriate statistical methodology, use computer software, and make inferences and predictions using data from applications in finance, economics and other disciplines.

**Objective 4.2:** Students will be able to demonstrate proficiency in the use of computer software such as EXCEL, SPSS and databases. Students will also be able to do basic computer programming.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

Course approved by the Actuarial Science program director

Satisfactory completion of the Actuarial Science major automatically qualifies the student to apply for a minor in mathematics; subject to the Mathematics minor GPA restrictions (see the Mathematics section of this catalog). Students are ready to take the first and second actuarial exams at the end of their junior and senior years, respectively. Students are encouraged to participate in a summer internship during their junior/senior year. In the past, these internships have proven to be most valuable to students and their subsequent job search.
Actuarial Science Minor

Learning Goals and Objectives for the minor in Actuarial Science

**Goal 1:** Students will master the quantitative and analytical skills required to obtain an entry level position in the actuarial science profession.

**Objective 1.1:** Students will be able to apply and use the fundamentals tools of calculus and the principles of mathematical proofs to solve applied and theoretical mathematical problems.

**Objective 1.2:** Students will be able to demonstrate mastery of the computational skills used in probability theory as well as the use of discrete and continuous probability distributions to model various applications in the natural sciences, engineering, finance, insurance and the social sciences.

**Goal 2:** Students will have the knowledge to qualify for professional credentials awarded by the Society of Actuaries and the Casualty Actuary Society.

**Objective 2.1:** Students will be able to demonstrate their knowledge of macro and micro economics and obtain VEE (validation by experience and education) credit from professional actuarial societies.

**Objective 2.2:** Students will know the content covered in the first professional actuarial science examination.

**Goal 3:** Students will attain proficiency in research methodology and computer technology.

**Objective 3.1:** Students will be able to conduct quantitative research using appropriate statistical methodology.

**Objective 3.2:** Students will be able to demonstrate proficiency in the use of computer software such as EXCEL and SPSS.

With the approval of the Actuarial Science Director, students may minor in actuarial science. Students desiring to minor in actuarial science must take the following courses:

AEROSPACE STUDIES

Air Force Reserve Officer Training Corps (AFROTC)

Department Overview
The Department of Aerospace Studies offered through Detachment 750 at Saint Joseph's University offers college students a three- or four-year curriculum leading to a commission as a Second Lieutenant in the United States Air Force (USAF). In the four-year option, a student (cadet) takes General Military Course (GMC) classes during their freshmen and sophomore years, attends a 4-week summer training program between their sophomore and junior years, and then takes Professional Officer Course (POC) classes during their junior and senior years. Cadets in the three-year option will be dual-enrolled in both GMC classes during their sophomore year, attend a summer training program, and take POC classes during their junior and senior years. A cadet is under no contractual obligation with the USAF until entering the POC or accepting an AFROTC scholarship. The GMC curriculum focuses on the scope, structure, organization, and history of the USAF with an emphasis on the development of airpower and its relationship to current events. The POC curriculum concentrates on the concepts and practices of leadership and management, and the role of national security forces in American society.

In addition to the academic portion of the curricula, each cadet participates in a two-hour Leadership Laboratory and two hours of physical training each week. Leadership Laboratory utilizes the cadet organization designed for the practice of leadership and management techniques.

Further information on the AFROTC program at Saint Joseph's University can be found at sites.sju.edu/afrotc, or students can contact detachment personnel directly at:

Aerospace Studies Program (p. 58)

AER 101 Foundations of USAF I (1 credit)
A survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory (AER 200) is mandatory for Air Force ROTC cadets, and it complements this course by providing cadets with followership experiences.

Attributes: Undergraduate

AER 102 Foundations of USAF II (1 credit)
A survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory (AER 200) is mandatory for Air Force ROTC cadets, and it complements this course by providing cadets with followership experiences.

Attributes: Undergraduate

AER 200 Leadership Lab (0 credits)

AER 201 Evolution USAF Aero Power I (1 credit)
A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC candidate. Featured topics include: Air Force heritage, Air Force leaders, an introduction to ethics and values, introduction to leadership, group leadership problems, and continuing application of communication skills. Leadership Laboratory (AER 200) is mandatory for Air Force ROTC cadets, and it complements this course by providing cadets with their first opportunity to apply leadership experiences discussed in class.

AER 252L Leadership Lab (0 credits)

AER 301 Air Force Leadership Studies I (3 credits)
This course is a study of the leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory (AER 200) is mandatory for Air Force ROTC cadets, and it complements this course by providing advanced leadership experiences, giving students the opportunity to apply leadership and management principles. Prerequisite: Successful completion of Air Force ROTC Field Training

Attributes: Undergraduate

This course is a study of the leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. Leadership Laboratory (AER 200) is mandatory for Air Force ROTC cadets, and it complements this course by providing advanced leadership experiences, giving students the opportunity to apply leadership and management principles. Prerequisite: Successful completion of Air Force ROTC Field Training

Attributes: Undergraduate
AER 351 L POC Leadership Lab (0 credits)
AER 352 L POC Leadership Lab (0 credits)
AER 401 National Security Affairs I (3 credits)
This course examines the national security process, regional studies, advanced leadership ethics, Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. Leadership Laboratory (AER 200) is mandatory for Air Force ROTC cadets, and it complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles. Prerequisite: Successful completion of Air Force ROTC Field Training

Aerospace Studies Minor

Objectives
The AFROTC objectives are to:

- Recruit, select, and retain officer candidates until they are commissioned as second lieutenants in the U.S. Air Force;
- Provide college-level education that qualifies cadets for commissioning in the U.S. Air Force; and
- Develop each cadet's sense of personal integrity, honor, and individual responsibility; enhance knowledge of how the U.S. Air Force serves the national interest; increase understanding of officer professionalism in the U.S. Air Force; and develop potential as a leader and manager.

Program Requirements
The Department of Aerospace Studies offers three-year, and four-year curricula leading to a commission as a Second Lieutenant in the United States Air Force. In the four-year curriculum, a student takes AER 101 and AER 201 courses during the freshman and sophomore years, attends a four-week summer training program, and then takes the AER 301 and AER 401 in the junior and senior years. In the three-year curriculum, a student completes AER 101 and AER 201 during the sophomore year, attends a four-week summer training program, and then takes the AER 301 and AER 401 in the junior and senior years. A student is under no contractual obligation to the Air Force until completing the summer training program or accepting an Air Force scholarship. The subject matter of the freshman and sophomore years is developed from a historical perspective and focuses on the scope, structure, and history of military power with the emphasis on the development of air power and its relationship to current events. During the junior and senior years the curriculum concentrates on the concepts and practices of leadership and management, and the role of national security forces in contemporary American society.

In addition to the academic portion of the curricula, each student participates in a two-hour Leadership Laboratory (AER 200) each week. During this period, the day-to-day skills and working environment of the Air Force are discussed and explained. Leadership Lab utilizes a student organization designed for the practice of leadership and management techniques.

Air Force ROTC offers scholarships for two, three, and four years on a competitive basis to qualified applicants. All scholarships are applied to tuition and lab fees, and include a textbook allowance, plus a tax-free monthly stipend which varies from $250 to $500, depending on graduation date.

Undergraduate Minors
• Minor in Africana Studies (p. 59)

Africana Studies Minor

Students interested in pursuing the Minor in Africana Studies should consult the Advising Support Center of the College of Arts and Sciences.

The Africana Studies program currently includes courses offered by the departments of Economics, English, French, History, Foreign Languages and Literatures, Music, Theatre and Film, Philosophy, Political Science and Religious Studies. Courses taken to satisfy requirements of this program may also serve to satisfy GEP or major requirements, including Integrative Learning courses where appropriate. Participants choose a minimum of six courses from those listed below (both course numbers and course titles must match the ones listed below) with no more than three from any one department. Substitutions may be approved upon written application to the director. Students who successfully complete the program requirements earn a Minor in Africana Studies.

Undergraduate Minors

- Minor in American Studies (p. 60)

American Studies Minor

The minor in American Studies provides a framework within which students can focus their elective and related courses on the study of American history, literature, art, politics, ideas, and institutions. Students majoring in economics, English, history, fine arts, political science, sociology, and theology are especially encouraged to consider a minor in American Studies. By examining the United States from a variety of intellectual perspectives, American Studies minors will develop both a more nuanced understanding of the development and dynamics of American culture and a more sophisticated, interdisciplinary approach to academic study.

Learning Goals and Objectives for American Studies

Goal 1: Students minoring in American Studies will gain a stronger knowledge in the disciplines that make up this minor and thus articulate key aspects of United States history, politics, economics, culture (including art, religions, and literatures) and society.

Objective 1.1: Students will be trained to identify, define, or analyze key aspects of U.S. history, politics, economics, culture (including art, religions, and literatures) and society, using a variety of tools, methods, and perspectives, in order to gain knowledge and articulate their understanding in the disciplines that make up this minor.

Goal 2: Students will produce clear and persuasive analyses of relevant research questions generated by the interdisciplinary approaches offered in the minor of American studies.

Objective 2.1: Students will be able to practice a range of methodological perspectives and practices used to investigate and interpret topics in American Studies, and to present their findings effectively.

Animal Studies is an interdisciplinary field that aims not only to investigate animals themselves, but also the relationship between human and non-human animals. Animal Studies brings together scholarship from the social and natural sciences, as well as the humanities. The Animal Studies minor exposes students to courses focusing on human and animal relations and interactions, animal biology/physiology, animal behavior and cognition, and the role played by non-human animals in the larger world around them. The selection of courses is designed to yield a greater knowledge of and appreciation for animals and our relationship with them.

Goals and Objectives of the Animal Studies Minor

Goal 1. Students will develop greater understanding of the nature of animals and the role played by animals in the larger world.

Objective 1.1: Students will demonstrate knowledge of the role of animals in the broader natural world or in human society.

Objective 1.2: Students will demonstrate knowledge of human-animal interactions and relationships.

Objective 1.3: Students will demonstrate knowledge of the major concepts, historical trends and theoretical perspectives in the discipline of Animal Studies.

Objective 1.4: Students will demonstrate knowledge of animal biology.

Objective 1.5: Students will demonstrate knowledge of animal behavior and cognition.

Goal 2. Students will develop a greater understanding of the ethical issues that surround human-animal interactions.

Objective 2.1: Students will demonstrate knowledge of the theoretical perspectives concerning the moral status of animals.

Objective 2.2: Students will demonstrate knowledge of the ethical issues surrounding the use of animals.

The Minor

All students seeking to minor in Animal Studies will take the following courses:

1. PSY 208 Human-Animal Relations (PSY 100 or PSY 101 is prerequisite)
2. An understanding of how human and non-human animals relate and interact requires understanding form and function of the organisms, so all students seeking to minor in Animal Studies will complete one of the following courses: (These courses all have prerequisites)

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

3. A background in animal behavior and its underpinnings is helpful when considering the interactions and relationships between human and non-human animals. All students seeking to minor in Animal Studies must take one of the following courses: (These courses all have prerequisites)

<table>
<thead>
<tr>

4. Students will take three additional elective courses to complete the Animal Studies minor (Note: many of these have pre-requisites and/or co-requisites); at least one of these courses must be from a department other than Psychology or Biology. Students may choose from among the following, which are included in order to provide additional knowledge of human and non-human animal relations and interactions, animal biology/physiology, animal behavior and cognition, and the role of non-human animals in the larger world around them:

</table>
With permission of the Animal Studies Director, students can count one semester of an appropriate independent study, research, or internship toward the minor (in category 4).

This course is a freshman seminar.

PSY 201 may be used as an elective or to satisfy requirement 3 above, but it may not be used in both categories.

At least half (three) of the courses counting toward the minor must come from outside the student’s major department.
ART

Department Overview
The Art Department’s award-winning faculty, all professional artists or scholars, have exhibited their work in prestigious galleries and published their writings around the globe. Our professors are also dedicated teachers who challenge and inspire students to develop their own self-expression and personal aesthetic.

We offer courses in painting, drawing, traditional photography, digital photography, sculpture, found object art, pottery, ceramics, mosaics, and art history. We have two large studios dedicated exclusively to painting and drawing, another two studios for sculpture and related courses, a ceramics/pottery area with its own kiln house, a darkroom for traditional photography, and a digital photography lab with 30 high-end computers and state-of-the-art software.

Department Mission
Through practice, study and research in a variety of disciplines, the Art Department fosters an appreciation of the transformative nature of art both personally and culturally. Studio and lecture courses in the visual arts and art history integrate intellectually informed, hands-on instruction with elements of creative freedom, independent thought and critical insight.

Providing strong faculty mentorship in both traditional and contemporary methods, the Department encourages individuality and ingenuity in every student. The broadly based curriculum and the rigor of concentration in a specific discipline equips students with the knowledge and skills necessary to flourish beyond the undergraduate experience.

Art Department Environment
The Art Department is the home of the University Gallery in Merion Hall, and the Boland Hall Gallery. The University Gallery mounts six professional exhibitions and one student exhibition each year. The year-end exhibition in the University Gallery is the result of the seniors’ capstone experience, displaying the work of graduating studio art majors. The first exhibition in the Boland Hall Gallery each fall showcases the work of a recent graduate. The Boland Hall Gallery also exhibits student works from the different concentrations, curated by the faculty in those disciplines on an ongoing basis. The final exhibit in the Boland Hall Gallery is the junior majors’ invitational exhibit.

Art in the GEP
All Majors
The “Art, Music/Theater/Film, or Literature” GEP requirement for all majors may be satisfied by any three-credit ART course (Art History or studio course) not requiring a pre-requisite.

Independent Study Program
Independent study courses may be taken for upper division credit in a student’s major department. Advanced or specialized work in Art may be pursued under the guidance of a faculty mentor within the independent study program. Students requesting an independent study should contact the faculty member to be involved in the project at least two weeks prior to the registration period. Students must submit a written project proposal which outlines topics and goals.

College Honors Requirements
To receive College Honors credit, Art majors participate in the Senior Project courses, required of all majors, and complete additional assigned reading, research and discussion that are not required of those students not taking the courses for honors credit. For students in the University Honors program, these two upgraded courses may be counted toward the eight course Honors requirement. To be eligible to participate in College Honors, a student must have a 3.5 GPA. Students interested in completing the College Honors project during their senior year should contact the department chair early in the spring semester of their junior year. More details concerning College Honors may be found in the “Honors Program” section of the catalog.

Art History Courses
All Art History courses are open to all majors with no prerequisites. Students need not take 100-level courses before 200-level courses. All courses fulfill the “Art, Music/Theater/Film, or Literature” requirement.

Students wishing to concentrate in Art History should work closely with their advisors to ensure that their chosen courses cover a wide range of art historical areas (i.e. Ancient, Medieval, Renaissance, and Modern).

Professor: Bruce Wells, Ph.D.; Dennis McNally, S.J., Ph.D.
Associate: Emily Hage, Ph.D.; Susan Fenton, M.F.A.
Assistant: Jury Smith, M.F.A.; Steve Cope, M.F.A.

Chair: Wells

Undergraduate Majors
• Art (p. 73)
• Art as a Second Major (p. 71)
• Art Education (p. 72)

Undergraduate Minors
• Art (p. 74)
• Art History (p. 74)

All Art History courses are open to all majors with no prerequisites. Students need not take 100-level courses before 200-level courses. All courses fulfill the Art/Lit requirement.

Students wishing to concentrate in Art History should work closely with their advisors to ensure that their chosen courses cover a wide range of art historical areas (i.e. Ancient, Medieval, Renaissance, and Modern).

ART 101 Intro to Art History I (3 credits)
A survey of the visual arts and architecture from Pre-Historic times to the Renaissance. Students are introduced to a wide range of artistic practices, styles, and media from many major periods and styles throughout history including pre-historic, Roman, Byzantine, medieval and Gothic.

Attributes: GEP Art/Literature, Undergraduate
ART 102 Art History Survey II (3 credits)
A survey of the visual arts and architecture from the Renaissance to the present. Students are introduced to a wide range of artistic practices, styles, and media, including painting, drawing, prints, photography, sculpture, installation art, performance art, film, video, and architecture. The class examines many major periods and movements in the history of art, including the Italian Renaissance, Impressionism, Cubism, Abstract Expressionism, and the multiple artistic currents that characterize art being created today.
Attributes: GEP Art/Literature, Undergraduate

ART 103 Non Western Art & Architecture (3 credits)
This course moves beyond North America and Europe to offer a global view of the visual arts and architecture. From the Great Pyramids and the Taj Mahal to Ukiyo-e woodcuts, Frida Kahlo’s paintings, and the myriad works by African artists today, such works offer insight into the range and complexity of today’s increasingly globalized climate. For each semester in which it is offered, this course focuses on art from a specific country or region outside of North America and Western Europe, including those found in Africa, Asia, and Central and South America. It takes advantage of the many rich collections of art and architecture in the Philadelphia area by visiting these institutions and analyzing works firsthand.
Attributes: Asian Studies Course, GEP Art/Literature, Non-Western Studies (GEP), Undergraduate

ART 104 The Experience of Architecture (3 credits)
This course is designed to acquaint the student with the medium of architecture as environmental artwork capable of both reflecting a society’s self-image, and directly influencing that image. Works from the Prehistoric through the present periods are included in the scope of this course. The class format includes lectures, discussions, slide presentations, and visits to art historically exemplary buildings in this area and reflectively comparative papers on two buildings per week.
Attributes: GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ART 105 Arts of East Asia (3 credits)
This course introduces students to East Asian art and architecture and to East Asian history and culture in general. Lectures and discussions address major movements in the visual culture of East Asia, including architecture, painting and sculpture. Readings cover both art historical works and primary source material in translation. Themes include religious art, particularly the introduction of Buddhism to East Asia from India, cultural interchange within East Asia, and the collection and display of East Asian art in America. Students are given the opportunity to see relevant works of art in collections in the Philadelphia region.
Attributes: Diversity Course (New GEP), GEP Art/Literature, Globalization Course (New GEP), Non-Western Studies (GEP), Undergraduate

ART 106 Art of Colonial Latin America (3 credits)
This course examines the visual arts of Latin America beginning with the Spanish and Portuguese colonization of the New World until the early nineteenth century when Independence was achieved. It encompasses the study of painting, sculpture, decorative arts and architecture from Mesopotamia, Central America, South America and the Caribbean. We also address issues critical to discussions of the arts of Latin America, such as preconceptions about the political and religious roles in art, appropriation and adaptation of western cultures, the incorporation and relationship with European/American art theory and methods, and the reevaluation of Latin American art today. Students are given the exciting opportunity to examine works of art from Saint Joseph’s University’s important collection of colonial Spanish American art as well as collections at nearby museums.
Attributes: GEP Art/Literature, Non-Western Studies (GEP)

ART 107 Women, Gender, and Art (3 credits)
This course offers a survey of art history with an emphasis on gender. It will consider how gender informs the production, reception, and cultural understanding of art and imagery. Students will consider how gender is relevant to the creation and study of arts and culture. We will study artists who have used art to effect social change. Exploring feminist approaches to art historical study, we will analyze perceptions of gender through visual culture and personal experience. We will examine the ways that certain ideals of masculinity and femininity are represented in art and its history to gain insight into gender performance and sexual identity both in past periods and in contemporary society.
Attributes: Diversity Course (New GEP), Gender Studies Course, GEP Art/Literature, Undergraduate

ART 121 Introduction to Studio Art (3 credits)
This course is designed to introduce the essential elements of painting, drawing and sculpture. Working from the landscape, still life and the figure, students research two-dimensional form and space through tone, size relationships, mark-making and composing the picture plane. Ultimately we try to integrate these elements producing a unified whole as well as finding an equivalent to the artists’ experience. Media range from small pencil drawings to larger more ambitious charcoal drawings.
Attributes: GEP Art/Literature, Undergraduate

ART 133 Drawing I (3 credits)
Students work from their actual visual experience. Working from the landscape, still life and the figure, students research form and space through tone, size relationships, mark-making and composing the picture plane. Ultimately we try to integrate these elements producing a unified whole as well as finding an equivalent to the artists’ experience. Media range from small pencil drawings to larger more ambitious charcoal drawings.
Attributes: GEP Art/Literature, Undergraduate

ART 135 Painting I (3 credits)
This course concentrates on becoming familiar and proficient with the basics of image-making through painting, developing good studio practice, introducing terminology, developing language and examining the work of established professional painters, so that constructive discussions and self-analysis may take place. The subject is studio-based, and the course focuses on working from life (meaning that students work from their actual visual experience) or on learning from the attempt to express an interior reality. Working from various motifs as appropriate, including the landscape, still life and the figure, students research form and space using paint.
Attributes: GEP Art/Literature, Undergraduate
ART 136 Landscape Painting (3 credits)
This course is designed to introduce the student to the essential elements of painting. We research these elements through the unique challenges that arise from notating the landscape, which include: overlapping forms, color temperature, the vastness of an outdoor space, scale relationships and atmospheric perspective. Ultimately we try to integrate these elements producing a unified whole as well as finding an equivalent to the artists’ experience.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

ART 137 Printmaking (3 credits)
In this class we explore the processes of printmaking, resulting in as many as five projects all of which are realized in numbered editions. The areas covered include: reversing the image, direct cutting, color registration, and developing a substantial image from working drawings. The class includes slide presentations and critical discussions of student works.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Fine Performing Arts.
Attributes: GEP Art/Literature

ART 138 Landscape Drawing (3 credits)
This course is designed to introduce the student to the essential elements of drawing from the landscape. We research form and space while working from the landscape. Some of the issues include: reversing the image, direct cutting, color registration, and developing a substantial image from working drawings. The class includes slide presentations and critical discussions of student works.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Fine Performing Arts.
Attributes: GEP Art/Literature

ART 140 3-D Studio Art (3 credits)
This introductory course explores ideas and techniques for thinking critically and working three-dimensionally. Visual language and understanding of form is taught through the use of simple materials such as wood and wire to construct projects. The students discuss the variety of problem-solving issues connected to making sculpture. Three-dimensional theory, language, expression, and practical applications are emphasized along with the use of basic tools.
Attributes: GEP Art/Literature, Undergraduate

ART 142 Pottery I (3 credits)
This course is an introduction to the potter’s wheel. The primary focus is functional pottery with a minor emphasis on building and modeling by hand. Topics include basic handbuilding techniques, basic to intermediate throwing techniques, ceramic surfacing and firing methods, and concept development. In this course, students explore a variety of functional pottery forms including cups, bowls, vases and pitchers. Classes consist of technical demonstrations, lectures, practice time, and critiques.
Attributes: GEP Art/Literature, Undergraduate

ART 143 Mosaics I (3 credits)
This course focuses on the relationship between image and object through an exploration of ceramic tile and mosaics. Found adorning the most sacred of spaces and often performing the most mundane functions, ceramic tile is a form of artistic inquiry that explores the intersection of art and utility. Topics include visual perception and language; basic painting and drawing methods; non-objective, abstract and representational imagery; and the construction, firing, and glazing of ceramic tile and mosaics.
Attributes: GEP Art/Literature, Undergraduate

ART 144 Ceramics I (3 credits)
This course is an introduction to building and modeling clay vessels and sculptures by hand with a minor emphasis on the potter’s wheel. Topics covered include basic to intermediate handbuilding techniques, basic throwing techniques, ceramic surfacing and firing methods, and concept development. Classes consist of technical demonstrations, lectures, practice time, and critiques. In this course, students explore a variety of functional and sculptural forms.
Attributes: GEP Art/Literature, Undergraduate

ART 145 Figurative Sculpture (3 credits)
This introductory course explores ideas and techniques for sculpting the figure from life. Traditional figurative sculpting is taught through study of anatomical proportion, muscular structure, and clay modeling. The history of contemporary figurative sculpture will be explored through lectures, power point presentation, videos, and student research. This class culminates in a project based on contemporary figurative processes.
Attributes: GEP Art/Literature, Undergraduate

ART 147 Intro to Found Object Art (3 credits)
Making art from everyday objects is regarded as a form of sculptural expression. This class will focus on both the historical and contemporary styles of Found Object art-making. Students are required to both find/purchase objects and reconfigure them into sculptures. Common venues for acquiring objects are explored. These include flea markets, thrift stores, recycling centers, garage sales, and one’s own basements/attics. Once acquired we explore the various methods of reconfiguration into objects of art.
Attributes: GEP Art/Literature, Undergraduate

ART 150 Blasphemy & Devotion (3 credits)
Modern and contemporary artists and architects have engaged the many intersections between art and religions, and unprecedented globalization has helped spur dialogs among a wide range of creeds and has called attention to artists’ (sometimes controversial) visual responses to religion worldwide. This course also considers debates raised in recent exhibitions and scholarly texts. Artists studied include VanGogh, Warhol and Kahlo. Although some emphasis is placed on the relationship between art and Catholicism, students also analyze creative responses to many faiths, including other forms of Christianity, Judaism, Hinduism, Buddhism, and Islam.
Attributes: First-Year Seminar, Undergraduate

ART 157 Music History I (3 credits)
ART 170 Spec. Topics & Ind. Study (FR) (3 credits)
Concentrated focus on a selected topic in Art at an introductory level. GEP certifications vary by section.
Attributes: GEP Art/Literature, Undergraduate
ART 171 Color Composition (3 credits)
A hands-on photography course aimed at the student who wants to develop the perceptual, creative and technical skills needed to use a camera effectively, with color film. Presentations of color photographs, class discussions and student critiques of their own work deal with elements of photographic composition, focus, and light. Student work is done in the medium of color slides.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

ART 172 Traditional Photography (3 credits)
This course investigates film-based black and white photography as an expressive and creative medium. Topics include the skills of using a 35mm camera effectively, film processing, basic darkroom printing techniques, and an understanding of the aesthetics of photography. Adjustable 35mm cameras will be provided to any students who need them.
Attributes: GEP Art/Literature, Undergraduate

ART 173 Digital Photography I (3 credits)
This course teaches the fundamental principles of photography using digital materials and equipment. Students will use digital cameras, computers, and scanners as tools for image manipulation and creative expression through the latest version of Adobe Photoshop and Lightroom. Topics will include basic photographic elements of exposure, camera controls, focus, lighting, tone, and a brief introduction to color. A limited number of digital cameras are available to students who need them.
Attributes: GEP Art/Literature, Undergraduate

ART 174 Alt. Photographic Processes (3 credits)
This course is an introduction to the photographic image as it relates to the fine art and contemporary commercial worlds, and the creative possibilities that result from the combination of historic printing methods with contemporary media. Students will learn a variety of alternative processes that can produce or appropriate “photographic” images without the use of a camera. Experimentation with “non-silver” techniques such as solar printing (sun prints), hand-applied emulsions, and computer-generated negatives will allow students to explore their own artistic approach to a photographic printmaking process that does not require extensive technical expertise.
Attributes: GEP Art/Literature, Undergraduate

ART 178 Art History &Photography:Italy (3 credits)
This Art study tour will have a combined emphasis on the history of Italian Renaissance art and the practice of photography. Through travel to the Italian cities of Venice, Florence, and Rome students will have the opportunity to explore the great works of art and architecture that defined the Renaissance in Italy – St. Mark’s Square, the Uffizi, the Sistine Chapel and more. They will also spend time developing photographic skills as they explore these cities with an eye toward creating their own photo essay. Travel will be over Spring Break. No prior experience in either art history or photography is required.

ART 180 Encountering Mystery (3 credits)
This course investigates the relationship between art, religious belief structures, and mystical experience. With a number of texts from Comparative Religion and Art Theory as backdrop, the lectures, discussions, and papers will involve presentations of art and architecture which circumscribe religious belief structures as well as expressions of spiritual conviction. Discussions of the essential elements of the I-am-spiritual-but-not-religious mindset will expose contrasting experiences of the mysterium tremendum et fascinans, the “numinous” wholly Other. Reflection on experience will lead to a stronger ability to express one’s own attitudes about the scientific mindset and the creative expression of spiritual ideas and ideals.
Prerequisites: PHL 154 and (THE 154 or THE 221)
Attributes: Faith-Reason Course (New GEP), GEP Art/Literature, Undergraduate

ART 202 Late Antique and Medieval Art (3 credits)
This course examines human cultural production between the years 250 and 1300. Beginning in the last centuries of the Roman Empire, and continuing through the luminous art of the "dark ages," the topics of study conclude with the towering monuments of the French Gothic style. Particular attention is given to works of architecture and engineering, and class discussion explores themes of social as well as political history.
Attributes: GEP Art/Literature, Undergraduate

ART 203 Renaissance Art (3 credits)
This course analyzes key works of art and architecture and art historical trends from the period of the 14th to 17th century. The focus of our exploration is on the art of Europe, with a particular emphasis on Italy, Spain, and the Netherlands. We discuss the careers and works of artists such as Michelangelo, Leonardo da Vinci, and Albrecht Dürer. We also explore the social and historical context of the art they produced. Attention is paid to a variety of art forms, including painting, sculpture, and architecture.
Attributes: GEP Art/Literature, Undergraduate

ART 204 Baroque Art and Architecture (3 credits)
This course analyzes key monuments and art historical trends from the late 17th century to the mid-18th century. The focus of our exploration is on the art of Europe, with a particular emphasis on Italy, Spain, and the Netherlands. We discuss the careers and works of artists such as Caravaggio, Gianlorenzo Bernini, Artemisia Gentileschi, and Jan Vermeer, and also explore the social and historical context of the art they produced. Attention is paid to a variety of art forms, including painting, sculpture, and architecture.
Attributes: GEP Art/Literature, Undergraduate

ART 205 NeoClassic-Impression1780-1880 (3 credits)
From the power of Neoclassicism to the decadence of the fin-de-siècle, painters, sculptors, and architects challenged tradition and transformed art during the dynamic and often turbulent years between 1780 and 1880. The death of the revolutionary hero, the search for spiritual meaning, the "rape" of the countryside by industrialism, the anxious masculinity of romanticism, and the emergence of such conceptions as "Orientalism" and nationalism are some of the themes that are addressed through the art of this period. Students study the careers of such artists as David, Delacroix, Ingres, Gericault, Constable, Turner, and Goya, and the radical landscape painting of the mid-century that foreshadowed Impressionism. Themes explored include gender and sexuality, patronage, and political censorship, and we focus on the social and political contexts in which works were produced, exhibited, and understood.
Attributes: GEP Art/Literature, Undergraduate
ART 206 Impressionism (3 credits)
This course examines paintings produced between the mid-nineteenth and early twentieth centuries. We consider artists from many countries who worked and exhibited in Paris at this time, including Monet, Renoir, Degas, and Cassatt. This course also includes discussion of artists who immediately followed the Impressionists, such as Manet, Seurat, Cézanne, Van Gogh and Gauguin. We consider the reception of these artists' works by their contemporaries and since, and examine these works within their wider artistic, cultural, political, and social contexts.
Attributes: GEP Art/Literature, Undergraduate

ART 207 American Art and Architecture (3 credits)
This course offers a survey of the history of American art and architecture. Organized around important episodes in American history, including the Civil War, the Harlem Renaissance, and the Civil Rights Movement, this course considers such topics as the role of gender and racial identity in the content, authorship, and reception of artworks. The class examines major movements in the history of American art, with an emphasis on works that historically have been overlooked because of the race, gender, religion, nationality, and/or ethnicity of the artist or architect. In an effort to show the currency and relevance of these issues, and to scrutinize how art institutions treat (or ignore) issues of diversity, the course requires students to visit area museums and galleries.
Attributes: GEP Art/Literature, Undergraduate

ART 208 Modern Art & Architecture (3 credits)
This course offers a survey of the history of European and American art and architecture, with a focus on the first half of the 20th century. Students are introduced to a wide range of artistic practices, styles, and media, including painting, drawing, prints, photography, sculpture, film and architecture. The class examines major movements within the history of art, including such artists as Pablo Picasso, Marcel Duchamp, Frida Kahlo, and Salvador Dalí. It takes advantage of the many rich collections of art and architecture in the Philadelphia area by visiting these institutions and analyzing works firsthand.
Attributes: GEP Art/Literature, Undergraduate

ART 209 Contemporary Art (3 credits)
The period from the mid-twentieth century to the present is one of exceptional political, social, cultural, and technological upheaval. This course offers a survey of European and American painting, drawing, prints, photography, sculpture, installation art, performance art, film, video, and architecture within the context of these changes. Topics covered include debates regarding abstraction and figuration, as well as feminism, primitivism, modernism, postmodernism, and the impact of such factors as technology, religion, and war on the creation and reception of art.
Attributes: GEP Art/Literature, Undergraduate

ART 210 Museum Studies (3 credits)
This course explores the history of museums and debates about the nature of collecting and modes of display. Using historical and theoretical texts as well as select case studies, it focuses on the evolving structure and mission of the museum and its impact on our understanding of art and related fields. In addition to the study of the history of exhibitions and the role of the museum, the course investigates the various jobs and responsibilities that people hold within museums. Guest speakers include members of the curatorial, publications, registration, education, and installation staff at various area museums. We take advantage of the distinct art institutions in Philadelphia, exploring their exhibitions and permanent collection displays. Although centered on art museums, this course also considers a broad range of museum practices.
Attributes: GEP Art/Literature, Undergraduate

ART 212 History of Photography (3 credits)
Photography is a widely used but relatively little understood medium. This course offers a survey of photography in the United States and Europe from its invention to the present. We examine the ways in which photography has been employed by amateurs, artists, anthropologists, politicians, and scientists for a wide range of purposes. We also examine how the medium has affected portraiture, painting, documentation, journalism, and advertising. The class considers photography in the context of continuing debates regarding the nature of reality and truth, photography's status as art or document, subjectivity versus objectivity, and issues of originality, authenticity, and power.
Attributes: GEP Art/Literature, Undergraduate

ART 221 Art Education in the Schools (4 credits)
Qualified students are invited to take part in a supervised practicum, teaching at a local grammar school. In this course there are seminar discussions in methods of teaching, levels of mark making, learning styles, art historical references for the learning lessons being taught this week in the school in an eight-week intensive experience of teaching a group of fifteen to thirty primary school students. While this is being done, the student keep a weekly diary from which they construct a ten-page term paper on the meaning of the experience. This is a service learning course. This course may count as a GEP course if taken in conjunction with an introductory studio course (studio, drawing, painting, 3D, ceramics, traditional or digital photography).
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Art Education or Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

ART 233 Drawing II (3 credits)
Our purpose is to explore both formally and conceptually the elements of drawing in order to realize an authentic vision. Through directed exercises students discover new possibilities in the essential experience of drawing. These exercises cover the formal issues including surface and spatial geometry, the relationship between tone or scale to spatial depth, the mark as a means to personal expression and the integration of pictorial elements into a unified whole. In order to create new possibilities, students experiment with developing images and explore how and why images become interesting. This course may be taken as an independent study.
Prerequisites: ART 1311 (may be taken concurrently) or ART 1331 (may be taken concurrently) or ART 121 (may be taken concurrently) or ART 133 (may be taken concurrently)
Attributes: GEP Art/Literature, Undergraduate

ART 235 Painting II (3 credits)
Through lectures, critical discussions course work and examination of the work of established professional painters, students will study content and material issues pertinent to producing compelling artworks. Finding one's own voice as well as an authentic application of the media are primary objectives. Formal concerns such as dynamic composition and rigorous construction of form and space will be stressed. This course may be taken as an independent study.
Prerequisites: ART 135
Attributes: GEP Art/Literature, Undergraduate
ART 239 Concepts and Artmaking (3 credits)
Artists have always made work based on concepts; ideas upon which the image or process is based. For example, the Impressionists in the second half of the 19th century made work based on concepts relevant to the time, choosing to paint common, every day subjects in plain air. Those concepts affected the processes, materials, and subjects of their work. In this course we explore how contemporary artists develop the concepts underpinning their work as well as develop our own conceptual thought concerning art-making. The focus each week is on making our own work. In this regard we will be paying particular attention to the ideas that are motivating us to make the image in the first place, clarifying them by considering some of the factors that influence our ideas and consequently refining the process by which we pursue the development and actualization of those ideas. We will augment our own ideas by researching the concepts of a number of contemporary artists. There are restrictions concerning the materials or medium, except those restrictions that we choose to place on ourselves as a result of the deepening understanding of our concepts and processes. The process of developing your own ideas in art is invaluable if you want to make art in the future; and if not, may simply alter your understanding of the next step you are going to take in your life, helping you to clarify your wants and desires. This course may be taken as an independent study.
Prerequisites: ART 121 or ART 133 or ART 135 or ART 141 or ART 142 or ART 143 or ART 144 or ART 172 or ART 173
Attributes: GEP Art/Literature, Undergraduate

ART 241 Sculpture II (3 credits)
Building on skills acquired in ART 141, this course covers the use of repetition to achieve scale, the relationship between interior and exterior spaces, and the critical analysis associated with these techniques. Projects are executed in simple materials such as wood. This course may be taken as an independent study.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

ART 242 Pottery II (3 credits)
This course covers intermediate wheel-throwing techniques to create complex functional forms, such as teapots, lidded jars, forms within forms, and large vessels. Emphasis is given to the ergonomics of each vessel. Topics also include function as an abstract attribute of material expression and the role of handmade pottery from a historical and contemporary viewpoint. Classes consist of technical demonstrations, lectures, practice time, and critiques. This course may be taken as an independent study.
Attributes: GEP Art/Literature, Undergraduate

ART 243 Mosaics II (3 credits)
This course covers a broad range of ceramic surfacing techniques, from traditional to alternative processes, and explores the relationship among surface, content, form, and function. Topics include surface undulation, surface depth, texture, sheen, color, and value. Students are encouraged to explore the experimental use of materials and to develop a personal approach to glaze and surface. Projects include functional and sculptural work, both two-dimensional and three-dimensional, and emphasize the dialogue between surface and form. This course may be taken as an independent study.
Prerequisites: ART 143 or ART 142 or ART 144
Attributes: GEP Art/Literature, Undergraduate

ART 244 Ceramics II (3 credits)
This course explores the techniques and concepts involved in creating complex hand-built and wheel-thrown vessels and sculptures. Assignments are concept-driven and encourage creative inquiry and independent thought. The emphasis is not only the refinement of skill but the importance of content. Topics include sculptural approaches to clay, the wheel as an idea generating tool, alternative surfacing methods, and other research-driven investigations. Classes consist of technical demonstrations, lectures, practice time, and critiques. This course may be taken as an independent study.
Prerequisites: ART 142 or ART 143 or ART 144
Attributes: GEP Art/Literature, Undergraduate

ART 245 Atmospheric Firing: Wood/Salt (3 credits)
This course explores the effects of wood, salt, and raku firing on pottery and sculpture. Firings include high-fire, midrange, and low-fire. To create a type of visual poetry, the projects in this course focus on the distinct attributes of each firing: fuel source, timing, weather, loading method, and flame path. Topics include the impact of heat movement, atmosphere, and temperature on aesthetics and functionality. Some off-campus events are required, including firing a Japanese style noborigama kiln. This course may be taken as an independent study.
Attributes: GEP Art/Literature, Undergraduate

ART 246 Ceramic Sculpture (3 credits)
Students explore the development of ceramic sculpture from its earliest beginnings to contemporary work being done. A variety of techniques to both construct and glaze ceramics are studied. Students will be expected to produce a body of sculptural work that explores both personal ideas and historical techniques. This course may be taken as an independent study.
Attributes: GEP Art/Literature, Undergraduate

ART 247 Appropriated Art (3 credits)
Making art from everyday objects is regarded as a form of sculptural expression. This class focuses on both the historical and contemporary styles of Found Object art-making. We develop the skills acquired in ART 147 or ART 141. This course may be taken as an independent study.
Attributes: GEP Art/Literature, Undergraduate

ART 248 Figurative Sculpture II (3 credits)
This class consists of research, discussion, and practice on contemporary figurative and body art issues. Projects throughout the semester explore different sculptural working methods, processes, and techniques including armature, traditional materials, molding/casting, and form building. Outcome of student work is focused on understanding of human gesture and individual expression.
Attributes: Undergraduate

ART 266 Women in Modern Theatre (3 credits)
ART 270 Spec. Topics & Ind. Study (SO) (3 credits)
Concentrated focus on a selected topic in Art History. Topic and content vary from semester to semester. Course may be taken twice for credit as the topic changes.
Attributes: GEP Art/Literature, Undergraduate
ART 272 Traditional Photography II (3 credits)
This course provides a continuation or review of film-based camera and
darkroom techniques while introducing more advanced and experimental
development. Topics include archival printing, advanced exposure
controls, experimental camera work, and darkroom print manipulation.
Slide presentations of master photographers will illustrate the flexibility
of the medium and enable students to develop visual analysis, as
well as their own creative expression. Adjustable 35mm film cameras
will be provided to any student who needs one. May be taken as an
independent study with the instructor’s permission during years when it
is not regularly scheduled.
Prerequisites: ART 172
Attributes: GEP Art/Literature, Undergraduate

ART 273 Digital Photography II (3 credits)
This second level digital photography course explores a broad range
of topics in the creative use of digital photography. Using Photoshop
software, students will develop a high level of personal control of their
images. Topics include lighting, perception and use of color, digital
toning and “hand coloring,” combining multiple layers, creative masking,
combining text and images, image web design, digital “silkscreen”
techniques, scanning, and digital fine printing. A limited number of digital
.cameras are available to students who need them.
Prerequisites: ART 275 or ART 173
Attributes: GEP Art/Literature, Undergraduate

ART 275 Color Photography (3 credits)
This course is a comprehensive introduction to digital color photography.
Students learn how light influences color, how colors interact within
an image, and how color influences meaning and emotional impact.
Topics will include camera work and an understanding of light, digital
processing, and printing with an emphasis on color theory and the history
of fine art color photography.
Prerequisites: ART 172 or ART 173
Attributes: GEP Art/Literature, Undergraduate

ART 301 Art and Archaeology: Greece (3 credits)
This course examines the material culture remains of various cities
prominent in the history of Greece. Knossos, the main city of the island
of Crete, Troy, and Mycenae are among the sites studied for their
importance in the Bronze Age (3000-1100 BCE). After a detailed study of
Greek architecture and the evolution of key building types such as the
temple, the stoa, and the theater, students explore the material remains
of Olympia, Delphi, and Athens. The myths associated with these cities
are also included.

ART 302 Art and Archaeology: Italy (3 credits)
An introduction to the art and archaeology of Roman Italy, which will
explore through digital images the major surviving monuments of Rome
and its environs, of the Etruscans, and of other famous sites in Italy.

ART 331 Works on Paper (3 credits)
In this course, students address more sophisticated problems in black
and white composition, using graphite, charcoal, and ink. They then are
introduced to color media appropriate for paper, pastel and aquarelle,
investigate the interaction of drawing and photography, and experiment
with collage techniques. The course presupposes that drawing is a
significant medium in itself and that works on paper are not mere way-
stations to other “heavier” media, such as painting or sculpture. This
course may be taken as an independent study.
Attributes: GEP Art/Literature, Undergraduate

ART 333 Drawing III (3 credits)
Drawing III is an intensive and rigorous study of drawing where students
produce an enormous amount of work. The issues we investigate include:
organizing your visual experience into a clear pictorial idea, recognizing
and articulating the structure of a work, the relationships in tone and
the uses of scale as an element. This course is directed to be a more
personal exploration of drawing and images. Students will be encouraged
to produce a series of related images. This course may be taken as an
independent study.
Prerequisites: ART 233
Restrictions: Enrollment is limited to students with a major, minor, or
concentration in Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

ART 335 Painting III (3 credits)
This course concentrates on realizing convincing form, rigorous
construction of the entire picture plane and the pursuit of finding an
authentic vision. There is a focus on the scale of the paintings and
tone relationships. We research what personal narrative is and how it
could impact the image. The students produce paintings in a range of
sizes including some very large works. This course may be taken as an
independent study.
Restrictions: Enrollment is limited to students with a major, minor, or
concentration in Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

ART 341 Sculpture III (3 credits)
Advanced skills in three-dimensional concepts and techniques. This
course may be taken as an independent study.
Restrictions: Enrollment is limited to students with a major, minor, or
concentration in Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

ART 344 Ceramics III (3 credits)
More complex work in ceramic sculpture, pottery-making or mosaics are
studied in this class. It is expected that the students in this class will
explore and develop their personal approach to both ceramic art and
glazing/firing techniques. One other class in ceramics is required before
enrolling in this class. The requirements are designed to develop a strong
sense of the history in ceramics and the students’ own skills in ceramic
art. This course may be taken as an independent study.
Attributes: GEP Art/Literature, Undergraduate

ART 370 Spec. Topics & Ind. Study (JR) (3 credits)
Concentrated focus on a selected topic in Studio Art. Topic and content
vary from semester to semester. Course may be taken twice for credit as
the topic changes.
Attributes: GEP Art/Literature, Undergraduate

ART 372 Directed Projects - Photography (3 credits)
This course provides students with an opportunity to build a
comprehensive portfolio of photographic work. Topics include specific
shooting assignments that lead to individual projects that investigate
the photography student’s personal vision. Lectures and presentations
review the work of selected fine art photographers, both historic and
contemporary, for group discussion and analysis. With input from the
instructor and the class, students develop their own photographic
project in traditional, non-silver, or digital media, reflecting historic
and/or contemporary genres of image making. May be taken as an
independent study with the instructor’s permission during years when it
is not regularly scheduled.
Prerequisites: ART 172 or ART 173 or ART 272 or ART 273
Attributes: GEP Art/Literature, Undergraduate
**ART 373 Photo Essay/Docu Photo (3 credits)**
This course is an introduction to the tradition of documentary photography. Topics will emphasize why people photograph, the stories photographs can tell us, and how photographs can manipulate or evoke emotions. Presentations will include the work of master documentary photographers, both fine art and journalistic, enabling students to discuss and analyze social documentation as well as autobiographical documentation. Assignments will encourage students to look at their own work in a new way and allow them to choose their own subjects for a photographic essay. May be taken as an independent study with the instructor’s permission during years when it is not regularly scheduled.

Prerequisites: ART 273
Attributes: GEP Art/Literature, Undergraduate

**ART 374 Studio Photography (3 credits)**
This course investigates the versatility and creative potential of the photographic studio and the “directed” photographic stage. Topics will include portraiture, full figure study, still life, and staged environments, as well as the controlled lighting and set-ups of a photographic studio. Contemporary and historical references will include slide presentations, as well as visits to a museum or gallery and a professional photography studio. May be taken as an independent study with the instructor’s permission during years when it is not regularly scheduled.

Prerequisites: ART 172 (may be taken concurrently) or ART 172 (may be taken concurrently)
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Fine Performing Arts.
Attributes: GEP Art/Literature, Undergraduate

**ART 444 Ceramics IV (3 credits)**
More complex work in ceramic sculpture, pottery-making or mosaics is studied in this class. It is expected that the students in this class will explore and develop their personal approach to both ceramic art and glazing/firing techniques. One other class in ceramics is required before enrolling in this class. The requirements are designed to develop a strong sense of the history in ceramics and the students’ own skills in ceramic art. This course may be taken as an independent study.

Attributes: GEP Art/Literature, Undergraduate

**ART 470 Spec. Topics & Ind. Study (SR) (3 credits)**
Concentrated focus on a selected topic in Art at an advanced level. Course may be taken twice for credit as the topic changes. GEP certifications vary by section.
Attributes: GEP Art/Literature, Undergraduate

**ART 491 Internship in the Arts I (3 credits)**
Junior and Senior art majors may broaden their perspective by completing an approved internship in the arts. Work in industry, art studios, theatres, galleries and museums offers potential opportunities for internships. Students are expected to spend six to eight hours per week on site, and to maintain a weekly journal of their experiences and to secure a report by their immediate supervisor at mid semester and upon completion of the work. Prior approval by the chair is required.
Attributes: GEP Art/Literature, Undergraduate

**ART 492 Internship in the Arts II (3 credits)**
Junior and Senior art majors may broaden their perspective by completing an approved internship in the arts. Work in industry, art studios, theatres, galleries and museums offers potential opportunities for internships. Students are expected to spend six to eight hours per week on site, and to maintain a weekly journal of their experiences and to secure a report by their immediate supervisor at mid semester and upon completion of the work. Prior approval by the chair is required.
Attributes: GEP Art/Literature, Undergraduate

**ART 493 Ind. Research in the Arts I (3 credits)**
Students pursuing advanced independent projects, especially those in connection with departmental or university honors, may register for these courses under the direct mentorship of department faculty. Prior approval of both faculty mentor and chair required.
Attributes: GEP Art/Literature, Undergraduate

**ART 494 Ind. Research in the Arts II (3 credits)**
Students pursuing advanced independent projects, especially those in connection with departmental or university honors, may register for these courses under the direct mentorship of department faculty. Prior approval of both faculty mentor and chair required.
Attributes: GEP Art/Literature, Undergraduate

**ART 495 Senior Project I (Capstone) (3 credits)**
A student majoring in Art (excluding double majors) must do a supervised senior project, which combines both production and analysis. Under a mentor’s guidance the student researches some specific aspect of one of the arts; the first semester’s research should result in a paper describing the research and its intended product. The second semester’s work consists of production and final exhibition or research paper. (Art Education majors and double majors may, but are not required to complete the Senior Project courses. Instead those students may take two additional Art courses).
Attributes: GEP Art/Literature, Undergraduate

**ART 496 Senior Project II (Capstone) (3 credits)**
A student majoring in Art (excluding double majors) must do a supervised senior project, which combines both production and analysis. Under a mentor’s guidance the student researches some specific aspect of one of the arts; the first semester’s research should result in a paper describing the research and its intended product. The second semester’s work consists of production and final exhibition or research paper. (Art Education majors and double majors may, but are not required to complete the Senior Project courses. Instead those students may take two additional Art courses).
Attributes: GEP Art/Literature, Undergraduate

**ART 497 Professional Practices Seminar (3 credits)**
The class is a seminar with practical applications. It is part laboratory for hands-on projects and part discussion group. Projects include: creation of a professional website, creation of a professional resume and creation of writing samples, application for a grant and public speaking. Class trips to galleries and museums will form the basis for discussions about contemporary art and for critical writing assignments. Topics under discussion include: the transition from student to professional, job searches, gallery contracts, grant applications, graduate school options and trends in contemporary art. Class attendance and participation are mandatory. By the end of the semester, students will have a website for their work, a resume, an artist statement and writing samples. They will know how to apply for a grant and they will be aware of the possibilities for employment and exhibition in the arts. The class is aimed at Art majors, but those outside the major will also find it useful.
Attributes: GEP Art/Literature, Undergraduate

**Art as a Second Major**

**Learning Goals and Outcomes**

**Goal 1:** To develop a visual awareness through analysis and creative work.

**Outcome 1.1:** Distinguish the components of a work of art, and
Outcome 1.2: Discuss the context of a work of art.

Goal 2: To manifest their visual awareness in their own work.

Outcome 2.1: Produce a body of creative visual works, and/or
Outcome 2.2: Write critical analysis of visual works of art.

Students wishing a double major with Art as their second major must complete the requirements for the major with the exception of the Senior Project. However, they may take the Senior Project courses with departmental approval.

See here for requirements: https://nextacademiccatalog.sju.edu/arts-sciences/art/art-major

Art Education Major

Learning Goals and Outcomes

Goal 1: To develop a visual awareness through analysis and creative work.

Outcome 1.1: Distinguish the components of a work of art, and
Outcome 1.2: Discuss the context of a work of art.

Goal 2: To manifest their visual awareness in their own work.

Outcome 2.1: Produce a body of creative visual works, and/or
Outcome 2.2: Write critical analysis of visual works of art.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

Art Major

Students whose primary major is Art will receive a Bachelor of Arts (B.A.) degree upon graduation. The Art Major is designed to provide a concentration in the visual arts, within the context of a liberal arts education.

Our majors have developed careers in a wide range of art-related areas including advertising, gallery and museum curating, graphic design and web design, pottery, interior design, fashion design, and architecture. A

Summative Assessment

During their final two semesters Art majors create a summative portfolio of visual artwork or an in-depth work of critical scholarship. This is the culminating expression of their years of pushing their own personal boundaries so that they might know themselves as artists or historians seeking excellence.

Art majors focusing on studio art present their portfolio as a public exhibition in the Senior Show at the University Gallery in Merion Hall. They will have already had the opportunity to show their work in a juried Junior Show in the Boland Hall Gallery.

Art majors focusing on art history write in-depth research papers and present their findings at a public Senior Art History Thesis Presentation.

For all majors there are at least two faculty mentors and the professor of record, who provide critical perspectives on the progress of their year-long project. The culminating senior project provides an accurate reflection of the degree of success achieved by each major. It provides the basis for the next stage in their creative and scholarly careers.

Learning Goals and Outcomes

Goal 1: To develop a visual awareness through analysis and creative work.

Outcome 1.1: Distinguish the components of a work of art, and

Outcome 1.2: Discuss the context of a work of art.

Goal 2: To manifest their visual awareness in their own work.

Outcome 2.1: Produce a body of creative visual works, and/or

Outcome 2.2: Write critical analysis of visual works of art.

Art Minor

Learning Goals and Outcomes

Goal 1: To develop a visual awareness through analysis and creative work.

Outcome 1.1: Distinguish the components of a work of art, and
Outcome 1.2: Discuss the context of a work of art.

Goal 2: To manifest their visual awareness in their own work.

Outcome 2.1: Produce a body of creative visual works, and/or
Outcome 2.2: Write critical analysis of visual works of art.

Students wishing a minor in Art must contact the chair to declare their intention. The minimum requirement for the minor is the completion of six courses in Art (18 credits) and departmental approval. The department offers advising to all declared art minors.

Art History Minor

Learning Goals and Outcomes

Goal 1: To develop a visual awareness through analysis and creative work.

Outcome 1.1: Distinguish the components of a work of art, and
Outcome 1.2: Discuss the context of a work of art.

Goal 2: To manifest their visual awareness in their own work.

Outcome 2.1: Produce a body of creative visual works, and/or
Outcome 2.2: Write critical analysis of visual works of art.

Students wishing a minor in Art History must contact the chair to declare their intention. The minimum requirement for the minor is the completion of six courses in Art History (18 credits) and departmental approval. The department offers advising to all declared Art History minors. Any Art History course offered by the department counts toward the minor; in addition, ITA 315 (Italy through Art) and ITA 425 (The Artist and the Madman in the Renaissance and Reformation), which are offered by the Department of Modern and Classical Languages, also count toward the minor.

Some courses below may have prerequisites – please consult the appropriate department for further information.
Asian Studies is an interdisciplinary major and minor that encourages, facilitates, and recognizes the study of Asia, broadly defined as the region from the Persian Gulf to the Philippines, including the present states of China, Japan, Korea, Mongolia, Taiwan, Vietnam, Cambodia, Laos, Thailand, Indonesia, Malaysia, Singapore, Burma, Bangladesh, India, Pakistan, Afghanistan, Iran, and the Central Asian Republics of the former Soviet Union.

Asian Studies students prepare themselves for graduate study or professional work by studying the language, history, culture, and politics of the region. Currently, departments including Fine and Performing Arts, History, Political Science, Theology and Religious Studies, Non-Native Languages, and Economics offer Asian Studies courses. Students are encouraged to study abroad in the region as part of their university program. The program offers a limited number of scholarships in support of such study.

Students are required to register and consult with the Director of the Asian Studies program, and may earn a major or minor in Asian Studies.

**Asian Studies Major**

**Asian Studies: Learning Goals and Objectives**

**Goal 1:** Students will achieve Intermediate Low Oral Proficiency in an Asian language (by ACTFL standards).

**Learning Outcome 1.1:** Students will be able to communicate effectively in an Asian language.

**Goal 2:** Students will explore Asia’s importance in the world through interdisciplinary investigation of the histories, political systems, economies, cultures, and societies of Asia.

**Learning Outcome 2.1:** Students will be able to apply a variety of tools, methods, and perspectives to investigate and interpret important aspects of the history, politics, geography, economics and culture of contemporary Asian societies.

**Goal 3:** Students will conduct research about Asia, evaluate data generated by multiple methodologies, and present their findings effectively.

**Learning Outcome 3.1:** Students will be able to produce cogent, well-organized, and thoroughly researched written and oral presentations on important aspects of East or South Asian language, history, politics, culture and society that display familiarity with the scholarly conventions of the respective disciplines.

The traditional undergraduate programs include 40 courses distributed across three components: a General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

**General Education Signature Courses**
See this page about Signature courses (p. 26). Six courses

**General Education Variable Courses**
See this page about Variable courses (p. 26). Six to Nine courses

**General Education Overlays**
See this page about Overlays (p. 27).

**General Education Integrative Learning Component**
See this page about Integrative Learning Component (p. 27). Three courses

Asian Studies majors are required to take three integrated learning courses. Two of these courses must be Area Studies courses dealing with areas outside Asia. A third course must focus on methodology.

**GEP Electives**

**Major Concentration**

The core of the Asian Studies program is the major. The Asian Studies major requires the following:

- Intermediate language competency in an Asian language
- HIS 208 Historical Introduction to Asia
- Eight electives courses
- A Senior Seminar in Asian Studies

**Foundational Heritage**

<table>

<td>3</td>
</tr>
</tbody>
</table>

This course provides a broad overview of Asia, and will emphasize the fundamental background on which students will build in their later courses, including the basic linguistic, geographic, cultural, religious, and historical trends that have shaped East and South Asia.
Electives and Concentration

Students must complete a minimum of seven elective courses, reflective of their geographical area of concentration and exclusive of language courses at or below the intermediate level.

Geographic concentration: students must complete a geographical focus, with four elective classes in one of two geographical concentrations:

- East Asia or
- South Asia.

This requirement may also be satisfied by at least one semester of study abroad in the area of concentration.

To insure interdisciplinary breadth, elective courses must be selected from at least four different departments. In addition, electives must be distributed to ensure breadth of study, with at least one course taken from each of three categories:

- Art (e.g., Asian Cinemas), Literature (e.g. Literature of South Asia) and Language (e.g., Japanese Film and Culture)
- Philosophy and Theology and Religious Studies (e.g., Mahayana Buddhism)
- Social Sciences (e.g., Asian Economies; Japanese Politics) and Business

To insure geographical breadth at least two elective courses must be taken outside the student’s concentration (whether East Asia or South Asia).

Area Studies Courses

These classes, which parallel the interdisciplinary nature of the major, afford students the opportunity to explore other major Area Studies fields (Africana Studies, Latin American Studies) taught at SJU. This component complements the major by exposing students to comparative perspectives on history, culture, politics and economics, broadening their understanding of the world and of the place of Asia within it. Note that some of these courses have pre-requisites. These two courses should be selected from any two of the following areas:

<table>

**Africana Studies (includes but is not limited to)**

**Latin American Studies (includes but is not limited to)**

To attain fluency in an Asian language, ideally, students will augment language study at SJU with an immersion experience of a semester or more. Part of the program’s endowment will be dedicated to funding student needs for study abroad.

For languages not offered at SJU (Hindi, Urdu, Korean, etc.), the program will help interested students find appropriate instruction at other institutions or abroad, unless and until SJU is able to offer these languages on campus.

Methodology Course

Asian Studies majors must also take a methodology course. Students will select from a menu of courses designed to introduce them to fundamentals of social science theory. The intent of this course will be to equip students with analytic tools that they may make use of in their Asian Studies courses. Note that some of these courses have pre-requisites. This course may be selected from the following:

Senior Seminar in Asian Studies

The senior experience is designed to enable students to synthesize what they have learned during their time at SJU, and will typically take the form of a research seminar and/or thesis. The expectation is that these papers would be nominated to be presented at the Greater Philadelphia Asian Studies consortium conference each spring.

Language Requirement

All majors are required to attain intermediate language competency in their area of concentration. The language requirement may be satisfied in one of three ways.

1. Two sequential intermediate classes (1200-level) in the same Asian language (each course consisting of a minimum of three semester credit hours) at SJU or another US institution.
2. Language examination confirming intermediate-level competency
3. One semester language intensive study-abroad experience.

This requirement is seen as a minimum. The program encourages majors to attain fluency in an Asian language. Ideally, students will augment language study at SJU with an immersion experience of a semester or more. Part of the program’s endowment will be dedicated to funding student needs for study abroad.

For languages not offered at SJU (Hindi, Urdu, Korean, etc.), the program will help interested students find appropriate instruction at other institutions or abroad, unless and until SJU is able to offer these languages on campus.

Study Abroad

The Asian Studies program considers experience in Asia to be an essential means of understanding. All Asian Studies majors are expected
to spend at least one term (fall, spring, or summer) in a study-abroad program in Asia. There are currently approved programs in China, Japan, and India. This requirement can frequently be met through programs with existing ties to SJU, including The Beijing Center (operated by a consortium of Jesuit universities) and Sofia University in Tokyo, as well as summer programs.

**Asian Studies Minor**

**Asian Studies: Learning Goals and Objectives**

**Goal 1:** Students will achieve Intermediate Low Oral Proficiency in an Asian language (by ACTFL standards).

**Learning Outcome 1.1:** Students will be able to communicate effectively in an Asian language

**Goal 2:** Students will explore Asia’s importance in the world through interdisciplinary investigation of the histories, political systems, economies, cultures, and societies of Asia.

**Learning Outcome 2.1:** Students will be able to apply a variety of tools, methods, and perspectives to investigate and interpret important aspects of the history, politics, geography, economics and culture of contemporary Asian societies.

**Goal 3:** Students will conduct research about Asia, evaluate data generated by multiple methodologies, and present their findings effectively.

**Learning Outcome 3.1:** Students will be able to produce cogent, well-organized, and thoroughly researched written and oral presentations on important aspects of East or South Asian language, history, politics, culture and society that display familiarity with the scholarly conventions of the respective disciplines.

Students completing the Minor in Asian Studies fulfill a six-course requirement. To ensure the interdisciplinary nature of the program, courses must be taken from at least three departments, and no more than three courses from any one department may count for credit toward the minor. Although language competency is not required for the minor, language study is encouraged.

Autism Behavioral Studies Major

To meet the growing need for qualified, highly trained providers of autism services and treatment, Saint Joseph's University offers a B.S. in Autism Behavioral Studies. This program offers a rigorous and comprehensive undergraduate major focusing primarily on medically related services and treatment of autism through extensive classroom education and training, as well as hands-on skill development and practice for mastery of classroom concepts. Students complete this major with the option of obtaining a Board Certified Assistant Behavior Analyst Certification (BCaBA).

The curriculum for the Autism Behavioral Studies Major is approved by the Behavior Analyst Certification Board (BACB), accredited by the National Commission for Certifying Agencies in Washington, DC. Applied Behavior Analysis has been endorsed by many state and federal agencies, including state health departments and the U.S. Surgeon General. In order to receive BCaBA certification approval, the Behavior Analyst Certification Board (BACB) requires an approved Bachelor’s degree in a health-related field. With a Bachelor’s degree in Autism Behavioral Studies, completion of the required coursework and field hours, and successfully passing the BCaBA exam, students will obtain national certification as Board Certified Assistant Behavior Analysts (BCaBA), graduating with a highly marketable credential to work in any area of the United States.

Need and demand

According to the Centers for Disease Control, the number of individuals with autism has risen dramatically. Autism is now considered an urgent public health crisis, needing resources, funding and, most importantly, highly trained health professionals and therapists. Research has demonstrated that early, intensive intervention treatment services may greatly improve child development. Further, there is a significant need for adult services for individuals 21 years and older. As the rates of autism continue to climb and the field becomes more specialized, there is an increased demand for highly trained students who specifically focus on autism, especially in the use of evidence-based practices such as Applied Behavior Analysis.

Students majoring in Autism Behavioral Studies will benefit from a comprehensive program of study that includes a rigorous focus in Applied Behavior Analysis and behavioral techniques, biological issues in autism, navigating medical services, community-based advocacy, managing the population of individuals with autism, health policy in autism, coping with the stress of a child or family member with autism, coping methods for providers of autism services, long-term care, ancillary services and other related topics. This comprehensive approach is unique and is highly desirable for students interested in focusing specifically on autism services. The Autism Behavioral Studies program is housed in the Department of Health Services, aligning the program with the medical field and behavioral medicine. The Department of Health Services offers courses in allied and public health, epidemiology, and behavioral medicine. These students go on to work in the field of autism as behavior analysts, occupational and physical therapists, speech pathologists, behavioral medicine specialists, health and hospital administrators, health policy makers and advocates and therapists, as well as other areas of medicine and public health.

Student Learning Goals and Objectives

Goal 1: Graduates of the Autism Behavioral Studies Program will know and understand the potential causes, symptoms and diagnostic criteria of autism spectrum disorders as well as the specific needs of individuals with autism across the lifespan and how they are treated.

Objective 1.1: Demonstrate knowledge of the current theories on the causes of autism spectrum disorders.

Objective 1.2: Demonstrate knowledge of the frequency, characteristics, symptoms, and diagnostic criteria of individuals with autism spectrum disorders.

Objective 1.3: Demonstrate knowledge of the nature of stereotypes, stigma, and discrimination of individuals with autism spectrum disorders.

Goal 2: Graduates of the Autism Behavioral Studies Program will know and understand the unique and specific behavioral needs of individuals with autism as well as both medical and behavioral approaches to autism treatment and related issues.

Objective 2.1: Identify the behavioral needs of children and adults with autism spectrum disorders and demonstrate the current behavioral approaches to treating behavioral issues of individuals with autism using Applied Behavior Analysis and medically related therapeutic services.

Objective 2.2: Demonstrate the ability to communicate orally and in writing in the language of the discipline and particularly on the principles of Applied Behavior Analysis.

Goal 3: Graduates of the Autism Behavioral Studies Program will understand, follow and demonstrate the ethics guidelines and professional codes of conduct for working with individuals with autism.

Objective 3.1: Demonstrate the roles and responsibilities of behavior analysts, therapists, allied health professionals and related staff, and demonstrate understanding of ethics guidelines in working with individuals with autism.
Objective 3.2: Graduates will act as responsible citizens, embracing personal and career objectives that honor and serve individuals with autism and their families.

Goal 4: Graduates of the Autism Behavioral Studies Program will identify and understand the difficulties that families face in coping with autism and the impact of paying for autism-related services, as well as the social and economic impact on families and on society.

Objective 4.1: Identify the impact on parents, siblings, families, and friends of individuals with autism spectrum disorders and demonstrate how to best help these individuals cope with associated stress.

Objective 4.2: Identify the impact of political issues, including funding and approval of services, around autism spectrum disorders.

Goal 5: Graduates of the Autism Behavioral Studies Program will demonstrate how to collect behavioral data using Applied Behavior Analysis, to measure the progress of individuals with autism; to develop behavioral plans for individuals with autism; and/or to conduct research on individuals with autism or on related treatment plans.

Objective 5.1: Collect data on the progress of individuals with autism and develop behavioral plans; or collect data for the purpose of conducting research on a particular topic in the field of autism.

Objective 5.2: Identify and demonstrate methods to empirically assess and evaluate the progress of individuals with autism spectrum disorders for the purpose of developing intervention plans.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

Required courses for the ABS major include:

- One Biology or Chemistry Course with Lab

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

PSY 201 Biological Bases of Behavior 3
Autism Studies Certificate of Proficiency

Michelle Rowe, Ph.D., Chair, Health Services Department
Eileen Sullivan, Pharm.D., Program Director

Program Goals/Objectives

Goal 1: Students will know and understand the potential causes, symptoms and diagnostic criteria of autism spectrum disorders as well as the specific needs of individuals with autism across the lifespan and how they are treated.

Objective 1a. Demonstrate knowledge of the current theories on the causes of autism spectrum disorders.

Objective 1b. Demonstrate knowledge of the frequency, characteristics, symptoms, and diagnostic criteria of individuals with autism spectrum disorders.

Objective 1c. Demonstrate knowledge of the nature of stereotypes, stigma, and discrimination of individuals with autism spectrum disorders.

Goal 2: Students will know and understand the unique and specific behavioral needs of individuals with autism as well as both medical and behavioral approaches to autism treatment and related issues.

Objective 2a. Identify the behavioral needs of children and adults with autism spectrum disorders and demonstrate the current behavioral approaches to treating behavioral issues of individuals with autism using Applied Behavior Analysis and medically related therapeutic services.

Objective 2b. Demonstrate the ability to communicate orally and in writing in the language of the discipline and particularly on the principles of Applied Behavior Analysis.

Goal 3: Students will understand, follow and demonstrate the ethics guidelines and professional codes of conduct for working with individuals with autism.

Objective 3a. Demonstrate the roles and responsibilities of behavior analysts, therapists, allied health professionals and related staff, and demonstrate understanding of ethics guidelines in working with individuals with autism.

Objective 3b. Graduates will act as responsible citizens, embracing personal and career objectives that honor and serve individuals with autism and their families.

Goal 4: Students will identify and understand the difficulties that families face in coping with autism and the impact of paying for autism-related services, as well as the social and economic impact on families and on society.

Objective 4a. Identify the impact on parents, siblings, families, and friends of individuals with autism spectrum disorders and demonstrate how to best help these individuals cope with associated stress.

Objective 4b. Identify the impact of political issues, including funding and approval of services, around autism spectrum disorders.

Goal 5: Students will demonstrate how to collect behavioral data using Applied Behavior Analysis; to measure the progress of individuals with autism; to develop behavioral plans for individuals with autism; and/or to conduct research on individuals with autism or on related treatment plans.

Objective 5a. Collect data on the progress of individuals with autism and develop behavioral plans; or collect data for the purpose of conducting research on a particular topic in the field of autism.

Objective 5b. Identify and demonstrate methods to empirically assess and evaluate the progress of individuals with autism spectrum disorders for the purpose of developing intervention plans.

Post-Baccalaureate Autism Studies Certificate

Michelle Rowe, Ph.D., Chair, Health Services Department

Program Goals/Objectives

Goal 1: Students will know and understand the potential causes, symptoms and diagnostic criteria of autism spectrum disorders as well as the specific needs of individuals with autism across the lifespan and how they are treated.

Objective 1a. Demonstrate knowledge of the current theories on the causes of autism spectrum disorders.

Objective 1b. Demonstrate knowledge of the frequency, characteristics, symptoms, and diagnostic criteria of individuals with autism spectrum disorders.

Objective 1c. Demonstrate knowledge of the nature of stereotypes, stigma, and discrimination of individuals with autism spectrum disorders.

Goal 2: Students will know and understand the unique and specific behavioral needs of individuals with autism as well as both medical and behavioral approaches to autism treatment and related issues.

Objective 2a. Identify the behavioral needs of children and adults with autism spectrum disorders and demonstrate the current behavioral approaches to treating behavioral issues of individuals with autism using Applied Behavior Analysis and medically related therapeutic services.

Objective 2b. Demonstrate the ability to communicate orally and in writing in the language of the discipline and particularly on the principles of Applied Behavior Analysis.

Goal 3: Students will understand, follow and demonstrate the ethics guidelines and professional codes of conduct for working with individuals with autism.

Objective 3a. Demonstrate the roles and responsibilities of behavior analysts, therapists, allied health professionals and related staff, and demonstrate understanding of ethics guidelines in working with individuals with autism.

Objective 3b. Graduates will act as responsible citizens, embracing personal and career objectives that honor and serve individuals with autism and their families.

Goal 4: Students will identify and understand the difficulties that families face in coping with autism and the impact of paying for autism-related services, as well as the social and economic impact on families and society.

Objective 4a. Identify the impact on parents, siblings, families, and friends of individuals with autism spectrum disorders and demonstrate how to best help these individuals cope with associated stress.
Objective 4b. Identify the impact of political issues, including funding and approval of services, around autism spectrum disorders.

Goal 5: Students will demonstrate how to collect behavioral data using Applied Behavior Analysis; to measure the progress of individuals with autism; to develop behavioral plans for individuals with autism; and/or to conduct research on individuals with autism or on related treatment plans.

Objective 5a. Collect data on the progress of individuals with autism and develop behavioral plans; or collect data for the purpose of conducting research on a particular topic in the field of autism.

Objective 5b. Identify and demonstrate methods to empirically assess and evaluate the progress of individuals with autism spectrum disorders for the purpose of developing intervention plans.

If pursuing the Board Certified Assistant Behavioral Analyst (BCaBA) credential, the Behavioral Analyst Certification Board requires a grade of "C" or better in the behavioral analysis and practicum courses (IHS 480, IHS 481, IHS 482). Courses must be completed in the sequence outlined above.

Experience Requirement for Board Certified Assistant Behavioral Analyst (BCaBA) Credential.

Students who plan to pursue the BCaBA credential must complete an experience requirement under the supervision of a Behavioral Analyst Credential Board (BACB) approved supervisor. For additional information on options for completing this experience requirement, please see BACB website at www.bacb.com.

The SJU adult learner program offers an intensive practicum to meet the BACB experience requirement. This includes three (3) practicum courses (IHS 480, IHS 481, and IHS 482) which would require 19+ hours per week on site, supervised by the BACB approved supervisor.

IHS 480-IHS 482. Those who plan to pursue the BCaBA credential must also complete 3 practicum courses (19+ hours per week—supervised by a person with the BCBA credential).
BEHAVIORAL NEUROSCIENCES

• Behavioral Neurosciences (p. 83)

Behavioral Neurosciences Minor

Program Overview
Behavioral neuroscience is a field of endeavor that uses interdisciplinary approaches to study and understand the interaction of brain processes and complex behaviors, human and animal. It is an integration of traditional disciplines as diverse as biology, chemistry, computer science, philosophy, and psychology. The behavioral neuroscience minor is intended to be a first step for undergraduate students contemplating professional, academic, and/or research careers in neuroscience or related fields.

Program Purpose and Specifics

Mission
• Advancing understanding of nervous systems and the part they play in determining behavior.
• Providing students with multidisciplinary training and perspectives needed to approach issues of interest in the broad area of the biological support of behavior.

Learning Goals and Objectives

The learning objectives of the Behavioral Neuroscience program include fostering in students:

• An understanding of theories, concepts, and research findings within the field of behavioral neuroscience.
• The usage of appropriate methodologies to develop knowledge and to examine questions within the field of behavioral neuroscience.
• The ability to apply a knowledge base to phenomena within the field of behavioral neuroscience.
• An awareness and an adoption of values and ethical standards shared by professionals within the field of behavioral neuroscience.

Students complete the Behavioral Neuroscience minor with six courses: Three ‘core’ courses and three electives.

Select three of the following:

Elective Courses
Select three of the following:

Biology
- BIO 101 Bio I: Cells
- BIO 401 Animal Behavior
- BIO 402 Advanced Cell Biology
- BIO 405 Biomechanics
- BIO 411 Molecular Genetics
- BIO 412 Neurobiology
- BIO 417 Systemic Physiology

Chemistry
- CHM 210 Organic Chemistry I
- CHM 215 Organic Chemistry II
- CHM 340 Biochemistry
- CHM 430 Mechanisms in Organic Chem
- CHM 480 Role of Metal Ions in Biology

Computer Science
- CSC 121 Computer Science II
- CSC 201 Data Structures
- CSC 202 Computer Architecture
- CSC 261 Principles of Programming Lang
- CSC 342 Computer Vision
- CSC 362 Artificial Intelligence

Education/Special Education
- SPE 160 Intro to Special Education
- SPE 310 Assessment & Progress Monitor
- SPE 330 Educ Studts w Low Incid Disabi

Interdisciplinary Health Services
- IHS 110 Psyc Aspects Illness & Disab
- IHS 253 Nutrition:Health & Disease
- IHS 263 Theory/AddictionAddictiveBehav
- IHS 357 Autism Spectrum Disorders
- IHS 458 Public Health & Epidemiology

Philosophy
- PHL 322 Philosophy of Science
- PHL 473 Philosophy of Mind

Physics
- PHY 101 General Physics I
- PHY 105 University Physics I
- PHY 110 Understanding Natural World
- PHY 253 Survey of Nanotechnology
- PHY 261 Electronics I
- PHY 419 Biophysics
- PHY 421 Physics of Fluids

Psychology
- PSY 201 Biological Bases of Behavior
- PSY 220 Sensation and Perception
PSY 221 Animal Learning and Memory
PSY 222 Neuropsychology
PSY 223 Health Psychology
PSY 224 Drugs, Brain & Human Behavior
PSY 225 Comparative Animal Behavior
PSY 226 Psychology of Emotion

1 PSY 205 or BIO 412 serve as a prerequisite for PSY 206 and PSY 207.

2 To ensure the interdisciplinary nature of the program, students wishing to complete the minor must select elective courses offered by at least one participating department other than their own major. Courses currently offered by the Departments of Biology, Chemistry, Computer Science, Education/Special Education, Interdisciplinary Health Services, Philosophy, Physics, and Psychology that might support the proposed minor are listed.

Students may petition the Behavioral Neuroscience Advisory Board to receive credit for courses not listed above. The determination of the appropriateness of courses for inclusion in the minor will be made by the director of the program, in consultation with an advisory board. Courses may be taken for Behavioral Neuroscience credit only if the student’s work in the class meets one or more of the following criteria:

• Coursework includes a substantive treatment of brain/behavior relationships.
• Coursework includes a substantive treatment of methodology, techniques, and approaches relevant to neuroscience.
• Coursework in other ways contributes to an understanding of the relationship between nervous systems and behavior or other issues typically addressed by neuroscientists.
BIOLOGY

Department Overview

The undergraduate Biology curriculum begins with a core of courses that presents the fundamentals of the life sciences, both in concept and methodology. After completing the core, students take a distribution of upper division courses with at least one course in each of the three major areas of biology. This distribution strategy insures that all students have broad exposure to an extensive range of topics including cell and molecular biology, microbiology, genetics, plant biology, evolution, physiology, ecology, environmental biology, and animal behavior. The curriculum provides appropriate training for students seeking admission to professional and graduate schools and those who wish to enter the job market directly following graduation.

The presence of diverse and engaged graduate students enhances the academic experience for undergraduate students. The Department of Biology also has a small but strong graduate program that leads to either a MS or a MA degree in biology. The MA degree is primarily designed for post-graduates who are working or wishing to improve their credentials for professional school. The MS degree requires the development and presentation of a thesis based on original research. This degree is more appropriate for full-time students wishing to engage in research as part of a career or as a prelude to graduate training at the doctoral level. Students in the MS program may be eligible for a teaching assistantship that provides a tuition scholarship and stipend.

The faculty of the Department of Biology view teaching as the primary mission of both the Department and the University. In addition, Biology faculty are involved in high caliber scientific research. The interplay between teaching and research, and the involvement of students in faculty research strengthens the Biology curriculum. One of the most important qualities of the Department is the opportunity for undergraduates to participate in faculty research. This mentor-student relationship involves the design and execution of experiments, and is a very enriching learning experience. Students can work with faculty as volunteers, for academic credit, or for pay during the summer months. The research done by students often leads to publications and presentations at national and regional conferences. Whatever the career plans, students are encouraged to seriously consider participating in undergraduate research. Up to two semesters of research may be counted as biology electives.

The Biology program has always been known as a training ground for individuals pursuing professional careers in the life sciences. Many graduates from the Biology program have gone on to professional schools, pursued graduate studies, or entered the work force directly in academic, government, and industrial labs. This requires that our students be prepared to face the challenges of a competitive world. To help them meet these challenges the Department of Biology has established a strong advising program. Faculty commitment to academic advising and accessibility of faculty advisors to students exemplifies the institutional mission of cura personalis.

Biology in the GEP (See Curricula)

The GEP requires that all students take EITHER one semester of a lab-based natural science course (6 contact hours) OR two semesters of lecture-only natural science courses. Students who wish to satisfy the natural science GEP by completing courses in Biology may do so by taking the first semester of the Biology majors, lab-based course sequence, BIO 101, or one of the lab-based, one-semester courses for non-science majors, as they become available. Alternatively, students may fulfill one or both semesters of the natural science GEP by completing one or two of the special one-semester lecture-only Biology courses designed for non-science majors listed below.

Advisory Option - Biology Pre-Professional

Biology majors may satisfy entrance requirements for medical, dental, osteopathic medical, and other schools of the health professions. Students are advised to take elective courses in liberal arts and behavioral sciences.

Professor: Dr. Christina King Smith; Eileen Grogan, Ph.D.; Jonathan Fingerut, Ph.D.; Karen Snetselaar, Ph.D.; Michael P. McCann, Ph.D.; Scott McRobert, Ph.D.
Associate: Edwin Li, Ph.D.; John M. Braverman, S.J., Ph.D.; Julia Lee-Soety, Ph.D.
Assistant: Catalina Arango Pinedo, Ph.D.; Clint J. Springer, Ph.D.; Jennifer C. Tudor, Ph.D.; Matthew D. Nelson, Ph.D.; Shantanu Bhatt, Ph.D.
Lab Coordinator: Denise Marie Ratterman, Ph.D.

Chair: King Smith

Undergraduate

- B.S. in Biology (p. 92)
- Five Year Combined B.S. in Biology/M.S. in Education Option (p. 94)
- Five Year Combined BS/MS or BS/MA in Biology (p. 95)

Undergraduate Minors

- Biology (p. 98)

Graduate

- Master of Science In Biology (p. 97)
- Master of Arts in Biology (p. 96)
BIO 101 Bio I: Cells (4 credits)
The study of the structure and function of representative prokaryotic and eukaryotic cells. Chemical makeup, organelle interactions, energy producing and biosynthetic reactions will be stressed. Three lecture periods, one three-hour laboratory period (BIO 101L or 150L). First of three courses in the core program.
Attributes: GEP Natural Science, Science Course w/Lab (Sci Maj), Undergraduate

BIO 101L Bio I: Cells Lab (0 credits)
Students who register for BIO 101 must also register for a BIO 101 laboratory. For example, if you register for BIO 101 you must, at the same time, register for BIO 101L.
Attributes: GEP Natural Science, Undergraduate

BIO 102 Bio II: Genetics (4 credits)
The study of heredity and the mechanism of transmission of genetic information in biological systems. The course material is approached from the population, organismic, and biochemical perspectives. Three lecture periods, one three-hour laboratory period (BIO 102L or 151L).
Prerequisite: BIO 101.
Prerequisites: (BIO 1011 or BIO 1015) or BIO 101
Attributes: Science Course w/Lab (Sci Maj), Undergraduate

BIO 102L Bio II: Genetics Lab (0 credits)

BIO 150 The Science of Learning Science (3 credits)
A first year seminar focusing on the science that underlies how we learn and application of that to teaching and learning science, with a focus on biology. Students will read literature on learning that ranges from how the brain works to current evidenced-based studies of effective ways to teach and learn science. Students will put this new knowledge to work immediately by analyzing their own learning and by designing and teaching hands-on science units to children. Co-requisite: BIO 101.
Attributes: First-Year Seminar

BIO 150L Bio I: Cells Lab Phage (0 credits)
A research-based laboratory for freshman accompanying BIO 101 involving isolation, purification, and preliminary genomic characterization of bacteriophages, viruses that infect bacteria. Open to first year students majoring in Biology, Chemical-Biology, or Environmental Science.
Prerequisites: Successful completion of BIO 101 and 150L fulfills the first year seminar GEP requirement. Students are expected to continue with BIO 151L in the spring. Two 105-minute lab periods.
Attributes: First-Year Seminar, Undergraduate

BIO 151L Bio II: Genetics Lab Phage (0 credits)
A continuation of BIO 150L, this laboratory is conducted in silico to annotate bacteriophage genomes isolated during the fall semester. Complete annotated genomes will be submitted to GenBank. Open to first year students majoring in Biology, Chemical Biology, or Environmental Science.
Prerequisites: BIO 101L or BIO 150L
Attributes: Undergraduate

BIO 160 Heredity & Evolution (3 credits)
A study of human genetics at three levels: human heredity and the inheritance of disease, genes and DNA, and human evolution. Includes discussion of how a cell uses its genetic information and how scientists study genes using genetic engineering techniques.
Successful completion of this course satisfies one of the Natural Science requirements in the GER/GEP. Open to all students except those who have credit for BIO 102. Three lecture periods.
Attributes: GEP Natural Science, Undergraduate

BIO 161 Human Organism (3 credits)
A study of the basic principles of human anatomy, physiology, and genetics. The organization and function of the human body will be described with an appreciation of underlying genetic and evolutionary concepts. Successful completion of this course satisfies one of the Natural Science requirements in the GER/GEP. Open to all students except those who have credit for BIO 201 or 260. Three lecture periods.
Attributes: GEP Natural Science, Undergraduate

BIO 162 Plants and Civilization (3 credits)
This course will examine plants in the context of their importance to people. Plants used for food, fiber, medicine, and recreation will be included. Successful completion of this course satisfies one of the Natural Science requirements in the GEP. Open to all students except biology majors. Biology majors need permission of the Biology Chair to take this course.
Restrictions: Students cannot enroll who have a major in Biology, Chemistry, Chemical Biology or Physics.
Attributes: Undergraduate

BIO 163 Unseen Life on Earth (4 credits)

BIO 163L Unseen Life on Earth Lab (0 credits)

BIO 165 Exploring the Living World (4 credits)
This course is designed for students not planning to major in science. This course includes a survey of plant and animal life, an overview of bioenergetics, and selected topics in genetics and evolutionary biology. Successful completion of this course fully satisfies the GEP Natural Science requirement. Three lecture periods and one three hour laboratory.
Attributes: GEP Natural Science, Science Course w/Lab (Sci Maj), Undergraduate

BIO 165L Exp. Living World Lab (0 credits)

BIO 170 Special Topics (3 credits)

BIO 201 Bio III: Organismic Biology (4 credits)
A survey of all living things followed by more detailed study of plants and animals. Topics include development, nutrition, locomotion, transport, and homeostatic controls. Three lecture periods, one three-hour laboratory period.
Prerequisites: (BIO 1021 or BIO 102 or BIO 1025)
Attributes: Undergraduate

BIO 201L Bio III: Organismic Biol Lab (0 credits)

BIO 260 Anatomy/Physio I Nurs/Al Hlth (4 credits)
This course is designed for students needing preparation in human anatomy and physiology as required for nursing and some allied health programs. It does not fulfill a requirement for a Biology major or minor, nor does it fulfill general education requirements. Students may count either BIO 260 plus BIO 261 or BIO 417 toward graduation, but not both. Three 50-minute lecture periods and one three-hour lab period.
Prerequisites: BIO 101 or BIO 1011 or BIO 1015 or BIO 165
Attributes: Undergraduate
BIO 260L Anatomy & Physiology Lab (0 credits)

BIO 261 Anatomy/Physio Nurs/Al Hlth II (4 credits)
Continuation of BIO 260. This course is designed for students needing preparation in human anatomy and physiology as required for nursing and some allied health programs. For biology majors and minors, completion of BIO 261 may count for one, 400-level Biology elective. It does not satisfy the requirement for a course from groups A, B, or C. nor does it fulfill general education requirements. Students may count either BIO 260 plus BIO 261 or BIO 417 toward graduation, but not both. Three 50-minute lecture periods and one three-hour lab period.
Prerequisites: BIO 260 (may be taken concurrently)
Attributes: Undergraduate

BIO 261L Anatomy & Physiology Lab II (0 credits)

BIO 270 Microbio Nurse/Allied Health (4 credits)
This course is designed for students needing preparation in microbiology as required for nursing and some allied health programs. It does not fulfill a requirement for the Biology major or minor, nor does it fulfill general education requirements. Not open to students who have taken BIO 416 or BIO 422. Three 50-minute lecture periods and one three-hour lab period.
Prerequisites: BIO 101 or BIO 165
Attributes: Undergraduate

BIO 270L Microbio Nurse/Allied Hlth Lab (0 credits)

BIO 320 Science Communication&Outreach (1 credit)
Optional Service Learning course can be taken in conjunction with any Biology course. Guided experience in preparing and presenting hands-on science lessons to K-12 children. Time commitment is 3 hrs per week.
Attributes: Undergraduate

BIO 360 God and Evolution (3 credits)
This course considers a major topic in academic discourse and society at large, the relationship between religion/theology and biological evolution. This course explores the thesis that the two can be compatible — including from an informed scientific point of view. Students in this course learn evolutionary biology, theological account of creation, and how they can be compatible. This course fulfills the "Faith and Reason" requirement of the GEP. It does not fulfill requirements for a Biology major or minor.
Prerequisites: (THE 154 or THE 221) and PHL 154
Attributes: Faith-Reason Course (New GEP), Undergraduate

BIO 390 Biology Seminar (0 credits)
Attendance at three seminars is required each semester during sophomore, junior, and senior years. Approved seminars are posted in the Department. Graded on a P/NP basis.
Restrictions: Enrollment is limited to students with a major in Biology or Chemical Biology.
Attributes: Undergraduate

BIO 401 Animal Behavior (4 credits)
The study of animals and their behaviors, with a strong emphasis on evolutionary relationships and ecology. Live animals will be studied in the classroom, laboratory, and field. Two 50-minute lecture periods, one four-hour laboratory period.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1025 or CHM 125 or CHM 1023) or CHM 126
Restrictions: Enrollment is limited to students with a major in Biology or Environmental Science.
Attributes: Undergraduate

BIO 401L Animal Behavior Lab (0 credits)

BIO 402 Advanced Cell Biology (4 credits)
An in-depth analysis of eukaryotic cell structure and function, including membrane structure and transport, cellular organelles, the cytoskeleton, and cell communication. Emphasis will be on experimental approaches to understanding concepts in cell biology. Two 50-minute lecture periods, one four-hour laboratory period.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1025 or CHM 125 or CHM 126 or CHM 1023)
Restrictions: Enrollment is limited to students with a major in Biology, Chemical Biology or Environmental Science.
Attributes: Undergraduate

BIO 402L Advanced Cell Biology Lab (0 credits)

BIO 403 Biometrics and Modeling (4 credits)
Computer simulation of life science phenomena from the subcellular to population levels. Appropriate statistics are included along with exposure to simulation software. Three 50-minute lecture periods, one three-hour laboratory period.
Prerequisites: BIO 201 and CHM 125
Restrictions: Enrollment is limited to students with a major in Biology.
Attributes: Undergraduate

BIO 404 Biochemistry (3 credits)
An introduction to the chemistry of living systems. The study of important molecules, metabolic pathways, and control systems will be emphasized.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 2321 (may be taken concurrently) or CHM 215 (may be taken concurrently)) and (CHM 125 or CHM 126 or CHM 215 or CHM 1025 or CHM 1023)
Restrictions: Enrollment is limited to students with a major in Biology or Chemical Biology.
Attributes: Undergraduate

BIO 405 Biomechanics (4 credits)
The role of physics in biological systems and the organismal and super-organismal level. Lectures will cover a range of biomechanics disciplines, presenting underlying physical principles and their biological ramifications. Laboratories will provide experience with the experimental techniques available to measure forces relevant to biological systems. Two 75-minute lecture periods, one three-hour laboratory period.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1023 or CHM 125 or CHM 1025) and (PHY 1031 or PHY 101 or PHY 105 or PHY 1051)
Attributes: Undergraduate

BIO 405L BioMechanics Lab (0 credits)

BIO 406 Comparative Anatomy (4 credits)
An integrated comparative study of vertebrate structure and development. A synthesis of the embryological development, the gross anatomy, and the histology of selected forms. Two 75-minute lecture periods, one three-hour laboratory period.
Prerequisites: BIO 201 and CHM 125
Restrictions: Enrollment is limited to students with a major in Biology.
Attributes: Undergraduate
BIO 406L Comparative Anatomy Lab (0 credits)

BIO 407 Developmental Biology (4 credits)
A study of the molecular and cellular aspects of development. Emphasis will be on induction, regeneration, and genetic control of differentiation. Two 50-minute lecture periods, one four-hour laboratory period. 
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1025 or CHM 125 or CHM 126 or CHM 1023)
Attributes: Undergraduate

BIO 407L Developmental Biology Lab (0 credits)

BIO 408 Histology (4 credits)
A study of the molecular and cellular aspects of development. Emphasis will be on induction, regeneration, and genetic control of differentiation. Two 50-minute lecture periods, one four-hour laboratory period. 
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1025 or CHM 125 or CHM 126 or CHM 1023)
Attributes: Undergraduate

BIO 408L Histology Lab (0 credits)

BIO 409 Ecology (4 credits)
A study of the complex interrelationship between organisms and their environment. The course will include discussions on fundamental themes in ecology such as food webs and population growth, as well as topics of current interest such as oil spills and the destruction of the rain forest. Two 50-minute lecture periods, one four-hour laboratory period. 
Prerequisites: BIO 201 and CHM 125
Attributes: Undergraduate

BIO 409L Ecology Lab (0 credits)

BIO 410 Light and Electron Microscopy (4 credits)
A course in techniques of light and electron microscopy, including aspects of technique, theory, and operation through lecture, demonstration, and student exercises. Time for individual use of the confocal and electron microscopes will be provided. A special fee will be assessed. Two 50-minute lecture periods, one four-hour laboratory period. 
Prerequisites: BIO 201 and CHM 125
Attributes: Undergraduate

BIO 410L Light & Electm Microscopy Lab (0 credits)

BIO 411 Molecular Genetics (4 credits)
A course in techniques of light and electron microscopy, including aspects of technique, theory, and operation through lecture, demonstration, and student exercises. Time for individual use of the confocal and electron microscopes will be provided. A special fee will be assessed. Two 50-minute lecture periods, one four-hour laboratory period. 
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1025 or CHM 125 or CHM 1023 or CHM 126) and ENG 101
Restrictions: Enrollment is limited to students with a major in Biology or Chemical Biology.
Attributes: Undergraduate

BIO 411L Molecular Genetics Lab (0 credits)

BIO 412 Neurobiology (4 credits)
Introduction to the structure and function of the vertebrate nervous system. Major topics will include the molecular and cellular basis of neuronal activities, sensory and motor systems, behavior, and higher mental processes. The neurobiology of disease and neuroethics will also be discussed. Laboratory work will include hands-on experience of several neurobiological techniques to measure molecular and biochemical changes in a mouse brain. Two 50-minute lecture periods, one four-hour laboratory period. 
Prerequisites: BIO 201 and CHM 125
Attributes: Undergraduate

BIO 412L Neurobiology Lab (0 credits)

BIO 413 Plant Physiological Ecology (4 credits)
This course will focus on the physiological mechanisms plants use to respond to their environment. Major topic areas include the basic environmental physiology of carbon, water, and mineral nutrient exchange, and the adaptive mechanisms plants use to survive the variety of global environments. Labs will cover common physiological research methods ranging from cellular to whole organism level measurements and will involve both laboratory and field work. Two 75-minute lecture periods, two 90-min laboratory periods. 
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1025 or CHM 125 or CHM 1023 or CHM 126)
Restrictions: Enrollment is limited to students with a major in Biology or Environmental Science.
Attributes: Undergraduate

BIO 413L Plant Physiological Eco Lab (0 credits)

BIO 414 Plant Systematics (4 credits)
Students will learn to recognize vascular plant families and understand how taxonomists study evolutionary relationships among plant groups. Economic, medical, and ecological importance of various seed plants will be emphasized. Two 75-minute lecture periods, two 90-minute laboratory periods. 
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1025 or CHM 125 or CHM 1023 or CHM 126)
Restrictions: Enrollment is limited to students with a major in Biology or Environmental Science.
Attributes: Undergraduate

BIO 414L Plant Systematics Lab (0 credits)

BIO 415 Immunology (4 credits)
An introductory course providing students with an overview of how the immune system works, including molecules, cells and organs of the immune system and their functions and interactions. Discussion of the experimental techniques used to understand the cell-cell interactions that occur in immunity as well as the differentiation and activation of the immune response will be included. Two 50-minute lecture periods, one four-hour laboratory period. 
Prerequisites: BIO 201 and CHM 125
Restrictions: Enrollment is limited to students with a major in Biology or Chemical Biology.
Attributes: Undergraduate

BIO 415L Immunology Lab (0 credits)
BIO 415L Immunology Lab (0 credits)

BIO 416 Microbiology (4 credits)
The structural, cultural, and physiological characteristics of microorganisms and their role in the economy of nature. The principles of immunity, serology, and virology are also considered. Three 50-minute lecture periods, one three-hour laboratory period.

Prerequisites: BIO 201 and CHM 125

Restrictions: Enrollment is limited to students with a major in Biology, Chemical Biology or Environmental Science.

Attributes: Undergraduate

BIO 416L Microbiology Lab (0 credits)

BIO 417 Systemic Physiology (4 credits)
A study of the fundamental mechanisms of vertebrate physiology. The basis for the function of the various organ systems and the biological controls that result in the integration of these systems will be discussed. Two 50-minute lecture periods, one four-hour laboratory period.

Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1023 or CHM 125 or CHM 1025 or CHM 126)

Attributes: Undergraduate

BIO 417L Systemic Physiology Lab (0 credits)

BIO 418 Field Research Techniques (4 credits)

BIO 418L Field Research Techniques Lab (0 credits)

BIO 419 Invertebrate Zoology (4 credits)
A study of the morphology, physiology, behavior, and phylogenetic relationships of the major groups of invertebrates. Participants will compare and contrast the physical and biological challenges facing the invertebrates that live on land, in water, and inside other organisms. The laboratory will include observations and experiments on live and preserved animals. Two 50-minute lecture periods, and two 2-hour lab periods.

Prerequisites: BIO 201 and CHM 125

Attributes: Undergraduate

BIO 419L Invertebrate Zoology Lab (0 credits)

BIO 420 Bioinformatics (4 credits)
Introduction to the use of computers in biology. Students learn about important scientific questions and the contemporary tools used to answer them. Topics include genome sequence assembly and annotation, database mining, genome organization, phylogenetics and genetics of human disease. Two 50-minute lecture periods, one four-hour lab period.

Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1023 or CHM 1025 or CHM 125 or CHM 126)

Restrictions: Enrollment is limited to students with a major in Biology.

Attributes: Undergraduate

BIO 420L Bioinformatics Lab (0 credits)

BIO 421 Molecular & Cellular Biophysics (4 credits)
The course is designed to show students how the integration of physics, chemistry and molecular biology are used to explain and predict molecular and cellular processes such as protein-protein interactions, protein folding, diffusion, and signaling. The course will also provide students with a basic understanding and hands-on experience of several biophysical and biochemical laboratory techniques. Two 50-minute lecture periods, one four-hour lab period.

Prerequisites: (BIO 201 or BIO 1031) and (CHM 125 or CHM 1021 or CHM 1023 or CHM 1025 or CHM 126) and (PHY 101 or PHY 105)

Restrictions: Enrollment is limited to students with a major in Biology or Chemical Biology.

Attributes: Undergraduate

BIO 421L Mol & Cell Biophysics Lab (0 credits)

BIO 422 Applied & Environ Microbiology (4 credits)
The course will introduce us to the complex relationships between microbes and their environment, including other organisms. In the frame of these relationships, we will explore how microbial activities are key to geochemical cycles and to human-engineered processes that are essential part of our lives. Two 50-minute lecture periods, one four-hour lab period.

Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 1023 or CHM 1025 or CHM 125 or CHM 126)

Restrictions: Enrollment is limited to students with a major in Biology, Chemical Biology or Environmental Science.

Attributes: Undergraduate

BIO 422L Applied & Environ Microbio Lab (0 credits)

BIO 423 Evolution (4 credits)
This course covers the major concepts of evolutionary biology, including natural selection, adaptation, genetic drift, and phylogenetic trees. The course trains students to know how to generate and test evolutionary hypotheses using data and inference. The lab portion of the course encourages hands-on learning through computer simulation and problem-solving. Two 50-minute lecture periods, one four-hour lab period.

Prerequisites: BIO 201 and CHM 125.

Restrictions: Enrollment is limited to students with a major in Evolutionary Biology.

Attributes: Undergraduate

BIO 423L Evolution Lab (0 credits)

BIO 424 Biotechnology (4 credits)
A course in which students will learn how basic cell and molecular biology are used to develop products for biomedical, agricultural and industrial applications. The course will also cover fundamental and emerging techniques in the biotechnology field. The lab section will focus on the steps involved in the production and purification of recombinant proteins expressed in bacterial cells. Two 50-minute lecture periods, one four-hour laboratory period.

Prerequisites: (BIO 201 or BIO 1031) and (CHM 125 or CHM 1021 or CHM 1023 or CHM 1025 or CHM 126)

Restrictions: Enrollment is limited to students with a major in Biology or Chemical Biology.
BIO 424L Biotechnology Lab (0 credits)

BIO 425 Bacterial Pathogenesis (4 credits)
A study of the physiological, genetic, and biochemical basis underlying some of the commonly encountered bacterial diseases. The course also addresses the roles of antimicrobial compounds and the host immune system in countering disease. Finally, in the lab module for the course, students perform discovery-oriented research as they identify novel genes in enteropathogenic Escherichia coli (EPEC) that affect bacterial virulence in a C. elegans (roundworm) model of disease. Two 75-minute lecture periods, one three-hour laboratory period.
Prerequisites: BIO 201 and CHM 125
Attributes: Undergraduate

BIO 425L Bacterial Pathogenesis Lab (0 credits)

BIO 428 Histopathology (4 credits)
A study of the microscopic structure and function of normal and diseased cells, tissues and organs, focusing on vertebrates, with a special emphasis on humans. Using prepared slides and computer images, students will learn to identify and differentiate healthy and pathological samples and relate this to abnormal or disrupted organ function. Two 50-minute lecture periods, two, two-hour lab periods.
Prerequisites: BIO 201 and CHM 125
Attributes: Undergraduate

BIO 428L Histopathology Lab (0 credits)
A study of the microscopic structure and function of normal and diseased cells, tissues and organs, focusing on vertebrates, with a special emphasis on humans. Using prepared slides and computer images, students will learn to identify and differentiate healthy and pathological samples and relate this to abnormal or disrupted organ function. Two 50-minute lecture periods, two, two-hour lab periods. Prerequisites: BIO 201 and CHM 125.
Prerequisites: BIO 201 and CHM 125
Attributes: Undergraduate

BIO 470 Special Topics (3 credits)
Advanced study on a topic or problem to be arranged with any of the Departmental faculty members. Open to juniors and seniors, with permission of the chair.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 125 or CHM 126 or CHM 1021)
Attributes: Undergraduate

BIO 491 Biology Internship (3 credits)
Internships enable the student to gain first-hand experience working in some field of biology. Interns should work a minimum of 10 hours weekly for 12 weeks to earn credit for a single course. Permission to take an internship for course credit must be obtained prior to beginning the internship. Open to juniors and seniors, with permission of the chair of Biology.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 125 or CHM 126 or CHM 1021)
Attributes: Undergraduate

BIO 493 Undergraduate Research in Bio (3,6 credits)
Laboratory or field work on a specific biological problem in cooperation with a faculty member of the department. Normally requires three hours of work per week for each unit of credit. This course may be taken for credit multiple semesters but only one semester counts as a biology elective. In subsequent semesters this course will count as a general elective. Students need to complete the application form for independent study and have the approval of the department chair and Associate Dean.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 125 or CHM 126 or CHM 1023)
Attributes: Undergraduate

BIO 494 Undergraduate Research in Bio (3,6 credits)
Laboratory or field work on a specific biological problem in cooperation with a faculty member of the department. Normally requires three hours of work per week for each unit of credit. This course may be taken for credit multiple semesters but only one semester counts as a biology elective. In subsequent semesters this course will count as a general elective. Students need to complete the application form for independent study and have the approval of the department chair and Associate Dean.
Prerequisites: (BIO 1031 or BIO 201) and (CHM 1021 or CHM 125 or CHM 126 or CHM 1023)
Attributes: Undergraduate

BIO 550 Research Techniques (3 credits)
An introduction to techniques commonly used in life science research laboratories. Weekly meetings by different faculty members on their area of specialty. One lecture period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 550L Research Techniques Lab (1 credit)
This course is designed to expose students to the research activity within the department. Students will be rotated through 2-3 faculty research laboratories, working in each lab for a four-week period. Students will select the labs to work in based on their interest. This experience is designed to allow students the opportunity to learn the practical side of laboratory techniques and to help students select a research area for study. Times to be arranged.
Restrictions: Enrollment is limited to Graduate level students.

BIO 552 Graduate Seminar (1 credit)
Presentations and discussions of primary literature articles. Topic varies by semester. One period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 601 Animal Behavior (4 credits)
Study of animals and their behaviors with strong emphasis on evolutionary relationships and ecology. Two lecture periods, one four hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 601L Animal Behavior Lab (0 credits)

BIO 602 Advanced Cell Biology (4 credits)
In depth analysis of eukaryotic cell structure and function. Emphasis is on experimental approaches to understanding concepts in cell biology. Two lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 602L Advanced Cell Biology Lab (0 credits)

BIO 603 Biometrics and Modeling (4 credits)
Computer simulation of life science phenomena from the subcellular to population levels. Appropriate statistics are included along with exposure to simulation software. Two lecture periods, one four-hour laboratory.
Restrictions: Enrollment is limited to Graduate level students.
BIO 604 Biochemistry (3 credits)
An introduction to the study of the chemistry of living systems. The study of important macromolecules, metabolic pathways, and control systems will be emphasized. Two lecture periods.
Restrictions: Enrollment is limited to Graduate level students.

BIO 605 Biomechanics (4 credits)
Students are introduced to the ways in which the behavior, morphology and material composition of plants and animals are affected by and take advantage of physical forces. This course will include lectures given by the members of the Biology and Physics Department, as well as an integrated laboratory section where students will observe and measure the effect of physical forces on organisms in both aquatic and terrestrial systems. Two 75-minute lecture periods, one three-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 605L Biomechanics Lab (0 credits)

BIO 606 Comparative Anatomy (4 credits)
An integrated comparative study of vertebrate structure and development. A synthesis of the embryological development, the gross anatomy, and the histology of selected forms. Two lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 606L Comparative Anatomy Lab (0 credits)

BIO 607 Developmental Biology (4 credits)
A study of the molecular and cellular aspects of development. Emphasis will be on induction, regeneration, and genetic control of differentiation. Two lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 607L Developmental Biology Lab (0 credits)

BIO 608 Histology (4 credits)
A study in depth of the microscopic structure and function of normal cells, tissues and organs as found in the vertebrates. Students will make extensive use of computer imaging, CD-ROM presentations and biological specimens for study in the laboratory. Two three-hour sessions per week.

BIO 608L Histology Lab (0 credits)

BIO 609 Ecology (4 credits)
Study of complex interrelationship between organisms and their environment. Two lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 609L Ecology Lab (0 credits)

BIO 610 Light & Electron Microscopy (4 credits)
The techniques of light and electron microscopy, including aspects of technique, theory, and operation. Two lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 610L Light & Elec Microscopy Lab (0 credits)

BIO 611 Molecular Genetics (4 credits)
Study of the molecular biology of the genetic material, its structure, expression, regulation, and its dynamic nature. Two lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 611L Molecular Genetics Lab (0 credits)

BIO 612 Neurobiology (4 credits)
A study of neural activity using examples from invertebrate and vertebrate model systems. The emphasis will be at the cellular and tissue levels with appropriate neurochemistry and pharmacology included. Laboratory work will focus on computer simulation of neural processes including simple nerve nets. Two lecture periods, one four-hour laboratory.
Restrictions: Enrollment is limited to Graduate level students.

BIO 612L Neurobiology Lab (0 credits)

BIO 613 Plant Physiological Ecology (4 credits)
This course will focus on the physiological mechanisms plants use to respond to their environment. Major topic areas include the basic environmental physiology of carbon, water, and mineral nutrient exchange, and the adaptive mechanisms plants use to survive the variety of global environments. Labs will cover common physiological research methods ranging from cellular to whole organism level measurements and will involve both laboratory and field work. Two 75-minute lecture periods, two 90-minute lab periods.
Restrictions: Enrollment is limited to Graduate level students.

BIO 613L Plant Physiological Eco Lab (0 credits)

BIO 614 Plant Systematics (4 credits)
Students will learn to recognize vascular plant families and understand how taxonomists study evolutionary relationships among plant groups. Economic, medical, and ecological importance of various seed plants will be emphasized. Two 75-minute lecture periods, two 90-minute laboratory periods.
Restrictions: Enrollment is limited to Graduate level students.

BIO 614L Plant Systematics Lab (0 credits)

BIO 615 Immunology (4 credits)
An introductory course providing students with an overview of how the immune system works, including molecules, cells and organs of the immune system and their functions and interactions. Discussion of the experimental techniques used to understand the cell-cell interactions that occur in immunity as well as the differentiation and activation of the immune response will be included. Two 50-minute lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 615L Immunology Lab (0 credits)

BIO 616 Microbiology (4 credits)
The structural, cultural, and physiological characteristics of microorganisms and their role in the economy of nature. Three 50-minute lecture periods, one three-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 616L Microbiology Lab (0 credits)

BIO 617 Systemic Physiology (4 credits)
A study of the fundamental mechanisms of vertebrate physiology. The basis for the function of the various organ systems and the biological controls that result in the integration of these systems will be discussed. Two lecture periods, one four-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.
BIO 617L Systemic Physiology Lab (0 credits)
BIO 618 Field Research Techniques (4 credits)
BIO 618L Field Research Techniques Lab (0 credits)
BIO 619 Invertebrate Zoology (4 credits)
A study of the morphology, physiology, behavior, and phylogenetic relationships of the major groups of invertebrates. Participants will compare and contrast the physical and biological challenges facing the invertebrates that live on land, in water, and inside other organisms. The laboratory will include observations and experiments on live and preserved animals. Two 50-minute lecture periods; two two-hour lab periods. Restrictions: Enrollment is limited to Graduate level students.

BIO 619L Invertebrate Zoology Lab (0 credits)

BIO 620 Bioinformatics Lab (0 credits)

BIO 620L Bioinformatics Lab (0 credits)

BIO 621 Molecular & Cell Biophysics (4 credits)
The course is designed to show students how the integration of physics, chemistry and molecular biology are used to explain and predict molecular and cellular processes such as protein-protein interactions, protein folding, diffusion, and signaling. The course will also provide students with a basic understanding and hands-on experience of several biophysical and biochemical laboratory techniques. Two 50-minute lecture periods, one four-hour lab period. Restrictions: Enrollment is limited to Graduate level students.

BIO 621L Mol & Cel Biophysics Lab (0 credits)

BIO 622 Applied & Environ Microbiology (4 credits)
The course will introduce us to the complex relationships between microbes and their environment, including other organisms. In the frame of these relationships, we will explore how microbial activities are key to geochemical cycles and to human-engineered processes that are essential part of our lives. Two 50-minute lecture periods, one four-hour lab period. Restrictions: Enrollment is limited to Graduate level students.

BIO 622L Applied&Environ Microbioy Lab (0 credits)

BIO 623 Evolution (4 credits)
This course covers the major concepts of evolutionary biology, including natural selection, adaptation, genetic drift, and phylogenetic trees. The course trains students to know how to generate and test evolutionary hypotheses using data and inference. The lab portion of the course encourages hands-on learning through computer simulation and problem-solving. Two 50-minute lecture periods, one four-hour lab period. Restrictions: Enrollment is limited to Graduate level students.

BIO 623L Evolution Lab (0 credits)

BIO 624 Biotechnology (4 credits)
A course in which students will learn how basic cell and molecular biology are used to develop products for biomedical, agricultural and industrial applications. The course will also cover fundamental and emerging techniques in the biotechnology field. The lab section will focus on the steps involved in the production and purification of recombinant proteins expressed in bacterial cells. Two 50-minute lecture periods, one four-hour lab period
Restrictions: Enrollment is limited to Graduate level students.

BIO 624L Biotechnology (0 credits)

BIO 625 Bacterial Pathogenesis (4 credits)
A study of the physiological, genetic, and biochemical basis underlying some of the commonly encountered bacterial diseases. The course also addresses the roles of antimicrobial compounds and the host immune system in counteracting disease. Finally, in the lab module for the course, students perform discovery-oriented research as they identify novel genes in enteropathogenic Escherichia coli (EPEC) that affect bacterial virulence in a C. elegans (roundworm) model of disease. Two 75-minute lecture periods, one three-hour laboratory period.
Restrictions: Enrollment is limited to Graduate level students.

BIO 625L Bacterial Pathogenesis Lab (0 credits)

BIO 628 Histopathology (4 credits)
A study of the microscopic structure and function of normal and diseased cells, tissues and organs, focusing on vertebrates, with a special emphasis on humans. Using prepared slides and computer images, students learn to identify and differentiate healthy and pathological samples and relate this to abnormal or disrupted organ function. Two 50-minute lecture periods, two, two-hour lab periods.
Restrictions: Enrollment is limited to Graduate level students.

BIO 628L Histopathology Lab (0 credits)

BIO 629 Science Communication&Outreach (1 credit)

BIO 720 Science Communication&Outreach (1 credit)

BIO 770 Advanced Topics in Biology (3-4 credits)
Topics, course format, and instructors may vary each semester.

BIO 790 Independent Study (3 credits)

BIO 791 Graduate Internship (1-4 credits)

BIO 793 Research (1-6 credits)
Research project undertaken in the laboratory of a member of the graduate faculty. Meeting times arranged.
Restrictions: Enrollment is limited to Graduate level students.

BIO 794 Thesis Research (3,6 credits)
Research credit during preparation of thesis. Times to be arranged.
Restrictions: Enrollment is limited to Graduate level students.

Biology Major

Learning Goals and Objectives for the B.S. in Biology
Goal 1: Students will gain an appreciation and understanding of cell structure and function, the organization of biological systems, and the evolution of biological diversity.

Objective 1.1: Students will be able to describe evolution and the basic mechanisms of evolutionary change.

Objective 1.2: Students will demonstrate knowledge of the major domains of life on earth and the distinctive characteristics of major groups.

Objective 1.3: Students will demonstrate knowledge of anabolic and catabolic pathways used by living organisms to provide energy and macromolecules for synthesis.

Objective 1.4: Students will be able to describe the components of the major trophic levels and diagram the flow of nutrients through food webs in the environment.

Objective 1.5: Students will be able to describe how organisms respond to physiological, environmental and physical challenges.

Objective 1.6: Students will be able to describe the role of genetics at both cellular and organismal levels.

Objective 1.7: Students will demonstrate an understanding of the importance of protein structure and function.

Goal 2: Students will develop skills in experimental design, surveying of scientific literature, data collection, and the interpretation of results, including statistical analysis.

Objective 2.1: Students will demonstrate competency in operating basic laboratory equipment.

Objective 2.2: Students will demonstrate competency in data reduction and presentation, including choosing and interpreting the appropriate statistical tests.

Goal 3: Students will develop skills in presenting scientific information both orally and in writing.

Objective 3.1: Students will be able to develop cogent, well structured, and researched written and oral presentations of scientific content.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

Four additional 400-level biology courses  

Chemistry  
CHM 125  General Chemistry II (second semester, freshman year)  3  
CHM 125L  General Chemistry Lab II (second semester, freshman year)  2  
CHM 215  Organic Chemistry II (second semester, sophomore year)  3  
CHM 215L  Organic Chemistry Lab II (second semester, sophomore year)  1  

Mathematics  
MAT 128  Applied Statistics (first semester, sophomore year)  3  

Physics  
PHY 102  General Physics II (second semester, junior year)  3  
PHY 102L  General Physics Laboratory II (second semester, junior year)  1  

1. BIO 101, BIO 102, BIO 201 and CHM 120, CHM 125 are prerequisite for all 400 level BIO courses.  

Note: Directed readings, special topics Biology Graduate courses and other Biology courses without a lab component can only be counted as a Biology elective and in most cases no more than one such non-lab course may be applied to this requirement. Students with the appropriate Mathematics background and interests can substitute University Physics for General Physics.  

Biology B.A.  
This program allows a student to complete in five years the requirements for both the B.S. in Biology and M.S. in Education degrees with certification to teach biology by permitting an undergraduate student to begin graduate coursework in Education during his/her senior year. The program features:  

1. an independent faculty-directed research project in biology in the summer between the fourth and fifth years,  
2. two graduate courses in biology, and  
3. seven graduate courses in education, including a one semester student teaching experience.  

A student should apply to the Chair of the Department of Biology for admission to this program by the second semester of his/her junior year at the latest. It is anticipated that the graduates of this program will be highly competitive in the rapidly expanding market for qualified high school biology teachers.  

The Pennsylvania Department of Education requirements and program of study sequence for students under the GEP have not yet been finalized. This section will be updated as soon as the requirements are in place. Students interested in the five year program should speak to their academic advisors and to Chair of the Department of Biology as early in their academic careers as possible.  

The Bachelor of Arts degree in Biology is for students who wish to pursue a dual major with Secondary Education (B.S.). The B.A. degree is only available for students who pursue the dual major.  

Requirements for the B.A. in Biology: To become certified to teach at the secondary education level (grades 7-12), students must complete a total of five Education and three Special Education courses, and student teaching. For further details, see the Teacher Education section.

1 BIO 101, BIO 102, BIO 201 and CHM 120, CHM 125 are prerequisite for all 400 level BIO courses.

Biology Five-year BS/MS or BS/MA

Students who are completing undergraduate degrees leading to the BS in Biology have the option to complete a combined BS/MS or BS/MA degree in five years (including the summer term after the fifth year). Students electing this option must apply to the graduate program in their senior year and be provisionally accepted before they complete the BS. (Students applying for the BS/MS program must have been accepted by a faculty mentor for the thesis portion of their work at the time of application.) They will be required to complete all the requirements for the normal MS or MA degree, with the following additions/exceptions:

- Students in the five year programs will have the option of taking up to two graduate courses that count toward the graduate degree while they are still enrolled as undergraduates. The graduate courses will only count toward the graduate degree if they are not needed for the BS. For example, a senior exercising the 38 course option for Biology majors can take two graduate level Biology courses, thus complete 40 courses, and use the two graduate courses toward the credits required for the graduate degree. For students in the BS/MS program, it would be possible for the graduate credits to be research credits, if they have begun their graduate research in their senior year. Students exercising these options may be able to graduate in the spring of the fifth year.

- Students in the five year programs will be expected to take at least three credits during the summer between their senior year and the fifth year. These credits may be for research or coursework.

- Students in the five year BS/MS will not take the lab portion of research techniques but should be accepted into a research lab in their senior year. BS/MS students are expected to take three graduate courses: Research Techniques plus two other 3 or 4 credit graduate courses. The balance of the required credits can be graduate research credits.

- Students in the five year programs will be expected to take graduate seminar for both semesters in their fifth year.

- Students considering the five year programs should speak with their advisors and the graduate director as early as possible.

Biology M.A.

Graduate Arts and Sciences
Dr. Karen Snetselaar, Director
Science Center 225
610- 660-1826
ksnetsel@sju.edu

Mission Statement

The Biology Department offers programs leading to the Master of Science (M.S.) and Master of Arts (M.A.) degrees in biology. These flexible programs meet the needs of students wishing to develop their skills as research scientists or prepare for admission to professional school or doctoral programs. Both programs can prepare students to enter science-related careers or help them advance in education or corporate settings.

Description of Programs and Application Guidelines

The graduate programs of the Biology Department are intended for graduates who desire training in specialized fields and who are planning a career in teaching, research or professional practice in these areas. Applicants must have a bachelor’s degree from an accredited college or university and must present evidence of ability to pursue graduate work as exemplified by high scholastic achievement, high GRE test scores and exemplary recommendations. The Biology Department reserves the right to make exceptions or require additional undergraduate coursework prior to admission.

Applicants should submit or have sent to the Office of Graduate Operations the following:

- a completed Saint Joseph’s University graduate application.
- official sealed transcript(s) of undergraduate/graduate coursework. If you are a SJU graduate the Office of Graduate Operations will obtain your SJU transcripts for you.
- official copies of scores of the Graduate Record Examination (general test).
- letters of recommendation from at least two faculty evaluating the candidate’s promise and capacity for graduate study.
- a personal statement outlining the candidate’s professional goals and educational objectives for the program, including the applicant’s rationale for program choice and professional study.
- $35 application fee – waived if attended an Open House or an SJU graduate.

The M.S. program requires completion of an extensive research project and a written thesis and is typically a full-time program completed within two years. The M.A. program is course-based and more easily accommodates part time as well as full-time students. Non-matriculated students may also, with permission, enroll for isolated credit. Competitive Teaching Assistantships are available for students who qualify and there may be additional opportunities for financial support. Students apply to either the M.S. or the M.A. program depending on their interests. Due to the independent nature of the M.S. program, admission is more competitive. The number of M.S. students admitted each year is also limited by the availability of faculty mentors and may change annually. The graduate admissions committee will evaluate all applicants and decide whether the applicant has sufficient credentials to be admitted to the program. A personal interview with the applicant may be requested.

The biology graduate program accepts applications all year; however students are generally advised to begin their studies in the fall semester because the required Research Techniques course is offered only in fall. Applicants wishing to be considered for teaching or research assistantships for the fall semester are advised to apply by March 1 as funds are limited and funding decisions are typically made by April 1.

Program learning goals and objectives

Goal 1: Students will develop their identity as scientists through interactions with faculty mentors, with their colleagues and with non-scientists. They will become informed about prospective careers for life scientists in government, industry and academia as well as learning about the professional and ethical expectations for scientists.

Objective 1.1: Students will be familiar with the appropriate set of research, laboratory and/or field skills used by specialists in their subfields of choice.

Goal 2: Students will be able to understand and critique articles from the primary literature in biology. They will improve their skills in communicating about science, particularly about biology, including data presentation, writing, and oral communication appropriately targeted to various audiences.

Objective 2.1: Students will be able to locate, read, interpret, evaluate and discuss primary literature in Biology.

Objective 2.2: Students will be able to analyze, interpret and present data of various kinds.

Objective 2.3: Students will design, execute and communicate results of research. (For M.A. students, this will take the form of projects completed for courses. M.S. students will complete a traditional thesis that includes a public defense and a written report.)

Goal 3: Students will develop skills in experimental design, data collection and analysis.

Objective 3.1: Students will be able to analyze, interpret and present data of various kinds.
Objective 3.2: Students will design, execute and communicate results of research. (For M.A. students, this will take the form of projects completed for courses. M.S. students will complete a traditional thesis that includes a public defense and a written report.)

Goal 4: Students will have a deeper and more sophisticated understanding of one or more of the subfields of biology, and they will develop the appropriate set of research, laboratory and/or field skills necessary for specialization in the subfields.

Objective 4.1: Students will increase their knowledge and understanding of one or more of the subfields of biology through assignments in courses and research experiences in courses and/or independent study.

Objective 4.2: Students will be familiar with the appropriate set of research, laboratory and/or field skills used by specialists in their subfields of choice.

Course Requirements
Degree candidates for the Master of Arts Degree in Biology will be required to complete 32 credit hours of graduate study in biology. A minimum of two semesters of seminar must be taken, with a maximum of 4 credit hours counting toward the degree. Students must take Research Techniques (BIO 550) and at least one each from two of the three broad categories of Evolution and Diversity, Cell Structure and Function, and Systemic Organization.

Other specific requirements
1. Successful completion of all requirements must be accomplished within a maximum of 5 years from the time of acceptance to the program.
2. All of the requirements described in this document represent minimum requirements, and it is understood that the Graduate Committee may require additional work to make up for deficiencies in the student’s background. Any exceptions to requirements must be approved by the graduate director.

Objective 4.2: Students will be familiar with the appropriate set of research, laboratory and/or field skills used by specialists in their subfields of choice.

Course Requirements
Degree candidates for the Master of Science degree in Biology must be full time students and will be required to complete 30 credit hours of graduate study in biology. All candidates will be required to complete 24 credit hours of formal classroom study and 6 credit hours of thesis research (BIO 794). The 24 credit hours of formal classroom study must be in graduate level courses (600-700 level), which may include up to 4 credit hours of seminar (BIO 552) and 8 credit hours of research (BIO 793). Seminar participation is required during each semester of enrollment.

Thesis requirement
Degree candidates for the Master of Science Degree in Biology will be required to complete a research problem in their area of specialization and to publish their findings in thesis form. A Thesis Committee will be formed to follow the progress of the candidate, evaluate the final thesis and administer a final oral examination based on the thesis research. The Thesis Committee will consist of three faculty members, and be chaired by the candidate’s research mentor. The thesis must be acceptable in both scholarship and literary quality. Both a public presentation of the thesis work and a private defense of the thesis are required. To be recommended for the Master of Science degree in Biology, the candidate must receive approval of the majority of the committee members. Not later than three weeks prior to the commencement at which the degree is to be conferred, two copies of the completed thesis suitable for binding and bearing approval of the Thesis Committee must be deposited in the Department of Biology office. The cost of preparation, reproduction, and binding of the thesis is the responsibility of the candidate.

Other specific requirements
1. The candidate for the M.S. Degree in Biology is required to graduate with a grade point average of at least 3.0.
2. Successful completion of all requirements must be accomplished within a maximum of 5 years from the time of acceptance to the program.
3. All of the requirements described in this document represent minimum requirements, and it is understood that the Thesis Committee may require additional work to make up for deficiencies in the student’s background. Any exceptions to requirements must be approved by the thesis mentor and the graduate director.

Financial Support
Full-time M.S. students can apply for teaching assistantships that include a stipend and tuition scholarship. Other teaching opportunities may be available to both M.A. and M.S. candidate. Students seeking financial support are encouraged to apply by March 1 or earlier for the fall semester.

Biology Minor

Learning Goals and Objectives for the minor in Biology

Goal 1: Students will gain a fundamental understanding of biological systems.

Objective 1.1: Students will understand concepts of basic cellular structure and function.

Objective 1.2: Students will demonstrate knowledge of the organization of biological systems.

Objective 1.3: Students will understand basic concepts concerning the evolution of biological diversity.

Goal 2: Students will develop basic skills in the practice of experimental inquiry into biological systems.

Objective 2.1: Students will understand the rudiments of experimental design.

Objective 2.2: Students will be competent in the operation of basic laboratory equipment.

Objective 2.3: Students will be competent in data collection, interpretation, and the communication of research findings in written and oral form.

The minor in biology requires completion of the following:

Program Overview
The major in Chemical Biology addresses the growing interest that many biologists have in the molecular aspects of biology and the increasing emphasis that many chemists place on the significance of chemical interactions and reactions in biological systems. The mission of the major in Chemical Biology is to provide students with an inter-disciplinary and thorough training in both biology and chemistry so that they can understand and investigate the chemical processes that take place at the molecular level in living systems. Chemical Biology majors take a wide variety of chemistry and biology courses with the flexibility to focus on particular areas of their own interest. All students majoring in Chemical Biology engage in faculty-directed independent research projects as part of the major requirement. This gives students the opportunity to apply the principles that they have learned in the classroom and laboratory to the solution of real world scientific problems. In doing research, students gain hands-on experience in the use of state-of-the-art instrumentation, data analysis and interpretation. Students have presented their research at local and national conferences and in journal publications.

A major in Chemical Biology provides a strong academic background for students interested in pursuing graduate, professional and industrial careers at the interface between chemistry and biology. Students in the major benefit from the presence of pharmaceutical, chemical and biochemical industries, and many strong graduate and professional programs in the Philadelphia region. Chemical Biology majors have gone on to careers in cellular and molecular biology, biochemistry, genetics, pharmacy and pharmacology, medicine, biotechnology, forensic science and neuroscience.

Learning Goals and Objectives
Goal 1: Students will gain an appreciation of the integration of chemistry and biology to solve scientific problems.

Objective 1.1: Students will use fundamental chemical principles such as molecular structure, bonding, and interactions, stoichiometry, kinetics, equilibrium, and thermodynamics to understand and explain biological systems, processes, and structures.

Objective 1.2: Student will demonstrate knowledge of biochemical pathways used by living organisms to provide energy and macromolecules for synthesis.

Objective 1.3: Students will understand the biochemical underpinnings of how organisms respond to changes in their environment.

Objective 1.4: Students will work independently and in collaboration with others in the investigation of problems in biology and chemistry.

Goal 2: Students will understand the role of chemical properties in biological systems and processes.

Objective 2.1: Student will describe the molecular mechanism of evolutionary change and genetic variation at both the cellular and organismal levels.

Objective 2.2: Students will understand the biochemical underpinnings of how organisms respond to changes in their environment.

Goal 3: Students will acquire research experience through faculty-supervised independent projects in chemistry or biology.

Objective 3.1: Students will search the literature for published work relevant to a problem of interest.

Objective 3.2: Students will use, in a "hands on" environment, chemical tools and instrumentation to study and solve problems involving chemical and biological systems, processes and structures.

Objective 3.3: Students will analyze data, including data reduction, presentation, and interpretation.

Objective 3.4: Students will work independently and in collaboration with others in the investigation of problems in biology and chemistry.

Objective 3.5: Students will conduct research in an ethical manner.

Goal 4: Students will effectively communicate scientific information.

Objective 4.1: Students will develop cogent, well structured, and researched written and oral presentations of scientific content.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

**General Education Signature Courses**
See this page about Signature courses (p. 26). Six courses

**Select the following:**

Hours A Chemical Biology major must register for Chemical Biology Seminar each semester as a junior and a senior.
CHEMISTRY

Department Overview
Chemistry is the branch of science that tries to understand the relationships between the detailed structure of a substance and its properties and reactivity. Chemistry is concerned both with naturally occurring substances and with new substances that are created by humans. Chemists work to determine why substances differ in their properties and how these properties can be controlled and used effectively. An important objective in chemical education is to develop in students the ability to solve problems by employing the techniques of the various sub-disciplines of chemistry. A student who is majoring in chemistry at Saint Joseph’s University is introduced to all of the major sub-disciplines: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. Throughout the program, emphasis is placed on chemistry as a laboratory science. Consequently, a student majoring in chemistry learns not only the basic theories of chemistry, but also how to use experimental techniques to solve chemical problems. The modern research-grade instrumentation in our laboratories enhances the experimental experiences of our students. Faculty members teach all of the sections of laboratory courses. In addition, chemistry majors are able to engage in faculty-directed independent research projects in the traditional sub-disciplines of chemistry and environmental chemistry during the academic year and/or in the summer. Students often have the opportunity to present the results of their research in the chemical literature and at local, regional, and national scientific meetings. The curriculum for the chemistry major is designed to prepare students for continuing their educations in graduate and professional schools as well as for employment in the chemical and pharmaceutical industries and government laboratories. The American Chemical Society certifies the curriculum of the Bachelor of Science degree in Chemistry.

Departmental Mission
The Department of Chemistry trains students in both the theoretical and experimental aspects of the major sub-disciplines of chemistry. Our modern research-grade instrumentation makes it possible for students to explore contemporary problems in all of these areas. Chemistry majors are encouraged to engage in faculty-directed independent research projects and to present the results of their studies in the chemical literature and at scientific meetings. The curriculum for a chemistry major prepares the graduates to continue their educations in graduate and professional schools or to work in the chemical and pharmaceutical industries and in government laboratories. Our alumni are aware that through chemistry they can continue to make contributions to society that are of service to others.

Advisory Option—Chemistry Premedical
Students planning to enter medical or dental school should take BIO 101-BIO 102.

Advisory Option—Chemistry and Business
Students who intend to pursue studies toward the M.B.A. or who plan careers in the marketing or management areas of the chemical industry should minor in business.

Chemistry in the GEP
(See Curricula (p. 26))

The GEP requires that all students take EITHER one semester of a lab-based natural science course (6 contact hours) OR two semesters of lecture-only natural science courses. Students who wish to satisfy the natural science GEP by completing courses in Chemistry may do so by taking the first semester of the Chemistry majors, lab-based course sequence, CHM 120 and CHM 120L, or one of the lab-based, one-semester chemistry courses for non-science majors, as they become available. Alternatively, students may fulfill one or both semesters of the natural science GEP by completing one or two of the special one-semester lecture-only Chemistry courses designed for non-science majors listed below.

Non-science majors Chemistry GEP lecture-only courses:

Professor: Mark A. Forman, Ph.D.; Roger K. Murray, Ph.D.
Associate: E. Peter Zurbach, Ph.D.; Jean M. Smolen, Ph.D.; Mark F. Reynolds, Ph.D.; Peter M. Graham, Ph.D.; Usha Rao, Ph.D.
Assistant: Jose Cerda, Ph.D.
Lab Coordinator: John Longo, M.A. M.S.

Chair: Forman

Undergraduate
• Chemistry Major with ACS Certification (p. 107)
• Chemistry Major: Environmental Chemistry Option (p. 110)
• Chemistry Major: Biochemistry Option (p. 108)
• Five Year Combined B.S. in Chemistry Education/M.S. in Education Option (p. 112)
• B.A. in Chemistry/B.S. in Secondary Education Dual Major (p. 106)

Undergraduate Minors
• Chemistry Minor (p. 112)

CHM 100 Chemistry for the Consumer (3 credits)
This course is designed to help students understand the chemistry that affects them throughout their lives. Topics include: nuclear chemistry, home products, food and drugs, acid rain, energy, climate control, and sustainability. May be taken for science or elective credit without previous chemistry courses. Successful completion of this course will fulfill a lecture-only natural science course requirement for the GEP natural science area.

Restrictions: Students cannot enroll who have a major in Biology, Chemistry, Chemical Biology, Food Marketing or Physics.

Attributes: GEP Natural Science, Undergraduate
**CHM 112 Food Chemistry (4 credits)**

The study of chemistry as it specifically relates to food. Underlying basic chemical principles will allow the study of particular molecules found in food (carbohydrates, proteins, lipids) and the changes these molecules undergo as they are cooked and absorbed. Topics will also include preservation, food safety, and food additives. This laboratory course will introduce students to the use of laboratory techniques to study food, including the measurement of food properties including pH, flavor, color, and texture. Students will learn how chemical and physical changes can alter food quality. The content material of CHM 112 overlaps with the content of IHS 253 Nutrition: Health and Disease. Students may take either CHM 112 or IHS 253 not both. Successful completion of CHM 112/112L fulfills the GEP science requirement for Food Marketing majors only. It will serve as a free-elective for all other majors. CHM 112L is a corequisite for CHM 112.

**Restrictions:** Enrollment is limited to students with a major in Food Marketing Co-Op or Food Marketing.

**Attributes:** GEP Natural Science, Science Course w/Lab (Sci Maj)

**CHM 112L Food Chemistry: Lab (0 credits)**

Students who register for this Chemistry lab must also register for the corresponding lecture. For example, if you register for CHM 112L you must, at the same time, register for CHM 112.

**Restrictions:** Enrollment is limited to students with a major, minor, or concentration in Food Marketing Co-Op or Food Marketing.

**Attributes:** GEP Natural Science

**CHM 115 Chemistry in Daily Life (4 credits)**

This course explains the basic theories and need-to-know facts of scientific events one encounters in daily life from a chemistry perspective. In addition to explaining the fundamental concepts of chemistry, the course will cover topics such as acids and bases, oxidation and reduction, household chemicals, nuclear energy, nuclear medicine, biochemistry, and drugs. This laboratory course will cover a wide range of experiments that require mastering a variety of laboratory skills, which utilize many different types of equipment. The proper use of beakers, flasks, pipets, burets, simple calorimeters, balances, and thermometers, to name a few, is critical to a student’s success in the course. Accurate observations and recording of data is stressed and evaluated. Students will submit data and results forms at the conclusion of each experiment. Both qualitative (observations and descriptions) and quantitative (calculations and graphs) methods will be stressed. Successful completion of CHM 115/115L fulfills the GEP science requirement.

**Attributes:** GEP Natural Science, Science Course w/Lab (Sci Maj), Undergraduate

**CHM 115L Chemistry in Daily Life (0 credits)**

**CHM 120 General Chemistry I (3 credits)**

Topics included are chemical formulas, stoichiometry, balancing reactions, ideal gases, thermodynamics, atomic structure, chemical bonding and molecular structure, kinetics, equilibrium, the chemistry of acids and bases, entropy, free energy, and electrochemistry. CHM 120 is a prerequisite to CHM 125. Successful completion of CHM 120 and CHM 120L fulfills the GEP natural science requirement.

**Attributes:** GEP Natural Science, Science Course w/Lab (Sci Maj), Undergraduate

**CHM 120L General Chemistry Lab I (2 credits)**

A lecture-laboratory course to accompany CHM 120-125 with emphasis upon concepts in chemistry, quantitative and qualitative analysis, and introduction to instrumental methods. One four-hour period. Successful completion of CHM 120L is a prerequisite to CHM 125L. CHM 120/121 is a co or prerequisite for CHM 120L. CHM 125/126 is a co or prerequisite for CHM 125L.

**Attributes:** GEP Natural Science, Undergraduate

**CHM 121 General Chemistry Honors I (3 credits)**

The material covered in this honors course is the same as CHM 120-125 but more extensive in depth. Additional topics may be added as time permits. The course assumes that the student has had chemistry in high school. The format of the course may differ from the standard lecture model. CHM 120 or 121 is a prerequisite to CHM 126. Successful completion of CHM 121 and CHM 120L fulfills the GEP natural science requirement.

**Attributes:** GEP Natural Science, Honors Course, Science Course w/Lab (Sci Maj), Undergraduate

**CHM 125 General Chemistry II (3 credits)**

Topics included are chemical formulas, stoichiometry, balancing reactions, ideal gases, thermodynamics, atomic structure, chemical bonding and molecular structure, kinetics, equilibrium, the chemistry of acids and bases, entropy, free energy, and electrochemistry. CHM 120 is a prerequisite to CHM 125. Successful completion of CHM 120 and CHM 120L fulfills the GEP natural science requirement.

**Prerequisites:** CHM 120 or CHM 121

**Attributes:** GEP Natural Science, Science Course w/Lab (Sci Maj), Undergraduate

**CHM 125L General Chemistry Lab II (2 credits)**

A lecture-laboratory course to accompany CHM 120-125 with emphasis upon concepts in chemistry, quantitative and qualitative analysis, and introduction to instrumental methods. One four-hour period. Successful completion of CHM 120L is a prerequisite to CHM 125L. CHM 120/121 is a co or prerequisite for CHM 120L. CHM 125/126 is a co or prerequisite for CHM 125L.

**Prerequisites:** CHM 120L or CHM 126 (may be taken concurrently)

**Attributes:** Undergraduate

**CHM 126 General Chemistry Honors II (3 credits)**

The material covered in this honors course is the same as CHM 120-125 but more extensive in depth. Additional topics may be added as time permits. The course assumes that the student has had chemistry in high school. The format of the course may differ from the standard lecture model. CHM 120 or 121 is a prerequisite to CHM 126. Successful completion of CHM 121 and CHM 120L fulfills the GEP natural science requirement.

**Prerequisites:** CHM 120 or CHM 121

**Attributes:** GEP Natural Science, Honors Course, Science Course w/Lab (Sci Maj), Undergraduate
CHM 150 Freshmen Seminar (3 credits)
This course is designed to introduce students to the fundamental factors governing air, water and soil pollution, and to briefly discuss the impacts of pollution on public health, both in the US and in the developing world. We will examine various physical, chemical and biological sources of pollution such as heavy metals, volatile organic compounds, pesticides, radionuclides, ionizing and nonionizing radiation, thermal and noise pollution, bacteria, viruses, and parasites. These different agents contribute to the pollution of soil, the atmosphere, and water bodies such as lakes, rivers and oceans, and pose a significant public health problem across the globe. No prior background in the natural sciences will be required of the students. The course will fulfill the First-Year Seminar GEP requirement.
Attributes: First-Year Seminar, Undergraduate

CHM 210 Organic Chemistry I (3 credits)
Modern organic chemistry in which the treatment of aliphatic and aromatic compounds is integrated as much as possible. Reactions of the functional groups are explained in terms of electronic mechanisms. CHM 125 or CHM 126 is a prerequisite to CHM 210. CHM 210 is a prerequisite to CHM 215.
Prerequisites: CHM 125 or CHM 126 or CHM 1021
Attributes: Undergraduate

CHM 210L Organic Chemistry Lab I (1 credit)
This semester concentrates on experiments designed to introduce students to the various techniques used in the organic laboratory. CHM 210 is a co or prerequisite for CHM 210L.
Attributes: Undergraduate

CHM 215 Organic Chemistry II (3 credits)
Modern organic chemistry in which the treatment of aliphatic and aromatic compounds is integrated as much as possible. Reactions of the functional groups are explained in terms of electronic mechanisms. CHM 125 or CHM 126 is a prerequisite to CHM 210. CHM 210 is a prerequisite to CHM 215.
Prerequisites: CHM 210
Attributes: Undergraduate

CHM 215L Organic Chemistry Lab II (1 credit)
A continuation of CHM 210L utilizing micro scale laboratory techniques in organic chemistry for the preparation, purification and analysis of organic compounds. CHM 210L is a prerequisite to CHM 215L. CHM 215 is a co or prerequisite for CHM 215L.
Prerequisites: CHM 210L and CHM 210
Attributes: Undergraduate

CHM 293 Sophomore Research Studies I (3,6 credits)
Integrated literature and laboratory investigation of an assigned problem under the supervision of a departmental faculty member. Each credit of CHM 293-294 requires four hours each week in the research laboratory. Students need to complete the application form for independent study and have the approval of the Chemistry Department Chair and Associate Dean in order to register.
Attributes: Undergraduate

CHM 294 Sophomore Research Studies II (3,6 credits)
Integrated literature and laboratory investigation of an assigned problem under the supervision of a departmental faculty member. Each credit of CHM 293-294 requires four hours each week in the research laboratory. Students need to complete the application form for independent study and have the approval of the Chemistry Department Chair and Associate Dean in order to register.
Attributes: Undergraduate

CHM 310 Physical Chemistry I (3 credits)
Thermodynamics as applied to gases, liquids, and solutions; thermodynamics of ideal systems; thermochemistry; chemical kinetics; gaseous equilibrium; colligative properties of solutions; quantum mechanics. CHM 215 is a prerequisite to CHM 310. CHM 310 is a prerequisite to CHM 315.
Prerequisites: CHM 215 or CHM 2321
Attributes: Undergraduate

CHM 310L Physical Chemistry Lab I (2 credits)
Experiments are performed to reinforce the concepts learned in CHM 241L-242L. Laboratory reports are submitted for each experiment. CHM 310 is a co-requisite to CHM 310L.
Attributes: Undergraduate

CHM 315 Physical Chemistry II (3 credits)
Thermodynamics as applied to gases, liquids, and solutions; thermodynamics of ideal systems; thermochemistry; chemical kinetics; gaseous equilibrium; colligative properties of solutions; quantum mechanics. CHM 215 is a prerequisite to CHM 310. CHM 310 is a prerequisite to CHM 315.
Prerequisites: CHM 310
Attributes: Undergraduate

CHM 315L Physical Chemistry Lab II (2 credits)

CHM 320 Physical Chem for Cheml Bio (3 credits)
Study of atomic and molecular structure; chemical thermodynamics; states of matter; kinetics and mechanisms of reactions; phase and chemical equilibria; emphasis on applications in biological systems. CHM 215 is a prerequisite to CHM 320.
Prerequisites: CHM 215
Attributes: Undergraduate

CHM 330 Instrumental Analysis (3 credits)
This course covers the theory, methodology, and instrumentation for the study of atomic and molecular species and/or processes. CHM 215, CHM 310, and PHY 106 or permission of the Department of Chemistry chair) are prerequisites to CHM 330.
Prerequisites: CHM 215
Attributes: Undergraduate

CHM 330L Instrumental Analysis Lab (2 credits)
CHM 330 is a co-requisite to CHM 330L.
Prerequisites: CHM 215L
Attributes: Undergraduate

CHM 340 Biochemistry (3 credits)
A basic introduction to the chemistry of living systems emphasizing their major metabolic activities. Structure and function of proteins, lipids, and carbohydrates. Basic principles of intermediary metabolism and photosynthesis. CHM 215 is a prerequisite for CHM 340.
Prerequisites: CHM 215
Attributes: Undergraduate

CHM 340L Biochemistry Lab (1 credit)
Laboratory applications of the topics covered in CHM 340. CHM 215L is a prerequisite to CHM 340L. CHM 340 is a co-requisite to CHM 340L.
Prerequisites: CHM 215L and CHM 340 (may be taken concurrently)
Attributes: Undergraduate
CHM 350 Inorganic Chemistry (3 credits)
This course includes the study of atomic structure, bonding, molecular orbital theory, symmetry and group theory, the chemistry of the main group elements, and the structure and reactivity of transition metal complexes. CHM 215 is a prerequisite to CHM 350.
Prerequisites: CHM 215 or CHM 2321
Attributes: Undergraduate

CHM 350L Inorganic Chemistry Lab (2 credits)
This course focuses on synthetic inorganic chemistry and emphasizes the use of modern analytical techniques for the characterization of inorganic and organometallic compounds. This course satisfies the GEP Writing Intensive requirement. CHM 215L is a prerequisite to CHM 350L.
CHM 350 is a co-requisite for CHM 350L.
Prerequisites: CHM 215L
Attributes: Undergraduate, Writing Intensive Course- GEP

CHM 390 Chemistry Seminar (0 credits)
Lectures by outside and local speakers and discussions of special topics in chemistry. Enrollment is required each semester for junior and senior chemistry majors. Graded on a P/NP basis.
Attributes: Undergraduate

CHM 393 Junior Research I (3,6 credits)
Integrated literature and laboratory investigation of an assigned problem under the supervision of a departmental faculty member. Each credit of CHM 393-394 requires four hours each week in the research laboratory. Students need to complete the application form for independent study (available in the Dean's Office) and have the approval of the Chemistry Department chair and Associate Dean in order to register.
Attributes: Undergraduate

CHM 394 Junior Research II (3,6 credits)
Integrated literature and laboratory investigation of an assigned problem under the supervision of a departmental faculty member. Each credit of CHM 393-394 requires four hours each week in the research laboratory. Students need to complete the application form for independent study (available in the Dean's Office) and have the approval of the Chemistry Department chair and Associate Dean in order to register.
Prerequisites: CHM 393 or CHM 293 or CHM 2901
Attributes: Undergraduate

CHM 400 Biogeochemistry (3 credits)
This course examines the chemical processes that control the distribution, speciation, and transfer of essential elements and energy in natural systems. Topics include: the concept of the Earth as a biogeochemical system; the use of quantitative methods to model the chemical fluxes of elements on a global scale; dominant chemical reactions in natural environments; evolution of metabolic pathways; the biogeochemical cycling of water, carbon, nitrogen, phosphorus, sulfur, and select heavy metals under natural and anthropogenically-influenced conditions. CHM 340 is a prerequisite or a co-requisite to CHM 400. This prerequisite may be waived with permission of the Chemistry Department Chair.
Prerequisites: CHM 340 (may be taken concurrently)
Attributes: Undergraduate

CHM 410 Biophysical Chemistry (3 credits)
This course utilizes the concepts of physical chemistry to understand the properties of biological systems.
Prerequisites: CHM 310 or CHM 320
Attributes: Undergraduate

CHM 410L Biophysical Chemistry Lab (1 credit)

CHM 420 Environmental Chemistry (3 credits)
Investigation of both pristine and polluted environments using chemistry as a foundation. Topics include: atmospheric chemistry, water quality, soil composition, fate of toxic metals and organic pollutants, and using chemistry as a solution for pollution. CHM 215 is a prerequisite to CHM 420.
Prerequisites: CHM 2321 and CHM 210
Attributes: Undergraduate

CHM 420L Environmental Chemistry Lab (1 credit)

CHM 430 Mechanisms in Organic Chem (3 credits)
Application of the electron pushing formalism for manipulating Lewis structure representations of organic structures. Emphasis is placed on mechanistic rationalization of complex organic transformations. Classes of mechanisms include elimination, substitution, rearrangement, oxidation-reduction, enolate alkylation, and others. CHM 215 is a prerequisite to CHM 430.
Prerequisites: CHM 215
Attributes: Undergraduate

CHM 435 Tech Applications of Chemistry (3 credits)
Course will focus on current and future technologies that utilize fundamental and advanced theories of chemistry. Topics will include, but are not limited to, microwave ovens, liquid crystal displays (LCD), light emitting diode displays (LED), plasma screens, charge coupled devices (CCD), field effect transistors (FET), positron emission tomography (PET), magnetic resonance imagining (MRI), battery systems, data storage devices, and solar panels. CHM 215 is a pre-requisite to CHM 435)
Prerequisites: CHM 215

CHM 440 Organometallic Chemistry (3 credits)
This course will focus on the structure and reactivity of organometallic transition metal complexes. Topics include catalysis, reaction mechanisms, applications to organic chemistry, and characterization by spectroscopic methods. CHM 350 is a prerequisite to CHM 440.
Prerequisites: CHM 350
Attributes: Undergraduate

CHM 445 Thermodynamics & Stat Mechanic (3 credits)

CHM 450 Polymer Chemistry (3 credits)

CHM 460 Water Chemistry (3 credits)
This course examines the behavior of chemical species in natural and engineered water systems. Topics include: the chemical composition of surface and subsurface water; geochemical controls on water composition; equilibrium and kinetic processes in aquatic systems; fate and reactions of inorganic and organic constituents in water; acid-base chemistry, complexation chemistry, and redox chemistry in water; the applications of isotopic and other tracers in the study of aquatic systems; and water pollution. CHM 210 is a prerequisite to CHM 460.
Prerequisites: CHM 125 or CHM 126
Attributes: Undergraduate

CHM 470 Special Topics (3 credits)
Advanced study on a topic that is arranged with a chemistry faculty member. Permission of the Department of Chemistry chair is required.
Attributes: Undergraduate

CHM 480 Role of Metal Ions in Biology (3 credits)
Advanced study on a topic that is arranged with a chemistry faculty member. Permission of the Department of Chemistry chair is required.
Prerequisites: CHM 215
Attributes: Undergraduate
CHM 490 Spectroscopy (3 credits)
Advanced study on a topic that is arranged with a chemistry faculty member. Permission of the Department of Chemistry chair is required.
Prerequisites: CHM 330
Attributes: Undergraduate

CHM 491 Chemistry Internship I (3 credits)

CHM 492 Chemistry Internship II (3 credits)

CHM 493 Senior Research I (3,6 credits)
Integrated literature and laboratory investigation of an assigned problem under the supervision of a departmental faculty member. Includes a seminar, a poster presentation, and written reports. Each credit of CHM 493 and CHM 494 requires four hours each week in the research laboratory. CHM 493 is a prerequisite for CHM 494. Students need to complete the application form for independent study (available in the Dean’s Office) and have the approval of the Chemistry Department chair and Associate Dean in order to register.
Prerequisites: CHM 493
Attributes: Undergraduate

CHM 494 Senior Research II (3,6 credits)
Integrated literature and laboratory investigation of an assigned problem under the supervision of a departmental faculty member. Includes a seminar, a poster presentation, and written reports. Each credit of CHM 493 and CHM 494 requires four hours each week in the research laboratory. CHM 493 is a prerequisite for CHM 494. Students need to complete the application form for independent study (available in the Dean’s Office) and have the approval of the Chemistry Department chair and Associate Dean in order to register.
Prerequisites: CHM 493
Attributes: Undergraduate

Chemistry and Secondary Education combined Major

The Bachelor of Arts degree in Chemistry is for students who wish to pursue a dual major with Secondary Education (B.S.). The B.A. degree is only available for students who pursue the dual major.

Requirements for the B.A. in Chemistry In order to become certified to teach at the secondary education level (grades 7-12), students must complete a total of five Education and three Special Education courses, as well as student teaching. For further details, see the Teacher Education section of the catalog. Students interested in the dual major program should speak to their academic advisors and to Chair of the Department of Chemistry as early in their academic careers as possible.

**Chemistry Major with ACS Certification**

Learning Goals and Objectives for the B.S. in Chemistry

**Goal 1:** Students will develop an understanding of the theoretical methods and models that chemists use to understand the properties and behavior of matter.

**Objective 1.1:** Students will demonstrate a mastery of the key concepts in the five major subdisciplines of chemistry: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry.

**Objective 1.2:** Students will apply appropriate theoretical models to explain experimental observations.

**Goal 2:** Students will employ the experimental methods used by chemists.

**Objective 2.1:** Students will properly employ the instruments that are used to study problems in chemistry. The students will correctly interpret the data that they obtain from these instruments.

**Objective 2.2:** Students will store, handle, and use chemicals safely and responsibly

**Goal 3:** Students will effectively communicate scientific information.

**Objective 3.1:** Students will present results from chemical investigations and the chemical literature both orally and in writing.

**Objective 3.2:** Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

*The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:*

1. Diversity, Globalization or Non-western Area Studies,  
2. Ethics Intensive, and  
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

**General Education Signature Courses**

Enrollment in CHM 390 is required each semester for junior and senior chemistry majors. Students planning to go into industry or attend graduate school should take Senior Research I-II. All students who meet the above requirements satisfactorily will be certified by the American Chemical Society.

Biochemistry Maor

Learning Goals and Objectives for the B.S. in Chemistry

**Goal 1**: Students will develop an understanding of the theoretical methods and models that chemists use to understand the properties and behavior of matter.

**Objective 1.1**: Students will demonstrate a mastery of the key concepts in the five major sub disciplines of chemistry: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry.

**Objective 1.2**: Students will apply the scientific method to study problems in chemistry.

**Objective 1.3**: Students will predict the behavior of a new substance based on the known behavior of related compounds.

**Objective 1.4**: Students will apply appropriate theoretical models to explain experimental observations.

**Objective 1.5**: Students will gain hands-on experience with the instruments that are used to study problems in chemistry. The students will learn how to interpret the data that they obtain from these instruments.

**Objective 1.6**: Students will assess experimental data critically.

**Objective 1.7**: Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

**Objective 1.8**: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

**Goal 2**: Students will gain authentic hands-on experience with the experimental methods used by chemists.

**Objective 2.1**: Students will use contemporary computer software to study problems in chemistry and present results properly and accurately using figures, graphs and tables.

**Objective 2.2**: Students will store, handle, and use chemicals safely and responsibly.

**Objective 2.3**: Students will gain hands-on experience with the instruments that are used to study problems in chemistry. The students will learn how to interpret the data that they obtain from these instruments.

**Objective 2.4**: Students will assess experimental data critically.

**Objective 2.5**: Students will use accepted laboratory record-keeping methods to record their experimental data.

**Objective 2.6**: Students will conduct research in an ethical manner.

**Objective 2.7**: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

**Goal 3**: Students will understand that ethical conduct is fundamental to progress in science.

**Objective 3.1**: Students will conduct research in an ethical manner.

**Objective 3.2**: Students will use contemporary computer software to study problems in chemistry and present results properly and accurately using figures, graphs and tables.

**Objective 3.3**: Students will store, handle, and use chemicals safely and responsibly.
Objective 3.4: Students will use accepted laboratory record-keeping methods to record their experimental data.

Goal 4: Students will appreciate that the frontiers of science are expanding at an accelerating rate and that they must develop a commitment to lifelong learning.

Objective 4.1: Students will work independently and in collaboration with others in the investigation of problems in chemistry.

Objective 4.2: Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

Objective 4.3: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

Goal 5: Students will understand how chemistry provides opportunities for them to address major issues in society.

Objective 5.1: Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

Objective 5.2: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

Goal 6: Students will effectively communicate scientific information.

Objective 6.1: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

Objective 6.2: Students will write about chemistry using objective language and succinct explanations that are typical of scientific writing.

Objective 6.3: Students will use contemporary computer software to study problems in chemistry and present results properly and accurately using figures, graphs and tables.

Objective 6.4: Students will use accepted laboratory record-keeping methods to record their experimental data.

Objective 6.5: Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and free electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-Western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

Environmental Chemistry Major

Learning Goals and Objectives for the B.S. in Chemistry

**Goal 1:** Students will develop an understanding of the theoretical methods and models that chemists use to understand the properties and behavior of matter.

**Objective 1.1:** Students will demonstrate a mastery of the key concepts in the five major sub disciplines of chemistry: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry.

**Objective 1.2:** Students will apply the scientific method to study problems in chemistry.

**Objective 1.3:** Students will predict the behavior of a new substance based on the known behavior of related compounds.

**Objective 1.4:** Students will apply appropriate theoretical models to explain experimental observations.

**Objective 1.5:** Students will gain hands-on experience with the instruments that are used to study problems in chemistry. The students will learn how to interpret the data that they obtain from these instruments.

**Objective 1.6:** Students will assess experimental data critically.

**Objective 1.7:** Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

**Objective 1.8:** Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

**Goal 2:** Students will gain authentic hands-on experience with the experimental methods used by chemists.

**Objective 2.1:** Students will use contemporary computer software to study problems in chemistry and present results properly and accurately using figures, graphs and tables.

**Objective 2.2:** Students will store, handle, and use chemicals safely and responsibly.

**Objective 2.3:** Students will gain hands-on experience with the instruments that are used to study problems in chemistry. The students will learn how to interpret the data that they obtain from these instruments.

**Objective 2.4:** Students will assess experimental data critically.

**Objective 2.5:** Students will use accepted laboratory record-keeping methods to record their experimental data.

**Objective 2.6:** Students will conduct research in an ethical manner.

**Objective 2.7:** Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

**Goal 3:** Students will understand that ethical conduct is fundamental to progress in science.

**Objective 3.1:** Students will conduct research in an ethical manner.

**Objective 3.2:** Students will use contemporary computer software to study problems in chemistry and present results properly and accurately using figures, graphs and tables.

**Objective 3.3:** Students will store, handle, and use chemicals safely and responsibly.

**Objective 3.4:** Students will use accepted laboratory record-keeping methods to record their experimental data.
Goal 4: Students will appreciate that the frontiers of science are expanding at an accelerating rate and that they must develop a commitment to life-long learning.

Objective 4.1: Students will work independently and in collaboration with others in the investigation of problems in chemistry.

Objective 4.2: Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

Objective 4.3: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

Goal 5: Students will understand how chemistry provides opportunities for them to address major issues in society.

Objective 5.1: Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

Objective 5.2: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

Goal 6: Students will effectively communicate scientific information.

Objective 6.1: Students will describe results from chemical investigations and the chemical literature both orally and in writing to specialists and to a general audience.

Objective 6.2: Students will write about chemistry using objective language and succinct explanations that are typical of scientific writing.

Objective 6.3: Students will use contemporary computer software to study problems in chemistry and present results properly and accurately using figures, graphs and tables.

Objective 6.4: Students will use accepted laboratory record-keeping methods to record their experimental data.

Objective 6.5: Students will search and properly cite the chemical literature for published work relevant to a problem of contemporary interest.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. All students who meet the above requirements satisfactorily will be certified by the American Chemical Society.

## Chemistry Minor

### Learning Goals and Objectives for the minor in Chemistry

**Goal 1:** Students will develop an understanding of the theoretical methods and models that chemists use to understand the properties and behavior of matter.

**Objective 1.1:** Students will gain an understanding of the key concepts fundamental to the five major sub disciplines of chemistry: analytical chemistry, biochemistry, inorganic chemistry, organic chemistry, and physical chemistry.

**Objective 1.2:** Students will predict the behavior of a new substance based on the known behavior of related compounds.

**Objective 1.3:** Students will apply appropriate theoretical models to explain experimental observations.

**Objective 1.4:** Students will assess experimental data critically.

**Goal 2:** Students will gain authentic hands-on experience with the experimental methods used by chemists.

**Objective 2.1:** Students will use contemporary computer software to study problems in chemistry and present results properly and accurately using figures, graphs and tables.

**Objective 2.2:** Students will store, handle, and use chemicals safely and responsibly.

**Objective 2.3:** Students will assess experimental data critically.

**Objective 2.4:** Students will apply appropriate theoretical models to explain experimental observations.

**Objective 2.5:** Students will use accepted laboratory record-keeping methods to record their experimental data.

The following courses constitute the minor in chemistry:

### Chemistry and Education combined B.S./M.S.

This program allows a student to complete in five years the requirements for both the B.S. in Chemistry and M.S. in Education degrees with certification to teach chemistry by permitting an undergraduate student to begin graduate coursework in Education during his/her senior year. The program features:

1. an independent faculty-directed research project in chemistry in the summer between the fourth and fifth years, and
2. nine graduate courses in education, including a one-semester student teaching experience.

A student should apply to the Chair of the Department of Chemistry for admission to this program by the first semester of his/her sophomore year.
year. It is anticipated that the graduates of this program will be highly competitive in the rapidly expanding market for qualified high school chemistry teachers.

In order to become certified to teach at the secondary education level (grades 7-12), students must complete a total of five Education and three Special Education courses, as well as student teaching. For further details, see the Teacher Education (p. 162) section. Students interested in the five-year program should speak to their academic advisors and to Chair of the Department of Chemistry as early in their academic careers as possible.
MISSION

The Classical Studies Program aims to be a model for visionary, interdisciplinary thinking, offering courses that serve the needs of multiple academic departments as well as the new General Education Program. The mission of the Classical Studies Program is to offer courses in ancient languages including Greek, Latin and Hebrew, biblical texts, and ancient history. We offer a major in Classical Studies in two concentrations. The Classical Languages and Literatures concentration will combine courses in intermediate/upper level Latin and Greek language and literature, Classical literature in translation, Hebrew language, Bible and religious studies, ancient history of the Mediterranean and Near East, and ancient material culture. As such, it will prepare students for secondary school teaching in Latin but it will also better prepare students for graduate study in Classical Studies and Classical Archaeology. A second concentration in Ancient Cultures is interdisciplinary and flexible to allow specialization in a variety of areas that complement existing programs (e.g., Classical Studies, Ancient Near East, Bible, Ancient History, Archaeology). We also offer minors in Classical Studies and Ancient Cultures. Our courses in ancient language, literature, and civilization complement courses in other disciplines so that students may combine their Classical Studies major with a second major in English, fine and performing arts, history, languages, psychology, theology, philosophy, and elementary education.

The Classical Studies Program offers courses from the elementary to advanced levels of Latin and Greek language and literature. The program serves its majors and minors by offering a full range of advanced level Latin and Greek courses covering the works of major Latin and Greek authors and literary genres. These courses feature comprehensive exploration of Greek and Latin language and of classical society and culture and are designed to prepare majors and minors for graduate study in Classics. Our elementary and intermediate level Latin and Greek courses may be taken as prerequisite courses for advanced work in the languages, and they may also be taken to fulfill the non-native language general education program requirement. All Latin and Greek courses enable students to explore a wide variety of supplementary materials that focus upon mythology, religion, literacy and education, and political and social history.

We also offer a wide range of courses in ancient culture and civilization that focus on the literature, history, and material culture of the ancient world. We offer two Honors courses that focus on Greece and Rome: Sexuality and Gender in the Ancient World and the team-taught Society, Democracy, Republic. Knowledge of Greek and Latin are not required for any of these civilization courses, which may be taken to fulfill requirements for the major or minor, to fulfill the Art/Literature, Diversity, Writing Intensive, and Ethics Intensive areas of the GEP, or as free electives. These courses are interdisciplinary and stress connections with other disciplines such as history, literature, philosophy, theology, gender studies, and the social and natural sciences.

MAJOR REQUIREMENTS

Major Concentration:

The major requires a minimum of 10 courses. Additional requirements are distributed according to each student’s concentration within the major.

- The Classical Languages and Literatures concentration places primary focus on the languages, literatures, and cultures of ancient Greece and Rome. The requirements of this concentration are the best preparation for students interested in ancient languages, essential preparation for post-graduate studies in Classics, or the acquisition of Latin language teaching certification.
- The Ancient Cultures concentration is an interdisciplinary program for students who have an interest in the study of antiquity with less emphasis on ancient languages.

Students may also obtain credit by participating in one of the three options listed below.

- Archaeological Fieldwork (usually one or two courses, offered in cooperation with various other universities as approved in advance, usually as summer transfer credit; because of methodological and experiential value, sites need not be limited to geographical areas normally implied in the minor). Recommended in this category is REL 332 Digging at Tel Dor (fieldwork in Israel).
- International Study Tour (usually equivalent to one course), location as appropriate (e.g., Italy; Greece; Turkey; Israel; Egypt; and others), usually with advance approval of director.
- Study Abroad at an approved overseas university.

REQUIREMENTS FOR DEPARTMENTAL HONORS

To receive College Honors credit, students undertake two consecutive semesters of course-based research and study that culminates in a senior thesis. For students in the University Honors program, these two courses may be counted toward the eight course Honors requirement. To be eligible for College Honors, a student must have a 3.5 GPA. If you are interested in completing the College Honors project during your senior year, please be in touch with the department chair early in the spring semester of your junior year. Specific requirements for the College Honors thesis may be found under Honors Program.

CLASSICAL STUDIES AND TEACHER CERTIFICATION

1. Majors in Classical Studies who intend to pursue teacher certification will earn a double major in their primary subject area and in Secondary Education.

Below is the recommended program for students who will be eligible for a PA Level I teaching certificate in Secondary Education.

* Note: English and foreign language majors are required to take one linguistics course: LIN 200, LIN 317, or EDU 420. See the Education Unit (Teacher Education Department) section of the Catalog for more information.

2. Recommended for other Students in the Classical Studies concentration: Any three courses in ART, CSC, HIS, LIN, MAT, PHL, REL/THE, or SOC that may complement the major concentration, chosen in consultation with the student's advisor. These courses may include other courses in ancient studies that are outside the field of Classics.

3. Recommended for students in both the Classical Studies concentration and Ancient Cultures concentration interested in archaeology: Students may take any courses in BIO, CHM, CSC, MAT, PHY, SOC beyond the courses used to satisfy the GEP and major requirements.

4. Recommended for other students in the Ancient Cultures concentration: Any three courses in relevant cultures, history, language, methodologies, or research tools that may complement the major concentration.

Advisory Option—Teacher Certification in Latin
Advisors in both Classics and the Education Department guide Latin students seeking teacher certification in Latin to use electives to fulfill the following courses required for certification:

Ancient Cultures Concentration of the Classical Studies Major

After completing the Ancient Cultures Concentration:

Goal 1: Students will develop a critical understanding of the literary production of the ancient Mediterranean.

Objective 1.1: Students can analyze primary textual sources (all in translation) in their literary, social, historical, political, economic, philosophical, religious, or legal context.

Objective 1.2: Students can identify gaps or conflicting information in textual sources.

Objective 1.3: Students can specify methods and approaches needed to analyze fragmentary or inconclusive information preserved in ancient texts.

Goal 2: Students will incorporate material evidence into their study of ancient Mediterranean cultures.

Objective 2.1: Students can demonstrate the significance of art and architecture for understanding an ancient society.

Objective 2.2: Students can apply evidence from material culture to illuminate their analysis of textual sources.

Objective 2.3: Students can recognize and describe specific motifs or techniques in ancient art or architecture.

Goal 3: Students will gain a critical awareness of the interconnectedness of ancient Mediterranean cultures.

Objective 3.1: Students can assess differences and commonalities (cultural, historical, artistic, literary, religious, etc.) across geographical and linguistic boundaries.

Objective 3.2: Students can identify and analyze influences of one ancient culture upon another.

Objective 3.3: Students can apply scholarly methods of analysis of one ancient culture to another.

Goal 4: Students will investigate the influence of Mediterranean antiquity upon modern culture.

Objective 4.1: Students can explain how ancient Mediterranean cultures have shaped western culture, in particular spheres such as literature, art, architecture, law, politics, philosophy, and religion.

Objective 4.2: Students can discuss the use and abuse of evidence about ancient Mediterranean cultures in later times.

Goal 5: Students will generate written and/or oral work by deploying standard research tools.

Objective 5.1: Students can formulate meaningful interpretations of the literature and/or material culture of Mediterranean antiquity.

Objective 5.2: Students can assess ways in which perceptions about the ancient Mediterranean world have been shaped by contemporary social and political contexts and concerns.
Objective 5.3: Students can apply broad theoretical frameworks that help to integrate the study of ancient cultures into research in other relevant fields.

Goal 6: Students will achieve intermediate proficiency in one ancient language.

Objective 6.1: Students can demonstrate mastery of basic Greek or Latin vocabulary, morphology, grammar, and syntax.

Objective 6.2: Students can produce an English translation of a Greek or Latin text that illustrates their knowledge of basic vocabulary, grammar, and syntax.

Ancient Cultures Concentration

General Education Signature Courses

See this page about Signature courses (p. 26). Six courses

General Education Variable Courses

See this page about Variable courses (p. 26). Six to Nine courses

Majors in Classical Studies must strengthen their skills in the study of antiquity by taking three complementary courses in the College of Arts and Sciences. No more than two of these courses may be taken in any one department. Students have considerable flexibility in choosing these courses because familiarity with a wide variety of issues, methods, and tools is vital to the study of antiquity. Given the interdisciplinary nature of the major (especially the Ancient Cultures concentration), the boundary between courses in the major and courses in the integrated learning requirement is inherently fluid. The three courses needed for the integrated learning requirement may be drawn from programs and departments that focus on (1) relevant cultural and historical contexts; (2) methodologies that are applied in the study of antiquity; (3) research tools that are employed in the study of antiquity. More specific recommendations are below, but students should consult with their advisors to determine what courses are best suited to their own interests. Courses listed in some departments may have prerequisites.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

Any of the following courses will satisfy the Art/Literature portion of the GEP:

Learning Goals and Objectives for the Classical Languages and Literatures Concentration

After completing the Classical Languages and Literatures concentration:

Goal 1: Students will gain proficiency in reading Latin or ancient Greek.

Objective 1.1: Students can demonstrate mastery of Latin or ancient Greek vocabulary, morphology, grammar, and syntax.

Objective 1.2: Students can produce an accurate English translation of a grammatically and syntactically complex Latin or ancient Greek text.

Objective 1.3: Students can apply metrical rules to reading aloud Latin or ancient Greek poetry.

Goal 2: Students will develop philological skills and engage in critical analysis of ancient Greek and/or Latin literature.

Objective 2.1: Students can comment meaningfully on the ideas of a Latin or ancient Greek text.

Objective 2.2: Students can examine an ancient text within its social, historical, economic, political, religious, philosophical, or legal context.

Objective 2.3: Students can identify basic themes, ideologies, and/or stylistic features of major literary genres.

Goal 3: Students will deploy evidence from material culture.

Objective 3.1: Students can incorporate material from classical art and architecture into the interpretation of ancient textual sources.

Objective 3.2: Students can recognize and translate basic ancient Greek and/or Latin terms in epigraphic and numismatic material.

Goal 4: Students will explore the interdisciplinary nature of Classics.

Objective 4.1: Students can make connections between Classics and other academic disciplines devoted (partly or wholly) to the study of the ancient world, such as history, archaeology, philosophy, and theology.

Objective 4.2: Students can demonstrate awareness of the importance of the classical world for more recently developed disciplines, such as psychology, gender studies, and film studies.

Goal 5: Students will investigate the impact of classical antiquity on modern languages and culture.

Objective 5.1: Students can explain the significance of Latin for English and the Romance languages.

Objective 5.2: Students can discuss how classical antiquity has shaped western thought and culture, in particular literature, art, architecture, theater, cinema, law, politics, and social structures.

Goal 6: Students will generate written and/or oral work by using standard research methods.

Objective 6.1: Students can produce cogent, well-organized, and thoroughly researched presentations (written and/or oral) by investigating primary and secondary sources.

Objective 6.2: Students can formulate meaningful and original interpretations about ancient texts and Greco-Roman culture.
for the integrated learning requirement may be drawn from programs and departments that focus on (1) relevant cultural and historical contexts; (2) methodologies that are applied in the study of antiquity; (3) research tools that are employed in the study of antiquity. More specific recommendations are below, but students should consult with their advisors to determine what courses are best suited to their own interests. Courses listed in some departments may have prerequisites.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

<td>3</td>
</tr>
</tbody>
</table>

Any LAT courses numbered 300-400 (1 course, 3 credits)

Any GRK courses numbered 300-400 (1 course, 3 credits)

### Major Requirements:

Latin/Greek 101/102 (2 courses, 4/4, 8 credits) OR Latin/Greek 201/202/201 (2 courses, 3/3, 6 credits) OR Latin/Greek 201/202 (2 courses, 3/3, 6 credits) OR Latin/Greek 202/300-400 (2 courses, 3/3, 6 credits) OR Latin/Greek 300-400 (1 course, 3 credits).

A minimum of 10 courses in the languages, literatures, and archaeology of Classical antiquity. Four courses must be in Latin above the intermediate level (at LAT 300 level or above). The remaining six courses should be chosen from courses in Classical languages and cultures (CLA, LAT 201/202, GRK, HIS, HON, PHL, REL, THE).
Ancient Cultures Minor

Minor in Ancient Cultures

With the approval of the Director of the Classical Studies Program, students may elect a minor in Ancient Cultures by taking any 6 ancient studies courses in CLA, LAT, GRK, HIS, HON, PHL, REL, or THE courses at any level.

Classical Studies Minor

Minor in Classical Studies

With the approval of the Director of the Classical Studies Program, students may elect a minor in Classical Studies by taking a minimum of 2 LAT courses at any level, 2 CLA courses at any level, and 2 additional ancient studies courses (CLA, LAT, GRK, HIS, HON, PHL, REL, or THE) at any level.
CLASSICS

Mission

The Classics Program aims to be a model for visionary, interdisciplinary thinking, offering courses that serve the needs of multiple academic departments as well as the new General Education Program. The mission of the Classics Program is to offer courses in ancient languages including Greek, Latin and Hebrew, biblical texts, and ancient history. We offer a major in Ancient Studies in two concentrations. The Classics concentration will combine courses in intermediate/upper level Latin and Greek language and literature, Classical literature in translation, Hebrew language, Bible and religious studies, ancient history of the Mediterranean and Near East, and ancient material culture. As such, it will prepare students for secondary school teaching in Latin but it will also better prepare students for graduate study in Classical Studies and Classical Archaeology. A second concentration in Ancient Cultures is interdisciplinary and flexible to allow specialization in a variety of areas that complement existing programs (e.g., Classics, Ancient Near East, Bible, Ancient History, Archaeology). We also offer minors in Ancient Studies, Classical Humanities, and Latin. Our courses in ancient language, literature, and civilization complement courses in other disciplines so that students may combine their Latin major with a second major in English, fine and performing arts, history, languages, psychology, theology, philosophy, and elementary education.

The Classics program offers courses from the elementary to advanced levels of Latin and Greek language and literature. The program serves its majors and minors by offering a full range of advanced level Latin and Greek courses covering the works of major Latin and Greek authors and literary genres. These courses feature comprehensive exploration of Greek and Latin language and of classical society and culture and are designed to prepare majors and minors for graduate study in Classics. Our elementary and intermediate level Latin and Greek courses may be taken as prerequisite courses for advanced work in the languages, and they may also be taken to fulfill the non-native language general education program requirement. All Latin and Greek courses enable students to explore a wide variety of supplementary materials that focus upon mythology, religion, literacy and education, and political and social history.

We also offer courses in ancient culture and civilization, including Classical Mythology, Classical Epic, Classical Tragedy, Ancient Medicine, and survey courses in Art & Archaeology of Greece and Rome along with specialized topics in Pompeii and Herculaneum, the Etruscans, and the Phoenicians. We offer two Honors courses that focus on Greece and Rome: Golden Age of Rome and Sexuality and Gender in the Ancient World. Knowledge of Greek and Latin are not required for any of these civilization courses, which may be taken to fulfill requirements for the major or minor, to fulfill the Art/Literature GEP, or as free electives. These courses are interdisciplinary and stress connections with other disciplines such as history, literature, philosophy, theology, gender studies, and the social and natural sciences.

Major Requirements

Major Concentration

Ten approved courses. All majors must take at least one course in archaeology and attain at least intermediate proficiency in at least one ancient language. Additional requirements are distributed according to each student’s concentration within the major. Students with an interest in teaching in Latin or in graduate studies related to Classics (including Classical archaeology) should choose the Classics concentration. The strong emphasis on ancient languages in the Classics concentration is essential for these goals. The Ancient Cultures concentration is an interdisciplinary program that may be appropriate for students who have other career goals but share an interest in the study of antiquity. The Ancient Cultures concentration also more easily accommodates advanced studies in mathematics and computer science, which are vital to archaeology. In both concentrations, courses at the intermediate 200 level in any ancient language may count among the ten courses. Courses at the introductory 100 level in an ancient language cannot be counted among the ten courses unless it is a student’s second ancient language and a student satisfies the requirement for intermediate proficiency in another ancient language.

Classes in the GEP (See Curricula)

The non-native language portion of the GEP Variable Course Requirement may be satisfied by testing (obtaining a score of 5 on an AP Latin Examination) or through successful completion of any of the following course sequences:

**Professor**
- Marsilio (Director)

**Associate Professors**
- Nikoloutsos

**Adjunct Lecturers**
- Bender
- Brown
- Dlugacz

**Undergraduate Majors**
- Ancient Cultures (p. 124)
- Classics (p. 126)

**Undergraduate Minors**
- Ancient Studies (p. 128)
- Latin (p. 128)

**CLA 201 Love, Sex, Conquest: Classic Myth (3 credits)**
Study and interpretation of the sources, nature, and function of Greek and Roman mythology, including its major story patterns, divine and human figures, and recurrent themes; exploration of the significance and uses of mythology and mythic symbolism; understanding and appreciation of the continuing significance of classical mythology in literature, the arts, and modern popular culture. Fulfills the Art/Literature requirement of the GEP. *Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate*

**CLA 202 Classical Epic: Gods & Heroes (3 credits)**
We will engage in reading, discussion and analysis of the Greek epic poems of Homer (Iliad and Odyssey), Hesiod (Works and Days), and the Roman epic of Virgil (Aeneid). We will consider important questions and topics arising from a reading of Homer, such as the identity of the poet and his society, his depiction of Late Bronze Age "heroic" values, the "oral" and "formular" nature of Homeric language, Homeric theology, Mycenaean civilization and the historical/archaeological evidence for the Trojan War. We will then consider Hesiod's response to Homer's warrior society and values in his Works and Days, and Virgil's reshaping of Homeric epic conventions and promotion of Augustan policy and ideals in his Aeneid. Fulfills the Art/Literature requirement of the GEP. *Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate*

**CLA 203 Classical Tragedy (3 credits)**
This course features reading in English of several original tragedies of Aeschylus, Sophocles, and Euripides. Students discuss the nature and character of the gods in these plays as well as the interactions and relationships between human and divine characters. The class also evaluates the often expressed idea that the texts of Greek tragedy and comedy reflect an Athenian society in crisis. The class will explore how various forms of upheaval in politics, education, religion, and domestic life are reflected in Athenian drama, and also how the Athenian playwrights may be commenting on these issues. Another significant topic of examination is the tendency of Athenian tragedy to feature characters that rebel against or subvert traditional Athenian gender roles. We discuss in each case what these reversals reveal about the characters and what consequences arise from these reversals. In order to assist students in visualizing the dramas, the instructor will show images from ancient Greek theatres at Athens and Epidaurus and scenes from the famous National Theatre of Great Britain production of Aeschylus’ Oresteia (directed by Peter Hall, with actors performing in masks) and the equally famous Kennedy Center production of Euripides’ Medea. Fulfills the Art/Literature requirement of the GEP. *Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate*

**CLA 204 Comedy: Ancient and Modern (3 credits)**
CLA 204 Ancient Comedy (3 credits) This course features reading in English of several original comedies of Aristophanes and Plautus. The class explores the “Old Comedy” of Aristophanes with its topical satire and also evaluates the often expressed idea that the texts of Greek tragedy and comedy reflect an Athenian society in crisis. The class will consider how various forms of upheaval in politics, education, religion, and domestic life are reflected in Athenian drama, and also how Aristophanes may be commenting on these issues. We will then study the development of comedy at Rome and its debt to Greek “New Comedy,” its staging and performance, and its conventional themes and stock characters. Fulfills the Art/Literature requirement of the GEP. *Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate*
CLA 205 Ancient Rome: Art & Arch (3 credits)
CLA 206 Sports in the Ancient World (3 credits)
The purpose of the course is to explore the genesis and significance of athletics in ancient Greece and Rome with an emphasis on its socio-historical context. It will also examine how the parameters of participation and competition in ancient sports inform modern day athletic practices. The course will rely on primary literary sources, archaeology, and secondary scholarship in order to reconstruct the customs and beliefs pertaining to ancient athletics. Topics to be discussed during the semester include: the history of the ancient Olympics; other major athletic events organized in Greece (Pythian, Isthmian, and Nemean); the relationship between religion and sports in antiquity; ancient perceptions of gender and sports; pederasty and the context of the gymnasion; women in ancient athletics; Athenian vs. Spartan athletics; professional and amateur athletes; Greek athletics under the Romans; Roman spectacles; athletics and politics in the ancient world; and the role of ancient athletics in the history of the modern Olympic games. Fulfills the Art/Literature requirement of the GEP.

CLA 301 Mystery&Monument:Ancnt Greece (3 credits)
This course examines the material culture remains of various cities prominent in the history of Greece. Knossos, the main city of the island of Crete, Troy, and Mycenae are among the sites studied for their importance in the Bronze Age (3000-1100 BCE). After a detailed study of Greek architecture and the evolution of key building types such as the temple, the stoa, and the theater, students explore the material remains of Olympia, Delphi, and Athens. The myths associated with these cities are also included. Fulfills the Art/Literature requirement of the GEP.

Attributes: Ancient Studies Course, European Studies Course, GEP Art/Literature, Undergraduate

CLA 302 Mystery&Monument:Ancnt Rome (3 credits)
An introduction to the art and archaeology of Roman Italy, which will explore through digital images the major surviving monuments of Rome and its environs, of the Etruscans, and of other famous sites in Italy. Fulfills the Art/Literature requirement of the GEP.

Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate

CLA 303 Pompeii & Herculanum (3 credits)
This course examines the archaeological evidence of the ancient Roman towns of Pompeii and Herculanum, and also literary and epigraphical evidence from the Roman world, to bring to light various aspects of daily life in the Roman empire in the first century AD, including politics, religion, art, housing, entertainment, and industry. It is recommended that the student has taken CLA 1121 Art and Archaeology of Italy. Fulfills the Art/Literature requirement of the GEP.

Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate

CLA 304 Etruscan Art and Archaeology (3 credits)
At one time the masters of the Italian archipelago, the Etruscans have suffered at the pens of historians both ancient and modern; in redressing the record, archaeology has opened as many problems as it has solved. The Etruscans' non-Indo-European language, wealth and technology set them apart from theirItalic and Greek neighbors; though Romans adopted Etruscan religious doctrine and material culture, they ultimately conquered and eliminated this unique culture. This course examines the ancient written sources and the latest archaeological discoveries, from painted tombs and bronze armor to DNA, to identify the character of Etruscan civilization from 1000 BC to the days of Augustus, as well as its modern heritage. "Hands-on" visits to the world-class Etruscan collection in the University of Pennsylvania Museum will supplement illustrated lectures. Fulfills the Art/Literature requirement of the GEP.

Attributes: Ancient Studies Course, European Studies Course, GEP Art/Literature, Undergraduate

CLA 305 Cleopatra Thrg Anc & Mod Eyes (3 credits)
The last pharaoh of Egypt was also the first of its Macedonian rulers to speak the Egyptian language; Cleopatra was a charismatic woman, who directed her efforts toward protecting and enriching her family and subjects. Her efforts to enhance her realm collided with her family and romantic life, leaving a legacy for scholars, poets and artists down to the present day. The course will examine the Hellenistic period and the beginning of the Roman domination of the Mediterranean world, as focused in the character and historical career of Cleopatra, the last of the Ptolemaic rulers of Egypt. We will read the ancient sources on Cleopatra, the Ptolemies, Caesar and Marc Antony, the Battle of Actium and its aftermath, the consolidation of power by Octavian/Augustus. We will also analyze the evidence of ancient art and architecture, inscriptions, and archaeological contexts, including the background of Egyptian culture, the phenomenon of Alexander and the creation of the Hellenistic kingdoms. Fulfills the Art/Literature requirement of the GEP.

Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate

CLA 306 Ancient Medicine (3 credits)
After a brief look at medicine in Egypt and the ancient Near East, this course will examine medicine in the Greek and Roman world. We will read and analyze ancient medical texts, principally from the Hippocratic Corpus and the writings of Galen, and literary and philosophical texts contemporary with them. We will attempt to understand the cultural contexts of ancient medicine, the thought and practices of ancient physicians, and the relationship between Greco-Roman medicine and modern traditions that derive from it. Fulfills the Art/Literature requirement of the GEP.

Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate

CLA 307 Ancient Greece & Rome in Film (3 credits)
This course examines various films set in the classical world or inspired by classical themes. It focuses on the relation of these films to ancient literary sources and traces the reasons for the commercial success of the genre in the 1950's and early 1960's, and its rebirth at the dawn of the twenty-first century. The course investigates the uses and abuses of classical antiquity, such as how faithfully it is portrayed on the big screen and how modern concerns (about e.g., politics, ethnicity, morality, religion, gender, sexuality, and cinema itself) are dressed into an ancient costume. Students will read secondary literature as well as a variety of ancient sources in English translation. Students will be required to watch the films prior to class meetings, since only a few, representative scenes will be shown in class; these scenes will form part of the in-class discussion. Fulfills the Art/Literature requirement of the GEP. Also satisfies GEP Writing Intensive.

Attributes: Ancient Studies Course, GEP Art/Literature, Undergraduate
CLA 321 Anc World Sexuality & Gender (3 credits)
A study of the ancient Greek and Roman cultural constructions of gender through reading of legal, philosophical, medical, historical, religious, and literary works. We will examine the connections between the ancient ideology of gender and the legal, social, religious, and economic roles of women in Greek and Roman cultures. We will also compare this ancient ideology of gender with conceptions of masculinity and femininity in modern American culture. Fulfills the Art/Literature requirement of the GEP. Also satisfies Gender Studies requirement and GEP Diversity requirement.
Attributes: Ancient Studies Course, Diversity Course (New GEP), Gender Studies Course, GEP Art/Literature, Undergraduate

CLA 470 Topics in Classics (3 credits)
CLA 493 Ind. Research in Classics (3 credits)
The student will study a Greek or Latin author whose works are not treated in the usual sequence of courses. Or the student may undertake a research project in the Classical field that is acceptable to the Department. Fulfills the Art/Literature requirement of the GEP. Also satisfies Gender Studies requirement and GEP Diversity requirement.
Attributes: Ancient Studies Course, Undergraduate

CLA 494 Ind. Research in Classics (3 credits)
The student will study a Greek or Latin author whose works are not treated in the usual sequence of courses. Or the student may undertake a research project in the Classical field that is acceptable to the Department. Fulfills the Art/Literature requirement of the GEP.
Attributes: Ancient Studies Course, Undergraduate

Ancient Cultures Concentration of the Ancient Studies Major

Learning Goals and Objectives for the Ancient Cultures Concentration

After completing the Ancient Cultures Concentration:

Goal 1: Students will develop a critical understanding of the literary production of the ancient Mediterranean.

Objective 1.1: Students can analyze primary textual sources (all in translation) in their literary, social, historical, political, economic, philosophical, religious, or legal context.

Objective 1.2: Students can identify gaps or conflicting information in textual sources.

Objective 1.3: Students can specify methods and approaches needed to analyze fragmentary or inconclusive information preserved in ancient texts.

Goal 2: Students will incorporate material evidence into their study of ancient Mediterranean cultures.

Objective 2.1: Students can demonstrate the significance of art and architecture for understanding an ancient society.

Objective 2.2: Students can apply evidence from material culture to illuminate their analysis of textual sources.

Objective 2.3: Students can recognize and describe specific motifs or techniques in ancient art or architecture.

Goal 3: Students will gain a critical awareness of the interconnectedness of ancient Mediterranean cultures.

Objective 3.1: Students can assess differences and commonalities (cultural, historical, artistic, literary, religious, etc.) across geographical and linguistic boundaries.

Objective 3.2: Students can identify and analyze influences of one ancient culture upon another.

Objective 3.3: Students can apply scholarly methods of analysis of one ancient culture to another.

Goal 4: Students will investigate the influence of Mediterranean antiquity upon modern culture.

Objective 4.1: Students can explain how ancient Mediterranean cultures have shaped western culture, in particular spheres such as literature, art, architecture, law, politics, philosophy, and religion.

Objective 4.2: Students can discuss the use and abuse of evidence about ancient Mediterranean cultures in later times.

Goal 5: Students will generate written and/or oral work by deploying standard research tools.

Objective 5.1: Students can formulate meaningful interpretations of the literature and/or material culture of Mediterranean antiquity.

Objective 5.2: Students can assess ways in which perceptions about the ancient Mediterranean world have been shaped by contemporary social and political contexts and concerns.

Objective 5.3: Students can apply broad theoretical frameworks that help to integrate the study of ancient cultures into research in other relevant fields.

Goal 6: Students will achieve intermediate proficiency in one ancient language.

Objective 6.1: Students can demonstrate mastery of basic Greek or Latin vocabulary, morphology, grammar, and syntax.

Objective 6.2: Students can produce an English translation of a Greek or Latin text that illustrates their knowledge of basic vocabulary, grammar, and syntax.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.
Majors in Ancient Studies must strengthen their skills in the study of antiquity by taking three complementary courses in the College of Arts and Sciences. No more than two of these courses may be taken in any one department. Students have considerable flexibility in choosing these courses because familiarity with a wide variety of issues, methods, and tools is vital to the study of antiquity. Given the interdisciplinary nature of the major (especially the Ancient Cultures concentration), the boundary between courses in the major and courses in the integrated learning requirement is inherently fluid. The three courses needed for the integrated learning requirement may be drawn from programs and departments that focus on

1. relevant cultural and historical contexts;
2. methodologies that are applied in the study of antiquity;
3. research tools that are employed in the study of antiquity.

More specific recommendations are below, but students should consult with their advisors to determine what courses are best suited to their own interests. Courses listed in some departments may have prerequisites.

1. Recommended for students in both the Classics concentration and Ancient Cultures concentration interested in archaeology: Students may take any courses in BIO, CHM, CSC, MAT, PHY, SOC beyond the courses used to satisfy the GEP and major requirements.

2. Recommended for other students in the Ancient Cultures concentration: Any three courses in relevant cultures, history, language, methodologies, or research tools that may complement the major concentration.

GEP Electives

Any twelve courses

Major Concentration

Ten courses in ancient studies, at least six of which must be at the 300 level or above. At least one must be an archaeology course. The remaining courses may be chosen from any of the groups below. To ensure the interdisciplinary nature of the program, students must take courses from at least three groups. No more than three of these ten courses may be chosen from any one group except in the case of the language group, where no such restriction applies. In addition to achieving intermediate proficiency in at least one ancient language, students must take at least two additional courses in either an ancient language or an appropriate symbolic language. These two courses may be any two advanced courses (above the intermediate level) in the first ancient language; any two courses at any level in a second ancient language; or any two courses in mathematics and/or computer science above MAT 162 (Calculus II) and CSC 120 (Computer Science I). Students who use a symbolic language (mathematics or computer science) instead of an ancient language for this two-course requirement still must take at least ten courses in ancient studies.

Advisory Option—Teacher Certification in Latin

Advisors in both Classics and the Education Department guide Latin students seeking teacher certification in Latin to use electives to fulfill the following courses required for certification:

CLA 493  Ind. Research in Classics
or CLA 494  Ind. Research in Classics

Requirements for College Honors

To receive College Honors credit, students undertake two consecutive semesters of course-based research and study that culminates in a senior thesis. For students in the University Honors program, these two courses may be counted toward the eight course Honors requirement. To be eligible for College Honors, a student must have a 3.5 GPA. If you are interested in completing the College Honors project during your senior year, please be in touch with the department chair early in the spring semester of your junior year. Specific requirements for the College Honors thesis may be found under Honors Program.

Field Experience

Archaeological Fieldwork (usually one or two courses, offered in cooperation with various other universities as approved in advance, usually as summer transfer credit; because of methodological and experiential value, sites need not be limited to geographical areas normally implied in the minor). Recommended in this category is REL 332: Digging at Tel Dor (fieldwork in Israel).

International Study Tour at a location as appropriate (e.g., Italy; Greece; Turkey; Israel; Egypt; and others), with advance approval of director.

Study Abroad at an approved overseas University. Classics Program majors and minors may participate in a semester-long program at the Intercollegiate Center for Classical Studies in Rome (ICCS), or may enroll in another accredited study abroad or study tour program in Greece and/or Italy (e.g., the CIP approved John Cabot University Program in Rome, Italy; and programs pending CIP approval such as the Fairfield University Program in Syracuse, Sicily and the American Institute of Roman Culture).

Classics Concentration of the Ancient Studies Major

Learning Goals and Objectives for Classics Concentration

After completing the Classics Concentration:

Goal 1: Students will gain proficiency in reading Latin or ancient Greek.

Objective 1.1: Students can demonstrate mastery of Latin or ancient Greek vocabulary, morphology, grammar, and syntax.

Objective 1.2: Students can produce an accurate English translation of a grammatically and syntactically complex Latin or ancient Greek text.

Objective 1.3: Students can apply metrical rules to reading aloud Latin or ancient Greek poetry.

Goal 2: Students will develop philological skills and engage in critical analysis of ancient Greek and/or Latin literature.

Objective 2.1: Students can comment meaningfully on the ideas of a Latin or ancient Greek text.

Objective 2.2: Students can examine an ancient text within its social, historical, economic, political, religious, philosophical, or legal context.

Objective 2.3: Students can identify basic themes, ideologies, and/or stylistic features of major literary genres.

Goal 3: Students will deploy evidence from material culture.

Objective 3.1: Students can incorporate material from classical art and architecture into the interpretation of ancient textual sources.

Objective 3.2: Students can recognize and translate basic ancient Greek and/or Latin terms in epigraphic and numismatic material.

Goal 4: Students will explore the interdisciplinary nature of Classics.

Objective 4.1: Students can make connections between Classics and other academic disciplines devoted (partly or wholly) to the study of the ancient world, such as history, archaeology, philosophy, and theology.

Objective 4.2: Students can demonstrate awareness of the importance of the classical world for more recently developed disciplines, such as psychology, gender studies, and film studies.

Goal 5: Students will investigate the impact of classical antiquity on modern languages and culture.

Objective 5.1: Students can explain the significance of Latin for English and the Romance languages.

Objective 5.2: Students can discuss how classical antiquity has shaped western thought and culture, in particular literature, art, architecture, theater, cinema, law, politics, and social structures.

Goal 6: Students will generate written and/or oral work by using standard research methods.

Objective 6.1: Students can produce cogent, well-organized, and thoroughly researched presentations (written and/or oral) by investigating primary and secondary sources.

Objective 6.2: Students can formulate meaningful and original interpretations about ancient texts and Greco-Roman culture.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays
See this page about Overlays (p. 27).
General Education Integrative Learning Component

See this page about Integrative Learning Component (p. 27). Three courses

Majors in Ancient Studies must strengthen their skills in the study of antiquity by taking three complementary courses in the College of Arts and Sciences. No more than two of these courses may be taken in any one department. Students have considerable flexibility in choosing these courses because familiarity with a wide variety of issues, methods, and tools is vital to the study of antiquity. Given the interdisciplinary nature of the major (especially the Ancient Cultures concentration), the boundary between courses in the major and courses in the integrated learning requirement is inherently fluid. The three courses needed for the integrated learning requirement may be drawn from programs and departments that focus on

1. relevant cultural and historical contexts;
2. methodologies that are applied in the study of antiquity;
3. research tools that are employed in the study of antiquity.

More specific recommendations are below, but students should consult with their advisors to determine what courses are best suited to their own interests. Courses listed in some departments may have prerequisites.

Majors in Classics who intend to pursue teacher certification will earn a double major in their primary subject area and in Secondary Education.

Below is the recommended program for students who will be eligible for a PA Level I teaching certificate in Secondary Education.

Note: English and foreign language majors are required to take one linguistics course.

See the Education Unit (Teacher Education Department) section for more information.

1. Recommended for other Students in the Classics concentration: Any three courses in ART, CSC, HIS, LIN, MAT, PHL, REL/THE, or SOC that may complement the major concentration, chosen in consultation with the student's advisor. These courses may include other courses in ancient studies that are outside the field of Classics.

2. Recommended for students in both the Classics concentration and Ancient Cultures concentration interested in archaeology: Students may take any courses in BIO, CHM, CSC, MAT, PHY, SOC beyond the courses used to satisfy the GEP and major requirements.

GEP Electives

Any twelve courses

Major Concentration

Ten courses in the archaeology, literature, and languages of Classical antiquity. At least one must be an appropriate archaeology course. Six courses must be in Latin above the intermediate level (i.e., LAT 300 level or above). The remaining three courses should be chosen from courses in ancient studies that deal with Classical languages and cultures (CLA, LAT, GRK, HON, HIS, PHL, REL, THE).

Advisory Option—Teacher Certification in Latin

Advisors in both Classics and the Education Department guide Latin students seeking teacher certification in Latin to use electives to fulfill the following courses required for certification:

Requirements for College Honors

To receive College Honors credit, students undertake two consecutive semesters of course-based research and study that culminates in a senior thesis. For students in the University Honors program, these two courses may be counted toward the eight course Honors requirement. To be eligible for College Honors, a student must have a 3.5 GPA. If you are interested in completing the College Honors project during your senior year, please be in touch with the department chair early in the spring semester of your junior year. Specific requirements for the College Honors thesis may be found under Honors Program.

Field Experience

Archaeological Fieldwork (usually one or two courses, offered in cooperation with various other universities as approved in advance, usually as summer transfer credit; because of methodological and experiential value, sites need not be limited to geographical areas normally implied in the minor). Recommended in this category is REL 332: Digging at Tel Dor (fieldwork in Israel).

International Study Tour at a location as appropriate (e.g., Italy; Greece; Turkey; Israel; Egypt; and others), with advance approval of director.

Study Abroad at an approved overseas University. Classics Program majors and minors may participate in a semester-long program at the Intercollegiate Center for Classical Studies in Rome (ICCS), or may enroll in another accredited study abroad or study tour program in Greece and/or Italy (e.g., the CIP approved John Cabot University Program in Rome, Italy; and programs pending CIP approval such as the Fairfield University Program in Syracuse, Sicily and the American Institute of Roman Culture).

Latin Minor

With the approval of the director of the Classics Program, students may elect a minor in Latin by taking six courses at LAT 201 level or higher.

Ancient Studies Minor

With the approval of the directors of the Classics or Ancient Studies Programs, students may elect a minor in Ancient Studies by taking six courses in ancient studies from any of the groups below with no more than three from any one group unless it is a language group. At least two must be at the 300 level or above.
COMMUNICATION STUDIES

**Associate:** Aimée Knight, Ph.D.; David Parry, Ph.D.
**Assistant:** Bill Wolff, Ph.D.; Rachael L. Sullivan, Ph.D.; Steven R. Hammer Ph.D.
**Instructor:** J. Michael Lyons

**Undergraduate**
- Communication Studies (p. 130)

**Undergraduate Minors**
- Communication Studies (p. 132)

**COM 200 Communication Theory/Practice (3 credits)**
This introduction to communication and digital media studies focuses on various ways people employ language, image, and more cinematic means for communicative purposes. Through a series of hands-on projects students learn to research and analyze contemporary issues and trends in the field of communications, with an emphasis on digital media. In doing so, students examine how communication technologies are impacting the relationship between media audiences, producers, and content

**Restrictions:** Enrollment is limited to students with a major, minor, or concentration in Communication Studies.

**Attributes:** Undergraduate

**COM 201 Ethics in Communication (3 credits)**
This course explores ethical issues in the field of communications. Themes include: privacy, civic media, citizen journalism, copyright, intellectual property, cyber bullying, net neutrality, social networking, global ethics, and digital divides. Students develop skills in applied ethical decision making, democratic dialogue, and civic participation through a range of projects in both online and community settings.

**Prerequisites:** COM 200

**Restrictions:** Enrollment is limited to students with a major in Communication Studies.

**Attributes:** Undergraduate

**COM 202 Digital Aesthetics (3 credits)**
This course examines the role of aesthetic, sensory-based experience in digital environments. The course focuses on contemporary ways to understand sensory perception (especially sight, sound, and touch) and its relationship to meaning making. Students will come to understand aesthetics as a mode of complex communication intricately related to social and cultural influences. Students will apply this understanding to a variety of hands-on projects involving color, typography, photography, infographics, sound design and editing, and presentation design.

**Prerequisites:** COM 200

**Restrictions:** Enrollment is limited to students with a major, minor, or concentration in Communication Studies.

**COM 203 Civic Media (3 credits)**
This course engages students in questions about media, technology, sociality, and society. Students examine both theoretical and experiential foundations in order to understand the relationship between mediated communication and human communities. Those who complete this course will gain hands on experience engaging audiences and developing communities through various social media platforms.

**Prerequisites:** COM 200 (may be taken concurrently) and COM 201 (may be taken concurrently)

**Restrictions:** Enrollment is limited to students with a major, minor, or concentration in Communication Studies.

**COM 204 Web Design & Development (3 credits)**
This course explores the principles and best practices for creating web content, ranging from introductory work in HTML to design prototypes and web typography. Students will work with several types of web content (text, image, audio, video) and consider how that content is best used in the composition of usable, accessible, and attractive web sites. Students will also learn about the structure/history of the web, typical design workflows, and potential careers in web work.

**Prerequisites:** COM 200 and 201

**Restrictions:** COM 200 and COM 201 and COM 202

**COM 205 Civic Media (3 credits)**
This course explores ethical issues in the field of communications. Themes include: privacy, civic media, citizen journalism, copyright, intellectual property, cyber bullying, net neutrality, social networking, global ethics, and digital divides. Students develop skills in applied ethical decision making, democratic dialogue, and civic participation through a range of projects in both online and community settings.

**Prerequisites:** COM 200

**Restrictions:** Enrollment is limited to students with a major, minor, or concentration in Communication Studies.

**COM 306 Digital Publishing (3 credits)**
In this course students will research, produce and publish an interactive media rich culture and tour guide. This student centered digital publication will highlight art, architecture, history, culture, attractions, museums, parks, walking tours, side trips, and restaurants for the student traveler. The guidebook will also provide students traveling abroad with up-to-date, socially responsible opportunities to go beyond tourism. Destination varies depending on semester.

**COM 307 Advanced Web Design (3 credits)**
The class will be a mixture of web design theory and practical front-end techniques. Students are expected to have experience hand-coding websites using HTML and CSS, a basic understanding of using Git, and be familiar with basic principles of design such as color and typography. Topics covered will include: usability, accessibility, Git, Javascript/Query, designing for content management, and using Wordpress as a CMS. By the end of this course, students should have a solid understanding of the web design industry and modern web design techniques.

**Prerequisites:** COM 372 and COM 200 and COM 201

**Restrictions:** Enrollment is limited to students with a major, minor, or concentration in Communication Studies.

**COM 308 Social Media & Community Engagement (3 credits)**
Not-for-profit and community-based organizations rely on strategic digital communication to create social change. Students in this course gain in-depth knowledge of communication theories and practices while conducting research projects with local organizations through the Beautiful Social Research Collaborative. Students in the course actively participate as a member of a project team to complete projects with a non-profit client.

**Prerequisites:** COM 200 and COM 201
Communication Studies Major

Program Overview

The BA in Communication Studies is a major in the College of Arts and Sciences for students interested in specializing in digital media studies as an area of expertise. The major helps students develop advanced skills in communications with an emphasis on digital media studies, including multimedia writing, video editing and production, web content strategy and design, and writing for social media platforms.

Communication Studies students acquire a solid grounding in the study of digital communications while exploring current ideas and tools that are shaping the knowledge society. A hallmark of the Communication Studies curriculum is the emphasis on both theory and practice. Not only do students study what is happening at the forefront of emerging communication technologies, they also participate. Students have access to cutting-edge resources as they make and reflect upon media and in the process acquire important skills in teamwork, innovation, design, and entrepreneurship. The major prepares students for careers in digital media including web content strategy and design, social media/ community management, and multimedia journalism.

The Department of Communication Studies is committed to excellence in teaching and learning. Faculty are dedicated to the art of thinking across media, platforms, and theories in order to create an innovative and socially responsible curriculum that goes beyond the classroom. Communication Studies students gain hands-on experience by working closely with faculty on a variety of activities.

Student Learning Goals and Objectives

Goal 1: Students will gain critical awareness of the social role of media.

Objective 1.1: Students will understand the history and context of the role that media has played in society.

Objective 1.2: Students will be able to articulate and critique the role media has historically played, and currently plays in society.

Goal 2: Students will understand the principles and practices of effective media communication.

Objective 2.1: Students will be able to identify and employ a range of effective communication strategies to navigate audience, purpose, and context.

Goal 3: Students will understand and apply human centered design approaches to communicating through digital media.

Objective 3.1: Students will analyze, articulate, and understand how multiple theoretical approaches of aesthetics and design inform the way audiences act, interact, and produce meaning.

Objective 3.2: Students will be able to create media objects which effectively apply these design principles for a desired rhetorical goal.

Goal 4: Student will understand the relation between media and social responsibility.

Objective 4.1: Students will understand and articulate the ethical questions and principles that inform the use of digital media.

COM 492 Communication-Indep. Study (3 credits)

COM 493 Indep Create ResearchProject I (3 credits)

COM 494 Indep Create ResearchProject II (3 credits)

COM 495 Advanced Research Project (3 credits)
Objective 4.2: Students will understand and articulate how digital media has been, and can be, employed to facilitate innovation, social change, and civic engagement.

Goal 5: Students will be able to use digital media in a way which demonstrates information literacy.

Objective 5.1: Students will employ digital media tools and approaches to establish the veracity and credibility of information.

Objective 5.2: Students will demonstrate the ability to effectively manage the ubiquitous flow of digital media information.

Objective 5.3: Students will be able to effectively use digital media to research, gather, and assess digital information and knowledge.

Communication Studies Major Curriculum

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses

See this page about Signature courses (p. 26). Six courses

General Education Variable Courses

See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays

See this page about Overlays (p. 27).

General Education Integrative Learning Component

See this page about Integrative Learning Component (p. 27). Three courses

Communication majors must also take three courses in the College of Arts & Sciences (CAS) as part of the Integrated Learning Component (ILC) of the GEP. These courses must be outside of the major department. To fulfill the ILC requirement, students should choose three courses from the following:

Major Requirements

Communication Studies Courses
Eleven required courses, including seven core courses and five option courses.

All Communication majors will be assigned a departmental advisor with whom they will consult during the course of their studies and who will help them select a series of course appropriate for both their interests and future careers.

All students complete the six Core courses and select the remaining five courses from the list of Option Courses.

**Core Courses**

**Option Courses**

Select five of the following:

- ART 173 Digital Photography I
- ART 273 Digital Photography II
- ART 373 Photo Essay/Docu Photo
- COM 382 Digital Publishing
- COM 402 Advanced Web Design
- COM 441 Social Media & Community Engrmnt
- COM 442 Non-Profit Communications
- COM 473 Special Topics/ Com&Digi Media
- COM 491 Communications Internship
- CSC 115 Intro to Computer Science
- CSC 121 Computer Science II
- ENG 206 Public Speaking & Presentation
- ENG 261 News Reporting
- ENG 263 Writing for Organizations
- ENG 265 Writing for Public Relations
- ENG 266 Case Studies: PR & Advertising
- ENG 267 Negotiations, Writing & Conflict
- ENG 268 Persuasion/Influence in Media
- ENG 343 Nonfiction Workshop
- ENG 344 Screenwriting
- ENG 345 Tutor Prac, Writ Cntr Thry Pr
- ENG 346 Writing for Digital Platforms
- ENG 360 Feature Writing
- ENG 361 Mobile Journalism
- ENG 362 Photojournalism
- ENG 363 Sports Journalism
- ENG 364 History of Journalism
- ENG 365 Multimedia Reporting
- ENG 443 Special Topics in Writing
- ENG 460 Magazine Writing
- ENG 461 Food Writing
- ENG 462 Travel Writing
- ENG 463 Literary Journalism

1 Courses in the major may be chosen from a broad set of options. Note: two of the five must be COM courses, the remainder can be either COM courses or from the list of affiliated courses

**Internship**

Students who have completed both 200 and 201 and have at least junior standing are eligible to take the Internship course as one of their option courses. In order to take the Communications Internship students must be a Communications major and have a GPA of 2.5 or higher.

**Independent Study**

Communication Studies students with junior or senior standing and an overall GPA of 3.0 may apply for credit in an independent study program. These courses usually cover a topic not typically offered as part of the standard selection of courses, but which will enhance the student's educational objectives. At the end of the semester preceding the semester in which an independent study is sought the interested students should submit a written proposal describing, with particulars, the planned study project. The minimum requirement for such a proposal is that it include a substantial critical and/or creative project, and the name of the appropriate faculty member.

**Communication Studies Minor**

**Student Learning Goals and Objectives**

**Goal 1:** Students will gain critical awareness of the social role of media.

**Objective 1.1:** Students will understand the history and context of the role that media has played in society.
**Objective 1.2:** Students will be able to articulate and critique the role media has historically played, and currently plays in society.

**Goal 2:** Students will understand the principles and practices of effective media communication.

**Objective 2.1:** Students will be able to identify and employ a range of effective communication strategies to navigate audience, purpose, and context.

**Goal 3:** Students will understand and apply human centered design approaches to communicating through digital media.

**Objective 3.1:** Students will analyze, articulate, and understand how multiple theoretical approaches of aesthetics and design inform the way audiences act, interact, and produce meaning.

**Objective 3.2:** Students will be able to create media objects which effectively applies these design principles for a desired rhetorical goal.

**Goal 4:** Student will understand the relation between media and social responsibility.

**Objective 4.1:** Students will understand and articulate the ethical questions and principles that inform the use of digital media.

**Objective 4.2:** Students will understand and articulate how digital media has been, and can be, employed to facilitate innovation, social change, and civic engagement.

**Goal 5:** Students will be able to use digital media in a way which demonstrates information literacy.

**Objective 5.1:** Students will employ digital media tools and approaches to establish the veracity and credibility of information.

**Objective 5.2:** Students will demonstrate the ability to effectively manage the ubiquitous flow of digital media information.

**Objective 5.3:** Students will be able to effectively use digital media to research, gather, and assess digital information and knowledge.

Six courses are required to complete the minor. To gain solid grounding in the field of communications, all students will satisfy three core requirements and then select three other courses from a range of options. Students must apply to enter this Minor.

COMPUTER SCIENCE

Department Overview
The Department of Computer Science at Saint Joseph’s University offers the following degrees:

- B.S. Computer Science,
- B.S. Information Technology, and
- M.S. Computer Science.

The department has earned ABET (Accreditation Board For Engineering And Technology) accreditation of its B.S in Computer Science program.

Professor: Babak Forouraghi, Ph.D.
Associate: George J. Grevera, Ph.D.; Susanna Wei, Ph.D.
Assistant: Wei Chang
Adjunct: Mary Krueger

Chair: Forouraghi

Undergraduate Majors
- Bachelor of Science in Computer Science (p. 139)
- Bachelor of Science in Information Technology (p. 141)

Undergraduate Minors
- Computer Science (p. 144)
- Information Technology (p. 144)

Graduate Degree
- Master of Science in Computer Science (p. 142)

CSC 110 Building Virtual Worlds (3 credits)
A gentle introduction to programming with user-friendly software (Alice). Students will use 3D animated interactive virtual worlds to develop an understanding of basic programming constructs. Open to all students. Computer science majors may take this course to prepare for CSC 120. This course presupposes no previous programming experience.
Attributes: Undergraduate

CSC 115 Intro to Computer Science (3 credits)
A gentle introduction to computer science. Students will be introduced to basic programming constructs in a language such as Python. Open to all students. Computer science majors may take this course to prepare for CSC 120. This course presupposes no previous programming experience.
Attributes: Undergraduate

CSC 120 Computer Science I (4 credits)
Computer programming for beginners. Very little prior knowledge regarding how computers work is assumed. Learn how to write understandable computer programs in a programming language widely used on the Internet. Go beyond the routine skills of a computer user and learn the programming fundamentals: data, variables, selection, loops, arrays, input/output, methods and parameter passing, object and classes, abstraction. Take what is learned and write programs for use on the Internet. One hour per week of the course is a required laboratory.
Attributes: Undergraduate

CSC 121 Computer Science II (4 credits)
The course covers intermediate programming techniques emphasizing advanced object oriented techniques including inheritance, polymorphism, and interfaces. Other topics include recursion, exception handling, design patterns, simple GUI programming, and dynamic containers such as linked lists, stacks, queues, and trees.
Prerequisites: CSC 1501 or CSC 1505 or CSC 120
Attributes: Undergraduate

CSC 125 CSC I: Programming Fundamentals (3 credits)
CSC 126 CSC II: Intermed Prog Technique (3 credits)
CSC 150 First-Year Seminar (3 credits)
CSC 201 Data Structures (4 credits)
The course covers fundamental data structures, algorithms for manipulating and retrieving information from these data structures, and techniques for analyzing their efficiency in terms of space and time. The distinction between an Abstract Data Type and its implementation is emphasized. Topics include lists, vectors, trees (general trees, binary search trees, and balanced trees), priority queues, hashing, graphs, and various searching and sorting algorithms.
Prerequisites: CSC 121
Attributes: Undergraduate

CSC 202 Computer Architecture (3 credits)
Overview of computer system organization, hardware, and communications. Introduction to combinational and sequential logic, arithmetic, CPU, memory, microprocessors, and interfaces. CISC vs. RISC processors. Assembly language programming, microarchitecture, and microprogramming on a variety of processors.
Prerequisites: CSC 121
Attributes: Undergraduate

CSC 240 Discrete Structures I (3 credits)
Topics include finite probability space, conditional probability, Bayes’ theorem, permutations and combinations, statistics and sampling distributions, the Central Limit Theorem, hypothesis testing, correlation, regression analysis, data encoding, channel capacity, the Shannon coding theorem. Data analysis projects using an appropriate statistical package will be assigned. CS & IT Prerequisite: CSC 121, or permission of the CSC chair.
Restrictions: Graduate level students may not enroll.

CSC 241 Discrete Structures II (3 credits)
Mathematics needed for Computer Science. Topics covered include: functions, relations, propositional and first order predicate logic, set theory, proofs and their construction, counting and elementary probability. The course will use a declarative language as a tool to support concrete implementations of the mathematical ideas. CS & IT Prerequisite: CSC 240.

CSC 261 Principles of Programming Lang (3 credits)
The general principles underlying programming languages, including such topics as syntax and its specification, data types, data control, flow control, storage management and support for design patterns. Examples drawn from a variety of programming languages, including functional, logical and procedural languages, will be presented.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate
CSC 281 Design & Analysis Algorithms (3 credits)
This course presents fundamental techniques for designing efficient computer algorithms and analyzing their running times. Topics include asymptotics, solving summations and recurrences, sorting and selection, graph algorithms (depth-first and breadth-first search, minimum spanning trees, and shortest paths), algorithm design techniques (divide-and-conquer, dynamic programming, and greedy algorithms), and introduction to NP-completeness.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 310 Computer Systems (3 credits)
An overview of operating systems and the software required to integrate computer hardware into a functional system. Topics include operating systems structure, interrupt driven systems, concurrency, memory management, file systems and security, and system calls.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 315 Software Engineering (3 credits)
Principles of designing large programs, including issues of specification, documentation, design strategies, coding, testing and maintenance. Students work in small groups to design and implement a major software project.
Prerequisites: (CSC 201 or CSC 2301 or MAT 2305)
Attributes: Undergraduate

CSC 341 Introduction to Graphics (3 credits)
Principles of designing large programs, including issues of specification, documentation, design strategies, coding, testing and maintenance. Students work in small groups to design and implement a major software project.
Prerequisites: (CSC 201 or CSC 2305 or CSC 2301)
Attributes: Undergraduate

CSC 342 Computer Vision (3 credits)
Computer vision is the science of analyzing images and videos in order to recognize or model 3D objects, persons, and environments. Topics include the underlying image formation principles, extracting simple features like prominent points or lines in images, projecting a scene to a picture, tracking features and areas in images and make a mosaic, making an image-based positioning system, obtaining 3D models from two or more images, and techniques to recognize simple patterns and objects. The class includes programming exercises and hands-on work with digital cameras and laser scanners.
Prerequisites: CSC 281
Attributes: Undergraduate

CSC 343 Interactive 3D Game Developmt (3 credits)
This course will cover the tools and techniques for programming interactive games and virtual reality simulations. The focus is primarily on programming aspects, including event loops and execution threads, rendering and animation in 3D, terrain/background representation, polygonal models, texturing, collision detection and physically-based modeling, game AI, and multi-user games and networking. Although this course has a significant programming focus, other topics briefly covered will include the history of computer/video game technology, game genres and design principles, and the social impact of games.
Prerequisites: CSC 2301 or CSC 2305 or CSC 201
Attributes: Undergraduate

CSC 344 Human Computer Interaction (3 credits)
User models: conceptual, semantic and syntactic considerations; cognitive and social issues for computer systems; evaluating the interface; direct manipulation; architectures for Interaction; Students will design and implement a GUI based application.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 351 Database Management Systems (3 credits)
The course will cover the concepts and structures necessary to design and implement a relational database system. Topics to be covered: entity-relationship and relational data models, relational algebra, SQL, normalization, file organization, indexing, hashing, and enterprise-wide web-based applications. CS Prerequisite: CSC 281 or permission of the CSC chair. IT Prerequisite: CSC 201 or permission of the CSC chair.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 352 Data Communication & Networks (3 credits)
Topics include mathematical foundations of data communications, logical and physical organization of computer networks, the ISO and TCP/IP models, communication protocols, circuit and packet switching, the Internet, LAN/WAN, client/server communications via sockets, routing protocols, data encryption/decryption and network security issues.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 353 Internet Application Developmnt (3 credits)
This course will attempt to give you experience in designing Internet applications. A student finishing this course should be able to design, implement, and maintain a large community or e-commerce web site. They should leave the course with an understanding of at least one common scripting tool, an understanding of how to implement a database back-end into a large-scale site, and the ability to critically assess the usability of both their design and the design others.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 354 Web Technologies (3 credits)
Topics include organization of Meta-Markup languages, Document Type Definitions (DTD), document validity and well-formedness, style languages, namespaces, Transformations, XML parsers, and XQuery. Course includes programming projects.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 355 Cryptography & Netwrk Security (3 credits)
Topics include classical cryptosystems, public and symmetric cryptography, key management, digital signatures, cipher techniques, authentication and federated identity management. Course also covers concepts relating to crypto-virology, malware, viruses, Trojan horses, worms and other types of infectors as they relate to network security. Course includes programming projects.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate
CSC 356 Mobile App Design (3 credits)
This course is designed for students who wish to start developing mobile applications on Android platforms, and through the process understand the concepts relating to Computer Science on a mobile platform. The course will include the basics of mobile and wireless technology with Android programming and will cover the most recent version of Android. Students will learn how to develop feature-rich Android applications using various development platforms and learn the basic concepts in Computer Science such as algorithmic thinking, abstractions, logic, flow control, and data representation, storage and manipulation. The primary language used in the course will be Java.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 359 Security in Mobile App Design (3 credits)
The course introduces students on how to implement and enforce access and data protection measures for mobile applications using data encryption standards, VPN policies, and authentication. The focus of the course is on the integration between the mobile application and remote authentication services. The course include Android programming projects using security specific SDK's
Prerequisites: CSC 281 or CSC 201

CSC 361 Formal Lang & Compilr Constrctn (3 credits)
Introduction to formal languages and abstract machines: finite automata and regular sets, context free grammars and pushdown automata. Syntax trees and decorated trees. Application of these ideas to the construction of compilers and other language translation software. The course will include programming projects that will illustrate the major features of compiler construction.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 362 Artificial Intelligence (3 credits)
The course covers fundamental concepts such as role of logic in reasoning, deductive proofs, and blind and informed search techniques. Additional topics may include inductive learning, genetic algorithms, decision trees, planning, natural language processing, game trees and perceptron learning.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 363 Theoretical Foundations (3 credits)
Introduction to formal models of languages and computation. Topics covered include finite automata, regular languages, context-free languages, pushdown automata, Turing machines, computability, and NP-completeness.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 370 Topics in Computer Science (3 credits)
The course introduces students to recent theoretical or practical topics of interest in computer science. Content and structure of the course are determined by the course supervisor. The special topic(s) for a given semester will be announced prior to registration.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 490 Internship (3 credits)
The course goals are: to gain first-hand experience of the daily activities of professionals in computer science and related fields, to verify an interest in a particular area of computer science, to develop and hone skills required for computer science professions, to establish contacts outside the academic community who will facilitate a career in computer science. An internship journal and a report are also required.
Prerequisites: CSC 201 or CSC 2301 or CSC 2305
Attributes: Undergraduate

CSC 493 Independent Study (3 credits)
A one- or two-semester, independent research project on a topic selected by the student and a faculty research advisor, and approved by the department. The student may undertake the two-semester option to graduate with departmental honors, in which case he/she must notify the department by spring of his/her junior year. Students need to complete the application form for independent study (available in the Dean’s Office), meet the GPA and other requirements, and have the approval of the Computer Science Department chair and Associate Dean in order to register.
Prerequisites: CSC 281 or CSC 2281
Attributes: Undergraduate

CSC 494 Independent Study (3 credits)
A one- or two-semester, independent research project on a topic selected by the student and a faculty research advisor, and approved by the department. The student may undertake the two-semester option to graduate with departmental honors, in which case he/she must notify the department by spring of his/her junior year. Students need to complete the application form for independent study (available in the Dean’s Office), meet the GPA and other requirements, and have the approval of the Computer Science Department chair and Associate Dean in order to register.
Prerequisites: CSC 281 or CSC 2281
Attributes: Undergraduate

CSC 495 Computer Science Project (3 credits)
Students will work on a substantial application based upon their prior knowledge.
Prerequisites: (CSC 2301 or CSC 2305) or CSC 201
Attributes: Undergraduate

CSC 500 Discrete Structures (3 credits)
Mathematics needed for Computer Science. Topics covered include: functions, relations, propositional and first order predicate logic, set theory, proofs and their construction, counting and elementary probability. The course will use a declarative language as a tool to support concrete implementations of the mathematical ideas.
Restrictions: Enrollment is limited to Graduate level students.

CSC 501 Computer Science I (3 credits)
This is an intensive, one-semester, two-course sequence intended to provide students with the necessary background in programming for the graduate program. The use of the computer to solve problems. Students will learn general principles of program design, at first by using libraries of predefined program units, and later, by constructing complete programs. Emphasis is on developing techniques for program design that lead to correct, readable and maintainable programs. Intermediate programming techniques including the use of recursion. An introduction to encapsulated data structures. Lists and list sorting will be used to introduce a discussion of algorithm efficiency.
Restrictions: Enrollment is limited to Graduate level students.
CSC 502 Computer Science II (3 credits)
This is an intensive, one-semester, two-course sequence intended to provide students with the necessary background in programming for the graduate program. The use of the computer to solve problems. Students will learn general principles of program design, at first by using libraries of predefined program units, and later, by constructing complete programs. Emphasis is on developing techniques for program design that lead to correct, readable and maintainable programs. Intermediate programming techniques including the use of recursion. An introduction to encapsulated data structures. Lists and list sorting will be used to introduce a discussion of algorithm efficiency.
Prerequisites: CSC 3505 (may be taken concurrently) or CSC 501 (may be taken concurrently) or CSC 3405 Placement Score with a score of 1
Restrictions: Enrollment is limited to Graduate level students.

CSC 550 Object Orient Design & Data Struct (3 credits)
The course combines a strong emphasis on Object-Oriented Design principles and design patterns with the study of data structures. Fundamental Abstract Data Types, their implementations and techniques for analyzing their efficiency will be covered. Students will design, build, test, debug and analyze medium-size software systems and learn to use relevant tools.
Prerequisites: CSC 502 or CSC 3605
Restrictions: Enrollment is limited to Graduate level students.

CSC 551 Design and Analysis (3 credits)
Concepts of program complexity; basic approaches to complexity reduction: data structures and techniques; worst cases and expected complexity. Topics to be covered may include sorting, set manipulation, graph algorithms, matrix multiplication, and finite Fourier transforms, polynomial arithmetic, and pattern matching.
Prerequisites: CSC 4005 or CSC 550
Restrictions: Enrollment is limited to Graduate level students.

CSC 552 Computer Architecture (3 credits)
Overview of computer system organization, hardware components, and communications. Introduction to Boolean algebra, combinational and sequential logic, arithmetic, the CPU, memory, microprocessors, and interfaces. CISC vs. RISC processors. Practical assembly language programming will be the emphasis with an introduction to micro architecture and microprogramming on a variety of processors.
Prerequisites: CSC 501 or CSC 3405
Restrictions: Enrollment is limited to Graduate level students.

CSC 553 Computer Systems (3 credits)
An overview of the software required to integrate computer hardware into a functional system. The following topics are covered. Operating systems as resource managers and as virtual machines. System calls, in particular those required for process and file management; interrupt driven systems; concurrency; memory management; file systems and security.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 554 Theory of Computation (3 credits)
Formal languages, formal grammars, abstract machines; models of computation (e.g. Turing machines); computational complexity (NP completeness); undecidability and uncomputability.
Prerequisites: CSC 500
Restrictions: Enrollment is limited to Graduate level students.

CSC 610 Software Engineering (3 credits)
The purpose of this class is to teach the process of developing software. It combines a study of methods, tools, and techniques for creating and evolving software products, with the practical skills needed to deliver high-quality software products on schedule. The methods that are studied include requirements, specification, design, implementation, testing, and maintenance. The course includes a substantial group project.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 611 Human Computer Interaction (3 credits)
User models: conceptual, semantic and syntactic considerations; cognitive and social issues for computer systems; evaluating HCI; direct manipulation; the model view controller architecture; widgets and toolkits. Students will design a GUI based application.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 612 Program Verification (3 credits)
Symbolic logic and mechanized deduction; program specification; loop invariants; the proof methods of Floyd and Hoare; parallel computations; program semantics.
Prerequisites: CSC 551 or CSC 4015
Restrictions: Enrollment is limited to Graduate level students.

CSC 613 Software testing (3 credits)
A systematic approach to software testing, in context of the software life cycle and as a branch of software engineering, building on students’ prior knowledge of software engineering. Through both the breadth and depth of its coverage, the course prepares students to make an effective contribution to software testing as professional software engineers.
Prerequisites: CSC 3675 or CSC 500
Restrictions: Enrollment is limited to Graduate level students.

CSC 620 Internet App. Development (3 credits)
This course will attempt to give you experience in designing Internet applications. A student finishing this course should be able to design, implement, and maintain a large community or e-commerce web site. They should leave the course with an understanding of a variety of Internet protocols and markup languages, a knowledge of at least one common scripting tool, an understanding of how to implement a database back-end into a large-scale site, and the ability to critically assess the usability of both their design and the design others.
Prerequisites: CSC 502
Restrictions: Enrollment is limited to Graduate level students.

CSC 621 Database Systems (3 credits)
This course covers the concepts and structures necessary to design and implement a database management system. Topics to be covered: data models (entity-relationship and relational), SQL, normalization, storage structures, enterprise applications and database integrity.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 622 Advanced Database Concepts (3 credits)
Topics include stored procedures, triggers, query processing and optimization, web-based enterprise data applications, transaction management, concurrency control, distributed databases, data mining and web mining. The course includes programming projects involving SQL.
Prerequisites: CSC 621 or CSC 5215
Restrictions: Enrollment is limited to Graduate level students.
CSC 623 Data Comm and Networking (3 credits)
Topics include mathematical foundations of data communications, logical and physical organization of computer networks, the ISO and TCP/IP models, communication protocols, circuit and packet switching, the Internet, LAN/WAN, client/server communications via sockets, routing protocols, data encryption/decryption and network security issues. Prerequisite: CSC 550 Object Oriented Design and Data Systems.
Restrictions: Enrollment is limited to Graduate level students.

CSC 626 Web Technologies (3 credits)
Topics include organization of Meta-Markup languages, Document Type Definitions (DTDs), document validity and well-formedness, style languages, namespaces, Transformations, XML parsers, Web Services, and Web Security Specifications. Course includes programming projects.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 627 Introduction to Security (3 credits)
Topics include fundamental concepts in confidentiality, integrity, and availability, access control methods, cryptographic concepts, physical security, malware, computer viruses, privacy-invasive software, malware detection, network security, web security, security models, software vulnerability assessment.
Restrictions: Enrollment is limited to Graduate level students.

CSC 628 Advanced Security (3 credits)
Topics include classical cryptosystems, public and symmetric cryptography, key management, digital signatures, cipher techniques, authentication and federated identity management. Course also covers concepts relating to cryptovirology, malware, viruses, Trojan horses, worms and other types of infectors as they relate to network security. Course includes programming projects. Prerequisite: CSC 550 Object Oriented Design and Data Structures.
Restrictions: Enrollment is limited to Graduate level students.

CSC 629 Mobile App Design (3 credits)
This course is designed for students who wish to start developing mobile applications on Android platforms, and through the process understand the concepts relating to Computer Science on a mobile platform. The course will include the basics of mobile and wireless technology with Android programming and will cover the most recent version of Android. Students will learn how to develop feature-rich Android applications using various development platforms and learn the basic concepts in Computer Science such as algorithmic thinking, abstractions, logic, flow control, and data representation, storage and manipulation. The primary language used in the course will be Java. Prerequisite: CSC 551 Design and Analysis of Algorithms.
Prerequisites: CSC 550

CSC 630 Introduction to Graphics (3 credits)
The course provides an introduction to the principles of computer graphics. The emphasis will be placed on understanding how various elements that underlie computer graphics interact in the design of graphics software systems. Topics include pipeline architecture, graphics programming, 3D geometry and transformations, modeling, viewing, clipping and projection, lighting, shading and texture mapping and visibility determination. A standard graphics API will be used to reinforce concepts and the study of basic graphics algorithms. Students need some proficiency in C language and basic concepts from Linear Algebra.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 631 Computer Vision (3 credits)
Computer vision is the science of analyzing images and videos in order to recognize or model 3D objects, persons, and environments. Topics include the underlying image formation principles, extracting simple features like prominent points or lines in images, projecting a scene to a picture, tracking features and areas in images and make a mosaic, making an image-based positioning system, obtaining 3D models from two or more images, and techniques to recognize simple patterns and objects. The class includes programming exercises and hands-on work with digital cameras and laser scanners.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 632 Interactive 3D Game Developmtn (3 credits)
This is a technology-based course that uses the latest computer games technology to teach advanced programming, mathematics, and software development. The course is ideal for students with an interest in computer games who plan to seek employment in one of the country's more profitable industries, or students looking for a career in new technologies or software development. The interactive entertainment industry in the US and throughout the world is entering a new phase. New technology platforms are forcing existing development firms to diversify. There are many aspects of game design, development, production, finance, and the distribution process.
Prerequisites: CSC 550 or CSC 4005
Restrictions: Enrollment is limited to Graduate level students.

CSC 633 Advanced Graphics (3 credits)
The goal of this course is to expose students to advanced techniques in modeling and rendering in computer graphics and visualization. Topics include parametric curves and surfaces, mesh representation, multisolution modeling, mesh simplification, ray-tracing, radiosity and volume rendering (iso-rendering and direct volume rendering), anti-aliasing and animation.
Prerequisites: CSC 630 or CSC 5305
Restrictions: Enrollment is limited to Graduate level students.

CSC 634 Computational Geometry (3 credits)
The course covers design, implementation and analysis of data structures and algorithms for solving geometric problems concerning objects like points, lines, polygons in 2-dimensional space and in higher dimensions. The course emphasizes the applications of computational geometry. Topics include overview of geometric concepts, curves and surfaces, data structures for representing solid models, convex hulls, line segment intersection, multi-dimensional data structures (kd-trees, quadtrees and BSP trees), and range searching, point location, triangulations and Voronoi diagrams.
Prerequisites: CSC 551 or CSC 4015
Restrictions: Enrollment is limited to Graduate level students.

CSC 643 Big Data and Web Intelligence (3 credits)
The course explores the concepts of big data, the use of Artificial Intelligence data exploration techniques, the map-reduce parallel computing paradigm, distributed file systems, NoSQL databases, and stream computing engines. The course includes programming projects on a cluster of Hadoop servers.
Prerequisites: CSC 550
Restrictions: Enrollment is limited to Graduate level students.
CSC 644 Security in Mobile App Design (3 credits)
The course introduces students on how to implement and enforce access and data protection measures for mobile applications using data encryption standards, VPN policies, and authentication. The focus of the course is on the integration between the mobile application and remote authentication services. The course include Android programming projects using security specific SDK's

Prerequisites: CSC 551

CSC 651 Network Security & Cryptography (3 credits)

CSC 652 Computer Forensics & Crime (3 credits)

CSC 653 Internet Privacy & Surveillance (3 credits)

CSC 654 Cybersecurity & Risk Mgmt (3 credits)

CSC 670 Topics in CS (3 credits)
The course introduces students to recent theoretical or practical topics of interest in computer science. Content and structure of the course are determined by the course supervisor. The special topics for a given semester will be announced prior to registration. With permission of the Graduate Director the course may be taken more than once.

Prerequisites: CSC 550 or CSC 4005

Restrictions: Enrollment is limited to Graduate level students.

CSC 680 Artificial Intelligence (3 credits)
The course covers fundamental concepts such as role of logic in reasoning, deductive proofs, and blind and informed search techniques. Additional topics may include inductive learning, genetic algorithms, decision trees, planning, natural language processing, game trees and perception learning. Course includes programming projects in a suitable language.

Prerequisites: CSC 502

Restrictions: Enrollment is limited to Graduate level students.

CSC 681 Programming Paradigms (3 credits)
An exploration of the relationships between computational paradigms and the computer languages that support them. The Lambda calculus and functional programming, resolution and logic based languages, machine based models and imperative languages. The impact of the computational model on program structure and language design. A mid-sized programming project will be used to illustrate the concepts.

Prerequisite: CSC 500 Discrete Structures.

Restrictions: Enrollment is limited to Graduate level students.

CSC 682 Numerical Algorithms (3 credits)
Exposition and analysis of numerical methods for modern computers; review of basic concepts in linear algebra; direct and interactive methods for solving linear and nonlinear problems in numerical algebra; basic problems in approximation theory, numerical differentiation and integration; numerical solutions of differential equations; forward and backward error analysis of algorithms; criteria for comparing the efficiency and suitability of numerical methods.

Prerequisites: CSC 550 or CSC 4005

Restrictions: Enrollment is limited to Graduate level students.

CSC 683 Information Theory and Coding (3 credits)
Data encoding and transmission; variable length coding; the Kraft inequality for noiseless transmission channels; channel capacity; noise channels and channel capacity; the Shannon coding theorem; algebraic coding schemes. Prerequisite: CSC 500 Discrete Structures.

Restrictions: Enrollment is limited to Graduate level students.

CSC 684 Complexity of Computation (3 credits)
P and NP problems; NP-complete classes; concrete complexity and the P class of combinatorial problems; complexity reduction on graph and string problems; complexity of algebraic computations.

Prerequisites: (CSC 4015 or CSC 551) and (CSC 4025 (may be taken concurrently) or CSC 552 (may be taken concurrently))

Restrictions: Enrollment is limited to Graduate level students.

CSC 690 Computer Science Internship (3 credits)
An approved internship in advanced computer science.

CSC 791 Research Project I (3 credits)
Supervised independent research mentored by a graduate faculty member. Prerequisite: GPA of 3.5 and permission of the Graduate Director.

Restrictions: Enrollment is limited to Graduate level students.

CSC 792 Research Project II (3 credits)
Supervised independent research mentored by a graduate faculty member. Prerequisite: GPA of 3.5 and permission of the Graduate Director.

Restrictions: Enrollment is limited to Graduate level students.

CSC 793 Research Project III (6 credits)
Supervised independent research mentored by a graduate faculty member. Prerequisite: GPA of 3.5 and permission of the Graduate Director.

Restrictions: Enrollment is limited to Graduate level students.

Computer Science Major

Goals and Objectives for the B.S. in Computer Science

Goal 1: Graduates succeed as practicing computer scientists.

Students will be able to:

Objective 1.1: Solve problems and implement their solutions in an appropriate computational environment.

Objective 1.2: Apply their knowledge of computer science, mathematics, and science to solve technical problems.

Objective 1.3: Design systems, components, or processes to meet specified requirements.

Objective 1.4: Work in teams to create various software systems, both large and small.

Objective 1.5: Communicate effectively, orally and in written form, individually and/or in teams.

Goal 2: Graduates adapt and evolve in complex technological environments such as those found in the workplace.

Students will be able to:

Objective 2.1: Solve problems and implement their solutions in an appropriate computational environment.

Objective 2.2: Apply their knowledge of computer science, mathematics, and science to solve technical problems.

Objective 2.3: Design systems, components, or processes to meet specified requirements.
Objective 2.4: Work in teams to create various software systems, both large and small.

Objective 2.5: Analyze contemporary issues related to the evolving discipline of computer science.

Objective 2.6: Communicate effectively, orally and in written form, individually and/or in teams.

Goal 3: To provide graduates with a firm foundation in the scientific and mathematical principles that support the computing discipline.

Students will be able to:

Objective 3.1: Solve problems and implement their solutions in an appropriate computational environment.

Objective 3.2: Apply their knowledge of computer science, mathematics, and science to solve technical problems.

Objective 3.3: Design systems, components, or processes to meet specified requirements.

Goal 4: Graduates are careful, precise, mature thinkers, and take with them, the intellectual preparation they need to apply what they have learned, communicate it to others, and continue their education for the rest of their lives.

Students will be able to:

Objective 4.1: Enter and succeed in graduate programs in computing.

Objective 4.2: Solve problems and implement their solutions in an appropriate computational environment.

Objective 4.3: Apply their knowledge of computer science, mathematics, and science to solve technical problems.

Objective 4.4: Design systems, components, or processes to meet specified requirements.

Objective 4.5: Articulate the social, professional, ethical and legal aspects of a computing environment.

Objective 4.6: Analyze contemporary issues related to the evolving discipline of computer science.

Objective 4.7: Communicate effectively, orally and in written form, individually and/or in teams.

Requirements for the Computer Science Major

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses

See this page about Signature courses (p. 26). Six courses

**Double Major in Computer Science**

**Advisor**  
* Dr. Wei

With the approval of the Department, students who wish to double major in Computer Science and another discipline shall first satisfy the Major’s requirement of the Nine Required Core Courses and then take an additional CSC elective course.

---

**Information Technology Major**

**B.S. Information Technology Goals and Objectives**

**Goal 1:** Graduates will succeed as practicing information technologists.

Students will be able to:

- **Objective 1.1:** Solve business-related problems and implement their solutions in an appropriate computational environment.
- **Objective 1.2:** Apply their knowledge of computer science and business to develop business-related software solutions.
- **Objective 1.3:** Design systems, components, or processes to meet specified business requirements.
- **Objective 1.4:** Work in teams to create various software systems, both large and small.
- **Objective 1.5:** Communicate effectively, orally and in written form, individually and/or in teams.

**Goal 2:** Graduates will adapt and evolve in complex technological environments such as those found in the workplace.

Students will be able to:

- **Objective 2.1:** Solve business-related problems and implement their solutions in an appropriate computational environment.
- **Objective 2.2:** Apply their knowledge of computer science and business to develop business-related software solutions.
- **Objective 2.3:** Design systems, components, or processes to meet specified business requirements.
- **Objective 2.4:** Work in teams to create various software systems, both large and small.
- **Objective 2.5:** Articulate the social, professional, ethical and legal aspects of an IT environment.
- **Objective 2.6:** Communicate effectively, orally and in written form, individually and/or in teams.

**Goal 3:** Graduates will have a firm foundation in the computing and business principles that support the IT discipline.

Students will be able to:

- **Objective 3.1:** Solve business-related problems and implement their solutions in an appropriate computational environment.
- **Objective 3.2:** Apply their knowledge of computer science and business to develop business-related software solutions.
- **Objective 3.3:** Design systems, components, or processes to meet specified business requirements.

**Goal 4:** Graduates are careful, precise, mature thinkers, and take with them the intellectual preparation they need to apply what they have learned, communicate it to others, and continue their education for the rest of their lives.

Students will be able to:

- **Objective 4.1:** Enter and succeed in graduate programs in computing, business, or information technology.
- **Objective 4.2:** Solve business-related problems and implement their solutions in an appropriate computational environment.
- **Objective 4.3:** Apply their knowledge of computer science and business to develop business-related software solutions.
- **Objective 4.4:** Design systems, components, or processes to meet specified business requirements.
- **Objective 4.5:** Articulate the social, professional, ethical and legal aspects of an IT environment.
- **Objective 4.6:** Analyze contemporary issues related to the evolving discipline of IT.
- **Objective 4.7:** Communicate effectively, orally and in written form, individually and/or in teams.

**Requirements for the Information Technology Major**

The traditional undergraduate programs include 40 courses distributed across three components: a General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

---

**General Education Signature Courses**

See this page about Signature courses (p. 26). Six courses

**General Education Variable Courses**

See this page about Variable courses (p. 26). Six to Nine courses
## Admission Requirements and Procedures

Application to the program does not require a GRE test, as assessment is based on examining the applicants’ transcripts. There is also no minimum GPA required. Applicants should have the following undergraduate preparation:

### Computer Science

The equivalent of the following courses currently required in the undergraduate Computer Science program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 120</td>
<td>Computer Science I</td>
<td>4</td>
</tr>
<tr>
<td>CSC 121</td>
<td>Computer Science II</td>
<td>4</td>
</tr>
</tbody>
</table>

These courses use the Java programming language.

### Mathematics

The equivalent of the following courses in an undergraduate Mathematics or Computer Science program:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 226</td>
<td>Introduction to Linear Algebra</td>
<td>4</td>
</tr>
<tr>
<td>CSC 240</td>
<td>Discrete Structures I</td>
<td>3</td>
</tr>
</tbody>
</table>

1. New students will be required to take a placement examination in these subjects. Students who are deficient in these requirements must take and earn (without graduate credit) a grade of B in the appropriate courses.

## Application Procedures

Applicants should submit or have sent to the Office of Graduate Operations the following:

- a completed Saint Joseph’s University graduate application.
- official sealed transcript(s) of undergraduate/graduate coursework. If you are a SJU graduate the Office of Graduate Operations will obtain your SJU transcripts for you.
- two letters of recommendation appraising the candidate’s promise and capacity for graduate study, reflecting, from a professional’s point of view, the candidate’s ability to pursue a rigorous, independent course of study at the graduate level.
- a personal statement outlining the candidate’s professional goals and educational objectives for the program, including the applicant’s rationale for program choice and professional study.
- $35 application fee – waived if attended an Open House or an SJU graduate.

## Program Options

Students may choose to graduate with an:

- M.S. degree in computer science: General Option, or
- M.S. degree in computer science: Concentration Option

## M.S. Computer Science Goals and Objectives

**Goal 1:** Graduates succeed as practicing computer scientists.
Students will be able to:

Objective 1.1: Solve problems and implement their solutions in an appropriate computational environment.

Objective 1.2: Apply their knowledge of computer science, mathematics, and science to solve technical problems.

Objective 1.3: Design systems, components, or processes to meet specified requirements.

Objective 1.4: Work in teams to create various software systems, both large and small.

Objective 1.5: Communicate effectively, orally and in written form, individually and/or in teams.

Goal 2: Graduates adapt and evolve in complex technological environments such as those found in the workplace.

Students will be able to:

Objective 2.1: Solve problems and implement their solutions in an appropriate computational environment.

Objective 2.2: Apply their knowledge of computer science, mathematics, and science to solve technical problems.

Objective 2.3: Design systems, components, or processes to meet specified requirements.

Objective 2.4: Work in teams to create various software systems, both large and small.

Objective 2.5: Analyze contemporary issues related to the evolving discipline of computer science.

Objective 2.6: Communicate effectively, orally and in written form, individually and/or in teams.

Goal 3: Graduates are careful, precise, mature thinkers, and take with them the intellectual preparation they need to apply what they have learned, communicate it to others, and continue their education for the rest of their lives.

Students will be able to:

Objective 3.1: Enter and successfully complete Ph.D. programs in computing.

Objective 3.2: Solve problems and implement their solutions in an appropriate computational environment.

Objective 3.3: Apply their knowledge of computer science, mathematics, and science to solve technical problems.

Objective 3.4: Design systems, components, or processes to meet specified requirements.

Objective 3.5: Articulate the social, professional, ethical and legal aspects of a computing environment.

Objective 3.6: Analyze contemporary issues related to the evolving discipline of computer science.

Objective 3.7: Communicate effectively, orally and in written form, individually and/or in teams.

Degree Requirements for M.S. in Computer Science: General Option

A total of ten (six core and four elective) courses is the minimum required for the M.S. in Computer Science with General Option. Of these, a maximum of two courses may be for an approved research project.

<table>
<thead>

</tbody>
</table>

Elective Courses
Select any four CSC courses numbered 600 and more 12

A student who receives a grade lower than a B in a core course must retake the course.

Degree Requirements for M.S. in Computer Science: Concentration Option

A total of ten (four core and six elective) courses is the minimum for obtaining an M.S. degree in Computer Science in any of the following concentrations:

- Web and Database Technologies
- Cybersecurity

Students who do not need prerequisite courses take the following two required core courses during their first and second semesters, respectively:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSC 550</td>
<td>Objct Orint Dsgn &amp; Data Struct</td>
<td>3</td>

<tr>
<td>CSC 627</td>
<td>Introduction to Security</td>
</tr>
<tr>
<td>CSC 680</td>
<td>Artificial Intelligence</td>
</tr>
<tr>
<td>CSC 681</td>
<td>Programming Paradigms</td>
</tr>
</tbody>
</table>

A student who receives a grade lower than a B in any core course must retake the course.
Requirements for Six Elective (Concentration) Courses

Students take four courses from the same concentration plus any other two CSC courses numbered 600 and above to receive a specialized M.S. degree from that concentration:

Web and Database Technologies Concentration

Computer Science Minor

Advisor

- Dr. Wei

Objective 2.2: Analyze contemporary issues related to the evolving discipline of computer science.

Goal 3: Graduates have a firm foundation in the scientific and mathematical principles that supports the computing discipline.

Students will be able to:

Objective 3.1: Apply their knowledge of computer science, mathematics, and science to solve technical problems in an appropriate computational environment.

Information Technology Minor

Advisor

- Dr. Wei

With the approval of the Department, students may minor in Computer Science. Upon acceptance, the advisor will assist in selecting courses appropriate for their area of interest. Students who elect this minor must take six courses which include Computer Science I, Computer Science II, Data Structures, and three Computer Science electives numbered 202 and above.

Learning Goals and Objectives for the minor in Information Technology

Goal 1: Graduates will be practicing information technologists.

Students will be able to:

Objective 1.1: Apply their knowledge of information technology and business to solve technical problems in an appropriate computational environment.

Goal 2: Graduates adapt and evolve in complex technological environments such as those found in the workplace.

Students will be able to:

Objective 2.1: Apply their knowledge of information technology and business to solve technical problems in an appropriate computational environment.

Objective 2.2: Analyze contemporary issues related to the evolving discipline of information technology.

Goal 3: Graduates have a firm foundation in the computing and business principles that support the IT discipline.

Students will be able to:

Objective 3.1: Apply their knowledge of information technology and business to solve technical problems in an appropriate computational environment.

With the approval of the Department, students may minor in Information Technology. Upon acceptance, the advisor will assist in selecting courses appropriate for their area of interest. Students who elect this minor must take six courses which include computer Science I, Computer Science II, Data Structures, and three Computer Science electives numbered 202 and above.
CRIMINAL JUSTICE

Professors

• Kelly
• Logue
• Moore

Undergraduate Major
• Criminal Justice (p. 149)

Undergraduate Minors
• Criminal Justice (p. 154)

Graduate Program
• Master of Science in Criminal Justice (p. 151)

Adult Undergraduate
• Criminal Justice Studies (p. 151)

CRJ 550 Research Methods and Analysis (3 credits)
The functions of concepts, hypotheses, and theories for an empirical discipline; the operationalization of theoretical variables; the principles of research design; and the problems of inference. The association between criminological theories and research methods used to study crime is explored through the utilization of a variety of related data sources. Also covered are basic quantitative techniques, relevant statistics, data interpretation, and an overview of SPSS. Required of all students unless CRJ 575 is taken. Restrictions: Enrollment is limited to Graduate level students.

CRJ 565 Ethics and Criminal Justice (3 credits)
This course will address ethical issues in the criminal justice system at both the theoretical and applied levels. Typical theoretical issues addressed might include the following: the relationship between law and morality; theories of punishment; conditions for the moral and/or legal responsibility of individuals; notions of procedural justice. Typical applied ethics issues might include the following: search and seizure rules; the insanity defense and the "guilty but mentally ill" verdict; plea bargaining; capital punishment; mandatory sentencing; civil disobedience; limits on the use of deadly force. Required of all students.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 570 Prof. Writ. for Law Enforcmnt (3 credits)
The course is designed to develop the cognitive and technical skills of effective writing for law enforcement. Primary emphasis will be given to the "craft of writing", thus, learning the techniques and skills of effective communication in the law enforcement workplace. Class assignments will enhance students’ use of computer technology in the writing process. These tools are then applied to a variety of topics, including correspondence, memos, investigative reports, and presentations. Required of all students.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 575 Adv. Resrch Methods & Analysis (3 credits)
In-depth coverage of data collection including questionnaire construction, advanced quantitative techniques and statistics, interpretation and drawing inferences, comprehensive use of SPSS, function of the SJU Institutional Review Board, and research report formulation. Students will select a topic, complete the literature review, and develop a research methodology that may later be used as the initial components of the master’s thesis. Prerequisite: recent coursework and present working knowledge of basic research methods. Required of students intending to complete a master’s thesis via CRJ 793. May be substituted for CRJ 550 as a core course.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 580 Criminal Behavior & Profiling (3 credits)

CRJ 601 Law and Social Policy (3 credits)

CRJ 602 Courts, Policies & Admin (3 credits)

CRJ 603 The Criminal Justice Process (3 credits)

CRJ 604 Law Enforcement Management (3 credits)

CRJ 605 Criminal Justice Admin (3 credits)
This course provides present and future senior managers with the skills to achieve organizational effectiveness. Major topics include organizational design and behavior, budgeting and financial management, diversity, performance evaluation, human resources management, labor relations, and the policy process. Restrictions: Enrollment is limited to Graduate level students.

CRJ 606 Criminal Procedure (3 credits)

CRJ 607 Multiculturalism & Diversity (3 credits)
The purpose of this course is to present a conceptual framework to provide understanding of the special conditions of minorities in the context of the criminal justice system and encourage the development of culturally and gender specific compatible skills and practical approaches to more adequately meet the challenges presented by working with minority population concerns, problems and needs.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 608 Communicatn & Conflict Resolutn (3 credits)
CRJ 609 Alternative Dispute Resolution (3 credits)
CRJ 610 Commmnty&Prob-Oriented Policing (3 credits)
CRJ 611 Crime Analys Using GIS Mapping (3 credits)
This course will examine the role of geographic information systems (GIS) in crime analysis by covering the basic components of a GIS and examining the use of GIS in police departments throughout the US. Special attention will be given to the use of GIS at the Philadelphia Police Department and will include techniques used to analyze crime patterns as well as a review of the way crime maps influence tactical deployment decisions. Finally, a visit to the Philadelphia Police Department’s Crime Analysis Unit and/or Compstat meeting will illustrate the relationship of GIS to current crime problems in Philadelphia.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 612 Police Executive Management (3 credits)
This course is geared to the non-technical police manager and is designed to give students an overview of major automated systems used today throughout the United States. Topics covered include: the Internet, project management, budgeting, automation via computer including networks, dealing with vendors, maintenance agreements, grants, and applying for technical grants. The course will highlight major public safety systems such as the National Crime Information Center (NCIC2000), computer-aided dispatch, utilization of geographic information systems, and crime mapping. The course will also cover 911 systems, mobile/field communications, and vehicle mobile data terminals (MDT). No prior technical knowledge is required.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 614 Sem:Contemp Issues in Policing (3 credits)
CRJ 615 Youth Cultures and Deviance (3 credits)
This course offers economic, cultural, political, and social perspectives on American youth based on sociological theory. Special attention will be paid to youth popular culture and the unique social problems facing young adults (e.g. gangs, drugs, suicide, and teen pregnancy).
Restrictions: Enrollment is limited to Graduate level students.
CRJ 616 Juvenile Justice & Delinquency (3 credits)
This course provides a contemporary overview of theoretical and programmatic issues and concerns in juvenile delinquency and the juvenile justice system, including a review of recent research. The course also focuses on a critical review of the trends in problem solving and delivery of services to this population.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 617 Mental Health and the Law (3 credits)
The purpose of this course is to acquaint criminal justice professionals with the mental health field and to serve as a primer for understanding mental health and mental health professionals. In addition, particular areas of interplay between mental health and criminal justice will be emphasized to provide a historical and up-to-date factual background.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 618 Therapeutic Strat Crim Justice (3 credits)
An examination of the application of basic counseling principles to varied criminal justice settings, from adult correctional institutions to post-release situations. Special emphasis is given to innovative methods and programs.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 619 Fnds of Addiction;CRJ Profess (3 credits)
The course is designed to meet the needs of the criminal justice professional in dealing with the human and social consequences of addiction. The course will provide an understanding of substance abuse problems and addiction in American society. It is designed to provide a framework for exploring the effects of these problems on the many aspects of American culture including: the individual, family, criminal justice system, healthcare system, and the workplace. Course content will also include a critical analysis of current and past treatment interventions.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 620 Evid Bas Prac Subt Ab/Beh Hlth (3 credits)
Increasingly the Substance Abuse/Behavioral Healthcare field is being asked to prove that it offers a valuable treatment service for the funds it receives. This course will explore “best practices” including practice guidelines, treatments that are efficacious and evidence based treatments for substance abuse/addiction. The course will look at the level of energy needed and the complexities to transport “Evidence Based Scientific Knowledge” into a “real” clinical environment.
Restrictions: Enrollment is limited to Graduate level students.
CRJ 621 Co-Occurring Disorders (3 credits)
CRJ 622 Basic Prin. of Behavr Analysis (3 credits)
Learning serves as the basis for behavior change. In the field of criminal justice, programs often attempt to rehabilitate delinquents and offenders. This is an advanced course on principles of learning. This course will cover studies of principles of learning from relatively simple animal studies to more complex issues such as the acquisition of human language. We will outline from a behavior analytic perspective on such issues as thinking, feeling, and imagining. We will follow the structure of Catania’s text including an overview of learning processes, learning without words in an evolutionary context, and with words examining memory.
Restrictions: Enrollment is limited to students with a concentration in Behavior Analysis. Enrollment is limited to Graduate level students.
CRJ 623 Applied Behavior Analysis (3 credits)
Often Criminal Justice Personnel are called to function as behavior managers. To function effectively as a behavior manager/analyst, Criminal Justice Personnel need to grasp the basic concepts of human behavior and its change. This course covers the practical aspects of being an applied behavior analyst working in the criminal justice system, school system and the community setting. The topics will cover: basic principles of applied behavior analysis; the application of these principles to children ADHD, ODD, and CD8; writing behavioral objectives; training parents and paraprofessionals to execute operant and respondent based treatments; programming for generalization; working as a behavior analyst in a CASSP system; and legal and ethical issues in the treatment of children in a diverse society.
Restrictions: Enrollment is limited to students with a concentration in Behavior Analysis. Enrollment is limited to Graduate level students.
CRJ 624 Behavior Analysis: Consult (3 credits)
Professionals in the field of criminal justice often serve as consultants. Consultation has become a major approach to service delivery of psycho-educational services to children and adolescents. This course focuses on behavioral consultation in the juvenile justice system, school system, workplace, and community settings. The topics covered are best practices in behavioral consultation, the verbal behavior of the consultant and the consultee, building a consulting relationship, problem identification interviewing, direct observation methodology, problem analysis interviewing, skills and functional behavioral assessment methodology, functional analysis, standardized behavioral assessment, positive behavioral support and developing a competing behaviors model, treatment plan design and implementation, and treatment evaluation using single subject designs and graphical analysis of the data.
Prerequisites: CRJ 623 and CRJ 622
Restrictions: Enrollment is limited to Graduate level students.

CRJ 625 Behavioral Development (3 credits)
Many people in the justice system today are there because of emotional and behavioral disorders. Conceptualization of behavior problems and the origins of behavioral disorders are critical to the functioning of a criminal justice professional. This course focuses on Basic Principles in Behavior Analysis and how they shape the development of normal and abnormal children. The role of these principles in normal development and developmental problems such as language delays, motor developmental delays, conduct and oppositional defiant disorder, childhood depression and autism are explored. The course reviews field applications including observations, functional behavioral assessment, curriculum-based measures and intervention strategies that involve both the school and the family.
Prerequisites: CRJ 622 and CRJ 623
Restrictions: Enrollment is limited to Graduate level students.

CRJ 626 Clinical Behavior Analysis (3 credits)
This course observes behavior analysis as it enters into the child clinical, adult clinical, supervisory level and organizational behavior. The primary goal of the course is to provide an overview and skills for behavior analysts in criminal justice to function as parole and probation officers with both adults and children, as well as organizational and system level change experts.
Prerequisites: CRJ 622 and CRJ 623 and CRJ 624
Restrictions: Enrollment is limited to Graduate level students.

CRJ 627 Contemp Criminal.: Scope&Appl (3 credits)

CRJ 628 Victimology (3 credits)
The course focuses on the contemporary concept and status of the victim, juxtaposed with their historical evolution in terms of compensation, retribution, and vengeance. Current victim assistance programs are evaluated. The definition of the victim is broadened to include currently undervalued categories. Other issues addressed are child abuse, environmental casualties, and controversies over recovered memories.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 629 Violence and Victims (3 credits)
This course is designed to explore the serious problem of violence in our society from a sociological perspective. Violence is prevalent in homes and on the streets of the United States. This course will address a variety of types of violence, its causes, consequences, and theories for prevention. Topics which will be addressed include wife abuse, rape, child abuse, gang warfare, street violence and serial murder. An emphasis will be placed on understanding the structural causes of violence such as gender, race, and social class inequality as well as the effect of pornography, the media, and drugs/alcohol on violence. Particular attention will be given to the consequences of violence for both individual victims and society as a whole.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 630 Gender, Crime, and Justice (3 credits)

CRJ 631 Criminal Jurisprudence (3 credits)

CRJ 632 Crime and Urban Communities (3 credits)
This course examines crime and delinquency at the level of the urban neighborhood. This course takes an in- depth look at the theories and research that has emphasized the community level factors that lead to crime and delinquency, and examines the topic of what neighborhoods can do to prevent crime. The course will also consider policies that aim at alleviating neighborhood problems and reducing crime. The course has a practical component that requires students to apply what they learn in class to specific problems of crime and disorder in local communities.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 633 Federal Criminal Justice (3 credits)
This course will examine the criminal justice at the federal level. The main areas are the role of each branch of government; how agencies are funded; the major investigation, prosecution, probation, and correction elements; and individual investigative agencies including Inspector General. The course will cover the mission of and interrelationships among individual agencies.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 634 Fed Criminal Law & Prosecution (3 credits)
This covers federal criminal law and its enforcement. Major areas include an overview of federal crimes, elements of the United States Code, origin and scope of federal criminal law, and the role of federal agents in the support of prosecutions. Specific topics include mail and wire fraud, the Hobbs Act, official bribery and corruption, organizational crime, drug enforcement, money laundering, criminal civil rights violations and remedies, interference with witnesses, federal versus state prosecution, sentencing guidelines, and asset forfeiture.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 635 White Collar Crime (3 credits)
The course provides an understanding of the accounting and financial bases of embezzlement, fraud, corruption, and misapplication of funds. Legislation and regulation in government and business are examined. Consumer protection and corporate responsibility are discussed.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 636 Federal Search and Seizure (3 credits)
This course is designed to teach the law of search and seizure as it is defined and applied in federal court. Instruction will focus on the requirements of the Fourth Amendment and the proper means by which a federal agent may obtain evidence through searches and seizures. This course will address legal and evidentiary issues associated with search warrants, exceptions to the warrant requirement, warrantless searches, frequent problems that confront federal agents, as well as emerging trends in the law of search and seizure.
Restrictions: Enrollment is limited to Graduate level students.
Restrictions: Enrollment is limited to Graduate level students.

CRJ 637 Forensic Financial Analysis (3 credits)
This course covers the detection of illegal financial transactions. Major topics include money laundering, fraud, embezzlement, and illicit accounting practices. Students will learn data gathering and analysis techniques for financial transactions, records, legitimate businesses, illegal organizations, and individuals. The course will include preparation for trial. Prerequisite: a basic course in accounting or permission of the instructor.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 638 Drugs: Threats, Laws & Strat (3 credits)
This course covers illegal drugs and narcotics including prescription medication diverted for illicit use. Major topics include drug types, brief history, emerging trends, relevant federal and state laws, typical domestic and foreign sources, production and distribution methods. A strategy overview includes the National Drug Control Policy; agencies involved; the role of education, interdiction, investigation, prosecution, treatment and rehabilitation; and coordination among federal, state, and local law enforcement.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 639 Org Crime: Targets & Strat (3 credits)
This course will investigate the social, economic, and political impact organized crime has on our society. We will target specific industries where organized crime has influence/control (e.g. construction, waterfront, garment, trucking, and convention centers). The course will explore criminal, civil, and administrative strategies to control and/or remove the influence of organized crime in those industries.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 640 Terrorism: Threats and Strateg (3 credits)
This course is designed to give the student an understanding of the concepts of terrorism, both domestic and international. Lecturer will address the causes and effects of terrorism as they relate to political structures from both religious and historical perspectives; noting its impact on the world today.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 641 Homeland Security (3 credits)
This course focuses on the consolidation of responsibilities and functions across agencies, at various jurisdictional levels, that have the charge of mitigating hostilities, threats, hazards, and consequences. Further, this course incorporates the pillars of robust response systems. This course is designed to develop analytical skills that will prepare students to identify, evaluate and resolve complex policy issues and initiate practical actions. Though the range of relevant issues extends from local matters to national security, this course will concentrate on preparedness strategies for state, urban and local areas.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 642 Law Enforc Intel Analysis (3 credits)
This course pursues the deliberative and cognitive activities and methodologies that surround the production of intelligence information, in support of decision-making at the strategic, tactical, and operational levels of law enforcement. Also examined are the structure and supervision of the intelligence analysis unit at various levels of law enforcement, and the role of the analyst.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 643 L.E. Intelligence:Policy & Pro (3 credits)
This course provides insights into the contemporary functions of law enforcement strategic, tactical, and operational intelligence and its influence upon crime prevention policy. The discussion will include the intelligence process in the context of intelligence unit structure and supervision, operating procedures, and resources. The course will examine how law enforcement intelligence relates to organizational relationships, planning, and decision-making.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 644 Elec Intelligence Analysis (3 credits)
This course will use the latest computer technology to train students in the use of Analyst Notebook 7, an electronic version of link analysis, telephone toll analysis and flow charts. Analyst Notebook 7 is the program currently being used by the CIA, FBI, NSA, US ARMY, INS, CUSTOMS, SECRET SERVICE, HOMELAND SECURITY, DEA, and more than 1500 other National, State and Local Law Enforcement agencies throughout the world, to combat Terrorism, Drug Smuggling, Money Laundering and Organized Crime. It is a hands-on training course and is limited to twenty-five students. Prerequisite: CRJ 642.

Prerequisites: SOC 4545 or CRJ 642

Restrictions: Enrollment is limited to Graduate level students.

CRJ 645 Sociology of Disasters (3 credits)
This course is designed to provide the graduate student advanced knowledge and understanding of the sociological issues and concerns related to both man-made and natural disasters. The purpose is to present the current research pertaining to community resilience and the effects on individuals who witness, become victimized, or are otherwise affected by disasters. Each student will be expected to increase their capacity in both oral and written communication through their individual and group participation. The course will also improve the student’s analysis of the sociological implications related to disasters.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 646 Risk Assessment (3 credits)
This course is designed to provide the graduate student advanced knowledge and understanding in the area of risk assessment and management. The focus is on the recognition of real and perceived threats, sharing information between communities and agencies, the collaboration of resources, and the management of risk. Students will examine the concepts of risk assessment, risk analysis, and the impacts of actual and suspected threats.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 647 Prob Continental Corrections (3 credits)
The major problems of adult corrections, including prison and jail overcrowding, population forecasting, judicial intervention in correctional operations, prison disturbances, mental health and incarceration, pretrial and post-conviction alternatives to traditional incarceration, ethics and corrections, and the death penalty. Case study materials are employed, and current and ongoing correctional issues are discussed.

Restrictions: Enrollment is limited to Graduate level students.

CRJ 648 Con Prob Probation & Parole (3 credits)
This course is designed to analyze the current legal, managerial, and political factors which impact upon the probation and parole system. It will examine organizational innovations, caseload management techniques, and technological advances used to confront such problems.

Restrictions: Enrollment is limited to Graduate level students.
Program Description

The criminal justice major is designed to provide theoretical and practical knowledge for students interested in professional careers in traditional law enforcement fields such as federal law enforcement, corrections, courts, police, and probation; in administrative and management positions in criminal justice and private security; and in law and para-legal occupations. Moreover, the major's curriculum is intended to facilitate entry into graduate programs in criminal justice, sociology, and law, while also retaining a humanistic understanding of the study of crime. The criminal justice major at Saint Joseph's is distinguished by
its emphasis on creative participation, student-faculty interaction, and independent research projects.

Criminal Justice Learning Goals and Objectives

**Goal 1:** Criminal Justice majors will demonstrate comprehension of the discipline of sociology and its role in contributing to our understanding of social reality.

**Objective 1.1:** Students can apply the sociological imagination, sociological principles, and concepts to her/his own life.

**Objective 1.2:** Students can compare and contrast basic theoretical orientations.

**Goal 2:** Criminal Justice majors will develop knowledge of sociological research methods.

**Objective 2.1:** Students can design a research study in an area of choice and explain why various methodological decisions were made.

**Objective 2.2:** Students can run basic statistical analyses to answer research questions.

**Objective 2.3:** Students can identify and understand how to apply different methodologies (i.e., quantitative vs. qualitative) to the same subject and determine the benefits of each.

**Goal 3:** Criminal Justice majors will understand how to communicate within their discipline.

**Objective 3.1:** Students can engage in social scientific technical writing that accurately conveys data findings.

**Objective 3.2:** Students can orally present research or course material clearly and concisely.

**Goal 4:** Criminal Justice majors will incorporate the values from the discipline.

**Objective 4.1:** Students can assess the impact of the negative effects of social inequality.

**Objective 4.2:** Students can appraise the utility of the sociological perspective as one of several perspectives on social reality.

**Goal 5:** Criminal Justice majors will understand the operation of culture and social structure.

**Objective 5.1:** Students can describe the significance of variations by race, class, gender, sexual orientation, and age, and thus critically assess generalizations or stereotypes for inaccuracy.

**Objective 5.2:** Students will identify examples of specific policy implications using reasoning about the effects of social structuration.

**Goal 6:** Criminal Justice majors will be socialized for professional careers and/or further studies.

**Objective 6.1:** Students can identify a social problem, design ways to address it, and outline feasible steps to accomplish their task.

Requirements for the Criminal Justice Major

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

**General Education Signature Courses**

See this page about Signature courses (p. 26). Six courses

**General Education Variable Courses**

See this page about Variable courses (p. 26). Six to Nine courses

**General Education Overlays**

See this page about Overlays (p. 27).

**General Education Integrative Learning Component**

See this page about Integrative Learning Component (p. 27). Three courses

**GEP Electives**

Seven elective courses that students may select as appropriate for their own intellectual, aesthetic, moral or career development in Criminal Justice.

**Major Requirements**

**Major Concentration**

Requirements for College Honors in Sociology

To receive College Honors credit, Sociology majors will participate in the Senior Capstone experience required of all majors by taking SOC 495 as an honors course during the fall of the senior year. Additionally, College Honors candidates in Sociology will complete a second honors course during the spring of the senior year (SOC 497) that includes research, extending the senior capstone experience beyond what non-Honors students complete. For students in the University Honors program, these two upgraded courses may be counted toward the eight course Honors requirement. To be eligible to participate in College Honors, a student must have a 3.5 GPA. If you are interested in completing the College Honors project during your senior year, please be in touch with the department chair early in the spring of your junior year. More details concerning College Honors may be found under "Honors Program".

Criminal Justice Studies B.L.S.

Kim Logio, Ph.D, Chair, Sociology
Maria Kefalas, Ph.D, Program Director, Criminal Justice Studies

Learning Goals, Educational Objectives and Learning Outcomes

Goal 1: Criminal Justice Studies majors will demonstrate comprehension of the discipline and its role in contributing to our understanding of criminal justice processes.

Objective 1.1: Students will be able to compare and contrast basic theoretical orientations and apply them in at least one area of social reality.

Goal 2: Criminal Justice Studies majors will develop knowledge of criminological research methods.

Objective 2.1: Students will be able to identify basic methodological approaches and describe the general role of methods and ethical considerations in building knowledge.

Objective 2.2: Students will be able to critically assess a published research report from criminological journals and explain how the study could have been improved.

Goal 3: Criminal Justice Studies majors will understand how to communicate within their discipline.

Objective 3.1: Students will be able to write reviews of literature that express findings from criminological research.

Goal 4: Criminal Justice Studies majors will understand the operation of culture and social structure.

Objective 4.1: Students will be able to describe the significance of variations by race, class, gender, sexual orientation, and age, and thus critically assess generalizations or stereotypes for inaccuracy within the criminal justice system.

Objective 4.2: Students will be able to identify examples of specific criminal justice policy implications using reasoning about the effects of social structuration.

Students admitted prior to Summer 2016 entered under the curriculum requirements for the BS in Criminal Justice. Please see the S.JU Academic Catalog for your admit year for additional information.

M.S. in Criminal Justice Program Description

The Master's program in Criminal Justice is designed to meet the graduate educational needs of practitioners and students pursuing careers in criminal justice, in both the public and private sectors. While the 30-credit curriculum requires degree candidates to take four core courses, the student selects the remainder. This arrangement allows individuals to create unique plans of graduate study that are compatible.
with their interests and career objectives in the field of criminal justice. The program is flexible enough to allow students to concentrate on the theoretical and methodological knowledge needed to pursue a degree beyond the master’s or to focus on the management skills necessary to succeed as upper-level decision makers.

Course offerings and scheduling are conveniently arranged to accommodate the needs of both full-time and part-time students. Courses are offered at Main Campus and online.

**Admission Requirements and Procedures**

Students applying for admission to the Criminal Justice program must have a baccalaureate degree from an accredited college or university and an undergraduate grade point average (GPA) of at least 2.8 to be considered for admission. Students must maintain a 3.0 average throughout their tenure in the program.

Applicants should submit the following documents for admission consideration:

- a completed Saint Joseph’s University online graduate application, www.sju.edu/gradapplynow.
- official sealed transcript(s) of undergraduate/graduate coursework. If you are a SJU graduate the Office of Graduate Operations will obtain your SJU transcripts for you.
- a current resume
- two letters of recommendation (professional) from at least two faculty or employers appraising the candidate’s promise and capacity for graduate study, reflecting, from a professional’s point of view, the candidate’s ability to pursue a rigorous, independent course of study at the graduate level.
- a personal statement outlining the candidate’s professional goals and educational objectives for the program, including the applicant’s rationale for program choice and professional study. The personal statement additionally acts as a writing sample indicating an applicant’s ability to write and communicate on the graduate level.
- $35 application fee – waived if attended an Open House or an SJU gradstudies, International Students for more information.
- documentation of English language proficiency. See www.sju.edu/gradapplynow.
- a personal statement additionally acts as a writing sample indicating an applicant’s ability to write and communicate on the graduate level.
- A limited number of graduate assistantships are offered each academic year. Applicants who wish to be considered for a graduate assistantship must complete the above application process and submit a letter directly to the Sociology Program Chair by March 1 prior to the fall semester for which they are applying for admission. Please contact the Sociology Department for more information 610-660-1640.

**Learning Goals, Educational Objectives and Learning Outcomes**

**Goal 1:** MS Criminal Justice students can demonstrate comprehension of the theoretical foundations of the criminal justice system

**Objective 1.1:** Students can explain traditional and contemporary social policy

**Objective 1.2:** Students can apply theoretical concepts to their field

**Objective 1.3:** Students (Federal Law Enforcement and Intelligence specializations) can identify legal statutes and constitutional principles

**Goal 2:** MS Criminal Justice students can understand how to integrate ethical principles into the criminal justice system

**Objective 2.1:** Students can explain and apply historical and modern ethical principles to the workplace

**Goal 3:** MS Criminal Justice students will illustrate graduate-level written and oral communication

**Objective 3.1:** Students can write clear, organized papers following APA format

**Objective 3.2:** Students can clearly and concisely articulate research or course materials through oral presentations

**Goal 4:** MS Criminal Justice students will conduct and employ empirically-sound criminal justice-related research

**Objective 4.1:** Students can identify empirical Criminal Justice research materials

**Objective 4.2:** Students can evaluate and incorporate scholarly research into literature reviews

**Objective 4.3:** Students can apply research techniques to original research

**Goal 5:** MS Criminal Justice students can implement and demonstrate intervention strategies

**Objective 5.1:** Students (Behavioral Analysis and Behavior Management specializations) can identify and chart behavioral issues and create behaviorally-specific interventions

**Degree Requirements**

A total of 30 credits is the minimum requirement for the degree regardless of concentration. Two courses (6 credits) per semester is the recommended course of study while three courses (9 credits) is considered a full-time graduate load; any courses beyond these credit hours must be approved by the Program Director and/or Chair at their discretion. If the Program Director and/or the Chair determine that an overloaded schedule does not represent the student’s best interest, then additional courses will be disallowed.

All students must satisfactorily complete the following core courses at Saint Joseph’s University:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CRJ 550</td>
<td>Research Methods and Analysis</td>
<td>3</td>
</tr>
<tr>
<td>or CRJ 575</td>

<td>Ethics and Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td>CRJ 570</td>
<td>Prof. Writ. for Law Enforcimnt</td>
<td>3</td>
</tr>
</tbody>
</table>

Remaining coursework should be chosen to facilitate the student’s individual professional growth.
All Graduate Assistants and students, who intend to do a thesis, and those who have a recent and substantial undergraduate preparation in research methods, will be required to take CRJ 575 in lieu of CRJ 550.

**Master of Science—Criminal Justice—General**

This program provides students the opportunity to enhance their theoretical foundation of criminal justice; develop cognitive skills including application of ethics, written and oral communications, critical thinking, reasoning, understanding and conducting research; and prepare for their professional future.

**Electives**

Select six electives chosen from any available Criminal Justice graduate courses with the exception of Behavior Analysis courses which require program approval.

**Master of Science Criminal Justice—Concentration in Homeland Security**

This program offers students the opportunity to examine strategies, develop communication skills, execute plans, and learn about contemporary issues of terrorism which affect the public and private sectors in our society today. The curriculum can assist students in building strategies to prevent, and partnerships to prepare for homeland security incidents. Focus is on identifying threats and the critical infrastructure protections needed in the United States today.

**Master of Science Criminal Justice—Concentration in Intelligence and Crime Analysis**

This program provides insights into the contemporary functions of law enforcement intelligence and crime analysis. The specialized courses develop the deliberate and cognitive activities and methodologies including crime mapping that produce intelligence information in support of decision-making at the strategic, tactical, and operational levels of law enforcement. Students will be prepared for the growing number of intelligence and criminal analyst positions at the federal, state, and local levels.

Master of Science Criminal Justice-Concentration in Behavior Analysis

This program prepares graduates to become skilled behavior management practitioners. Behavior Analysis is recognized as a “best practice” in the field of autism, behavioral health, addictions, business and corrections. Graduates are prepared to work in a variety of settings including education, autism, criminal justice, public policy, addictions, mental health, business and other fields where the understanding and management of human behavior is desired. A minimum of one year of applied behavior analysis work experience is expected for candidates applying to and enrolled in this concentration.

The Behavior Analyst Certification Board (BACB) has approved courses CRJ 622 through CRJ 626 and CRJ 657 as meeting the coursework requirement for taking the Board Certified Behavior Analyst (BCBA) Examination. Applicants need to complete an experiential component to qualify.

Internship and Practicum Requirements
Students are not required to complete an internship or practicum for the awarding of a degree or post master’s certificate but for those who wish to pursue licensure or BACB Certification, skill experience/internship is required.

Behavior Analysis Certification vs. Behavior Specialist Licensure Certification
National certification is offered by the Behavior Analyst Certification Board (BACB). The BACB is responsible for certifying training programs and administering the certification examination. Saint Joseph’s University’s Behavior Analysis programs are approved by the BACB as meeting the coursework and practicum requirements for eligibility to take the certification examination. For more information, please visit www.bacb.com (http://www.bacb.com)

Licensure
The Commonwealth of Pennsylvania has instituted a Behavior Specialist License for professionals who work with children diagnosed with Autism Spectrum Disorder and who seek compensation for their services via insurance and medical assistance. The Saint Joseph’s University Behavior Analysis program can verify content hours toward this license. The amount of content hours awarded will vary by student depending upon the coursework completed by the student.

Post-Master’s Certificate in Behavior Analysis
Students who earned a Master’s degree in criminal justice or a related discipline may update/expand their knowledge or expertise through this certificate program. The certificate requires successful completion of eighteen specific Behavior Analysis credits (six courses) all of which have been approved by the Behavior Analyst Certification Board (BACB) as meeting the coursework requirement for taking the Board Certified Behavior Analyst (BCBA) Examination. Applicants need to complete an experiential component to qualify. Students who complete the Post-Master’s Certificate program may apply these credit hours towards an M.S. degree. Students must submit an updated application and meet all MS degree application requirements:

- Submit an online graduate application www.sju.edu/gradapplynow.
- Complete six courses. Must be approved by the Program Director.

Criminal Justice Minor

Criminal Justice Learning Goals and Objectives

Goal 1: Criminal Justice majors will demonstrate comprehension of the discipline of sociology and its role in contributing to our understanding of social reality.

Objective 1.1: Students can apply the sociological imagination, sociological principles, and concepts to her/his own life.

Objective 1.2: Students can compare and contrast basic theoretical orientations.

Goal 2: Criminal Justice majors will develop knowledge of sociological research methods.

Objective 2.1: Students can design a research study in an area of choice and explain why various methodological decisions were made.

Objective 2.2: Students can run basic statistical analyses to answer research questions.

Objective 2.3: Students can identify and understand how to apply different methodologies (i.e., quantitative vs. qualitative) to the same subject and determine the benefits of each.

Goal 3: Criminal Justice majors will understand how to communicate within their discipline.

Objective 3.1: Students can engage in social scientific technical writing that accurately conveys data findings.

Objective 3.2: Students can orally present research or course material clearly and concisely.

Goal 4: Criminal Justice majors will incorporate the values from the discipline.

Objective 4.1: Students can assess the impact of the negative effects of social inequality.

Objective 4.2: Students can appraise the utility of the sociological perspective as one of several perspectives on social reality.

Goal 5: Criminal Justice majors will understand the operation of culture and social structure.
Objective 5.1: Students can describe the significance of variations by race, class, gender, sexual orientation, and age, and thus critically assess generalizations or stereotypes for inaccuracy.

Objective 5.2: Students will identify examples of specific policy implications using reasoning about the effects of social structuration.

Goal 6: Criminal Justice majors will be socialized for professional careers and/or further studies.

Objective 6.1: Students can identify a social problem, design ways to address it, and outline feasible steps to accomplish their task.

The minor in criminal justice requires completion of the following:

Select any additional 200 level approved criminal justice course
ECN 101 Introductory Economics Micro (3 credits)

By analyzing the behavior of buyers and sellers in product and factor markets, this course explains how a market economy determines how scarce resources are allocated to the production and distribution of various goods and services. Supply-and-demand models are used to explain the determination of the prices of products and of factor inputs, and the consequences of government controls and of different types of market structures on prices, wages, and economic efficiency are analyzed.

Attributes: GEP Social Science, International Relations Course, Undergraduate

ECN 102 Introductory Economics Macro (3 credits)

Theoretical models of the economy as a whole, show what determines the level of national output, employment, and prices, and how these might be stabilized by the proper fiscal and monetary policies. The course also looks at the mechanism by which our money supply changes, and considers the benefits and problems associated with international trade. Topics covered include the measurement of GDP, inflation and unemployment; Keynesian and Classical theories of output and price determination; the Federal Reserve System; the federal budget and the national debt; and the balance of payments. ECN 101 not prerequisite for ECN 102 but recommended.

Attributes: GEP Social Science, International Relations Course, Undergraduate

ECN 103 Intermediate Microeconomics (3 credits)

This course presents an analysis of the behavior of households as buyers of output and suppliers of inputs, an analysis of firms as suppliers of output and buyers of inputs, and a study of their interaction in markets that determines the prices and quantities of outputs and inputs. Applications of analytical tools are demonstrated. Prerequisite: ECN 101.

Attributes: Undergraduate

ECN 104 Intermediate Macroeconomics (3 credits)

This course examines a complete model of the economy to show the forces that determine the rate of unemployment, the rate of inflation, the rate of growth, and the international financial position of an economy. This model is used to show the logic of, and the limitations of, monetary, fiscal, and other stabilization policies. Prerequisite: ECN 102.

Attributes: Undergraduate

ECN 105 International Economics (3 credits)

This course investigates international macroeconomic theory and its application to current events and policy issues, including the study of the principles and practices of the balance of payments, exchange rates, and international money markets for achieving both domestic and international policy objectives. Coverage includes the description and history of financial crises, currency policy, the development of international financial markets and the relevant national and international institutions. Prerequisite: ECN 102; ECN 101 is recommended. Note: counts towards the quantitative track.

Attributes: ECN 102

ECN 301 Microeconomic Theory (3 credits)

This course presents an analysis of the behavior of households as buyers of output and suppliers of inputs, an analysis of firms as suppliers of output and buyers of inputs, and a study of their interaction in markets that determines the prices and quantities of outputs and inputs. Applications of analytical tools are demonstrated. Prerequisite: ECN 101.

Attributes: Undergraduate

ECN 302 Macroeconomic Theory (3 credits)

This course examines a complete model of the economy to show the forces that determine the rate of unemployment, the rate of inflation, the rate of growth, and the international financial position of an economy. This model is used to show the logic of, and the limitations of, monetary, fiscal, and other stabilization policies. Prerequisite: ECN 102.

Attributes: Undergraduate

ECN 311 Economic Statistics (3 credits)

This course investigates a primary component in the study of international economics: the causes and effects of international trade and barriers to trade. The class begins with an overview of world trade patterns and then focuses on classical and modern trade theory, exploring the Ricardoan and Heckscher-Ohlin models, as well as non-comparative advantage based models that incorporate economies of scale and monopolistic competition. The second part of the class focuses on trade policy, starting with a theoretical analysis of tariffs, and then investigating the debate over free trade as it pertains to both developing and advanced economies. The class also looks at the economic institutions involved in the management of global trade, such as the World Trade Organization. Prerequisite: ECN 101.

Attributes: ECN 101 or ECN 102

ECN 321 International Trade (3 credits)

This course investigates international macroeconomic theory and its application to current events and policy issues, including the study of the principles and practices of the balance of payments, exchange rates, and international money markets for achieving both domestic and international policy objectives. Coverage includes the description and history of financial crises, currency policy, the development of international financial markets and the relevant national and international institutions. Prerequisite: ECN 102; ECN 101 is recommended. Note: counts towards the quantitative track.

Attributes: ECN 102

ECN 322 International Macroeconomics (3 credits)

This course investigates international macroeconomic theory and its application to current events and policy issues, including the study of the principles and practices of the balance of payments, exchange rates, and international money markets for achieving both domestic and international policy objectives. Coverage includes the description and history of financial crises, currency policy, the development of international financial markets and the relevant national and international institutions. Prerequisite: ECN 102; ECN 101 is recommended. Note: counts towards the quantitative track.

Attributes: ECN 102
ECN 330 Economics of Labor (3 credits)
This course concentrates on the analysis of the major contemporary issues concerning labor relations and labor unions; in particular: unemployment, wage-price relations, the settlement of disputes, minimum-wage legislation, wage differentials and discrimination, and competition from imports. Discussion is not confined to the purely economic dimensions of these topics. The course includes descriptive material on the development and present structure of the labor union movement in this country and on the more interesting and significant features of labor-management relations in selected foreign countries. Prerequisite: ECN 101. Note: Can be counted towards quantitative track with the completion of additional coursework and permission of the instructor.
Prerequisites: ECN 101
Attributes: Undergraduate

ECN 340 Government Finance (3 credits)
This course examines the nature of government spending, the decision-making process, and trends. It describes and evaluates several kinds of taxation and proposals for reform. It utilizes microeconomics to investigate tax incidence and the welfare effects of taxation. Prerequisite: ECN 101.
Prerequisites: ECN 101
Attributes: Undergraduate

ECN 350 Monetary Economics (3 credits)
The course analyzes the nature and functions of money to show its influence on GNP, the price level, unemployment, and the allocation of resources. Commercial banking and other financial institutions will be studied, as well as central banking. Prerequisite: ECN 102. Note: counts towards the quantitative track.
Prerequisites: ECN 102
Attributes: Undergraduate

ECN 360 Industrial Organization (3 credits)
Applications of microeconomic theories to public policies affecting structure and performance of markets and behavior of firms. Antitrust and other aspects of government regulation will be covered. Prerequisite: ECN 101. 
Prerequisites: ECN 101
Attributes: Undergraduate

ECN 365 Game Theory (3 credits)
The goal of the course is to introduce students to the field of Game Theory within the Microeconomics discipline. Standard concepts to be learned and discussed are the roles of strategy, decision making, solution concepts for games, the nature of Nash equilibria, strategic behavior, cooperation, the role of incentives, probabilities and the nature of Bayesian equilibria, auctions in theory and practice, matching theories, conflict and theories of appropriation versus production. The course will put a greater emphasis on the role of economic reasoning and the major results discovered within the field as opposed to understanding the complex mathematical proofs. In addition, students will learn to approach the study of economics from an analytic perspective as opposed to the standard quantitative approaches of undergraduate economic studies. Prerequisite: ECN 101. Note: counts towards the quantitative track
Prerequisites: ECN 101
Attributes: Undergraduate

ECN 370 Economic Development (3 credits)
This course focuses on the economic growth and development of the Third World; conditions that are conducive to growth are explored and the transformation that results from growth is studied. Also addressed is the development impact on trade, poverty, industrialization, etc. Latin American Studies. Latin American Studies.
Prerequisites: ECN 101 or ECN 102
Attributes: Globalization Course (New GEP), International Relations Course, Latin American Studies Course, Undergraduate

ECN 375 Environmental Economics (3 credits)
Introduces the environmental concerns facing optimal allocation of resources and factors of environmental policy. Topics include environmental policy analysis, externalities, public goods, criteria for evaluating environmental policies, the role of economic analysis in environmental policy decisions, discussion of pollution control planning, and economic analysis of environmental policy in United States and International Environmental issues. Prerequisites: ECN101 or equivalent
Prerequisites: ECN 101
Attributes: Undergraduate

ECN 380 Managerial Economics (3 credits)
ECN 390 The Economics of Healthcare (3 credits)
This course examines major policy issues associated with the delivery of health care in the United States from an economic perspective. Particular emphasis will be placed on the challenges and trade-offs involved in containing health care costs, maintaining quality, and ensuring access. This course will provide students with a better understanding of the major health policy issues. Prerequisite: ECN 101.
Prerequisites: ECN 101
Attributes: Undergraduate

ECN 410 Econometrics (3 credits)
Basic principles of econometrics beginning with the classical linear regression model and the method of least squares. Special problems arising from the violation of classical assumptions, and statistical procedures for dealing with them, are covered. Identification and estimation problems are also studied, as well as forecasting with single-equation regression and simultaneous system of equations. Modern time-series models are evaluated, with numerous forecasting illustrations from economics and business. Prerequisite: ECN 101, ECN 102, Introductory Statistics (MAT 118) or equivalent. Note: Required for quantitative track.
Prerequisites: ECN 101 and ECN 102 and (MAT 118 or MAT 128 or DSS 210)
Attributes: Undergraduate

ECN 415 Economic Forecasting (3 credits)
This course provides an introduction to forecasting techniques used frequently in economics and business. Students will review basic statistical concepts and then explore data patterns that are commonly found in a variety of economic settings. Central approaches to analyzing time-series data are covered, such as moving averages, smoothing methods, single and multivariate regression, Box-Jenkins (ARIMA) methodology, and others. Prerequisite: ECN 101, ECN 102, Introductory statistics (MAT 118) or equivalent (ECN 410 or DSS 220 recommended). Note: counts towards the quantitative track.
ECN 420 Sports Economics (3 credits)

ECN 430 Modern Economic Systems (3 credits)
This course examines the nature of economic systems such as the market economy, the centrally planned economy and market socialism. It includes an assessment of how these systems have changed over time and compares the performance of each with respect to various economic indicators (such as GNP, employment, health care, etc.).

Prerequisites: ECN 101
Attributes: Globalization Course (New GEP), International Relations Course, Undergraduate

ECN 435 History of Economic Thought (3 credits)
The origin and development of the dominant ideas of modern economics investigated by study of a succession of major economists who shared in its making; the place of Economics in the history of ideas.

Prerequisites: ECN 101 or ECN 102
Attributes: European Studies Course, Undergraduate

ECN 440 U.S. Economic History (3 credits)
Economic principles are used in an informal manner to assist in the interpretation of the history of U.S. economic development from colonial times to the recent past. Sociocultural factors are also noted as they relate to U.S. economic history.

Attributes: International Relations Course, Undergraduate

ECN 445 Eco. of Multinatnl Enterprises (3 credits)
This course will examine theories of foreign direct investment, initial investment strategies and organizational structure of multinational companies and their impact on the economies of both the host and home countries. It will also include the study of U.S. and host country policies toward multinationals and the business problems of firms operating in a foreign environment. Prerequisite: ECN 101

Prerequisites: ECN 101
Attributes: International Relations Course, Undergraduate

ECN 450 Nationalism and Economy (3 credits)

ECN 455 The Economics of Transition (3 credits)

ECN 460 African Economies (3 credits)
Africa is a continent of contrasts. The poorest country in the world is in Africa and the world’s highest rate of economic growth is also found in an African country. In this course, we will assess the economic performance of contemporary African countries and then we will analyze the reasons for their differing growth patterns. In the process, we will study what is produced, how it is produced and for whom it is produced. Satisfies Social Science GER.

Prerequisites: ECN 101 or ECN 102
Attributes: Africana Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

ECN 465 Consumer Economics (3 credits)

ECN 470 Ethical Values & the Marketplace (3 credits)

ECN 475 Asian Economies (3 credits)
This course will encompass a theoretical and empirical approach to the study of the economies of Asia. First, the nature of the various economies will be assessed by the observation of some indicators of economic and social development. Then, theories will be explored that attempt to explain the differences in the economies and their growth patterns. This theoretical section will entail the study of international and indigenous characteristics of Asian countries. The aim of the course is to convey to students the changes in the world distribution of economic power and in the international division of labor as it involves the Asian countries, and the implications of these trends. Prerequisite: ECN 101

Prerequisites: ECN 101 or ECN 102
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

ECN 477 Chinese Economics (3 credits)
As the world becomes more integrated, countries become more interdependent. Economic events and policy changes in one country affect many other countries. The emergence of China, especially in international markets, is clearly one of the most important forces currently reshaping the world economy. Understanding China’s history, culture, economics, politics and society is imperative to help students participate in the ongoing dialogue among policymakers, economists, business firms, and international agencies. This course will cover both the historical and current aspects of the Chinese economy with a focus on the historical development of its socio-economic institutions, on its varying economic policies and strategies. In addition, this course would provide the student with opportunities to explore and apply economic theories and models to understanding the diverse processes of economic development in China.

Prerequisites: ECN 101
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

ECN 480 Eco. of Poverty & Income Dist (3 credits)
In this course, we study several facets of income distribution and inequality in the United States through the lens of economic theory. Initially, we discuss the basics of income and wealth distribution (definitions and measurements), and study the trends and patterns of income, wealth and well-being, followed by a similar discussion with respect to poverty. The second portion of the course focuses on causes and explanations of poverty and income inequality. This section relies heavily on the foundation of labor economic theory with discussion of labor force participation, unemployment and human capital. Finally, we focus on policies that may cause or alleviate poverty and income inequality – both current and proposed policy – followed with a discussion of societal goals. If time permits, we also cover labor market discrimination and wage gaps, specifically with respect to race/ethnicity. This course is an upper-division Economics elective that also meets the Faith-Justice course studies criteria. Pre-requisite: ECN 101 (Principles of Microeconomics) or equivalent.

Attributes: Undergraduate
ECN 482 Latin American Economies (3 credits)
ECN 485 Econ of Migration & Immigratin (3 credits)
In this course, population movements are analyzed from the economics perspective. With respect to voluntary migration, we study both the macro issues (namely, the economic consequences of the loss and gain of population, the effect of globalization on labor markets) as well as the micro issues (such as who migrates and why). We study the different kinds of migrations that occur and the conditions that cause them to predominate. In the study of involuntary migration, we focus on the economic pressures used to force relocation. We also study the options open to displaced peoples, including encampments, repatriation, integration and third country asylum. Finally, we ask what happens to the economies of host countries when they are inundated with foreign migrants. Given that at this time, the majority of the annual migrants go to just four host countries: United States, Germany, Canada, and Australia, it is imperative to understand the effect of migration on their economies and the concerns that underlie immigration policy. Satisfies Social Science GER.
Prerequisites: ECN 101 or ECN 102
Attributes: International Relations Course, Undergraduate

ECN 487 Research Methods (3 credits)
This course is an upper level economics elective that provides students with an introduction into research methods. We will discuss current research in applied microeconomics and apply the methods learned to create original research. Throughout the course we will investigate multiple facets of research including literature review, data analysis, and analytic writing. Throughout the course, students will be given verbal and written feedback about their analysis and writing. Throughout this course, there will be opportunities for reading about, writing about, and discussing current policies, problems, and events that are relevant to writing a comprehensive research paper. In order to gain the most from these discussions, students are required to take on an active role in these discussions. Prerequisites: ECN 101, ECN 410 or equivalents
Prerequisites: ECN 101 and ECN 410 and ENG 101
Attributes: Undergraduate, Writing Intensive Course- GEP

ECN 490 Seminar in Economics (3 credits)
The process of developing and executing a research project according to the standards of modern economic science is the subject of this seminar. Attention is also given to the use of the computer as a research tool.
Attributes: Undergraduate

ECN 491 Economics Internship (3 credits)
This course combines work experience with academic study. Students work in unpaid internships for the duration of the semester (some 10 hours per week) with approved employers in the private and public sectors (or non-governmental and non-profit organizations) in the Philadelphia area. Their work experience is complemented with relevant required readings. In addition, students must keep a journal, write a final report and meet regularly with their adviser. A successful academic internship is a three-way partnership between the student, the employer, and the faculty adviser.

ECN 493 Independent Research (3 credits)
Students will study a topic in economics with a faculty mentor. Prerequisite: Permission of the Instructor.
Attributes: Undergraduate

ECN 494 Independent Research (3 credits)
Taken in senior year under the direction of a thesis mentor.
Attributes: Undergraduate

ECN 2301. Economics of Sports (3 credits)

### Economics Major

#### Learning Goals and Objectives

**Goal 1:** Students will understand how all issues in economics involve making choices in the context of scarcity.

**Objective 1.1:** Students will be able to explain the concept of opportunity cost.

**Objective 1.2:** Students will understand the concept that decision-making takes place at the margin and explain how this affects the behavior of consumers and firms.

**Goal 2:** Students will understand how economic agents interact.

**Objective 2.1:** Students will be able to explain the supply and demand model and how it is applied to input and output markets as well as the macro economy.

**Goal 3:** Students will be able to identify important economic variables, understand how they are measured, and explain what they tell us.

**Objective 3.1:** Students will be able to define and know the approximate value of some key macroeconomic variables in the US, including GDP growth, inflation, unemployment, and interest rates. Furthermore, students will know how these variables are measured, how they affect us and understand the difference between “nominal” and “real” values.

**Goal 4:** Students will understand how public policy impacts the economy.

**Objective 4.1:** Students will be able to explain how fiscal and monetary policy work.

**Objective 4.2:** Students will be able to explain how markets sometimes “fail” and how public policy can address these problems.

### Requirements for the Economics Major

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

#### GEP University Distribution

#### General Education Signature Courses

See this page about Signature courses (p. 26). Six courses

#### General Education Variable Courses

See this page about Variable courses (p. 26). Six to Nine courses

2. Natural Science: A natural science course with a laboratory, or two courses without a laboratory
3. General Education Overlays
See this page about Overlays (p. 27).

4. Students can take any Math "Beauty" course to fulfill the requirement of the GEP. However, we recommend:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 131</td>
<td>Linear Methods</td>
<td>3</td>
</tr>
<tr>
<td>MAT 132</td>
<td>Math of Games &amp; Politics</td>
<td>3</td>
</tr>
<tr>
<td>MAT 134</td>
<td>Math of Uncertainty: Rules/Prob</td>
<td>3</td>
</tr>
<tr>
<td>MAT 155</td>
<td>Fundamentals of Calculus (Students who earn a 4 or 5 on the AB or BC Calculus)</td>
<td>3</td>
</tr>
<tr>
<td>MAT 161</td>
<td>Calculus I (Students who earn a 4 or 5 on the AB or BC Calculus AP test have fulfilled the Math Beauty requirement)</td>
<td>4</td>
</tr>
</tbody>
</table>

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

Economics majors must take one course from each of the following three categories

- **Any Statistics Course, including:**

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAT 118</td>
<td>Introduction to Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MAT 123</td>
<td>Differential Calculus</td>
<td>3</td>
</tr>
<tr>
<td>MAT 128</td>
<td>Applied Statistics</td>
<td>3</td>
</tr>
<tr>
<td>MAT 322</td>
<td>Mathematical Statistics</td>
<td>3</td>
</tr>
</tbody>
</table>

- **Note:** For students who have already taken Calculus I or who earned credit for AP math, no additional math courses are required for the economics major. For these students, the second ILC course may be satisfied with one of the following:

  - Any additional math course (this is in addition to the Beauty requirement and the statistics requirement). For students considering graduate school in economics, we highly recommend additional courses in Calculus or linear algebra.

Major Requirements

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

</tr>
</tbody>
</table>

Economics Majors: Select one of the following tracks:

- **Economics Track**
  - Any six additional ECN 300/400-level economics courses

- **Economics Track with Econometrics**
  - ECN 410 Econometrics
  - Any four additional ECN 300/400-level economics courses

- **Quantitative Economics Track**
  - ECN 410 Econometrics ³
  - Three quantitative economics courses ³

  ³ Three additional ECN 300/400-level economics courses approved for the quantitative track. This currently includes Game Theory (ECN 365), Economic Forecasting, (ECN 415) Monetary Economics (ECN 350), and International Macroeconomics (ECN 322). Student may choose to take Labor Economics (ECN 330) as a quantitative-track course, but this will involve additional coursework.

Requirements for Departmental Honors
Requirements for departmental honors are found under Honors Programs and in the brochure published annually by the Director of Honors programs.

Advisory Option—Teacher Certification in Social Studies
Economics majors may receive teacher certification in social studies by using their electives to take courses in education, including supervised teaching, as specified under Education. Candidates for certification should consult Dr. Keefe, coordinator, as early as possible.

Economics Minor

Learning Goals and Objectives

**Goal 1:** Students will understand how all issues in economics involve making choices in the context of scarcity.

**Objective 1.1:** Students will be able to explain the concept of opportunity cost.

**Objective 1.2:** Students will understand the concept that decision-making takes place at the margin and explain how this affects the behavior of consumers and firms.

**Goal 2:** Students will understand how economic agents interact.

**Objective 2.1:** Students will be able to explain the supply and demand model and how it is applied to input and output markets as well as the macro economy.

**Goal 3:** Students will be able to identify important economic variables, understand how they are measured, and explain what they tell us.
Objective 3.1: Students will be able to define and know the approximate value of some key macroeconomic variables in the US, including GDP growth, inflation, unemployment, and interest rates. Furthermore, students will know how these variables are measured, how they affect us and understand the difference between “nominal” and “real” values.

Goal 4: Students will understand how public policy impacts the economy.

Objective 4.1: Students will be able to explain how fiscal and monetary policy work.

Objective 4.2: Students will be able to explain how markets sometimes “fail” and how public policy can address these problems.

EDUCATION UNIT

Education Mission
Saint Joseph’s University Education Unit comprised of the Departments of Teacher Education, Special Education, and Educational Leadership, is dedicated to preparing exemplary teachers, educational leaders, and educational researchers. The Unit seeks to promote a vibrant intellectual community, recognized for preparing reflective teacher educators and leaders committed to social justice and democratic principles; acknowledged for quality undergraduate and graduate teaching, research, and scholarly contributions that enhance educational theory and practice in teacher education, educational leadership, special education, and related disciplines; known for leadership and other educational opportunities; and established as contributing outstanding professional service and outreach.

Teacher Education (Program Overview)
The undergraduate Teacher Education programs are built upon a strong liberal arts curriculum provided through the General Education Program (GEP) at Saint Joseph’s University. This enables students to integrate their understanding of interdisciplinary content with an understanding of child and adolescent learning.

Students balance theory and practice in teaching related courses. Most education courses provide students with the opportunity to investigate theory and research while participating in field experiences in local schools.

Undergraduate students are admitted to Saint Joseph’s University as Elementary, Middle or Secondary Education majors. Secondary education majors are considered double majors as they must also major in a content area (Art, English, Mathematics, Science, Social Studies or Modern Language). Students are also admitted as double majors in Elementary Education and Special Education. There is a separate admissions process to be admitted to a teacher preparation program which leads to a professional teaching certificate in Pennsylvania.

Under the Pennsylvania School Code and Saint Joseph’s University Policy, students may formally apply to a Teacher Preparation Program after they have completed at least 48 college credits with an acceptable GPA and they must meet the basic skills testing requirements. Students must be admitted to a Teacher Preparation Program in order to take any Professional Core education courses. Acceptable GPA is defined as a GPA that is making forward progress towards a final cumulative GPA required for state certification.

Prior to admission to a Teacher Preparation Program, education majors may only take foundational pre-professional education courses.

List of Approved PA Instructional I Teacher Preparation Programs
- Art Education PK-12
- Citizenship Education 7-12
- English 7-12
- Foreign Language PK-12 (Latin, French, Spanish, German or Italian)
- Grades 4-8 (Concentration in English/Language Arts, Mathematics, Science and/or Social Studies)
- Grades PK-4
- Mathematics 7-12
- Science-Biology 7-12
- Science-Chemistry 7-12
- Science-General Science 7-12
- Science-Physics 7-12
- Social Studies 7-12
- Special Education PK-8 or 7-12

Each of the courses in the different programs explores historical and current theories as well as complex issues relevant to the varied areas of study in education. Courses in professional pedagogy focus on elementary or secondary students in the regular classroom, as well as on students with special education needs. Issues of inclusion and least restrictive environment, the effect of socioeconomic background, the challenge for English language learners, and the impact of gender and race on the learning of students are explored in a variety of course offerings.

Field experiences strike a balance between urban and suburban schools, with their differing situations, needs, problems, and opportunities. The capstone course, Student Teaching, provides students with a semester-long opportunity to relate theory to practice with the support of a cooperating teacher, a University supervisor, and a faculty member who conducts the weekly seminar.

Education Programs
There are FOUR undergraduate Education Majors
1. Elementary Education: PK-4*
2. Middle Years Education: 4-8
3. Secondary Education: 7-12 (includes Foreign Language PK-12) and Art Education PK-12
4. Special Education PK-8 (Information listed below in the Special Education Department section).

*Note: Elementary PK-4 majors may add on Grades 5-6 via testing only. Contact your advisor for more information.

Teacher Certification Program
All inquiries regarding certification should be directed to:
Office of Certification, Accreditation and Partnerships
Director: Joseph K. Cifelli, Ed.D.
Admission Requirements for the SJU Teacher Certification Program

Applying to the SJU Teacher Certification Program

All Education and/or Special Education majors must apply to the SJU Teacher Certification Program to be eligible for PA Teacher Certification upon completion of their degree. The application process and admission requirements are explained below.

The application process for admission into the SJU Teacher Certification Program begins in October of the candidate’s sophomore year when meeting with his/her advisor about registration. The advisor will provide the student information regarding the application process. The candidate must complete the application and requirements for admission by January 31st of his/her sophomore year. Students will not receive their registration PIN for the following semester if this application has not been completed and submitted to their advisor.

Completed applications for admission into the SJU Teacher Certification Program will be reviewed by the Education Transition committee and submitted to the Teacher Education and Special Education Department Chairs, as appropriate. Students will be notified in regards to the acceptance decision.

Admission Requirements for the SJU Teacher Certification Program

- Must have completed a minimum of 45 credits by end of Fall semester sophomore year
- Must have completed ENG 101 and ENG 102
- Must have completed 6 mathematics credits
- Must have B- average (2.7) or better in all major courses taken
- Must have P in accompanying field experiences to all Education/Special Education courses taken
- Must have a minimum cumulative GPA of at least 3.0
- Must meet Basic Skills Testing Requirements i.e. Reading, Writing and Mathematics in any of the approved assessments. Candidates may combine results from the following different assessments:
  - Qualifying PAPA scores
  - Qualifying SAT scores
  - Qualifying ACT scores
  - Qualifying ETS Academic Core scores

Professional Testing Requirements

Current information on testing requirements in Pennsylvania may be located at:

http://www.education.pa.gov/Teachers%20-%20Administrators/Certifications/Pages/Certification-Testing.aspx#tab-1

NOTE: Candidates must request that all test scores are sent directly from the testing company to the PA Department of Education. This is free at the time of registration. Fees will be charged to have score reports sent after a test has been taken. PDE will only accept scores that have been received directly from the testing company. Neither the candidate nor Saint Joseph’s University may upload scores into a certification application. This does not apply to SAT and ACT scores. SJU will submit SAT and ACT scores to PDE after candidates present evidence of their scores to the Office of Certification and Compliance (Merion Hall Suite 220).

Special Education - Department Overview

Saint Joseph’s University Department of Special Education centers its philosophical and practical mission on attaining social justice and democracy through the education of reflective, activist-oriented teacher candidates and practicing teachers. Faculty members are committed to a disposition of academic rigor and professional integrity across our undergraduate, post-baccalaureate, and graduate programs. This commitment is informed by the ideals of fairness, equity, and individuality. We strive to challenge routine societal structures and mindsets in order to promote vibrant learning environments among faculty and students that focus on character education, reflective inquiry-based teaching, and cultural/individual fairness and diversity. Central to our mission, is the delivery of a quality teacher preparation program that encourages future educators to adopt pedagogical practices that recognize the inherent strengths that all children bring to school.

The Special Education Department is focused on helping teachers respect the knowledge traditions of students from non-dominant cultural communities as these students have been historically excluded from educational curricula. Such practices provide a framework that incorporates all aspects of learning, cognitive, linguistic, social-emotional, and cultural variables. This includes recognizing students “funds of knowledge” and the diversity of cultural capital that exists in all homes and communities. Department faculty strive to support future teachers’ adoption of practices that celebrate the unique personality traits, talents and learning differences of individual learners. This will prepare future
teachers to help their students become resilient to unwanted peer pressure and bullying, and who actively challenge these and other negative influences.

Consistent with the mission of Saint Joseph’s University, we strive to create teachers who are broadly educated in the liberal arts and who consistently enhance their knowledge of various content areas to inform instruction. We embrace the goal of interdisciplinary teaching that requires teachers to make visible the connections between content areas. Future teachers must also be prepared for the technologies of the 21st Century. We are committed to providing students with the technological capacity that will help them teach in ways that enhance student knowledge and engagement.

The Department of Special Education is committed to creating teacher researchers who systematically study aspects of learning and teaching within their schools in order to inform their own instructional practice and contribute to the theoretical and practical knowledge base in education. The notion of teacher-as-researcher is central to building relationships between theory and practice. We also strive to create teacher activists who assume leadership positions within their schools and are committed to challenging practices and policies that undermine students’ achievement.

Consistent with The Magis it is our hope that our teacher candidates will strive to continue to grow throughout their experiences in and beyond the classroom and embrace the true meaning of Cura Personalis: To improve oneself in order to better serve others.

Graduate Arts and Sciences

John Vacca, Ph.D., Associate Dean of Education

Degrees and Certificates

Graduate students may elect to pursue a Masters or Doctorate degree in Education only, a professional Instructional I, Administrative I, Supervisory I, Program Specialist Certificate, or Letter of Eligibility (Superintendent) only, or a both degree and one or more certificates. Degrees are governed and conferred by Saint Joseph’s University per the policies and procedures contained in this catalog. Professional Certificates are issued by the Pennsylvania Department of Education and are subject to legislative and regulatory changes. Students are responsible to meet the state requirements in place at the time of their application for a given certificate. Pennsylvania is a member of NASDTEC (National Association of State Directors of Teacher Education and Certification). The NASDTEC Interstate Agreement facilitates the movement of educators among the states and other jurisdictions that are members of NASDTEC and have signed the agreement. As agreements vary from state to state and regulations are subject to change, Saint Joseph’s University cannot guarantee the reciprocity of a given certificate outside of Pennsylvania.

The Education Departments offer Master’s degree programs designed to meet the interests and needs of pre-service and in-service PK-12 educators.

The following programs are available in certification areas approved by the Pennsylvania State Department of Education: secondary school (grades 7-12) areas of General Science, Biology, Chemistry, Physics, Mathematics, Citizenship Education, English, German (PK–12), Italian (PK–12), Latin (PK–12), French (PK–12), and Spanish (PK–12). Initial certification programs are also available in Early Childhood Education (PK-4) and Elementary/Middle (4-8). Initial certification in Special Education as an additional certification is available at the post baccalaureate level for only those students who already hold a teaching certification at either the early childhood, elementary, or secondary levels. The certifications for those applying for Special Education certification are PK-8, 7-12, and Hearing Impaired PK-12.

The Departments also have programs leading to certification in the areas of curriculum supervision and principal certification at the elementary and secondary levels, as well as Instructional Technology Specialist and Superintendent’s Letter of Eligibility. Specialization programs are also available in other areas of professional education. Professional programs lead to certification in the Commonwealth of Pennsylvania, and students interested in out-of-state licensing are encouraged to seek the advice of the Department of Education of the state to which they are applying for certification.

The teacher education, special education, and educational leadership certification programs seek to increase students’ awareness of the function of schools in a contemporary, pluralist society, as well as to develop the concept of teaching as a career of vital service. The programs are intended to develop and refine competencies in prospective teachers so that they will be able to meet the demands of teaching in a variety of school environments, public and private, urban and suburban. Each of the courses in the programs, in its own way, explores historical and current theories, as well as problematic issues relevant to the varied areas of study in education. Each course in professional pedagogy focuses on students in the regular classroom, as well as on students with exceptional educational needs. Issues of the least restrictive environment, the effect of socioeconomic background, and the impact of gender, race, and class on the learning of students are explored in a variety of course offerings. Complementary field experiences/observations are included as part of appropriate courses, which strike a balance between urban and suburban schools, with their differing situations, needs, problems and opportunities.

The Departments also offer certification programs in education that do not lead towards the Master’s degree. Students interested in any of the certification areas listed above, but not interested in a formal advanced degree, should consider the Post-Baccalaureate Certification Program described below. Admission to this program is based on the standards for admission to the Master’s degree programs listed in this Catalog.

Scheduling is tailored to part-time students. Courses are offered in the late afternoon and evening, and selected courses are available during summer sessions. Students are required to speak with their advisors on a continuing basis so that they might plan their sequence of courses with care.

The Education Unit currently offers certification programs that can be completed online (with on-location field experiences):

• Secondary Education (OATCERT),
• Special Education (PK-8, 7-12),
• Education of the Deaf and Hard of Hearing (PK-12), and
• Instructional Technology Specialist.

A Curriculum Center is maintained in Drexel Library for the use of all interested students. Instructional materials representing a wide variety of grade levels and subject areas are available for student use. Microcomputers and appropriate software for courses taught within the Department are available in the Barbelin computer lab and in the Drexel Library. A number of courses in the Instructional Technology Studies
Admission Requirements and Procedures

Applicants should submit or have sent to the Office of Graduate Operations the following:

- A completed Saint Joseph’s University graduate application.
- Official sealed transcript(s) of undergraduate/graduate coursework. If you are a SJU graduate, the Office of Graduate Operations will obtain your SJU transcripts for you.
- A current resume
- Two letters of recommendation (at least one from a college professor) appraising the candidate’s promise and capacity for graduate study, reflecting, from a professional’s point of view, the candidate’s ability to pursue a rigorous, independent course of study at the graduate level.
- A personal statement outlining the candidate’s professional goals and educational objectives for the program, including the applicant’s rationale for program choice and professional study.
- $35 application fee – waived if applicant attended an Open House or applicant is an SJU graduate.
- Students applying for supervisory or principal certification should be aware of the specific application requirements for these programs stated in the Educational Leadership Program section.
- Students must have achieved a 3.0 Grade Point Average (GPA) in their undergraduate work for full admission. Candidates with a GPA below 3.0 may be considered for a provisional acceptance.
- First certification applicants must also have taken two English courses and two math courses in their previous coursework in higher education.
- For PK-4 (ECE) certification applicants, a U.S. History course, a general history course, a social science course, and a natural science course are additional requirements.
- K-12, 4-8 and 7-12 teacher candidates must meet all content prerequisites prescribed by their certification area.

Financial aid is available to graduate students in the form of student loans. A limited number of graduate assistantships are also available. Applications for these positions are accepted each spring for the coming academic year. For more information, contact the departmental administrative assistant at 610-660-1583.

Course Load

All courses must be completed at the 500 level or above. A full-time course load is three courses (9 credits) per term for fall and spring semesters and four courses (12 credits) for the summer term. Working professionals generally do not register for more than two courses (6 credits) for the fall and spring terms, and they may not register for more than two courses (6 credits) for each summer term.

The Director of Graduate Education must approve any exceptions to this policy. Students requesting full time status should submit a letter in writing to the Director of Graduate Education stating that they are working less than 20 hours per week during the semester(s) for which full-time status is being requested.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification. Those students taking a leave of absence for more than one semester may be required to meet new certification standards should the Pennsylvania Department of Education adopt new standards during the interim.

Criteria for certification are demonstrated by professional behavior in the classroom and in field placements. Students who do not meet the high standards of professionalism established by the Department will not be recommended for certification to the Pennsylvania Department of Education.

The contact information for Graduate Admissions is as follows:

Graduate Operations Office
Saint Joseph’s University
5600 City Avenue
Philadelphia, PA 19131
Telephone: 610.660.1101
Fax: 610.660.1224
http://www.sju.edu/admissions/graduate/

Financial aid is available to graduate students in the form of student loans. A limited number of graduate assistantships are also available. Applications for these positions are accepted each spring for the coming academic year. For more information, contact the departmental administrative assistant at 610-660-1583.

Terms of Acceptance

An applicant is afforded full acceptance when all admission criteria have been met and all required application materials have been submitted.

“Provisional acceptance” is provided if an application is complete, but academic credentials have not been satisfied. In this case an applicant is allowed to register for 9-12 credits. A student who is provisionally accepted must achieve grades of B or higher in their initial 3-4 graduate courses in order to be fully accepted into the master’s program and to continue taking courses. A registration hold is activated if a student’s
admission status is not updated to full admission (via the Registrar’s office) after taking his or her first 9-12 credits (3-4 courses).

Applicants whose application package is incomplete may receive "conditional acceptance," and permitted to register for up to 6 credits in the first semester. Typically, at least an application form and unofficial transcript have been received. A registration hold is activated after the initial semester if the file is not complete and admission status is not updated to full admission (via the Registrar’s office).

Applications that do not meet at least provisional academic requirements are generally not accepted.

Transfer of Courses
Applicants who have taken graduate courses elsewhere may request transfer of not more than six graduate credits in Arts and Sciences programs. Such requests must be filed at the time of application for admission. Only those courses which are judged to meet program requirements and in which a student has received a grade of B or higher will be accepted. In no instance will courses taken more than five years ago be accepted for transfer credit. Continuing Education units are not accepted for transfer credit. However, (American Council on Education) ACE approved courses are eligible for transfer.

Certification Requirements
Students seeking certification in a secondary subject area (7-12) must provide evidence of an undergraduate major in their specialty area or obtain approval from the Director of Graduate Education to complete appropriate additional coursework. Early advising in the program is necessary. Students seeking certification in PK-4, 4-8, 7-12, special education, Hearing Impaired k-12, or reading specialists should discuss their plans of study with an advisor at the time of admission. No student with a cumulative graduate GPA of less than 3.0 upon completion of the program will be certified in any area. In addition, candidates for secondary certification are expected to have a minimum GPA of 3.0 in their subject matter area; those who do not may be required to take additional coursework in the pertinent content area or to complete necessary Praxis II exams prior to student teaching. All students must also have passed all required Praxis tests for their area in order to be certified.

Note: Formerly, first certification graduate students were required to have successfully completed the PPST (basic skills) Praxis tests prior to the application for student teaching. However, Act 24 of 2011 removed the requirement for Basic Skills Tests for fully admitted GRADUATE students. This provision only applies to candidates seeking an Instructional Certificate. There are noted exceptions to this provision.

Several of the programs offered by the Graduate faculty in Education can lead to certification and the Master’s degree. There are selected programs, however, that lead to certification only or to the Master’s Degree without certification. Students are advised to discuss their educational plans before and after the admissions process with the Graduate Education Advisor by calling 610-660-3364 or by email to graduate_education@sju.edu.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification.

Criteria for certification is demonstrated by professional behavior in the classroom and in field placements. Students who do not meet the high standards of professionalism established by the Department and delineated in the Student Handbook will not be recommended for certification to the Pennsylvania Department of Education.

Field Experiences (Labs)
Field Experiences (FE) accompany most graduate courses; courses with field experiences are designated by a FE co-requisite (e.g.: EDU 550/EDU 550F). If the student is already teaching, these labs may be completed in his or her own school; if not, the Director of Field Experiences will place the student in an appropriate school. Assignments for the labs are given by the instructor of the course they accompany. Students taking the labs in the summer and unable to complete them in a school at that time will be given an "In Progress" grade until they are able to complete them in the following fall semester. The classroom teacher hosting the field experience student must sign off on a record of attendance.

Test/licensure Requirements
The Commonwealth of Pennsylvania requires employees working in schools to obtain both a criminal (Act 34) and child abuse (Act 151) background check, as well as a negative TB test. Students conducting a field experience placement must also have these clearances prior to beginning their field placement. The clearances are good for one calendar year. Students conducting a field experience also need to provide their FBI Criminal History Record Check before entering the schools.

Student Teaching
Students must apply to the Director of Field Experiences nine months prior to actual enrollment in Student Teaching. Students must demonstrate a 3.0 cumulative grade point average to participate in this program. All students will be expected to demonstrate completion of all prerequisite courses and pass all appropriate Praxis tests.

Middle school (4-8) and secondary (7-12) certification candidates must have a 3.0 GPA for all courses related to their content field. Effective June 1, 2015, all Secondary (7-12) certification candidates are required to complete the appropriate Praxis tests PRIOR TO APPLYING for student teaching.

Advising
For inquiries about any graduate education program, prospective students are encouraged to contact the Graduate Director of Teacher Education Director at 610-660-3285 or graduate_education@sju.edu. All students accepted into the program are required to meet with the Graduate Director of Teacher Education before they register for courses to review the student’s transcripts and to determine whether there is a need for additional courses at the undergraduate level.

Department of Teacher Education

Master of Science in Education with Level I Certification
The M.S. in Education leading to Level I certification is designed for students who have an undergraduate degree in a discipline other
than Education. Candidates’ undergraduate coursework must be in conformity with the guidelines established for Saint Joseph’s certification programs. Students lacking adequate preparation will be required to take prerequisite coursework in appropriate disciplines. The M.S. degree requires 36 credits of coursework (12 courses); this does NOT include the special one-credit field labs associated with specific courses. Requirements for PDE Level 1 certification vary according to the specific certification being earned (see “List of Courses” under each certification area below). Students enrolled in the Teacher Education Program may be certified to teach the following areas and grade levels:

- Early Childhood Education (PK to 4)
- Elementary/Middle (4 to 8)
  - Option 1 Concentrations: (1A) Language Arts, (1B) Mathematics, (1C) Science, (1D) Social Studies
  - Option 2 Concentrations: (2A) Language Arts and Science, (2B) Language Arts and Math, (2C) Science and Math (2D0 Social Studies and Math, (2D0 Social Studies and Science
- Secondary Education (7 to 12)
  - Sciences: General Science, Chemistry, Biology, Physics
  - Mathematics
  - Citizenship Education
  - English
- Foreign Languages (K to 12): French, Latin, German, Spanish, Italian

Important Note: effective August 15, 2015, ACT 168 states that graduate certification candidates may only apply undergraduate education courses to Level 1 certification requirements if they have satisfied the PDE Basic Skills Requirement. For more information, visit http://www.education.pa.gov/Documents/Teachers-Administrators/Certification Preparation Programs/Framework Guidelines and Rubrics/Entry into Certification Programs Guidelines.pdf

**Department of Special Education**

**Virginia G. Johnson, Chair**

**Special Education Department**

Merion Hall 212

vjohnson@sju.edu

**Dr. Samuel B. Slike**

**Director of Online Graduate Programs**

Merion Hall 217
610-660-3007

sslike@sju.edu

The Special Education Department offers several certification options. Details regarding each Special Education certification can be found online under Majors and Programs.

The Master’s in Education degree program is designed for students who already have an undergraduate degree and a valid Pennsylvania Instructional I certification or are working towards a Pennsylvania Instructional PK-8 or 7-12 certification.

This graduate program provides the student with extensive preparation for working students with special needs in the classroom. The program has a dual focus, the preparation of special education teachers and the development of master teachers remaining in the regular education classroom. The required courses are determined during the initial advising conference. Students are required to complete at least 36 graduate credit hours.

**Teacher Intern Program**

Joe Cifelli, Ph.D.
jcifelli@sju.edu

The Teacher Intern program is a non-degree granting certification program for persons interested in elementary and secondary school certification. Upon admission into the program, successful completion of the required Praxis examinations and completion of any needed courses, students will be eligible for Intern certification (a three-year provisional certificate). Candidates for the Intern certificate must apply through Dr. Joseph Cifelli, Director of Certification.

Saint Joseph’s University does not make intern or graduate field placements for intern candidates.

**Department of Educational Leadership**

A. William Place, Ph.D., Chair

**Department of Educational Leadership**

Merion Hall 281
610-660-2913

aplace@sju.edu

**Department Overview**

The Department of Educational Leadership offers programs at the graduate and post-graduate levels only. The Department of Educational Leadership houses graduate programs and certifications in the following areas:

- Educational Leadership
- Instructional Technology
- Interdisciplinary Doctor of Education Program for Educational Leaders (IDEPEL)

The Educational Leadership Department is committed to developing and educating aspiring and current leaders. The Educational Leadership Department serves local, national and international students, school and organizations through Doctoral programs, Masters of Science programs, Certifications, Graduate Teacher and Administrative Certificates (post-graduate program), Professional Development and other customized programs.

**Admission Requirements and Procedures**

The Master of Science degree includes a Master of Science with a concentration in Educational Leadership geared towards school leaders, specifically Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents. For students with a previous M.S. degree, Graduate Teacher and Administrative Certificates (post-graduate program) certification programs are offered in each of those same fields (Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents).

The Master of Science degree with a concentration in Educational Leadership is a 36-credit professional degree that may also lead toward certification as a school supervisor (of curriculum and instruction in one’s certification area, including special education) or principal. Prior acceptance in the program, an informal phone interview is required. Students are advised to contact the Director of Educational Leadership
graduate programs for all advising needs – including academic progress and compliance for certification – on a semester basis.

Students must be formally admitted to the Educational Leadership program for certification eligibility. Five years of teaching experience (minimum three by the time of acceptance in the program) or experience related to the instructional process is preferred. A valid teaching certification or a chief school administrator’s verification of the completion of three years of relevant professional experience in an educational setting related to the instruction process must be included in the application materials. Students not seeking a certification and only seeking a Master’s with a concentration in Educational Leadership do not need a valid teaching certification and/or five years of full-time teaching experience.

Since Spring 2012, this program is offered online, as well as face-to-face. The curriculum and program requirements are the same for all online and face-to-face students.

In order to be eligible for programs leading to certification within the Educational Leadership combination offerings, applicants must be U.S. citizens or legal permanent residents. Application requirements are as follows:

• A completed Saint Joseph’s University graduate application.
• Official sealed transcript(s) of undergraduate/graduate coursework.
  • Grade Point Average (GPA) in undergraduate work.
• Personal statement – a 500 word statement of intention outlining how the applicant’s professional goals fit the stated goals and objectives of the Educational Leadership graduate programs.
• Two letters of recommendations.
• Copy of a valid teaching certificate.
• Five years full-time teaching experience (minimum three by the time of acceptance in the program preferred)
• An informal phone interview with the Graduate Programs Director.
• $35 application fee.

Additional application requirements for the Principal Certification Program include the following portfolio items:

Two letters of recommendations from school district administrators; one of which must be from the applicant’s supervising administrator. Both letters must substantiate the candidate’s leadership potential and qualifications to become a school administrator.

Portfolio items:

• Essay concerning how principals shape learning in their schools (500 words)
• Resume that includes evidence of leadership potential (other leadership roles)
• Applicant’s educational philosophy
• A written description of a problem based learning activity

In addition, a Superintendent Letter of Eligibility is offered and all Pennsylvania Department of Education prerequisites must be met for admission.

Application Requirements for the Superintendent Letter of Eligibility Program are as follows:

• A completed Saint Joseph’s University graduate application.
• Master’s degree.
• Official sealed transcript(s) of undergraduate/graduate coursework.
• Grade Point Average (GPA) in graduate work.
• Two letters of recommendations from school district administrators; one of which must be from the applicant’s supervising administrator. Both letters must substantiate the applicant’s leadership potential and qualifications to become an assistant/superintendent of schools
• Copy of principal or supervisory certificate.
• Six years of satisfactory professional certificated service of which three of the six years must have been in a certificated supervisory or administrative capacity.

Finally, professional development is offered via the Digital Teacher Professional Development Program. The Digital Teacher Professional Development consists of five courses that are designed to prepare classroom teachers for the successful and seamless integration of technology using the school district’s curriculum.

Course Load

All courses must be completed at the 500 level or above. A full-time course load is three courses (9 credits) per term for fall and spring semesters, and four courses (12 credits) for the summer term. Working professionals may not register for more than two courses (6 credits) for the fall and spring terms and two courses (6 credits) for each summer term. Course load may be further discussed with the academic advisor on a one-on-one basis.

Any exceptions to this policy must be approved by the Graduate Programs Director or the academic advisor. Students requesting full time status should submit a letter in writing to the Director of Graduate Education stating that they are working less than 20 hours per week during the semester(s) for which full-time status is being requested.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification.

Criteria for certification are demonstrated by professional behavior in the classroom and in fieldwork. Students who do not meet the high standards of professionalism established by the Pennsylvania Department of Education risk being dismissed from the fieldwork or the program.

Contact information for Graduate Admissions is as follows:

Graduate Operations Office
Saint Joseph’s University
5600 City Avenue
Philadelphia, PA 19131
Telephone: 610.660.1101
Fax: 610.660.1224
http://www.sju.edu/admissions/graduate/

Domestic students (U.S. Citizens, Permanent Residents, Refugees & Asylees) must complete and submit the Application Form, along with all credentials, application documents, and the required $35 USD application fee directly to the Graduate Operations Office. For applications submitted as a result of attendance at an Open House information session, the application fee is waived.

Applicants for admission must possess a Bachelor’s degree from a regionally accredited institution and must provide evidence of their ability
and preparedness necessary for the satisfactory completion of graduate work. Specific requirements differ among the programs, and students are advised to consult the appropriate program requirements listed in each program section.

Domestic students who have received degrees from outside the U.S. should review our International Admissions section for information on required documentation. All documents submitted in support of an application will become the property of the University and are not returnable.

Terms of Acceptance
An applicant is afforded “full acceptance” when all admission criteria have been met and all required application materials have been submitted, reviewed and approved.

“Provisional acceptance” may be provided if an application is complete, but academic credentials have not been satisfied. In this case an applicant is allowed a trial semester of up to 9 credits. Candidates must receive a grade of B or better during all courses taken during the trial semester.

Applicants whose application package is incomplete may receive "conditional acceptance," and permitted to register for up to 6 credits in the first semester. To be granted "conditional" status, an application must at least include and application form and unofficial transcript.

Applications that do not meet at least provisional academic requirements are generally not accepted.

Transfer of Courses
Applicants who have taken graduate courses elsewhere may request transfer of not more than six graduate credits in Arts and Sciences programs. Such requests must be filed at the time of application for admission. Only those courses which are judged to meet program requirements and in which a student has received a grade of B or better will be accepted. In no instance will courses taken more than five years ago be accepted for transfer credit. Under no conditions will Continuing Education courses be accepted for transfer credit. However, Alliance for Catholic Education (ACE) approved courses are eligible for transfer.

Fieldwork Requirement
Effective Fall 2015, the three two-credits fieldwork courses (EDL 695, EDL 696, EDL 697) current in 2014-2015 were transitioned into two three-credits fieldwork courses (EDL 695 and EDL 696).

**Adult Undergraduate**

- Early Childhood/Elementary Education Pre-kindergarten-4th grade (p. 204)

**Teacher Education**

**EDU 121 Child Development (3 credits)**

This course examines the physical, intellectual, emotional, and social development of the child from birth through the childhood years (0-12), including the study of how children learn and acquire knowledge. Special attention will be given to leading theories of development and their implications in the early childhood and elementary classrooms as well as critiques of these theories.

**EDU 140 Publ Schls & Soc Eq in Urb Env (3 credits)**

This course explores the controversies that the current education reform has created in urban school districts such as the School District of Philadelphia. Particular attention is given to the debate over school funding and the role that charter schools play in this debate. To understand the complexity of this issue, the course will introduce students to some of the main changes experienced by the School District of Philadelphia in recent times and will address how charter schools came to be regarded as "the" solution for public education in this City. Because this course also aims at providing students with an introduction to the process of research and to familiarize them with the conventions of different ways of writing, students will be required to conduct library-based research and to present their conclusions in different academic formats.

**Restrictions:** Enrollment is limited to PLS/HDC level students.

**Attributes:** Adult Learning Seminar

**EDU 150 Schools in Society-Fr Seminar (3 credits)**

The course studies American education structurally. The origins, evolution, and realities of contemporary public and private schools are examined through critical readings. Visits to elementary classrooms in multicultural settings provide a strong link to the teacher’s world and the course content. Satisfies Freshman Seminar GEP requirement.

**Attributes:** Diversity Course (New GEP), First-Year Seminar, Undergraduate

**EDU 150F FE Schools in Soc (preK-4/4-8) (0 credits)**

The course studies American education structurally. The origins, evolution, and realities of contemporary public and private schools are examined through critical readings. Visits to elementary classrooms in multicultural settings provide a strong link to the teacher’s world and the course content. Satisfies Freshman Seminar GEP requirement.
EDU 151 Develop, Cognition, & Learning (3 credits)
This course provides students with the opportunity to apply theories of human development to teaching practices. Special attention is directed towards intrinsic and extrinsic motivation, social dynamics in the classroom, tests and measurements, and various instruction models. Enrollment in Field Experience is required with this course. Satisfies a Social/Behavioral Science GEP requirement.
Prerequisites: ENG 101
Attributes: Undergraduate, Writing Intensive Course- GEP

EDU 151F FE Devel, Cognition & Learning (0 credits)
This course provides students with the opportunity to apply theories of human development to teaching practices. Special attention is directed towards intrinsic and extrinsic motivation, social dynamics in the classroom, tests and measurements, and various instruction models. Enrollment in Field Experience is required with this course. Satisfies a Social/Behavioral Science GEP requirement.
Attributes: Undergraduate

EDU 152 FE Schools in Soc (preK-4/4-8) (1 credit)
EDU 153 FE Devel, Cognition & Learning (1 credit)
EDU 154 Teach Holocaust through Film (3 credits)
EDU 155 Foundations of Early Childhood (3 credits)
This course is designed as an introduction to the essentials of early childhood education. Topics to be covered include: recognizing the unique roles played by early care and education providers teaching young children; understanding cognitive, social-emotional, adaptive and motor development in childhood; assessing and planning a developmentally appropriate and standards-based curriculum; providing an inclusive learning environment; and communicating effectively with families and caregivers. Special attention will be given to contemporary models of Early Childhood Education in school and other early childhood settings and the unique needs of early learners, including English Language Learners and students with special needs. Prerequisites: EDU 121
Prerequisites: EDU 121
Attributes: Undergraduate

EDU 155F FE Found Early Child (preK-4) (0 credits)
This course is designed as an introduction to the essentials of early childhood education. Topics to be covered include: recognizing the unique roles played by early care and education providers teaching young children; understanding cognitive, social-emotional, adaptive and motor development in childhood; assessing and planning a developmentally appropriate and standards-based curriculum; providing an inclusive learning environment; and communicating effectively with families and caregivers. Special attention will be given to contemporary models of Early Childhood Education in school and other early childhood settings and the unique needs of early learners, including English Language Learners and students with special needs. Prerequisites: EDU 121
Attributes: Undergraduate

EDU 156 FE Found Early Child (preK-4) (1 credit)
EDU 157 Adolescent Development (3 credits)
The course addresses the dynamic complexities of adolescent development, through discussion of classic and emerging theories. The text readings and class assignments make use of research-based, real-world, and cross-cultural examples. The primary aim of the course is to foster the students ability to recognize and apply the connections among developmental domains and of theory and research with application as applied to the ever changing field of human development. The course takes a longer age range approach to adolescence by expanding coverage into the early twenties and giving attention to changes and continuities in development that take place during this period of "emerging adulthood."
Attributes: Undergraduate

Attributes: Undergraduate

EDU 161 FE Schools in Soc(preK-4/4-8) (1 credit)
EDU 230 Early Literacy and Numeracy (3 credits)
EDU 231 Assessment and Evaluation (3 credits)
Assessment and Evaluation in Education is designed to provide education majors with an in-depth understanding of the different types of assessment strategies, and how to use multiple assessment data for a wide range of educational decisions. Content coverage will include an overview of assessment models using authentic, diagnostic, dynamic, formative, and summative assessment techniques. In addition, course topic will include an examination of technical qualities of assessment tools, different types of educational decisions, current assessment legislation and regulation, and test modifications/accommodation.
Attributes: Undergraduate
EDU 231F FE: Assessment & Eval PK 4-4-8 (0 credits)
EDU 232 Reading Literature I (3 credits)
This course provides students with the opportunity to investigate the various theoretical models of the reading process. Students investigate the various factors which impact upon successful reading performance. Students begin to investigate the use of literature, specifically fiction, nonfiction, poetry, picture books, and fantasy selections in the development of instructional practices in the primary grades. Included in this course is an investigation of the use of Basals as literature. In addition, students study the use of reading strategies to be used for teaching reading in the content areas. Prerequisite: EDU 150, EDU 151. Prerequisites: EDU 151
Restrictions: Enrollment is limited to students with a major in Elem Special Education, Elementary Education or Elementary Educ Pre K -4th Gr.
Attributes: Undergraduate

EDU 232F FE Reading/Literature I (0 credits)
This course provides students with the opportunity to investigate the various theoretical models of the reading process. Included in this course is an investigation of multicultural literature and the writing process. Prerequisite: EDU 232 and acceptance into the Teacher Education Program. Attributes: Undergraduate

EDU 241 Social Motor Development (3 credits)
This course examines the role of cognitive and psychomotor influences on young children's social development. Topics studied include: purposes of play and play behavior; motor development and the goals of physical development programs; and behavioral structures that promote prosocial competencies. Special attention will also be directed towards the use of art, music, and movement as central tools to support learning and development. Restrictions: Enrollment is limited to students with a major in Elementary Educ Pre K -4th Gr.
Attributes: Undergraduate

EDU 242 Tech Enhncd Curr & Instrs PK-8 (3 credits)
This course provides multiple approaches to the critical linked processes of assessment, curriculum development, and instruction of young children. National Association for the Education of Young Children (NAEYC) standards as well as state and federal early learning standards, and guidelines for personnel preparation in early childhood education will be used to structure early learner curriculum and developmentally appropriate programs. Topics of study include: planning and preparation; implementing thematic units and child-centered studies using appropriate curricular materials, scope and sequence; and resources and strategies for student-centered assessments which address academic, cultural and linguistic differences. Prerequisites: EDU 150, EDU 151. Restrictions: Enrollment is limited to students with a major in Elementary Educ Pre K -4th Gr.
Attributes: Undergraduate

EDU 357 Edu and Jesuit Missn in Lat Am (3 credits)
This course takes students into the reality of schools in Latin America where poverty, ethnic marginalization and political disenfranchisement define the lives of most communities. The course focuses on the Jesuit ethic in Latin America and highlights the tradition of the theology of liberation which understands the school as a forum for advocacy, social empowerment, and personal spirituality. Latin American Studies.
Attributes: Undergraduate

EDU 360 Science Methods ECE (3 credits)
EDU 361 Math and Technology ECE (3 credits)
EDU 362 Social Studies Thru Arts PK-4 (3 credits)
The purpose of this course is to connect theory and practice in the teaching of elementary school social studies through the visual and performing arts. Strategies for planning, implementing, and evaluating social studies instruction are designed with a focus on preparing children to be critical thinkers and young citizens in a global, technological and culturally diverse world. Prerequisite: EDU 151 and acceptance into the Teacher Education Program.
Restrictions: Enrollment is limited to students with a major in Elementary Educ 4th - 8th Gr
Attributes: Undergraduate

EDU 362F FE: Soc Studies Thru Arts PK-4 (0 credits)
The purpose of this course is to connect theory and practice in the teaching of elementary school social studies through the visual and performing arts. Strategies for planning, implementing, and evaluating social studies instruction are designed with a focus on preparing children to be critical thinkers and young citizens in a global, technological and culturally diverse world. Prerequisite: EDU 151 and acceptance into the Teacher Education Program.
Restrictions: Enrollment is limited to students with a major in Elementary Educ Pre K-4th Gr.
Attributes: Undergraduate

EDU 363 Science Methods PK-4 (3 credits)
This course is designed to provide students with the opportunity to investigate teaching modalities relevant to elementary school science. Emphasis is placed upon the philosophy, curriculum planning and organization, skill development, instrumental methodology, and classroom resources for the natural sciences. Prerequisite: EDU 151 and acceptance into the Teacher Education Program.
Restrictions: Enrollment is limited to students with a major in Elementary Educ Pre K-4th Gr.
Attributes: Undergraduate
EDU 363F FE: Science Methods PK-4 (0 credits)
This course is designed to provide students with the opportunity to investigate teaching modalities relevant to elementary school science. Emphasis is placed upon the philosophy, curriculum planning and organization, skill development, instrumental methodology, and classroom resources for the natural sciences. Prerequisite: EDU 151 and acceptance into the Teacher Education Program.

EDU 365 Math & Technology (PreK-4) (3 credits)
This course provides an overview of the development of mathematics as a part of the elementary school curriculum. Emphasis will be placed upon current research and the development of techniques useful in the presentation of mathematical concepts. Included in this course is a thorough investigation into the Standards and of the National Council of Teachers of Mathematics and examination of gender bias in the mathematics classroom. Prerequisite: EDU 151 and acceptance into the Teacher Education Program.

Restrictions: Enrollment is limited to students with a major in Elementary Educ Pre K-4th Gr.
Attributes: Field Experience, Undergraduate

EDU 365F FE Math & Technology (PreK-4) (0 credits)

EDU 393 Science in the Elem School (3 credits)
EDU 410 Instructional Tech -English (3 credits)
A course designed to introduce pre-service and in-service secondary school teachers of English to instructional processes, strategies, materials, assessment practices and classroom management theory that will be of practical value in the classroom. Students will be placed in a secondary classroom where they will study issues related to teaching pedagogy. Emphasis is on lesson planning that utilizes questioning and discovery strategies, inductive and deductive teaching skills, process writing procedures and traditional grammar, plus oral English skills as demonstrated on a video-taped mini lesson. Prerequisites: EDU 150, EDU 157, and SPE 160 and acceptance into the Teacher Education Program.

Prerequisites: EDU 157
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Elementary Educ 4th - 8th Gr or Secondary Education.
Attributes: Undergraduate

EDU 410F FE: Instru Tech for English (0 credits)
A course designed to introduce pre-service and in-service secondary school teachers of English to instructional processes, strategies, materials, assessment practices and classroom management theory that will be of practical value in the classroom. Students will be placed in a secondary classroom where they will study issues related to teaching pedagogy. Emphasis is on lesson planning that utilizes questioning and discovery strategies, inductive and deductive teaching skills, process writing procedures and traditional grammar, plus oral English skills as demonstrated on a video-taped mini lesson. Prerequisites: EDU 150, EDU 157, and SPE 160 and acceptance into the Teacher Education Program.

Attributes: Undergraduate

EDU 411 Instruct Techniques -Eng FE (1 credit)
EDU 412 Instruct Techniques -Soc Stud (3 credits)
This course introduces pre-service and in-service secondary schools and classroom management techniques that will be of practical value in the classroom. Students will be placed in a secondary classroom where they will study issues related to teaching pedagogy. Investigations involve studies of the integration of social, economic, and political impact upon groups. Instruction is designed to explore the structure of the discipline with a focus on preparing students to be critical thinkers and citizens in a global, technological and culturally diverse world. Students will be placed in a secondary classroom where they will study issues related to teaching pedagogy. Prerequisites: EDU 150, EDU 157, and SPE 160 and acceptance into the Teacher Education Program.

Prerequisites: EDU 157
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Elementary Educ 4th - 8th Gr or Secondary Education.
Attributes: Undergraduate

EDU 412F FE: Instru Tech-Social Studies (0 credits)

EDU 413 Instruct Tech - Soc Stud FE (1 credit)

EDU 414 Instruct Techniques - For Lang (3 credits)
This course introduces the student or teacher to the substance and strategies of proficiency-oriented second-language instruction (K-12). Students will be placed in a K-12 classroom where they will study issues related to teaching pedagogy. The course will enable the student to compose a working definition of proficiency, and explore possible approaches (instructional techniques) for attaining the goals indicated by this definition. Attention is also given to selected topics in both first and second language acquisition theory and practice. An introduction to general linguistics is helpful but not required. Students will be placed in a secondary classroom where they will study issues related to teaching pedagogy. Prerequisites: EDU 150, EDU 157, and SPE 160 and acceptance into the Teacher Education Program.
Prerequisites: EDU 157
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Elementary Educ 4th - 8th Gr or Secondary Education. Attributes: Undergraduate

EDU 414F FE: Instr Tech Foreign Lang (0 credits)
This course introduces the student or teacher to the substance and strategies of proficiency-oriented second-language instruction (K-12). Students will be placed in a K-12 classroom where they will study issues related to teaching pedagogy. The course will enable the student to compose a working definition of proficiency, and explore possible approaches (instructional techniques) for attaining the goals indicated by this definition. Attention is also given to selected topics in both first and second language acquisition theory and practice. An introduction to general linguistics is helpful but not required. Attributes: Undergraduate

EDU 417 Instructional Tech - Math FE (1 credit)

EDU 418 Instructional Tech - Science (3 credits)
This course is intended to assist students in the development of their individual instructional styles and strategies. Well-conceived and effective curriculum and instruction are based upon both an understanding of the adolescent and the nature of science. Instructional techniques ranging from lecture and demonstrations to laboratory and computer simulations will be modeled and analyzed. Issues in classroom management and safety, among other topics, will be explored. Students will be placed in a secondary classroom where they will study issues related to teaching pedagogy. All of these courses in instructional methodology include discussion of and practice in instructional management, student motivation, the implications of learning theory for classrooms, the identification of instructional resources, and procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Prerequisites: EDU 150, EDU 157, and SPE 160 and acceptance into the Teacher Education Program.
Prerequisites: EDU 157
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Elementary Educ 4th - 8th Gr or Secondary Education. Attributes: Undergraduate

EDU 418F FE: Instr Tech for Science (0 credits)

EDU 419 Instructional Tech - Science FE (1 credit)

EDU 420 Edu & Selected Topics: Ling (3 credits)

EDU 421 Computers for Educators (3 credits)

EDU 422 Instruct Tech. for Art Edu (3 credits)
This course is designed to introduce pre-service teachers of Art to instructional processes, teaching strategies, materials, lesson planning, assessment practices, and classroom management theory that will be of practical value in the classroom. Students will be placed in a K-12 art classroom where they will study issues related to teaching pedagogy. Prerequisites: EDU 150, EDU 151, SPE 160 and acceptance into the Teacher Education Program.
Attributes: Undergraduate
EDU 422F FE: Instruct Tech for Art Edu (0 credits)
This course is designed to introduce pre-service teachers of Art to instructional processes, teaching strategies, materials, lesson planning, assessment practices, and classroom management theory that will be of practical value in the classroom. Students will be placed in a K-12 art classroom where they will study issues related to teaching pedagogy. Prerequisites: EDU 150, EDU 151, SPE 160 and acceptance into the Teacher Education Program.

EDU 423 Art Education Pedagogy Lab (0 credits)

EDU 424 English Linguistics (3 credits)
This course is an introduction to linguistics through the lens of educational research. First, we will overview the broad field of linguistics. Then, we will focus on an analysis of recent research in discourse analysis and explore particular contexts of discourse such as legal fields, family interactions, the workplace, and the classroom. Special attention will be given to language classroom discourse. We will focus on substantive issues addressed by the research and theoretical frameworks used to structure the inquiry.
Attributes: Undergraduate

EDU 468 Literature for Adolescents (3 credits)

EDU 470 Creative Expressions (3 credits)

EDU 471 Writing in the Classroom (3 credits)
A practical course in the teaching of writing across the curriculum. Practice in personal, creative, and expository writing. Methods of teaching writing and steps in the writing process (pre-writing, drafting, revising, editing, publishing) are emphasized in the course.
Restrictions: Enrollment is limited to students with a major in Elementary Educ 4th - 8th Gr.
Attributes: Undergraduate

EDU 472 Field Experience 7 ECE (1 credit)

EDU 473 Field Experience 7 4-8 (1 credit)

EDU 479 Independent Study Education (3 credits)
This course is designed to accommodate those students who have an interest in a research- or internship- worthy topic that can be examined on an independent basis. The student will work closely with a professor on an education-related topic that will require the identification of that topic, a literature review, appropriate methodology/field experience, and analysis.

EDU 490 Elementary Student Teaching (12 credits)

EDU 491 Secondary Student Teaching (12 credits)
This experience is designed as the capstone professional course for the Secondary Education Certification program; it is to be the final course taken in the educational coursework sequence. The student teaching experience approximates a full-time working experience for the semester (14 weeks). In addition, each week students attend a seminar in which issues related to student teaching are studied. At the conclusion of the student teaching experience, the student will have demonstrated proficiencies in instructional management, student motivation, curriculum planning, learning theory, solving problems in the educational setting, using technology in the classroom, identifying instructional resources, and assessing student achievement. A maximum of one additional course may be taken during the student teaching semester. Students should apply to the Office of Student Teaching according to the application deadlines established by the Department. These deadlines are more than one semester in advance of student teaching. See Education Department home page at for on-line application and guidelines.

Restrictions: Enrollment is limited to students with a major in Secondary Education.
Attributes: Undergraduate

EDU 492 ELE/SPED Student Teaching (12 credits)

EDU 495 Student Teaching ECE (12 credits)
This experience is designed as the capstone professional course for the PK-4 education major; it is to be the final course taken in the major sequence. The student teaching experience approximates a full-time working experience for the semester (14 weeks). In addition, the student attends a seminar once each week in which issues related to student teaching are studied. At the conclusion of the student teaching experience, the student shall have demonstrated proficiencies in instructional management, student motivation, curriculum planning, learning theory, solving problems in the educational setting, the use of technology, using reading, language, and literacy skills in all classrooms, the identification of instructional resources, and the assessment of student achievement. A maximum of one additional course may be taken during the student teaching semester. Students should apply to the Office of Student Teaching according to the application deadlines established by the Department. These deadlines are more than one semester in advance of student teaching. See Education Department home page at for on-line application and guidelines. http://www.sju.edu/academics/education

Restrictions: Enrollment is limited to students with a major in Elementary Educ Pre K -4th Gr.
Attributes: Undergraduate
EDU 496 Student Teaching 4-8 (12 credits)
This experience is designed as the capstone professional course for the 4-8 Certification program; it is to be the final course taken in the educational coursework sequence. The student teaching experience approximates a full-time working experience for the semester (14 weeks). In addition, each week students attend a seminar in which issues related to student teaching are studied. At the conclusion of the student teaching experience, the student will have demonstrated proficiencies in instructional management, student motivation, curriculum planning, learning theory, solving problems in the educational setting, using technology in the classroom, identifying instructional resources, and assessing student achievement. A maximum of one additional course may be taken during the student teaching semester. Restrictions: Enrollment is limited to students with a major in Secondary Education.
Attributes: Undergraduate

EDU 498 Student Teaching Dual (6 credits)
This experience is designed as the capstone professional course for the Double Major (PK-4 / Special Education); it should be taken in conjunction with SPE 495. It is to be the final course taken in the major sequence. The Student Teaching experience approximates a full-time working experience for the semester (fourteen weeks) and includes experiences in both regular and special education classrooms. It includes a seminar class each week in which issues related to student teaching are studied. At the conclusion of the Student Teaching experience, the student shall have demonstrated proficiencies in instructional management, student motivation, curriculum planning, learning theory, solving problems in the education setting, using reading, language and literacy skills in working with exceptional students, identifying instructional resources, using technology, and assessing student achievement. A maximum of one additional course may be taken during the student teaching semester. Students should apply to the Office of Student Teaching according to the application deadlines established by the Department. These deadlines are more than one semester in advance of student teaching. See Education Department home page at for on-line application and guidelines. http://www.sju.edu/academics/education

Co-requisite: SPE 495

Restrictions: Enrollment is limited to students with a major in Elem-Special Education or Elementary Education.
Attributes: Undergraduate
EDU 500C Movement & Lrnng in Classroom (3 credits)
EDU 501C School Violence:Strategies (3 credits)

Restrictions: Enrollment is limited to Graduate level students.
EDU 551 Psych Teaching:Develop Perspec (3 credits)
This course introduces theoretical models of instructional design, student motivation, classroom management, and assessment. Attention is directed to instructional objectives; to lesson formats; to motivational strategies; to classroom discipline; to teacher attitudes and expectations; and tests and measurements. Particular attention is given to recent developments in schema theory and to constructivist models. Enrollment in Field Experience (EDU 551F) is required with this course.
Prerequisites: EDU 4025 or EDU 4025 Placement Score with a score of 1 or EDU 554
Restrictions: Enrollment is limited to Graduate level students.
EDU 551F FE:Psych Teach:Develop Perspec (0 credits)
This course introduces theoretical models of instructional design, student motivation, classroom management, and assessment. Attention is directed to instructional objectives; to lesson formats; to motivational strategies; to classroom discipline; to teacher attitudes and expectations; and tests and measurements. EDU 607 Social Studies in Elem School (3 credits)
EDU 608 Science In Elementary School (3 credits)
EDU 610 Instruct Techniques - English (3 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student's area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 610F) is required with this course. Prerequisite: EDU 557/557F.
Prerequisites: EDU 4105 or EDU 653
Restrictions: Enrollment is limited to Graduate level students.
EDU 610F FE: Instruct Techniques - Engl (0 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 610F) is required with this course. Prerequisite: EDU 557/557F.
Restrictions: Enrollment is limited to Graduate level students.

EDU 611 Instruct Techniques - Eng Lab (1 credit)

EDU 612 Instruct Techniques - Soc Stud (3 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 612F) is required with this course. Prerequisite: EDU 557/557F.
Prerequisites: EDU 4105 or EDU 653
Restrictions: Enrollment is limited to Graduate level students.

EDU 612F FE: Instruct Tech-Soc Studies (0 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 612F) is required with this course. Prerequisite: EDU 557/557F.
Restrictions: Enrollment is limited to Graduate level students.

EDU 613 Instruct Tech - Soc Stud Lab (1 credit)

EDU 614 Instruct Techniques - For Lang (3 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 614F) is required with this course. Prerequisite: EDU 557/557F.
Prerequisites: EDU 4105 or EDU 653
Restrictions: Enrollment is limited to Graduate level students.

EDU 614F Instruct Techniques - For Lang (0 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 614F) is required with this course. Prerequisite: EDU 557/557F.
Restrictions: Enrollment is limited to Graduate level students.

EDU 615 Instruct Tech - For Lang Lab (1 credit)

EDU 616 Instruct Techniques - Math (3 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 616F) is required with this course. Prerequisite: EDU 557/557F.
Prerequisites: EDU 4105 or EDU 653
Restrictions: Enrollment is limited to Graduate level students.

EDU 616F FE: Instruct Techniques - Math (0 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 616F) is required with this course. Prerequisite: EDU 557/557F.
Restrictions: Enrollment is limited to Graduate level students.

EDU 617 Instruct Techniques - Math Lab (1 credit)

EDU 618 Instruct Techniques - Science (3 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 618F) is required with this course. Prerequisite: EDU 557/557F.
Prerequisites: EDU 4105 or EDU 653
Restrictions: Enrollment is limited to Graduate level students.

EDU 618F FE: Instruct Techniques - Sci (0 credits)
Intensive study and practice of teaching modalities and classroom management strategies appropriate for a secondary classroom. The study of curriculum resources in the student’s area of certification is included. Topics in the course include instructional management, student motivation, the implications of learning theory for classrooms, and the procedures for the measurement of student achievement. Students are expected to demonstrate proficiency in these skills for successful completion of the course. Enrollment in Field Experience (EDU 618F) is required with this course. Prerequisite: EDU 557/557F.
Restrictions: Enrollment is limited to Graduate level students.

EDU 619 Instruct Techniques - Sci Lab (1 credit)

EDU 620 Multimedia Production (3 credits)

EDU 621 Computers for Educators (3 credits)

EDU 622 Instructional Tech in Art Ed (3 credits)
This course is designed to introduce pre-service teachers of Art to instructional processes, teaching strategies, materials, lesson planning, assessment practices, and classroom management theory that will be of practical value in the classroom. Enrollment in Field Experience (EDU 622F) is required with this course.
Restrictions: Enrollment is limited to Graduate level students.
EDU 622F FE: Instructional Tech - Art Ed (1 credit)
This course is designed to introduce pre-service teachers of Art to instructional processes, teaching strategies, materials, lesson planning, assessment practices, and classroom management theory that will be of practical value in the classroom. Enrollment in Field Experience (EDU 622F) is required with this course.

EDU 623 Instruct Tech in Art Ed Lab (1 credit)

EDU 625 Theory & Prac in Second Teach (3 credits)
This course studies the content and methods for teaching the five PA certification disciplines: English, Foreign Language, Mathematics, Science, and Citizenship. National, state, and local standards are examined, which students consider in relation to curriculum design and pedagogy. Backward Design, a method for developing lessons and units, provides a common organizing framework that fosters good teaching. For part of the course, students study within their own discipline, interacting with texts that discuss curriculum frameworks, the planning of lessons and units, pedagogical content knowledge, and assessment. Ten models of teaching that are applicable to all disciplines are explored in detail. As students develop units of study, they gain practice in using these models and the Backward Design method.

Restrictions: Enrollment is limited to Graduate level students.

EDU 630 Early Literacy & Numeracy (3 credits)

EDU 631 Assessment & Evaluation (3 credits)

EDU 632 Reading Literature I (3 credits)
This course provides students with the opportunity to investigate the various theoretical models of the reading process. Students investigate the various factors which impact upon successful reading performance. Students begin to investigate the use of literature, specifically fiction, nonfiction, poetry, picture books, and fantasy selections in the development of instructional practices in the primary grades. Included in this course is an investigation of the use of Basals as literature. In addition, students study the use of reading strategies to be used for teaching reading in the content areas. Enrollment in Field Experience (EDU 632F) is required with this course. Prerequisite: EDU 551.

Prerequisites: (EDU 4035 or EDU 4035 Placement Score with a score of 1) or EDU 551

Restrictions: Enrollment is limited to Graduate level students.

EDU 632F FE Reading/Literature I (0 credits)
This course provides students with the opportunity to investigate the various theoretical models of the reading process. Students investigate the various factors which impact upon successful reading performance. Students begin to investigate the use of literature, specifically fiction, nonfiction, poetry, picture books, and fantasy selections in the development of instructional practices in the primary grades. Included in this course is an investigation of the use of Basals as literature. In addition, students study the use of reading strategies to be used for teaching reading in the content areas. EDU 633 FE: Assessment & Evaluation (1 credit)

EDU 634 FE: Reading Literature I (1 credit)

EDU 635 Networks: Config & Implement (3 credits)

EDU 640 Reading Literature II (3 credits)
The course provides students with the opportunity to continue their investigation of the use of literature as central to the development of successful reading. Students are involved in extensive analysis of a wide range of literature for young people. Students continue to investigate the use of instructional reading models to critique strategies related to the use fiction, nonfiction, poetry, picture books, and fantasy selections. Included in this course is an investigation of Multicultural Literature and the Writing Process. Enrollment in Field Experience (EDU 640F) is required with this course. Prerequisite: EDU 632.

Prerequisites: EDU 632

Restrictions: Enrollment is limited to Graduate level students.
EDU 640F FE: Reading Literature II (0 credits)

Restrictions: Enrollment is limited to Graduate level students.

EDU 641 Social Motor Development (3 credits)

EDU 642 Perspectives in Early Child Ed (3 credits)
This course is designed as an introduction to the essentials of early childhood education. Topics to be covered include: recognizing the unique roles played by early care and education providers teaching young children; understanding cognitive, social-emotional, adaptive and motor development in childhood; assessing and planning a developmentally appropriate and standards-based curriculum; providing an inclusive learning environment; and communicating effectively with families and caregivers. Special attention will be given to contemporary models of Early Childhood Education in school and other early childhood settings and the unique needs of early learners, including English Language Learners and students with special needs. Enrollment in Field Experience (EDU 642F) is required with this course. Prerequisites: EDU 550, EDU 551.
Restrictions: Enrollment is limited to Graduate level students.

EDU 642F FE: Curriculum & Inst in ECE (0 credits)
This course is designed as an introduction to the essentials of early childhood education. Topics to be covered include: recognizing the unique roles played by early care and education providers teaching young children; understanding cognitive, social-emotional, adaptive and motor development in childhood; assessing and planning a developmentally appropriate and standards-based curriculum; providing an inclusive learning environment; and communicating effectively with families and caregivers. Special attention will be given to contemporary models of Early Childhood Education in school and other early childhood settings and the unique needs of early learners, including English Language Learners and students with special needs. Enrollment in Field Experience (EDU 642F) is required with this course. Prerequisites: EDU 550, EDU 551.
Restrictions: Enrollment is limited to Graduate level students.

EDU 643 FE: Reading Literature II (1 credit)

EDU 644 Socio-Emotion & Motor Develop (3 credits)

EDU 645 Trauma: Infancy & Early Child (3 credits)

EDU 646 Language and Culture (3 credits)
This course introduces candidates to key theories, issues, and research-based practices related to teaching culturally and linguistically diverse students (Pre-K-12), with a special focus on students who are commonly referred to as English language learners (ELLs). Candidates will explore the many dimensions of culture and language. They will also learn how to align the PA Language Proficiency Standards with the PA academic standards to plan instruction in a culturally and linguistically diverse setting. Assigned readings, class discussions, video recordings, library and online research, and a field experience in a culturally and linguistically diverse classroom will engage candidates in the course topics.
Restrictions: Enrollment is limited to Graduate level students.

EDU 646F FE: Language and Culture (0 credits)
This course introduces candidates to key theories, issues, and research-based practices related to teaching culturally and linguistically diverse students (Pre-K-12), with a special focus on students who are commonly referred to as English language learners (ELLs). Candidates will explore the many dimensions of culture and language. They will also learn how to align the PA Language Proficiency Standards with the PA academic standards to plan instruction in a culturally and linguistically diverse setting. Assigned readings, class discussions, video recordings, library and online research, and a field experience in a culturally and linguistically diverse classroom will engage candidates in the course topics.
Restrictions: Enrollment is limited to Graduate level students.

EDU 647 Literacy & Learn Across Curric (3 credits)
The teaching of reading in various fields in middle and secondary schools will be the focus of this course. Topics examined will include reading in the school programs, problems in curricular materials, meeting individual needs, general and specific reading/study skills, critical reading, and adjustment of instruction to meet individual learning styles. Special focus on the use of audiovisual materials in the classroom is a core component of the course. Restricted to students in Level I Secondary Certification programs. Prerequisite: EDU 557/557F.
Restrictions: Enrollment is limited to Graduate level students.

EDU 647F FE: Literacy/Lrn Across Curric (0 credits)
The teaching of reading in various fields in middle and secondary schools will be the focus of this course. Topics examined will include reading in the school programs, problems in curricular materials, meeting individual needs, general and specific reading/study skills, critical reading, and adjustment of instruction to meet individual learning styles. Restrictions: Enrollment is limited to Graduate level students.

EDU 650 Assessment of Young Children (3 credits)

EDU 651 Trauma: Infancy & Early Child (3 credits)

EDU 652 Trauma Princ Infant & Early Child (3 credits)

EDU 653 Literacy in the Content Areas (3 credits)

EDU 654 Literacy, Language and Culture (3 credits)

EDU 655 FE: Social Studies Methods (1 credit)

EDU 656 FE: Liter/Soc Studies Meth 4-8 (1 credit)

EDU 657 Enhance Trauma Prin. Child/Infan (3 credits)

EDU 660 Science Methods ECE (3 credits)

EDU 661 Math & Technology ECE (3 credits)

EDU 662 Science & Math Methods 4-8 (3 credits)

EDU 663 Science Methods PK - 4 (3 credits)
This course is designed to provide students with the opportunity to investigate the philosophy, curriculum planning and organization, skill development, content knowledge, and instructional approaches relevant to teaching elementary school science.
Restrictions: Enrollment is limited to Graduate level students.

EDU 663F FE: Science Methods PK - 4 (0 credits)
This course is designed to provide students with the opportunity to investigate the philosophy, curriculum planning and organization, skill development, content knowledge, and instructional approaches relevant to teaching elementary school science. Prerequisite: EDU 551/551F.
Restrictions: Enrollment is limited to Graduate level students.
EDU 664 FE: Science Methods ECE (1 credit)

EDU 665 Interscip Teach Math, Sci Tech (3 credits)
This is a course in elementary level science and math teaching methods. Students will be exposed to the current academic standards for math, science, technology, and engineering standards using the Pennsylvania Standards Aligned System (PA SAS) as well as the PA Common Core Mathematics Standards (PA CCCMS). It is designed to take students’ thinking beyond the facts and tools of science and mathematics to the level of the underlying ideas that expose their relatedness. Thinking conceptually about science and mathematics means thinking in terms of unifying scientific ideas or mathematical constructs that have the potential to produce sharable tools and understandings. In addition, the course will address the role that technology tools are playing in children’s math and science education. Prerequisite: EDU 551/551F.

Restrictions: Enrollment is limited to Graduate level students.

Attributes: Field Experience

EDU 665F FE: Inter: Teach Math, Sci Tech (0 credits)
This is a course in elementary level science and math teaching methods. Restrictions: Enrollment is limited to Graduate level students.

EDU 667 Teach Soc Stud Thru Arts PK-4 (3 credits)
The purpose of this course is to connect theory and practice in the teaching of elementary school social studies. Strategies for planning, implementing, and evaluating social studies instruction are designed with a focus on preparing children to be critical thinkers and young citizens in a global, technological and culturally diverse world. Prerequisite: EDU 551/551F.

Restrictions: Enrollment is limited to Graduate level students.

EDU 667F FE: Teach Soc Stud Thru Art PK-4 (0 credits)
The purpose of this course is to connect theory and practice in the teaching of elementary school social studies. Strategies for planning, implementing, and evaluating social studies instruction are designed with a focus on preparing children to be critical thinkers and young citizens in a global, technological and culturally diverse world. Prerequisite: EDU 551/551F.

EDU 668 Literature for Adolescents (3 credits)

EDU 670 Creative Expressions (3 credits)

EDU 671 Writing in the Classroom (3 credits)
This course introduces theories and practices of writing instruction, with a specific emphasis on writing process pedagogy. Candidates will experiment with writing across genres, and will learn how to use mentor texts, develop mini-lessons, create workshop classrooms, and develop assessment tools. Candidates will be able to concentrate on specific student populations based on their certification.

Restrictions: Enrollment is limited to Graduate level students.

EDU 672 Field Experience 7 ECE (1 credit)
EDU 673 Field Experience 7 4-8 (1 credit)
EDU 679 Directed Research I (3 credits)
These directed experiences (students may do a maximum of 3) provide an opportunity to conduct a research project under the supervision of a faculty member. Note: students may register for a directed research study only after (a) submitting a research proposal to the program director; (b) arranging for a faculty member to serve as mentor; and (c) receiving explicit approval from the department chair.

Restrictions: Enrollment is limited to Graduate level students.

EDU 680 Directed Research II (3 credits)
These directed experiences (students may do a maximum of 3) provide an opportunity to conduct a research project under the supervision of a faculty member. Note: students may register for a directed research study only after (a) submitting a research proposal to the program director; (b) arranging for a faculty member to serve as mentor; and (c) receiving explicit approval from the department chair.

Restrictions: Enrollment is limited to Graduate level students.

EDU 681 Directed Research III (3 credits)
These directed experiences (students may do a maximum of 3) provide an opportunity to conduct a research project under the supervision of a faculty member. Note: students may register for a directed research study only after (a) submitting a research proposal to the program director; (b) arranging for a faculty member to serve as mentor; and (c) receiving explicit approval from the department chair.

Restrictions: Enrollment is limited to Graduate level students.

EDU 682 Social Studies in Elem School (3 credits)
EDU 683 Science in Elementary School (3 credits)
EDU 690 Elementary Student Teaching (6 credits)
EDU 691 Secondary Student Teaching (6 credits)
Student or Intern teaching (or individually designed field experience) under approved supervision (including seminar meetings). This experience is designed as the capstone professional course for the certification student. The fieldwork experience approximates a full-time working/teaching experience for one full semester. At the conclusion of the experience students must have demonstrated proficiencies in instructional management, student motivation, curriculum planning, learning theory, problem solving in an educational setting, using computers in the classroom, using reading, language, and literacy skills in all classrooms, the use of audiovisual materials in the classroom, the identification of instructional resources, and the assessment of student achievement. The fieldwork course is typically the final course in a certification sequence. Students should apply to the Director of Student Teaching based on the application deadlines established by the Department. Includes a weekly seminar.

Restrictions: Enrollment is limited to Graduate level students.
EDU 692 Elem/Sped Student Teaching (6 credits)

EDU 695 PK-4 Student Teaching (6 credits)
Student or Intern teaching (or individually designed field experience) under approved supervision (including seminar meetings). This experience is designed as the capstone professional course for the certification student. The fieldwork experience approximates a full-time working/teaching experience for one full semester. At the conclusion of the experience students must have demonstrated proficiencies in instructional management, student motivation, curriculum planning, learning theory, problem solving in an educational setting, using computers in the classroom, using reading, language, and literacy skills in all classrooms, the use of audiovisual materials in the classroom, the identification of instructional resources, and the assessment of student achievement. The fieldwork course is typically the final course in a certification sequence. Students should apply to the Coordinator of Student Teaching based on the application deadlines established by the Department. Includes a weekly seminar.

Restrictions: Enrollment is limited to Graduate level students.

EDU 696 4-8 Student Teaching (6 credits)
Student or Intern teaching (or individually designed field experience) under approved supervision (including seminar meetings). This experience is designed as the capstone professional course for the certification student. The fieldwork experience approximates a full-time working/teaching experience for one full semester. At the conclusion of the experience students must have demonstrated proficiencies in instructional management, student motivation, curriculum planning, learning theory, problem solving in an educational setting, using computers in the classroom, using reading, language, and literacy skills in all classrooms, the use of audiovisual materials in the classroom, the identification of instructional resources, and the assessment of student achievement. The fieldwork course is typically the final course in a certification sequence. Students should apply to the Coordinator of Student Teaching based on the application deadlines established by the Department. Includes a weekly seminar.

Restrictions: Enrollment is limited to Graduate level students.

EDU 697 Secondary Student Teaching (6 credits)

EDU 700 Psychology of Literacy (3 credits)
Designed to provide educators with an understanding of the psychological basis of literacy acquisition and development. Emphasis will be placed upon interactive models of the reading process and their implications for classroom instruction. The role of language, cognition, information processing, affective factors and measurement in reading will be examined in detail.

Restrictions: Enrollment is limited to Graduate level students.

EDU 701 Assess & Instr in Liter K-3 (3 credits)
This course provides in-depth study of students’ literacy development in grades K-3. A range of formal and informal assessments will be used to examine children’s early language and literacy development, including phonemic awareness, concepts of print, word recognition strategies, and comprehension abilities. This information will be used to make informed decisions about literacy instruction.

Restrictions: Enrollment is limited to Graduate level students.

EDU 702 Assess & Instr in Liter 4-12 (3 credits)
This course provides in-depth study of student’s literacy development in grades 4-12. A range of formal and informal assessments will be used to examine children’s literacy abilities; a focus of the course is understanding and enhancing growth in areas of selecting and applying comprehension strategies and reading texts critically. Assessments will be used to make informed decisions about literacy instruction.

Prerequisite: EDU 701
Restrictions: Enrollment is limited to Graduate level students.

EDU 703 Literacy Research (3 credits)
This course is designed to enable students to read and react critically to current research in the field of literacy. Emphasis will include an examination of the nature of educational research and the use and misuse of statistical analyses and interpretations of data. Students will complete a modified literature review of a specific topic to inform their own research agenda. Prerequisite: three reading specialist courses.

Restrictions: Enrollment is limited to Graduate level students.

EDU 704 Plng & Org a Literacy Program (3 credits)
The study of the reading program (K-12) is central to this course which utilizes the concept of communication as a unifying theme. Aspects of the planning and organizing of the literacy curriculum are examined. Emphasis is placed on the role of the reading specialist in developing, coordinating, and administering a literacy program. Students will assess the strengths and needs of a school's literacy program and make recommendations for improvement. Prerequisites: three reading specialist courses.

Restrictions: Enrollment is limited to Graduate level students.

EDU 705 Literacy Practicum (6 credits)
During this practical experience, students work intensively with pupils who have reading difficulties in their school setting. Under the guidance of a supervisor, graduate students will conduct assessments and draw from these data to inform their instruction. Each student will be expected to develop a case study on at least one student during the practicum experience. Prerequisites: EDU 700, 701, 702.

Prerequisites: EDU 700 and EDU 701 and EDU 702
Restrictions: Enrollment is limited to Graduate level students.

EDU 706 Socio Cult Aspects of Literacy (3 credits)
This course is based on theoretical frameworks relating literacy learning to the various contexts which lead learners to socially and culturally different ways of making sense and being in the world. It examines multiple views of language, literacy, and literacy development. Students explore the factors that impact literacy learning across different cultural communities. They also explore issues of race, class, and culture on language and literacy acquisition and development.

Restrictions: Enrollment is limited to Graduate level students.

EDU 707 Internship for ESL & Literacy (1 credit)
This practicum course is required for all students in the Five Year Program. Students work in schools under the supervision of a cooperating Reading Specialist. Course goals include understanding the roles and responsibilities of the Reading Specialist, instructing and assessing children with a variety of literacy abilities, and interfacing with parents, teachers, and administrators to serve the literacy needs of children in particular school communities.

Restrictions: Enrollment is limited to Graduate level students.
EDU 708 Multicultural Lit for Children (3 credits)
This course addresses literature that reflects the lifestyles, heritage, and values of the various cultures that make up the pluralistic American society. Students will examine various genres of multicultural literature, including folktales, realistic fiction, historical fiction, non-fiction, and poetry.
Restrictions: Enrollment is limited to Graduate level students.

EDU 710 English Linguistics (3 credits)
This course is an introduction to the study of language and principles of linguistics. The main areas of linguistics to be explored include: phonetics, phonology, morphology, syntax, semantics, sociolinguistics, pragmatics, second language acquisition, pedagogy, and applied linguistics. *While this course does not satisfy specific PDE standards for the ESL Specialist Program, we feel it is essential for all teachers who will be working with English language learners.
Restrictions: Enrollment is limited to Graduate level students.

EDU 711 Language and Culture (3 credits)
EDU 712 Topics in Language Acquisition (3 credits)
The course examines the processes of language acquisition, especially the process of learning a second or additional language, from various theoretical perspectives. Emphasis will be given to the learning environments, the characteristics of interaction and participation and contexts that facilitate second language acquisition. Additionally, the course will explore linguistic factors and processes in second language acquisition (SLA) and examine the structure of learner language.
Prerequisite: EDU 646
Restrictions: Enrollment is limited to Graduate level students.

EDU 713F FE: Meth Teach English Sec Lang (0 credits)
This course examines various approaches, methods, and techniques for teaching and assessing English language learners in bilingual and ESL classrooms, as well as assisting ESL students in the regular classrooms. Candidates explore the curriculum, instruction, and teaching materials to maximize opportunities for ESL learners to use the language, to learn about the language, and to learn through the language. Lab experience enables students to apply their pedagogical knowledge and skills in working with the ESL learners (prerequisites: EDU646, EDU710, EDU712).
Restrictions: Enrollment is limited to Graduate level students.

EDU 714 Intnship-ESL/Bilingual Programs (4 credits)
This course introduces students to the roles and responsibilities of the ESL/Bilingual teacher through a school-based internship. Interns spend 30 hours in the company of expert ESL/Bilingual educators in school settings. Students will gain expertise in working with groups of students, interfacing with teachers and caregivers, and examining programs that serve emergent bilingual students in grades PK-12. Emphasis will be on program design and implementation guided by the English language development standards (ELDS), including assessing students’ language capacities, designing programs to fit a variety of language needs, working with teachers and other school professionals to serve emergent bilinguals, and organizing programs to enhance caregiver collaboration.
Prerequisites: EDU712, EDU713, & EDU646
Restrictions: Enrollment is limited to Graduate level students.

EDU 716 Cultural Diversity in Classrooms (3 credits)
This course is designed to promote the exploration of issues of cultural diversity in American Education in preparation for the changing needs of society. Specific emphasis will be placed upon the role of literature as a springboard for discussion an integration of diversity issues into the curriculum. Students will also investigate current research investigating diversity in schools.
Restrictions: Enrollment is limited to Graduate level students.

EDU 769 Advanced Fieldwork in Literacy (6 credits)

Special Education
SPE 160 Intro to Special Education (3 credits)
This introductory course is designed to provide teachers-in-training with an understanding of the child with a disability in various instructional settings. Students will be provided with an overview of Special Education with emphasis on historical and emerging perspectives. Topics to be examined will include types and natures of exceptionalities; legal and ethical responsibilities of teachers; least restrictive environment; various instructional settings; the inclusion of exceptional children in regular education; services and programs for the exceptional child.
Prerequisites: PHL 154
Attributes: Ethics Intensive (New GEP), Undergraduate
SPE 160F FE Intro to Special Education (0 credits)
This introductory course is designed to provide teachers-in-training with an understanding of the child with a disability in various instructional settings. Students will be provided with an overview of Special Education with emphasis on historical and emerging perspectives. Topics to be examined will include types and natures of exceptionalities; legal and ethical responsibilities of teachers; least restrictive environment; various instructional settings; the inclusion of exceptional children in regular education; services and programs for the exceptional child.

Attributes: Undergraduate

SPE 200 Teaching in Inclusive Environ (3 credits)
The focus of this course is on the developing of skills dealing with effective inclusive classroom management and creating classroom climate conducive to student achievement. It provides comprehensive coverage of a variety of discipline models to aid candidates in building systems and conceptual models of total discipline based on their underlying theories; emphasizes activities promoting positive behavioral supports; increases pupil motivation; applies methods for establishing cooperative classroom routines, procedures, practices; organizes the environment, including school-wide, class-wide, and individual supports; measures and reports progress. This course of study will focus on the unique needs of students as well as the development of proactive approaches to classroom and school environments. This will enable teachers to increase the amount of academic learning time in which to address the needs of all students in inclusive classrooms and to increase achievement. In addition, the course study will include a focus on understanding how behaviors are influenced by pedagogical practices.

SPE 200F FE Teaching in Inclusive Environ (0 credits)
The focus of this course is on the developing of skills dealing with effective inclusive classroom management and creating classroom climate conducive to student achievement. It provides comprehensive coverage of a variety of discipline models to aid candidates in building systems and conceptual models of total discipline based on their underlying theories; emphasizes activities promoting positive behavioral supports; increases pupil motivation; applies methods for establishing cooperative classroom routines, procedures, practices; organizes the environment, including school-wide, class-wide, and individual supports; measures and reports progress. This course of study will focus on the unique needs of students as well as the development of proactive approaches to classroom and school environments. This will enable teachers to increase the amount of academic learning time in which to address the needs of all students in inclusive classrooms and to increase achievement. In addition, the course study will include a focus on understanding how behaviors are influenced by pedagogical practices.

SPE 203F FE Tchng Adolesc Inclus Environ (0 credits)
The focus of this course is on the developing of skills dealing with effective inclusive classroom management and creating classroom climate conducive to student achievement. It provides comprehensive coverage of a variety of discipline models to aid candidates in building systems and conceptual models of total discipline based on their underlying theories; emphasizes activities promoting positive behavioral supports; increases pupil motivation; applies methods for establishing cooperative classroom routines, procedures, practices; organizes the environment, including school-wide, class-wide, and individual supports; measures and reports progress. In addition, course study will include a focus on understanding how adolescent behaviors are influenced by pedagogical practices and classroom environments. Course content will include a careful analysis of the specific needs of intermediate and secondary aged learners, including: slower rates of acquiring information and skills, deficits in the ability to generalize learned skills to other settings or conditions, and a lack of ability to retain skills, all of which directly influence student behavior.

Attributes: Undergraduate

SPE 203F FE Tchng Adolesc Inclus Environ (0 credits)
The focus of this course is on the developing of skills dealing with effective inclusive classroom management and creating classroom climate conducive to student achievement. It provides comprehensive coverage of a variety of discipline models to aid candidates in building systems and conceptual models of total discipline based on their underlying theories; emphasizes activities promoting positive behavioral supports; increases pupil motivation; applies methods for establishing cooperative classroom routines, procedures, practices; organizes the environment, including school-wide, class-wide, and individual supports; measures and reports progress. In addition, course study will include a focus on understanding how adolescent behaviors are influenced by pedagogical practices and classroom environments. While general education curriculum is appropriate for the majority of students with disabilities, secondary learners who are at-risk for academic and behavioral failure, including those with disabilities, have specific learning and behavioral characteristics that can undermine progress through general education curriculum. Course content will include a careful analysis of the specific needs of intermediate and secondary aged learners, including: slower rates of acquiring information and skills, deficits in the ability to generalize learned skills to other settings or conditions, and a lack of ability to retain skills, all of which directly influence student behavior. Furthermore, course study will focus on the unique psychosocial problems of adolescents, social and interpersonal skill training priorities of young adults, classroom management and motivational strategies for adolescents, and validated learning strategies for adolescents and young adults. Pre-requisite: SPE 160/160F.
SPE 230 Intro to Special Education (3 credits)
SPE 231 FE Intro to Special Education (2 credits)

SPE 310 Assessment & Progress Monitor (3 credits)
This course is designed to introduce teacher candidates to educational assessment in regular and special classroom settings at the secondary level. The course will provide teacher candidates with an in-depth understanding of the different types of assessment strategies including how to use multiple assessment data for making a wide range of educational decisions. Content will include an overview of different types of assessments including screening, diagnostic, formative, summative, authentic, benchmark and differentiated. Teacher candidates will learn basic testing, measurement and evaluation concepts, examine instruments that reflect construct of interest (knowledge, affect, behavior), construct various types of assessments and interventions and analyze and use instruments. Teacher candidates will also learn how to analyze and interpret assessment data for making instructional decisions. Throughout the course, teacher candidates will learn the importance of critical issues in the field of assessment and evaluation including: 1. philosophical and theoretical perspectives on assessment in schools, 2. contemporary context of school assessment and educational reform, 3. intersection of cultural difference and school assessment, 4. ethical principles of effective assessment and 5. teacher accountability and assessment. Pre-requisite: SPE 160/160F.

SPE 310F FE: Assessment&Progress Monitor (0 credits)
This course will provide an in-depth presentation of the complex issue of assessment in early care and education. The content of this course will provide students with an in-depth review of informal evaluation procedures and classroom-based data collection strategies for young children in inclusive early care and education settings. Focus will include academic, affective, work-study skill, adaptive functioning, fine motor, and environmental measures. Content coverage will consist of an overview of assessment models including traditional, informal, dynamic, performance, curriculum-based, and alternative techniques and include an examination of evaluation procedures, from pre-referral intervention, eligibility/program decision-making to progress monitoring of scientifically-based instructional interventions based on Response to Intervention (RTI). Additional course topics address legislation, regulations, topical issues, emerging evaluation trends, test modifications/accommodations, parent involvement and assessment/ progress reporting with a focus on procedural considerations in the assessment of development and learning in the early childhood years. Related foci for discussion will also include the challenges in both assessing young children and using assessment data to design meaningful, developmentally appropriate activities for children and their families. Candidates will develop lesson plans, unit plans, IEPs, IFSPs, 504 plans and intervention strategies that employ Pennsylvania's Standards Aligned System. By using http://www.pdesas.org, candidates will be able to modify and implement curriculum using the appropriate Academic Standards, including Alternate Academic Standards where necessary, Assessment Anchors, and eligible content. Pre-requisite: SPE 160/160F.

Attributes: Undergraduate

SPE 319 Assessment:Ident & Progr Monit (3 credits)
This course will provide a comprehensive review of informal evaluation procedures and classroom-based data collection strategies for preschool-age children in inclusive early care and education settings. Focus will include academic, affective, work-study skill, adaptive functioning, fine motor, and environmental measures. Content coverage will consist of an overview of assessment models including traditional, informal, dynamic, performance, curriculum-based, and alternative techniques and include an examination of evaluation procedures, from pre-referral intervention, eligibility/program decision-making to progress monitoring of scientifically-based instructional interventions based on Response to Intervention (RTI). Additional course topics address legislation, regulations, topical issues, emerging evaluation trends, test modifications/accommodations, parent involvement and assessment/ progress reporting with a focus on procedural considerations in the assessment of development and learning in the early childhood years. Related foci for discussion will also include the challenges in both assessing young children and using assessment data to design meaningful, developmentally appropriate activities for children and their families. Candidates will develop lesson plans, unit plans, IEPs, IFSPs, 504 plans and intervention strategies that employ Pennsylvania's Standards Aligned System. By using http://www.pdesas.org, candidates will be able to modify and implement curriculum using the appropriate Academic Standards, including Alternate Academic Standards where necessary, Assessment Anchors, and eligible content. Pre-requisite: SPE 160/160F.
SPE 329 Educ Stds w/High Incid Disabil (3 credits)
This course is a comprehensive study of theoretical issues and research-based diagnosis, instructional planning and programmatic organization of instruction for children with learning problems. Content will cover curriculum design, development of programs of differential instruction involving evidence-based interventions that meet students’ needs based on formative assessment, developmental and educational information; integrated learning experiences; specialized adaptations and resources; practices and procedures validated for specific characteristics of learners and settings; prevention and intervention strategies from multiple theoretical approaches for individuals at-risk for academic or behavioral failure; systematic implementation of instructional variables; and systems management necessary for effective instruction of children with disabilities. Focus will also be given to the development and implementation of differentiated curriculum and curricular enhancements, and concepts and teaching practices related to the development and implementation of effective instructional programs for students with high incidence disabilities. Candidates will develop effective, evidence-based instructional strategies for all levels of support (PK-8). These will include: lesson plans, unit plans, IEPs, IFSPs, 504 plans, and intervention strategies that employ Pennsylvania’s Standards Aligned Systems (http://www.pdesas.org). Candidates will be able to modify and implement curriculum including appropriate adaptations and technology, using the appropriate Academic Standards, Alternate Academic Standards where necessary, Assessment Anchors, and eligible content. In addition, candidates will demonstrate the ability to collaborate and plan for student outcomes and transition at designated times throughout the student's education, including Age 3 transition for Pre K-8, secondary transition procedures (7-12), and transition to post school success. This course of study will include: applying the knowledge of transition-related legislation in fields of special and vocational education, rehabilitation, labor and civil rights; developing and implementing a transition plan that integrates functional, academic, and vocational data aligned to identified post school outcomes; and administering and interpreting formal and informal career and vocational assessment approaches. Pre-requisite: SPE 160/160F.
Attributes: Undergraduate

SPE 329F FE: Ed Stds w/ High Incid Disb (0 credits)
This course is a comprehensive study of theoretical issues and research-based diagnosis, instructional planning and programmatic organization of instruction for children with learning problems. SPE 330 Educ Studts w/ Low Incid Disabi (3 credits)
SPE 330F FE Edu Stu w/ Low Incid Disabi (0 credits)
SPE 339 Educ Stds w/Low Incid Disabil (3 credits)

This course addresses the definitions, characteristics, assessment and specific techniques for students needing adaptive and functional curricula. Characteristics are addressed in relation to why and how specialized instruction can meet the learning and developmental needs of these individuals, specifically in the areas of instruction, assistive learning, and language-communication. This includes research validated instructional strategies, adaptive and assistive technologies including augmentative communication systems, and communication and social interaction alternatives for non-speaking individuals. In addition, the course reviews behaviorally-based educational models for students with autism and other moderate and severe disabilities, and presents methods aimed at enhancing functional skill development in major life domains, with emphasis on community-based training and self-determination. Candidates will develop effective, evidence-based instructional strategies for all levels of support (PK-8). These will include: lesson plans, unit plans, IEPs, IFSPs, 504 plans, and intervention strategies that employ Pennsylvania’s Standards Aligned Systems (http://www.pdesas.org). Candidates will be able to modify and implement curriculum using the appropriate Academic Standards, Alternate Academic Standards where necessary, Assessment Anchors, and eligible content. SPE 379 Fam School & Comm:Diverse Soc (3 credits)
This course focuses on the process of family assessment and intervention, issues of family and professional collaboration and diversity, and methods of promoting adult communication and management strategies. It applies the knowledge of cultural and linguistic diversity and the significance of socio-cultural and political contexts as they relate to the family, culture and society. It identifies the members of teams designed to support and optimize children’s educational needs and social-emotional development and the network of community services and resources to individuals, families and groups affected by social, environmental, health and related problems. Candidates will develop effective, evidence-based instructional strategies for all levels of support (PK-8). These will include: lesson plans, unit plans, IEPs, IFSPs, 504 plans, and intervention strategies that employ Pennsylvania’s Standards Aligned Systems (http://www.pdesas.org). SPE 389 Perspect on Gifted/Talented (3 credits)
This course will provide an in-depth presentation of the complex issue of assessment for all students at the early childhood level through secondary education. The content of this course will provide students with an in-depth review of a variety of evaluation procedures and classroom-based data collection strategies for students in all educational settings. Content coverage will consist of an overview of assessment models including traditional, informal, dynamic, performance, curriculum-based, and alternative techniques and include an examination of evaluation procedures, from pre-referral intervention, eligibility/placement/program decision-making to progress monitoring of scientifically-based instructional interventions based on Response to Intervention (RTI). Students will be provided with an opportunity to explore assessment as it relates to their course of study. Additional course topics address legislation, regulations, topical issues, emerging evaluation trends, behavioral and social emotional assessment, test modifications/accommodations, parent involvement and assessment/progress reporting with a focus on procedural considerations in the assessment of development and learning. Related foci for discussion will also include the challenges in both assessing all students and using assessment data to design meaningful, developmentally appropriate activities for all students. Previous coursework related to the study of the contemporary and controversial issues within the field of special education will assist the learner in applying conceptual knowledge into practice to ensure success for all students. Knowledge of evidence-based core concepts that contribute to effective program planning; investigation of cognitive, academic, behavioral, and psycho-social solutions and implications for those working with exceptional students; and future implications for the advancement of special education diagnostic and instructional services as well as an understanding of the contemporary and controversial issues within the field of special education will assist the learner in applying conceptual knowledge into practice to ensure success for all students.

This experience is designed as the capstone professional course in the Special Education major. It is to be the final course in the sequence of Special Education courses for certification. The student teaching experience approximates a full time working experience for a fourteen week semester. It includes a supervised teaching experience as well as a weekly seminar class in which issues related to student teaching are studies. Evaluations are conducted by the seminar instructor, the cooperating teacher and a university supervisor.
Attributes: Undergraduate
SPE 498 SPE Studnt Teacher - Dual Prog (6 credits)
SPE 570 Special Ed Independent Study (3 credits)
SPE 600 Found & Current Issues: Sp Edu (3 credits)
This course is a critical study of the contemporary and controversial issues within the field of special education. Consideration will be given to the philosophical, psychological, and sociological basis of teacher education, including an analytical review of research-based curricula, programmatic innovations, policy issues and their effects, and ethical practices. Discussions will focus on evidence-based core concepts that contribute to effective program planning; investigation of cognitive, academic, behavioral, and psycho-social solutions and implications for those working with exceptional students; and future implications for the advancement of special education diagnostic and instructional services. Restrictions: Enrollment is limited to Doctoral or Graduate level students.

SPE 600F FE: CurrentIssuesSPED:PracProc (0 credits)
This course is a critical study of the contemporary and controversial issues within the field of special education. Consideration will be given to the philosophical, psychological, and sociological basis of teacher education, including an analytical review of research-based curricula, programmatic innovations, policy issues and their effects, and ethical practices. Discussions will focus on evidence-based core concepts that contribute to effective program planning; investigation of cognitive, academic, behavioral, and psycho-social solutions and implications for those working with exceptional students; and future implications for the advancement of special education diagnostic and instructional services. SPE 601 EducAssessment& ProgMonitoring (3 credits)
This course will provide an in-depth presentation of the complex issue of assessment for all students at the early childhood level through secondary education. The content of this course will provide students with an in-depth review of a variety of evaluation procedures and classroom-based data collection strategies for students in all educational settings. Content coverage will consist of an overview of assessment models including traditional, informal, dynamic, performance, curriculum-based, and alternative techniques and include an examination of evaluation procedures, from pre-referral intervention, eligibility/placement/ program decision-making to progress monitoring of scientifically-based instructional interventions based on Response to Intervention (RTI). Students will be provided with an opportunity to explore assessment as it relates to their course of study. Additional course topics address legislation, regulations, topical issues, emerging evaluation trends, test modifications/accommodations, parent involvement and assessment/progress reporting with a focus on procedural considerations in the assessment of development and learning. Related foci for discussion will also include the challenges in both assessing all students and using assessment data to design meaningful, developmentally appropriate activities for all students. Previous coursework related to the study of the contemporary and controversial issues within the field of special education will assist the learner in applying conceptual knowledge into practice to ensure success for all students. Knowledge of evidence-based core concepts that contribute to effective program planning; investigation of cognitive, academic, behavioral, and psycho-social solutions and implications for those working with exceptional students; and future implications for the advancement of special education diagnostic and instructional services as well as an understanding of the contemporary and controversial issues within the field of special education will assist the learner in applying conceptual knowledge into practice to ensure success for all students.

Restrictions: Enrollment is limited to Graduate level students.

SPE 601F FE: EducAssess&ProgMonitoring (0 credits)
SPE 602 DiagnosticAsses/ProgressMon (3 credits)
This course will provide an in-depth presentation of the complex issue of assessment, including an examination of evaluation procedures, from pre-referral intervention, eligibility/placement/ program decision-making to progress monitoring of scientifically-based instructional interventions based on Response to Intervention (RTI). Focus will include academic, affective, work-study skill, adaptive functioning, fine motor, and environmental measures. Content coverage will consist of an overview of assessment models including traditional, informal, dynamic, performance, curriculum-based, and alternative techniques. Addition course topics will address legislation, regulations, topical issues, emerging evaluation trends, test modifications/accommodations, parent involvement and assessment/progress reporting. Prerequisites: SPE 4805 or SPE 550 or SPE 600 or SPE 5105
Restrictions: Enrollment is limited to Graduate level students.

SPE 602F FE:DiagnosticAsses/ProgressMon (0 credits)
This course will provide an in-depth presentation of the complex issue of assessment, including an examination of evaluation procedures, from pre-referral intervention, eligibility/placement/ program decision-making to progress monitoring of scientifically-based instructional interventions based on Response to Intervention (RTI). SPE 603 Thry&InstrPracticeStdtntHighInc (3 credits)
This course is a comprehensive study of theoretical issues and research-based diagnosis, instructional planning and programmatic organization of instruction for children with learning problems. Content will cover curriculum design, development of programs of differential instruction involving evidence-based interventions that meet students’ needs based on formative assessment, developmental and educational information; integrated learning experiences; specialized adaptations and resources; practices and procedures validated for specific characteristics of learners and settings; prevention and intervention strategies from multiple theoretical approaches for individuals at-risk for academic or behavioral failure; systematic implementation of instructional variables; and systems management necessary for effective instruction of children with disabilities. Focus will also be given to the development and implementation of differentiated curriculum and curricular enhancements, and concepts and teaching practices related to the development and implementation of effective instructional programs for students with high incidence disabilities. Prerequisites: SPE 4805 or SPE 550 or SPE 600 or SPE 5105
Restrictions: Enrollment is limited to Graduate level students.
SPE 603F FE Stdnts W/High Disabilities (0 credits)
This course is a comprehensive study of theoretical issues and research-based diagnosis, instructional planning and programmatic organization of instruction for children with learning problems. Content will cover curriculum design, development of programs of differential instruction involving evidence-based interventions that meet students' needs based on formative assessment, developmental and educational information; integrated learning experiences; specialized adaptations and resources; practices and procedures validated for specific characteristics of learners and settings; prevention and intervention strategies from multiple theoretical approaches for individuals at-risk for academic or behavioral failure; systematic implementation of instructional variables; and systems management necessary for effective instruction of children with disabilities. Focus will also be given to the development and implementation of differentiated curriculum and curricular enhancements, and concepts and teaching practices related to the development and implementation of effective instructional programs for students with high incidence disabilities.

SPE 604 RsrchBsedModel:Lit,WritOrLan (3 credits)
This course will focus on the development of competency in the implementation of explicit and systematic evidence-based instructional strategies designed to teach accuracy, fluency, comprehension, and monitoring strategies in literacy and content area reading to students with disabilities, including exceptional children in regular classroom, with emphasis on applying findings from research in reading to classroom practices, including children who are linguistically and culturally diverse. Content will include diagnostic-prescriptive techniques for remediation of reading and written language and associated learning disabilities.

Restrictions: Enrollment is limited to Graduate level students.

SPE 604F FE Reading in Content Area (0 credits)
This course will focus on the development of competency in the implementation of explicit and systematic evidence-based instructional strategies designed to teach accuracy, fluency, comprehension, and monitoring strategies in literacy and content area reading to students with disabilities, including exceptional children in regular classroom, with emphasis on applying findings from research in reading to classroom practices, including children who are linguistically and culturally diverse. Content will include diagnostic-prescriptive techniques for remediation of reading and written language and associated learning disabilities.

SPE 605 RsrchBasedModel:MathSciencePro (3 credits)
This course will focus on the development of competency in the implementation of explicit and systematic evidence-based instructional strategies designed to teach mathematics and content area subjects, including science and social studies. A study of theory and practice of effective teaching methodologies, combined with principles of differentiated instruction. Attention will be on teaching models and methods supported by research and emphasis will be placed on development of effective teaching procedures.

SPE 606 ThryInstrPract:Emot/Soc/Behav (3 credits)
This course covers personal, social, and emotional disorders in an educational setting, including methods of identification, assessment, and instructional planning; develops skills in effective classroom management and creating classroom climate conducive to learning and growth. It also provides comprehensive coverage of a variety of models of disciplines and aids students in building systems and conceptual models of total discipline, emphasizing activities promoting pupil motivation and classroom management and organization of the environment, instruction, behavior and record keeping.

Restrictions: Enrollment is limited to Graduate level students.

SPE 607 ThryInstrPrctStdntsW/Lowlnccid (3 credits)
This course covers personal, social, and emotional disorders in an educational setting, including methods of identification, assessment, and instructional planning; develops skills in effective classroom management and creating classroom climate conducive to learning and growth. It also provides comprehensive coverage of a variety of models of disciplines and aids students in building systems and conceptual models of total discipline, emphasizing activities promoting pupil motivation and classroom management and organization of the environment, instruction, behavior and record keeping.

Restrictions: Enrollment is limited to Graduate level students.

SPE 607F FE Students W/ Low Disabilities (0 credits)
This course covers personal, social, and emotional disorders in an educational setting, including methods of identification, assessment, and instructional planning; develops skills in effective classroom management and creating classroom climate conducive to learning and growth. It also provides comprehensive coverage of a variety of models of disciplines and aids students in building systems and conceptual models of total discipline, emphasizing activities promoting pupil motivation and classroom management and organization of the environment, instruction, behavior and record keeping.

SPE 608 FamiliesSchls&Cmnty:CommCollab (3 credits)
This course focuses on the home-school partnerships, issues of family and professional collaboration and diversity, and methods of promoting adult communication and management strategies. It applies the knowledge of cultural and linguistic diversity and the significance of socio-cultural and political contexts as they relate to the family, culture and society. It identifies the members of teams designed to support and optimize children's educational needs and social-emotional development and the network of community services and resources available to individuals, families and groups affected by social, environmental, health and related problems.

Restrictions: Enrollment is limited to Graduate level students.

SPE 608F FE Families/SchoolsCommunities (0 credits)
This course focuses on the home-school partnerships, issues of family and professional collaboration and diversity, and methods of promoting adult communication and management strategies. It applies the knowledge of cultural and linguistic diversity and the significance of socio-cultural and political contexts as they relate to the family, culture and society. It identifies the members of teams designed to support and optimize children's educational needs and social-emotional development and the network of community services and resources available to individuals, families and groups affected by social, environmental, health and related problems.
SPE 609 SPED Clinical Practicum I (3 credits)
This is a combined seminar/internship experience. This fieldwork experience will provide the candidate with an opportunity for in-depth varied and continuous instruction experiences. The practicum will include a variety of researched based instructional practices, assessment procedures, classroom management strategies and organizational strategies to provide structured opportunities for professional growth and stimulation. These experiences will enable the candidate to (a) apply the knowledge and skills acquired through his/her study and previous experience to actual classroom situations that a teacher will face in a Response to Intervention Classroom; (b) integrate the concepts and skills from different prior learning experiences as well as researched based principles in reading, comprehension and writing for educational programming and apply to individual situations; (c) become involved in the routine functions of a classroom teacher including planning, assessment, progress monitoring and collaboration with peers. Course requirements are designed to meet Departmental and Commonwealth standards.
Restrictions: Enrollment is limited to Graduate level students.

SPE 610 SPED Clinical Practicum II (3 credits)
This is a combined seminar/internship experience. This fieldwork experience will provide the candidate with an opportunity for in-depth varied and continuous instruction experiences. The practicum will include a variety of researched based instructional practices, assessment procedures, classroom management strategies and organizational strategies to provide structured opportunities for professional growth and stimulation. These experiences will enable the candidate to (a) apply the knowledge and skills acquired through his/her study and previous experience to actual classroom situations that a teacher will face in a Response to Intervention Classroom; (b) integrate the concepts and skills from different prior learning experiences as well as researched based principles in mathematics and content areas for educational programming and apply to individual situations; (c) become involved in the routine functions of a classroom teacher including planning, assessment, progress monitoring and collaboration with peers. Course requirements are designed to meet Departmental and Commonwealth standards.
Restrictions: Enrollment is limited to Graduate level students.

SPE 611 SPED Lab & Seminar (3 credits)
This 30-hour practicum with additional online course content provides a culminating, clinical experience in which candidates apply theories and concepts learned in prior coursework in authentic teaching environments. Prerequisite: completion of all special education coursework.
Prerequisites: SPE 4805 and SPE 4815 and SPE 4825 and SPE 4885 and SPE 4905 and SPE 4915 or SPE 550 or SPE 602 or SPE 603 or SPE 607 or SPE 606 or SPE 700

SPE 612 Inclusive Classroom Practices (3 credits)
This course is a comprehensive study of theoretical issues and research-based diagnosis, instructional planning, and programmatic organization of instruction for children with disabilities in inclusive environments. Content will cover curriculum design, development of programs of differential instruction involving evidence-based interventions that meet students’ needs based on formative assessment, developmental and educational information; integrated learning experiences; specialized adaptations and resources; practices and procedures validated for specific characteristics of learners and settings; prevention and intervention strategies from multiple theoretical approaches for individuals at-risk for academic or behavioral failure; systematic implementation of instructional variables; systems management necessary for effective instruction of children with disabilities; and promote an understanding of the underlying theories, issues and methods for managing classroom environments.
Restrictions: Enrollment is limited to Graduate level students.

SPE 612F FE: Teach Inclusive Environments (0 credits)
This course is a comprehensive study of theoretical issues and research-based diagnosis, instructional planning, and programmatic organization of instruction for children with disabilities in inclusive environments. Content will cover curriculum design, development of programs of differential instruction involving evidence-based interventions that meet students’ needs based on formative assessment, developmental and educational information; integrated learning experiences; specialized adaptations and resources; practices and procedures validated for specific characteristics of learners and settings; prevention and intervention strategies from multiple theoretical approaches for individuals at-risk for academic or behavioral failure; systematic implementation of instructional variables; systems management necessary for effective instruction of children with disabilities; and promote an understanding of the underlying theories, issues and methods for managing classroom environments.
Restrictions: Enrollment is limited to Graduate level students.
SPE 615 F FE: Tching Inclsve Adol Envirnments (3 credits)
The focus of this course is on the developing of skills dealing with effective inclusive classroom management and creating classroom climate conducive to student achievement. It provides comprehensive coverage of a variety of discipline models to aid candidates in building systems and conceptual models of total discipline based on their underlying theories; emphasizes activities promoting positive behavioral supports; increases pupil motivation; applies methods for establishing cooperative classroom routines, procedures, and practices; organizes the environment, including school wide, classroom, and individual supports; measures and reports progress. This course of study will focus on the unique needs of students in grades seven through twelfth grades. Course study will include a focus on understanding how adolescent behaviors are influenced by pedagogical practices and classroom environments. While general education curriculum is appropriate for the majority of students with disabilities, secondary learners who are at-risk for academic and behavioral failure, including those with disabilities, have specific learning and behavioral characteristics that can undermine progress through general education curriculum. Course content will include a careful analysis of the specific needs of intermediate and secondary aged learners, including: slower rates of acquiring information and skills, deficits in the ability to generalize learned skills to other settings or conditions, and a lack of ability to retain skills, all of which directly influence student behavior. Furthermore, course study will focus on the unique psychosocial problems of adolescents, social and interpersonal skill training priorities of young adults, classroom management and motivational strategies for adolescents, and validated learning strategies for adolescents and young adults.

SPE 616 F Perspect on Gifted/Talented (3 credits)
The purpose of this course is to provide educators and education advocates with the historical and current perspectives in the field of gifted education and talent development. Course topics will include both theoretical foundations - related to theories, models, local and federal policy, and research - and practical considerations - such as identification, differentiation for academically talented students, advocacy, and collaboration with various stakeholders. Additionally, current issues in the field of gifted education and talent development (e.g. identification of traditionally underrepresented populations, service delivery models, etc) will be explored and students will be responsible for identifying relevant and reputable organizations and resources for meeting the needs of academically talented students.

SPE 620 F Fund SE Prac for School Ldrs (3 credits)
This course is a critical study of the contemporary and controversial issues within the field of special education. Emphases will be placed on the role of the supervisor or administrator. Consideration will be given to the philosophical, psychological, and sociological basis of teacher education, including an analytical review of research-based curricula, programmatic innovations, policy issues and their effects, and ethical practices. Discussions will focus on evidence-based core concepts that contribute to effective program planning; investigation of cognitive, academic, behavioral, and psycho-social solutions and implications for those working with exceptional students; and future implications for the advancement of special education diagnostic and instructional services. Restrictions: Enrollment is limited to Graduate level students.

SPE 620 F FE SPED School Leaders (0 credits)
SPE 621 F Law, Pol & Proced for SE Sup (3 credits)
This course is designed to provide an overview of the legal rights of students and their families in the field of special education, with particular focus on the supervisor's role in implementing and monitoring policy and procedures in districts' special education programs. Content covered includes an overview of laws and litigation and the current status of legislation dealing with special education. The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law, and judicial decisions interpreting those laws are reviewed. This course will focus on the supervisor's role in addressing issues of identification, IEP development and implementation, equal protection, extended school year (and day), functional behavioral analysis, teacher assistants, least restrictive environments, transition, procedural due process, complaint resolution, and substantive due process doctrines to school practices affecting students with disabilities. Additionally, attention will be given to preparation of focus audits, data collection, basic compliance issues, communicating and collaborating with parents and maintaining active parental support groups. Also, case studies will be conducted that deal with issue, rule, analysis and conclusion (IRAC), as a tool to provide a framework for supervisors to rapidly increase their understanding of emerging, complex legal issues. Restrictions: Enrollment is limited to Graduate level students.
Restrictions: Enrollment is limited to Graduate level students.

SPE 621F FE Law/Policy/Procr SPED Supvr (0 credits)

SPE 622 Admin & Supv:Spec Ed Progs (3 credits)
The purpose of this course is to provide the student an opportunity for in-depth understanding of the supervisory and administrative duties for the role of Supervisor of Special Education. This course provides the Special Education Supervisor candidate with a specified professional knowledge-base included in the following aspects of leadership: decision-making, leadership theory, communication skills, human relations theory, administrative theory, policy analysis/evaluation, supervision/assessment practices. Prerequisite: SPE 4805

Restrictions: Enrollment is limited to Graduate level students.

SPE 622F FE SPED Admin & Supervisor (0 credits)

SPE 623 Advanced Fieldwork/Seminar (3 credits)
This is a combined seminar/internship experience. This fieldwork experience will provide the candidate with an opportunity for in-depth varied and continuous administrative experiences. The practicum will attempt to include a blend of all the administrative experiences possible to provide professional growth, maturity and stimulation. These experiences will enable the candidate to (a) apply the knowledge and skills acquired through his/her study and previous experience to actual problem and day-to-day administrative duties faced by a Supervisor of Special Education; (b) integrate the concepts and skills from different prior learning experiences and focus on individual situations; (c) become involved in the routine functions of schools/school districts and Intermediate Units. Course requirements are designed to meet Departmental and Commonwealth standards. SPE 623 is taken as a culminating course by all students seeking Supervisor of Special Education certification. The requirements of this course include 180 clinical hours of fieldwork activities under the supervision of University faculty.

Restrictions: Enrollment is limited to Graduate level students.

SPE 623F FE Advanced Fieldwork/ Seminar (0 credits)

SPE 624 Adv Super & Curr Fieldwork/ Seminar (3 credits)
This is a combined seminar/internship experience. This fieldwork experience will provide the candidate with an opportunity for in-depth varied and continuous administrative experiences. The practicum will attempt to include a blend of all the administrative experiences possible to provide professional growth, maturity and stimulation. These experiences will enable the candidate to (a) apply the knowledge and skills acquired through his/her study and previous experience to actual problem and day-to-day administrative duties faced by a Supervisor of Special Education based on the Educational Leadership course content; (b) integrate the concepts and skills from different prior learning experiences and focus on individual situations; (c) become involved in the routine functions of schools/school districts and Intermediate Units. Course requirements are designed to meet Departmental and Commonwealth standards. The requirements of this course will be a continuation of SPE 623, specifically, an additional 180 hours, for a total of 360 hours of fieldwork activities under the supervision of University faculty.

Restrictions: Enrollment is limited to Graduate level students.

SPE 624F FE Adv Super & Curr Fieldwork/ (0 credits)

SPE 630 Design&Tech Differentiated Ins (3 credits)
This course will provide comprehensive coverage of what is involved in the consideration, assessment and implementation of assistive technology for students with special needs including those with specific learning disabilities found most commonly in regular and special education classrooms today. Additional topics will include current and emerging technologies used to enhance instruction for both regular and special learners; school practices related to technology integration and effective uses of technology in the general and special education classroom.

Restrictions: Enrollment is limited to Graduate level students.

SPE 638 Incl Prac/Stud Teach PK-8 (3 credits)
The focus of this course is on the developing of skills dealing with effective inclusive classroom management and creating classroom climate conducive to student achievement. It provides comprehensive coverage of a variety of discipline models to aid candidates in building systems and conceptual models of total discipline based on their underlying theories; emphasizes activities promoting positive behavioral supports; increases pupil motivation; applies methods for establishing cooperative classroom routines, procedures, and practices; organizes the environment, including school wide, classroom, and individual supports; measures and reports progress. This course of study will focus on the unique needs of students in grades K-8 as well as the development of proactive approaches to classroom and school environments. This will enable teachers to increase the amount of academic learning time in which to address the needs of all students in inclusive classrooms to increase achievement. In addition, the course study will include a focus on understanding how behaviors are influenced by pedagogical practices. Student Teaching. Student teachers are expected to complete 140 hours (equal to four 35-hour weeks) of hands-on teaching/co-teaching. The student teaching experience will occur during the second half of the course (SPE 638 or SPE 639). Time in the classroom may be spread out over more than 4 weeks, but must equal 140 hours. The class may be in a public (urban or suburban), private, charter, segregated special education, or parochial school. The class needs to contain at least 10% of students who have Individual Educational Plans (IEPs). Groups of four or more students, as in a resource room, with IEPs are permitted as long as the same group is provided consistent attention by the student/intern teacher for the duration of the experience. Alternate placements will be accepted on a case-by-case basis. In all placements, student teaching supervisors visit the classrooms and collaborate with the cooperating or mentor teacher(s) in supervising and evaluating the student or intern teacher. Student teaching supervisors conduct two formal observations of the student teacher.
SPE 638F FE Inclusive ClassPrac/ST K-8 (0 credits)
The focus of this course is on the developing of skills dealing with effective inclusive classroom management and creating classroom climate conducive to student achievement. It provides comprehensive coverage of a variety of discipline models to aid candidates in building systems and conceptual models of total discipline based on their underlying theories; emphasizes activities promoting positive behavioral supports; increases pupil motivation; applies methods for establishing cooperative classroom routines, procedures, and practices; organizes the environment, including school wide, classroom, and individual supports; measures and reports progress. SPE 640 Special Ed Student Teaching (2 credits)
SPE 690 Managing Fin & Material Resour (3 credits)
SPE 700 SpecialEd Law/Policy (3 credits)
This course is designed to provide an overview of the legal rights of students and their families in the field of special education. Students will explore the source, history, and current status of special education law. Content covered will include an overview of laws and litigation affecting special education. The American legal system, particularly in respect to special education, the constitutional and statutory provisions of federal and state law, and judicial decisions interpreting those laws are reviewed. This course relates equal protection, procedural due process, and substantive due process doctrines to school practices affecting students with disabilities. Restrictions: Enrollment is limited to Graduate level students.

SPE 701 Cog Proc: Resrch Brain Studies (3 credits)
This course provides an integrative survey of knowledge and research in the cognitive and neurological development of the young mind. The content is designed to connect cognition, neuroscience and educational practice with the critical periods of child development, including language development, visual systems, and psycho-social growth. Attention will be given to the basic structures of the brain and their corresponding dynamic functions, how neurons communicate with each other, and ways that networks of cells function in the vision, memory, and learning processes. The interaction and effects of learning and thinking and how the brain processes, consolidates and internalizes information will be explored. Restrictions: Enrollment is limited to Graduate level students.

SPE 702 Culturally Responsive Teaching (3 credits)
This course is designed to align instruction along with the assets and differential needs of diverse student populations through applying and incorporating multicultural perspectives into the teaching-learning process to maximize the academic, cognitive, personal, and social aspects of student learning. It will provide ways to design and deliver culturally responsive strategies to work with culturally and linguistically diverse students and empower their families in the teaching and learning process. The course focuses on addressing challenges to the reading achievement of culturally, linguistically, and economically diverse students with disabilities. Issues covered will include assessment and intervention, curricula development and social/affective skills related to family, community, values and culture of students from different cultural and ethnic groups. Restrictions: Enrollment is limited to Graduate level students.

SPE 710 WRP: Intro Multisens Lang Inst (1 credit)
This online Wilson introductory course examines the definition of dyslexia and common characteristics, reading research and the five areas of reading in relation to students beyond grade two with persistent phonological coding deficits. Specifically studies the Wilson Reading System® (WRS), including student identification and placement, program implementation, progress monitoring, scheduling, and creating a successful classroom environment; principles of language structure, and how to teach language with direct, multisensory methods. Wilson Reading Certification course. Restrictions: Enrollment is limited to Graduate level students.

SPE 711 WRP: Int Intr- NonRepsRdr 1-3 (3 credits)
This course presents in detail the multisensory structured language instruction that is required for teaching students beyond grade two with word-level deficits who are unresponsive to previous instruction. This online course provides practical application of reading research, with particular emphasis on phonological awareness, phonics and spelling at the beginning levels of decoding and encoding as well as expands upon these concepts with specific instruction in the closed syllable pattern. Provides specific procedures to teach the concepts presented in Wilson Reading System (WRS) Steps 1-3. Additional topics include accuracy and automaticity of word recognition, fluency with decodable and authentic text, vocabulary and listening/reading comprehension at beginning stages of reading. Wilson Reading Certification course. Prerequisite: SPE 710 Restrictions: Enrollment is limited to Graduate level students.
SPE 712 WRP: Int Instr- NonRepsRdr 4-6 (3 credits)
This is a continuation of the Wilson Steps 1-3 on-line course. Presents in detail the multisensory structured language instruction that is required for teaching students beyond grade two with word-level deficits who are unresponsive to previous instruction. This online course provides practical application of reading research, with particular emphasis on phonological awareness, phonics and spelling at the beginning levels of decoding and encoding as well as expands upon these concepts with specific instruction in the vowel-consonant-e, open, and consonant-le syllable patterns. Provides specific procedures to teach the concepts presented in Wilson Reading System® (WRS) Steps 4-6. Additional topics include the ten critical points of the Wilson Reading System, dyslexia, non-controlled text, and handwriting. Wilson Reading Certification course.
Prerequisite: SPE 710 and SPE 711
Restrictions: Enrollment is limited to Graduate level students.

SPE 713 WRP: Int Instr- NonRepsRdrPrac (3 credits)
This course, a supervised practicum, requires identifying and securing a practicum student in grades 4 - 12 with significant word level deficits, selected according to WRS practicum student selection criteria. Although not required, a second practicum student is highly recommended. The practicum entails successful delivery of a minimum of 60 Wilson Reading System (WRS) lessons and teaching mastery through WRS Step 4.2. A Wilson trainer observes the participant working with his/her student five times during the practicum via videoconferencing. Must demonstrate that the teaching plan is based on continuous assessment of the student's needs. *This course is completed over two semesters, generally spanning one academic year. Prerequisite: SPE 710 and completion of/ or concurrent enrollment in SPE 711/SPE 712. Please Note: Although completion of SPE 710, SPE 711, SPE 712 and SPE 713 are required for WRS Level I Certification, certification is not guaranteed and is dependent upon successful fulfillment of all Wilson requirements.
Restrictions: Enrollment is limited to Graduate level students.

SPE 720 Intro ASD: Caus Diag & Advoc (3 credits)
This course will provide candidates with an introduction to Autism Spectrum Disorders (ASD). With the increase in the number of individuals being diagnosed with ASD, this course will examine the challenge ASD presents to families, educators, students, related service providers, advocates, and policy makers. Course content will include an overview of ASD; family issues and challenges; ASD screening, diagnosis and assessment; an overview of intervention and treatment approaches; accessing appropriate supports and services; policy issues; advocacy and the experience of individuals living with ASD. Autism Spectrum Disorder Specialist Endorsement course.
Restrictions: Enrollment is limited to Graduate level students.

SPE 720F FE Intro to ASD (0 credits)
This course will provide candidates with an introduction to Autism Spectrum Disorders (ASD). With the increase in the number of individuals being diagnosed with ASD, this course will examine the challenge ASD presents to families, educators, students, related service providers, advocates, and policy makers. Course content will include an overview of ASD; family issues and challenges; ASD screening, diagnosis and assessment; an overview of intervention and treatment approaches; accessing appropriate supports and services; policy issues; advocacy and the experience of individuals living with ASD. Autism Spectrum Disorder Specialist Endorsement course.

SPE 721 Aug & Alt Com & Soc Stratg (3 credits)
This course will focus on a wide range of current research and evidence-based practices in the area of Augmentative and Alternative Communication (AAC) as it is implemented to increase, improve, and maintain functional communication skills of students with Autism Spectrum Disorder (ASD). In addition, specific strategies and techniques to address socialization skills for individuals with ASD as well as their communication partners will be addressed. Case studies, discussions, and activities will be utilized to personalize these strategies and techniques. Autism Spectrum Disorder Specialist Endorsement course.
Restrictions: Enrollment is limited to Graduate level students.

SPE 721F FE Aug & Alt Com & Soc Stratg (0 credits)
This course will focus on a wide range of current research and evidence-based practices in the area of Augmentative and Alternative Communication (AAC) as it is implemented to increase, improve, and maintain functional communication skills of students with Autism Spectrum Disorder (ASD). In addition, specific strategies and techniques to address socialization skills for individuals with ASD as well as their communication partners will be addressed. Case studies, discussions, and activities will be utilized to personalize these strategies and techniques. Autism Spectrum Disorder Specialist Endorsement course.

SPE 722 Evid Based Prac: AI&I Method (3 credits)
This course will provide comprehensive coverage of the importance of using evidence-based practice in assessment, instruction, and implementation of interventions for individuals with Autism Spectrum Disorder (ASD). Course content will include identifying the legal basis and requirements for evidence-based practice; a review of how to locate and evaluate evidence in the literature base; a review of the theoretical basis of, and evaluation of the empirical evidence for screening and assessments; a review of the theoretical basis of, and evaluation of the empirical evidence for screening and assessments; the continuum of interventions from traditional behavioral to social-developmental-pragmatic; comprehensive program approaches; and instructional strategies in the classroom. Additional topics will include the use of medical, dietary, and sensory interventions in the schools; pseudoscience and fad interventions; and finding the middle ground between parents and professionals in the decision-making process. Autism Spectrum Disorder Specialist Endorsement course.
Restrictions: Enrollment is limited to Graduate level students.

SPE 722F FE Evid Based Prac AI&I Method (0 credits)
This course will provide comprehensive coverage of the importance of using evidence-based practice in assessment, instruction, and implementation of interventions for individuals with Autism Spectrum Disorder (ASD). Course content will include identifying the legal basis and requirements for evidence-based practice; a review of how to locate and evaluate evidence in the literature base; a review of the theoretical basis of, and evaluation of the empirical evidence for screening and assessments; a review of the theoretical basis of, and evaluation of the empirical evidence for screening and assessments; the continuum of interventions from traditional behavioral to social-developmental-pragmatic; comprehensive program approaches; and instructional strategies in the classroom. Additional topics will include the use of medical, dietary, and sensory interventions in the schools; pseudoscience and fad interventions; and finding the middle ground between parents and professionals in the decision-making process. Autism Spectrum Disorder Specialist Endorsement course.
SPE 723 Autism: Behv Manag Approaches (3 credits)
This course will examine and introduce the major therapies/educational interventions that have been developed to treat autism and related pervasive developmental disorders. Applied behavior analysis (ABA), an empirically-validated treatment for individuals with autism and related disabilities will be discussed in detail. In addition, other emerging treatments including Greenspan, Relationship Development Intervention, and the principles of Positive Behavioral Supports (PBS) in Universal Design for Learning (UDL) will be examined in relation to ABA. In addition, scientific criteria will be compared to pseudoscientific criteria for various interventions. This course is relevant for both novices and experienced practitioners in the field of autism treatment. Autism Spectrum Disorder Specialist Endorsement course.
Restrictions: Enrollment is limited to Graduate level students.

SPE 723F FE Aut: Behv Manag Approaches (0 credits)
This course will examine and introduce the major therapies/educational interventions that have been developed to treat autism and related pervasive developmental disorders. Applied behavior analysis (ABA), an empirically-validated treatment for individuals with autism and related disabilities will be discussed in detail. In addition, other emerging treatments including Greenspan, Relationship Development Intervention, and the principles of Positive Behavioral Supports (PBS) in Universal Design for Learning (UDL) will be examined in relation to ABA. In addition, scientific criteria will be compared to pseudoscientific criteria for various interventions. This course is relevant for both novices and experienced practitioners in the field of autism treatment. Autism Spectrum Disorder Specialist Endorsement course.

SPE 726 American Sign Language I (3 credits)

SPE 730 Ed Found - Deaf & Hard of Hear (3 credits)
This course introduces basic concepts for the education of students who are deaf and hard of hearing. Topics covered will include the social construction of deafness and hearing loss; language acquisition and literacy development in children who are deaf and hard of hearing; educational philosophies and approaches; sign language systems in education; assistive technology including cochlear implants; placement options; supports for inclusive practices; and specially designed instruction, including adaptations for students who are deaf and hard of hearing and children with additional special needs.
Restrictions: Enrollment is limited to Graduate level students.

SPE 730F FE Foundations-Deaf Hard of He (0 credits)
This course introduces basic concepts for the education of students who are deaf and hard of hearing. Topics covered will include the social construction of deafness and hearing loss; language acquisition and literacy development in children who are deaf and hard of hearing; educational philosophies and approaches; sign language systems in education; assistive technology including cochlear implants; placement options; supports for inclusive practices; and specially designed instruction, including adaptations for students who are deaf and hard of hearing and children with additional special needs.

SPE 731 Lang, Lit & Comm Dev-Deaf & HH (3 credits)
This course will introduce students to the components of language, normal developmental sequences in children, and the impact of hearing loss upon language acquisition. Auditory and visual strategies for facilitating language acquisition among students who are deaf and hard of hearing will be included, as will protocols for integrating language instruction into academic content area instruction. Students will be introduced to the array of communication options available to families of children who are deaf and hard of hearing, early communication behaviors expressed by young children, and strategies for supporting families making communication decisions. The course will examine the components of literacy in conjunction with characteristics of scientifically-based reading research and principles of effective instruction. Students will examine reading programs created for students who are deaf and hard of hearing, create lesson plans, select websites and technology tools available online to support these lessons, practice using scoring rubrics, and develop personal plans for expanding their own communication skills over the course of the next year.
Restrictions: Enrollment is limited to Graduate level students.

SPE 731F FE Lang/Lit/Comm For DHH (0 credits)
This course will introduce students to the components of language, normal developmental sequences in children, and the impact of hearing loss upon language acquisition. Auditory and visual strategies for facilitating language acquisition among students who are deaf and hard of hearing will be included, as will protocols for integrating language instruction into academic content area instruction. Students will be introduced to the array of communication options available to families of children who are deaf and hard of hearing, early communication behaviors expressed by young children, and strategies for supporting families making communication decisions. The course will examine the components of literacy in conjunction with characteristics of scientifically-based reading research and principles of effective instruction. Students will examine reading programs created for students who are deaf and hard of hearing, create lesson plans, select websites and technology tools available online to support these lessons, practice using scoring rubrics, and develop personal plans for expanding their own communication skills over the course of the next year.

SPE 732 Curr, Inst & Lrn Env-Deaf & HH (3 credits)
This course will examine and introduce the major therapies/educational interventions that have been developed to treat autism and related pervasive developmental disorders. Applied behavior analysis (ABA), an empirically-validated treatment for individuals with autism and related disabilities will be discussed in detail. In addition, other emerging treatments including Greenspan, Relationship Development Intervention, and the principles of Positive Behavioral Supports (PBS) in Universal Design for Learning (UDL) will be examined in relation to ABA. In addition, scientific criteria will be compared to pseudoscientific criteria for various interventions. This course is relevant for both novices and experienced practitioners in the field of autism treatment. Autism Spectrum Disorder Specialist Endorsement course.

Restrictions: Enrollment is limited to Graduate level students.
SPE 732F FE Curric/Instruct/ DHH (0 credits)

SPE 733 List & Spk Skills - Deaf & HH (3 credits)
This course will provide information regarding the etiology and age of onset of hearing loss, anatomy and physiology of the hearing mechanism, degree and type of hearing loss, and interpretation of audiological results. The course will also offer information on auditory skill development, the utilization of various forms of amplification including hearing aids, cochlear implants, and FM systems, and the relationship of classroom acoustics to auditory access. Additionally, information in the area of spoken language development will be provided, including speech sound acquisition, development of vocabulary, syntax and pragmatics, and the relationship of listening and spoken language to literacy.

Restrictions: Enrollment is limited to Graduate level students.

SPE 733F FE Listen/Speak Skills DHH (0 credits)
This course will provide information regarding the etiology and age of onset of hearing loss, anatomy and physiology of the hearing mechanism, degree and type of hearing loss, and interpretation of audiological results. The course will also offer information on auditory skill development, the utilization of various forms of amplification including hearing aids, cochlear implants, and FM systems, and the relationship of classroom acoustics to auditory access. Additionally, information in the area of spoken language development will be provided, including speech sound acquisition, development of vocabulary, syntax and pragmatics, and the relationship of listening and spoken language to literacy.

SPE 734 Sign Comm in Instruct Settings (3 credits)
This course introduces and expands upon the use of a variety of sign languages and sign communication systems in instructional settings. Among the topics covered are the history and structure of American Sign Language (ASL), the nature and characteristics of artificial sign systems developed to represent English and hybrid systems such as those described as "contact signing." The parameters and use of fingerspelling as an educational tool will also be included. Various philosophies and methodologies of incorporating sign communication in educational settings will be covered. Students will be exposed to the appropriate use of sign languages and sign systems in instructional settings and how they may be used to enhance learning by deaf and hard of hearing students.

Restrictions: Enrollment is limited to Graduate level students.

SPE 734F FE Sign Comm in Instr Setting (0 credits)
This course introduces and expands upon the use of a variety of sign languages and sign communication systems in instructional settings. Among the topics covered are the history and structure of American Sign Language (ASL), the nature and characteristics of artificial sign systems developed to represent English and hybrid systems such as those described as "contact signing." The parameters and use of fingerspelling as an educational tool will also be included. Various philosophies and methodologies of incorporating sign communication in educational settings will be covered. Students will be exposed to the appropriate use of sign languages and sign systems in instructional settings and how they may be used to enhance learning by deaf and hard of hearing students.

SPE 739F FE Student Teach & Prof Sem (0 credits)

SPE 739 Student Teach & Prof Seminar (6 credits)
This is an individually designed field experience under approved supervision (including seminar meetings). This experience is designed as the capstone professional course for students seeking the Hearing Impaired (N-12) certification (PA). It approximates full-time working/teaching experience for one full semester. At the conclusion of this experience, students must have demonstrated proficiencies in instructional management and specially designed instruction, student engagement and motivation, curriculum planning, learning theory, problem solving in an educational setting, using computers in the classroom, integrating reading, language, and literacy skills in all classrooms, the use of audiovisual materials in the classroom, communicating effectively with students and staff members who are deaf or hard of hearing in their preferred languages and modes of communication, the identification of instructional resources, assessment of student achievement, the development of IEP goals and objectives, management of amplification systems, assessment and development of listening and spoken language skills, consultation with regular classroom teachers, modification of the classroom acoustic environment, and development of student compensating strategies. The fieldwork course is typically the final course in a certification sequence. Includes a weekly online seminar session. Prerequisites: SPE 600, 608, 612, 730, 731, 732, 733, 734

Restrictions: Enrollment is limited to Graduate level students.

SPE 739F FE Student Teach & Prof Sem (0 credits)

SPE 799 Intern/Student Teaching (0 credits)

Organizational Development and Leadership

ODL 200 Career & Personal Development (3 credits)
This course takes the student through a systematic and integrative process of examining eight research-supported "critical factors for success" as they apply to oneself and one's career. This course will be partially didactic, while being primarily small group oriented, experiential and self-reflective. No prerequisites.

Attributes: Undergraduate

ODL 300 Organizational Development (3 credits)
A behavioral science perspective on the causes and outcomes of individual and group behavior in organizations, and of the behavior of organizations. Topics will include motivation, attitudes, interpersonal processes, leadership, and macro-organizational behavior. Prerequisite: PSY 100 or permission of instructor.

Prerequisites: (PSY 1005 or PSY 1001 or PSY 100 or PSY 101 or PSY 1011)

Restrictions: Enrollment is limited to PLS/HDC level students.

Attributes: Undergraduate

ODL 310 Group & Team Dynamics (3 credits)
Almost all of our behavior takes place in the presence of other people. A number of small group practitioners and researchers have presented explanations for the why and how of individual behavior in group and team settings. Through the vehicle of the class as laboratory students will experientially examine a number of theories and concepts about individual behavior in group/team settings. Students through class discussions will learn to observe, understand, examine and influence team and group development. Prerequisite: PSY 100 or permission of instructor.

Prerequisites: PSY 1005 or PSY 1001 or PSY 100 or PSY 101

Restrictions: Enrollment is limited to PLS/HDC level students.

Attributes: Undergraduate
ODL 320 Leadership & Development (3 credits)
In this course, participants will review and discuss current applicable social science literature in an attempt to answer some of the following questions: Who is a leader? What is leadership? Does effective leadership originate in a person or in a set of actions or behaviors? What do we know about developing leaders? How do the constraints of organizations inhibit or facilitate leadership development? What is your current leadership style? These and related questions will be examined by class members through lectures, case studies, self-assessments, and experiential activities. Prerequisite: PSY 100.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ODL 330 Issues in Organizational Development (3 credits)
Selected issues in the field such as change agency, emotional intelligence, assessment, group and interpersonal processes, job enrichment, selection, and placement will be discussed. Small groups, role-playing, and other experiential exercises will clarify important concepts in the field. Prerequisite: ODL 300.
Prerequisites: ODL 300
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ODL 340 Coaching & Consulting (3 credits)
Roles, functions, tools and settings that define a consulting psychologist will be explored with an emphasis on the corporate world. Small groups, role-playing, videos and other experiential exercises will clarify and supplement readings, research and discussion. Prerequisites: PSY 100 or permission of the instructor.
Prerequisites: ODL 300 and ODL 320
Attributes: Undergraduate

ODL 350 Organizational Research (3 credits)

ODL 400 Cap Proj - Org Development (3 credits)
This course serves as a senior-level, research-based capstone in which organizational development students complete a research project typically developed in the Issues in Organizational Development course. Students will present and orally defend their research project to the Organizational Development and Leadership faculty. Prerequisite: ODL 330.
Prerequisites: PSY 2725 or ODL 330
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ODL 600 Adult Learning: Theory & App (3 credits)
Course introduces students to adult education theory that focuses on how adults learn, application of adult education theory, skills required in the delivery of adult learning programs and an introduction to group process. Students have an opportunity to develop a professional learning theory and model. Students also discover their learning style and how style impacts their ability to use their theory and model. Use of feedback as a tool for learning allows students to realize how to improve their facilitation approach. ALT Concentration Requirement
Restrictions: Enrollment is limited to Graduate level students.

ODL 605 Performance Consulting (3 credits)
Course presents to the Organization Development and Leadership professional the practical tools necessary to measure and evaluate the effectiveness of learning and change programs. A specific technology is presented in a step-by-step approach, which links the collaborative consulting process with performance assessment. The course focuses on increasing students’ ability to communicate and work with leaders in their organizations. ALT and OPD Concentration Requirement
Restrictions: Enrollment is limited to Graduate level students.

ODL 610 Adult Learning Methods (3 credits)
Major delivery methods and techniques that foster adult learning are discussed and demonstrated. Key elements are discussed that allow students to effectively facilitate adult learning methods that enhance individual and group learning. Emphasis is placed on student participation that fosters experiential learning. Impact of communication style on delivery effectiveness is also discussed. Some methods include case studies, role-plays, small groups, games, simulations, questioning techniques and icebreakers. ALT Concentration Requirement.
Prerequisite: ODL 600.
Prerequisites: ODL 600
Restrictions: Enrollment is limited to Graduate level students.

ODL 615 Learning Design & Implementation (3 credits)
Major steps in creating and designing adult education learning programs are discussed. Students develop a program that demonstrates their understanding of the key components of instructional design. Specific topics include collaborative relationships with customers/management, needs assessment, analyzing data, writing learning objectives, cost effectiveness of programs, selecting and sequencing content, developing learning materials and constructing evaluative instruments. ALT Concentration Requirement.
Restrictions: Enrollment is limited to Graduate level students.

ODL 618 e-Learning Design (3 credits)
Technological innovations are increasingly being used in training and development programs. Through the lens of adult learning theory, students will assess online learning needs, develop online modules, create online communities of learning and become familiar with the language and best practices associated with eLearning program development. (Pre-requisite: ODL 600 or permission from Director).
Prerequisites: ODL 600
Restrictions: Enrollment is limited to Graduate level students.

ODL 620 Psychological Assessments (3 credits)
The psychological theories and practices underlying a wide variety of instruments used in assessing individual and group behavior in organizations will be examined. Issues and topics will include employee selection, performance, ability, attitude and development. Participants learn how to critically evaluate measures to answer organizational issues. OPD Concentration Requirement.
Restrictions: Enrollment is limited to Graduate level students.

ODL 625 Psych of Executive Coaching (3 credits)
Executive Coaching has become a staple within many organizations. Executive Coaching is essentially a purposeful, relational intervention based in psychosocial concepts that leads to new and more complex level of functioning in one party. This course primarily assists the student in further development of their coaching skills and models while also examining coaching models, underlying constructs, skills and relevant coaching research. OPD Concentration Requirement, or ODL 680.
Restrictions: Enrollment is limited to Graduate level students.

ODL 630 Leadership & Team Development (3 credits)
Course focuses on theories and practices required in leading and developing teams. Issues of leadership behavior, interpersonal relations, group roles and stages of development are examined in an experiential laboratory. OPD Concentration Requirement.
Restrictions: Enrollment is limited to Graduate level students.
ODL 635 Positive Org Psych & Scholarship (3 credits)
This course will provide you with a grounding in the theories and applications of positive organizational and organizational psychology. The core premise of this course is that leadership and personal scholarship excellence are fundamentally tied to creating/enabling organizational contexts that build human strengths as well as unlock the positive and generative dynamics of vibrant human communities. This course will help you to create, foster, and develop organizations where people learn to thrive and perform at their best.
Restrictions: Enrollment is limited to Graduate level students.

ODL 640 Talent Dev & Mgt in Modern Org (3 credits)
An overview course that focuses on the emerging trend of talent management with a specific focus on how talent development, learning and training aligns with organizational strategy. Topics include areas like coordinating individual’s goals and organizational goals, positioning the learning function, and positioning yourself for a leadership position through talent development.
Restrictions: Enrollment is limited to Graduate level students.

ODL 642 Facilitating Adult Learning (3 credits)
Adult learning, as it relates to training/organization development, involves a combination of facilitation and presentation skills. Course focuses on strategies that increase students’ ability to interact with individuals and groups in these areas. Impromptu and planned presentations are audio taped and videotaped for students to receive constructive feedback. Facilitation techniques include managing question-and-answer sessions, dealing with resistive participants, and getting stalled sessions/groups going.
Restrictions: Enrollment is limited to Graduate level students.

ODL 644 Ldshp Dev Methods for Training (3 credits)

ODL 645 Leadership Principles (3 credits)
An introductory experiential course that acquaints the learner with the role and activities of being a leader in an organization. Management styles as well as key practices such as planning, decision making, change, conflict, motivation, group dynamics and control are discussed through interactive exercises.
Restrictions: Enrollment is limited to Graduate level students.

ODL 646 Career Dev Theory & Practice (3 credits)
Course provides students with an experiential understanding of the process of career development. Through a primarily experiential approach, where students craft their own career vision, students have an opportunity to engage key concepts in the field of career development. In addition, topics such as assessment, gender, choice, interventions and career management are experienced and discussed.
Restrictions: Enrollment is limited to Graduate level students.

ODL 647 Appreciative Inquiry (3 credits)
Appreciative Inquiry (Ai) is a methodology (and philosophy) for system intervention. Instead of examining what is wrong with a system and devising ways to fix it, Ai discovers what is right with a system and engages stakeholders to amplify and build upon that positive core and spurs innovation. Prerequisite: ODL 605 for ALT and OPD Concentrations, No Pre requisites for ODL Concentration
Restrictions: Enrollment is limited to Graduate level students.

ODL 648 Conflict & Negotiation (3 credits)

ODL 650 Organizational Leadership (3 credits)
This course provides a foundation for leadership competencies and characteristics necessary for guiding organizations. Students will use self-awareness tools grounded emotional intelligence developed especially for organizational leaders. Students will deepen their understanding of traditional and contemporary leadership research, theories and practices; and, explore the organizational contexts where work, management and leadership happen. Students will examine the responsibility that comes with leadership through readings, lectures, small group interactions and an online self-development process. This foundational course provides the framework for other online course work by establishing a community of learners.
Restrictions: Enrollment is limited to Graduate level students.

ODL 655 Org Change & Culture (3 credits)
Studying an organization’s culture is essential to any successful change effort. This course will enable students to study organizational theories, systems thinking, and the relationship between cultural issues and successful change implementation. They will experiment with taking on the role of a change agent through simulations, case studies, and studying the culture and changes in their own work place.
Restrictions: Enrollment is limited to Graduate level students.

ODL 660 Strategic Leadership (3 credits)
Consulting, advising, educating and coaching leaders necessitates a knowledge and understanding of the learning process and how that translates into strategy for changing any human social environment. In Strategic Leadership you will get a chance to broaden your knowledge and expand your leadership development toolkit as a leader and an educator of leaders. Specific strategies are considered and students begin to explore new ways of looking at leadership and their own behaviors in order to successfully implement strategies. Students have will have the opportunity to engage with a group of other students in an action research project and participate in a skill weekend where they reflect on the assumptions underlying their leadership actions.
Restrictions: Enrollment is limited to Graduate level students.

ODL 665 Leading Teams (3 credits)
A big part of organizational life takes place in groups. This course focuses on theories of group dynamics and development and the application to team membership and leadership. Facilitating teams, assessing the development of a team, influencing groups, group roles and group decision-making processes and the dynamics of creating effective virtual teams will all be explored. Students will work in teams in this class and will integrate class learning with their work experience on teams.
Restrictions: Enrollment is limited to Graduate level students.

ODL 668 Social Media & Learning (3 credits)

ODL 670 Strategic Leader Ethics & Values (3 credits)
Thinking strategically about your own development and the development of others is critical to your personal development and your ability to develop others. Leading at the next level requires knowledge and understanding of organizational vision, mission, values, ethics and communication. You will explore the impact of ethics and values on decision-making and organizational effectiveness. Students have the opportunity to focus on a particular area of organizational life and explore the impact of communications, perceptions, behaviors, culture, and current events on the outcomes of projects and initiatives. Pre-Requisites ODL 650 and ODL 655 or permission from Director.
Prerequisites: ODL 655 and ODL 650
Restrictions: Enrollment is limited to Graduate level students.
ODL 675 Implementing Change (3 credits)
Course aids students in designing and effectively implementing change programs and projects while achieving and sustaining performance. Students have an opportunity to create a change model from both experience and research. Major issues impacting change will be discussed including understanding resistance and techniques to overcome resistance to change. 
Restrictions: Enrollment is limited to Graduate level students.

ODL 680 Coaching & Mentoring Skills (3 credits)
This interactive course provides students with the opportunity to learn coaching skills. Specific topic areas include giving and receiving feedback, identifying and understanding communication style preferences, learning how to listen for the "real issues." This course is aligned with the competencies of the International Coach Federation (ICF) and can be applied to professional coaching portfolio hours. 
Restrictions: Enrollment is limited to Graduate level students.

ODL 685 Sem in Global Organ Issues (3 credits)
Learning to work across the boundaries of culture, opinions, language, ideas and time zones takes practice, experience, empathy and a sense of adventure. This Seminar in Global Leadership is offered in that spirit to give graduate students the opportunity to do a deep dive into other environments, exposure to multinational organizations like the United Nations, NGO’s, Schools, corporations, health systems etc. and to both study and get first hand exposure to training and leadership development functions, and what it takes to manage, facilitate and develop positive human development strategies from a multinational perspective. We will look at global learning and leadership at the individual, organization, national, regional and global levels. 
Restrictions: Enrollment is limited to Graduate level students.

ODL 686 Global Leadership (3 credits)
There is no better way to learn about cultural diversity and working in a multinational society than to actually travel to another country. The Study Tour Course includes 9 days in another country and pre work to prepare for the trip and post tour projects. This is a deeply experiential program with a focus on cultural diversity in a variety of education, business and social justice settings. The students will get a chance to network and learn from professionals in other countries.

ODL 688 Social Media & Learning (3 credits)
The course will examine the relationship between learning and social media. Current trends and use of social media in training, education, marketing, product development, data collection, customer service, and networking are some of the topics that will be covered. Students will discuss and evaluate uses of social media in informal social networking and formal knowledge management learning settings. Students will critique their own organization’s culture and values around learning and social media and the challenges and opportunities they pose.

ODL 690 Creative Problem Solving (3 credits)
Creative problem solving is an essential skill for people working in complex organizations. Creative thinkers reflect on the assumptions underlying actions and consider new ways of looking at and living in the world. They use methods to identify new alternatives. This course is a comprehensive guide for making worthwhile, influential and creative contributions at work. Students have an opportunity to identify and overcome personal and organizational barriers to develop breakthrough thinking. 
Restrictions: Enrollment is limited to Graduate level students.

ODL 695 Org Change: A Gestalt Approach (3 credits)
This course will focus on the Gestalt Model in organizational change consulting. Students will learn a powerful new perspective that recognizes behavior and interactions of systems, rather than individuals, creating new and dynamic possibilities for intervention. A theoretical and practical framework will be taught for high-impact consulting in organizations, exploring critical dilemmas and offering opportunities to practice new skills. This course will benefit students who wish to understand and develop process consultation skills while learning a new framework for managing change. Approved by International Coaching Federation (ICF) for coach accreditation hours. Prerequisite: ODL 605 for ALT and OPD Concentrations, No Pre requisites for ODL Concentration 
Restrictions: Enrollment is limited to Graduate level students.

ODL 700 Org Dev Theory & App (3 credits)
Course presents an overview of the fundamental components of organization development. Case studies are discussed and analyzed to demonstrate the fundamental components of OD. Practical skills and approaches are studied, such as change techniques and strategies, influence methods in dealing with leaders and consulting/learning models. Focus of course helps students implement successful learning or change programs in their organization. Topics of discussion include developing sponsorship, action research methods, survey feedback approaches, and dealing with conflict. Prerequisite: ODL 650 and 655 or Permission from Director. 
Prerequisites: ODL 650 and ODL 655
Restrictions: Enrollment is limited to Graduate level students.

ODL 705 Facilitating Org Development (3 credits)
This course includes an overview of how skilled facilitation helps individuals and groups learn and change within organizations. This course is part of a yearlong journey in which students immerse themselves in learning new skills to lead change. Students have an opportunity to practice organization development skills and learn new methods in helping individuals and groups learn to change. Participants learn to effectively use their own behaviors to influence others in creating work environments that foster collaborative, open problem solving, dealing with differences and participative decision making. (Prerequisites for ALT and ORG Psych: All Core Courses).

ODL 710 Interven Skills: Strat & Desgn (3 credits)
Students have an opportunity to complete a project demonstrating action research methodology. Course centers on understanding how to use interventions and the impact that interventions can have within an organizational setting. Students have an opportunity to design and facilitate interventions both in class and in their organization to assure the successful implementation of change and/or that individual learning takes place within their project. Prerequisite: ODL 705 
Prerequisites: ODL 705
Restrictions: Enrollment is limited to Graduate level students.

ODL 750 Change Leader:Facilitating Chg (6 credits)
This is a 6-credit Residency specifically required for students signing up for the online ODL program. The course is designed to be a transformative experience that builds on all of the preceding courses. It will provide real-time community interaction, face-to-face feedback, and opportunities to lead change experiments. During this residency, students learn how to close the gap between knowing and doing through specific teaching and learning strategies. The program is organized into a series of clinics focusing on areas like facilitative leadership, team leadership, implementing change, and power and authority dynamics. Prerequisite: ODL 650 or permission form Director. 
Prerequisites: ODL 650
ODL 770 Special Topics in ODL (3 credits)
ODL 775 Capstone Seminar (3 credits)
ODL 780 Research Design & Eval (3 credits)
The course helps students design and evaluate research in their respective organization or field of study. Methods are presented for application to work situations. Topics include: the similarities and differences between theoretical and applied research, use of data-gathering techniques, writing of research reports and evaluation methods for change, learning, and research projects. Prerequisite: Completion of Foundation Courses. Required for ALT and OPD concentration.
Restrictions: Enrollment is limited to Graduate level students.
ODL 785 Advanced Seminar (3 credits)
A capstone course and the last course taken in the Organization Development and Leadership Graduate Program. Course provides students the opportunity to complete a professional paper on a topic/issue of their choice utilizing research methods and statistics. Students also complete an independent/group project leading to the design and facilitation of a learning or change project. Prerequisite: ODL 780.
Prerequisites: ODL 780 (may be taken concurrently)
Restrictions: Enrollment is limited to Graduate level students.

**Autism Spectrum Disorder Specialist Endorsement**

**Goals and Objectives**

**Goal 1:** Students will demonstrate knowledge of the characteristics and etiology of ASD

**Objective 1.1:** The student will describe the defining characteristics of and diagnostic criteria for the various Autism Spectrum Disorders and other associated disorders, including common manifestations within communication and verbal behavior, social skills and social adaptation, repetitive and stereotypical behaviors, and patterns of responses to various sensory stimuli.

**Objective 1.2:** The student will identify and describe various diagnostic instruments and procedures, including their strengths and limitations.

**Goal 2:** Students will demonstrate an understanding of the use of assessment for instructional planning

**Objective 2.1:** The student will plan, structure, and conduct assessment for students with ASD.

**Objective 2.2:** The student will identify and demonstrate acceptable accommodations and appropriate adaptations to state- and district-wide assessments for students with ASD.

**Goal 3:** Students will demonstrate the ability to plan instructional interventions and methods across settings and grade levels.

**Objective 3.1:** The student will describe, interpret, utilize, and evaluate instructional strategies based on the principles of applied behavior analysis.

**Objective 3.2:** The student will demonstrated the ability to organize classroom teams to provide effective intervention and instruction by developing and managing a daily schedule for students and multiple staff that specifies appropriate levels.

**Goal 4:** Students will demonstrate the skills necessary to effectively collaborate with families, agencies, and the community

**Objective 4.1:** The student will demonstrate the ability to facilitate family and school collaboration by demonstrating sensitivity to the range of the impact that ASD may have on the family system.

**Objective 4.2:** The student will identify various agencies and community systems that support students with ASD in home, community, and work settings.

F courses are those that have a field assignment

**Early Childhood/Elementary Education Pre-kindergarten-4th grade B.L.S.**

Frank M. Bernt, PhD., Professor and Chair
Teacher Education Department
220 Merion Hall
610-660-1274
fbernt@sju.edu

The undergraduate Teacher Education programs are built upon a strong liberal arts curriculum provided through the General Education Program (GEP) at Saint Joseph's University. This enables students to integrate their understanding of interdisciplinary content with an understanding of child and adolescent learning.

Students balance theory and practice in teaching related courses. Most education courses provide students with the opportunity to investigate theory and research while participating in field experiences in local schools.

**B.L.S. Early Childhood Education PK-4: Learning Goals and Objectives**

**Goal 1:** The student will demonstrate an understanding of learner development.

**Objective 1.1:** The student will explain how learning occurs—how learners construct knowledge, acquire skills and develop disciplined thinking processes.

**Objective 1.2:** The student will identify readiness for learning and explain how development in one area may affect performance in others.

**Goal 2:** The student will demonstrate an understanding of learning differences.

**Goal 3:** The student will demonstrate an understanding of the central concepts of PK-4 teaching.
**Objective 3.1:** The student will identify and describe major concepts, assumptions, debates, processes of inquiry, and ways of knowing that are central to PK-4 teaching.

**Objective 3.2:** The student will identify and describe PK-4 content standards and learning progressions.

**Goal 4:** The student will plan instruction that supports PK-4 student learning.

**Objective 4.1:** The student will plan for instruction based on appropriate curriculum goals and content standards.

**Objective 4.2:** The student will plan instruction that is responsive to the identified strengths and needs of individual learners.

**Goal 5:** The student will demonstrate understanding and effective use of multiple methods of assessment.

**Objective 5.1:** The student will define and interpret types of valid and reliable education assessments (including screening, diagnostic, formative, summative, and authentic) and identify principles of their effective use.

**Objective 5.2:** The student will analyze and interpret assessment data to identify patterns and gaps in learning, to guide planning and instruction, and to provide meaningful feedback to all learners and their guardians.

**Goal 6:** The student will demonstrate an understanding of educating for social justice.

**Objective 6.1:** The student will describe key elements of interacting positively and respectfully with those of different racial, ethnic, language and socioeconomic backgrounds and sexual orientations.

**Objective 6.2:** The student will identify and describe practices and policies that reinforce inequalities and that undermine PK-4 student learning, as well as what can be done to challenge such practices in order to create a more just society.

Students admitted prior to Summer 2016 entered under the curriculum requirements for the BS in Early Childhood/Elementary Education Pre-kindergarten-4th Grade. Please see the SJU Academic Catalog for your admit year for additional information.

1. Also satisfies the GEP Social/Behavioral Science requirement
2. EDU 140 Public Schools & Social Equality in Urban Environments may substitute for this course

### Minor in Educational Studies

PLS students may pursue a minor in Educational Studies. For minor requirements, please see the Undergraduate Programs Education section of the catalog. Please note that the Educational Studies minor does not prepare students for teacher certification.

### Applying to the SJU Teacher Certification Program

All Education majors must apply to the SJU Teacher Certification Program to be eligible for PA Teacher Certification upon completion of their degree. This separate application process and the admission requirements are explained below. The application process for admission into the SJU Teacher Certification Program begins when a student is nearing completion of 45 credits towards his/her degree. The advisor will provide the student information regarding the application process. The candidate must complete the application and requirements for admission before earning 60 credits. Transfer students entering with more than 45 transfer credits must complete the application and requirements for admission to the SJU Teacher Certification Program in their first semester at SJU. Completed applications for admission into the SJU Teacher Certification Program will be reviewed by the Education Transition Committee and submitted to the Teacher Education Department Chair. Students will be notified in regards to the acceptance decision.

### Admission Requirements for the SJU Teacher Certification Program

- Must have completed a minimum of 48 credits
- Must have completed ENG 101 and ENG 102
• Must have completed 6 mathematics credits
• Must have an acceptable GPA. Acceptable GPA is defined as a GPA that is making forward progress towards a final cumulative GPA required for state certification. Typically, the minimum GPA is 2.8 for admission to a teacher certification program.
• Must meet Basic Skills Testing Requirements in at least one of the following assessments:
  • Qualifying PAPA scores
  • Qualifying SAT scores
  • Qualifying ACT scores
  • Qualifying ETS Core scores

Basic Skills Testing
According to ACT 168 (effective August 1, 2015), all undergraduate teacher certification candidates must achieve qualifying scores for one of the accepted tests of Basic Skills (Reading, Writing, and Math) in order to be admitted to a teacher certification program. Candidates must apply to a teacher certification program after they have completed a minimum of 48 undergraduate credits.

Candidates who have not satisfied the Basic Skills Test requirement may not register for education courses beyond 60 undergraduate credits, nor are they permitted to register for upper level professional education courses:

<td>EDU 495</td>
<td>Student Teaching ECE</td>
<td>12</td>
</tr>
<tr>
<td>Any 300-level SPE course or above</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

Candidates must satisfy the Basic Skills Testing requirement in order to apply any transfer credits to a teacher certification program.

Professional Testing Requirements
In addition to completing prescribed programs of study including field experiences, student teaching, practicums and internships, educators are often required to take and pass standardized tests in order to qualify for a professional license or certification. Testing requirements vary from state to state; therefore candidates must be alert to such requirements for any state in which they wish to be certified. Also, the requirements are subject to frequent changes, so one should always check to be sure they have the most current information regarding which test is required before they pay, register or take an exam. Because of the dynamic nature of the testing requirements, Saint Joseph’s University cannot be held responsible for any misinterpretation or misinformation (regardless of the source) used when deciding which test to take. The responsibility to take the proper tests lies solely with the candidates.

Note: The professional licensure tests are challenging and expensive. Candidates should take advantage of all available resources and practice test questions to seriously prepare themselves before sitting for a test.

Pedagogy and Content Exams
Candidates must earn a qualifying scores in the following pedagogy and/or content exams:

<table>

Education of the Deaf and Hard of Hearing Program
Program Goals and Objectives for the Education of the Deaf and Hard of Hearing Program

Goal 1: The student will demonstrate knowledge of learners who are deaf and hard of hearing.

Objective 1.1: The student will describe the range of programming for a classroom with students who are deaf and hard of hearing.

Objective 1.2: The student will analyze case studies of communication modes for deaf and hard of hearing learners.

Goal 2: The student will demonstrate an understanding of learners who have hearing losses from mild to profound.

Objective 2.1: The student will define the classifications of hearing loss.

Objective 2.2: The student will describe the characteristics of learners in a classroom where a variety of hearing losses and methods of communication occur.

Goal 3: The student will demonstrate knowledge of appropriate practices encountered in the education of deaf and hard of hearing learners.

Objective 3.1: The student will define the eight areas of concern of the Pennsylvania Agenda for Students who are Deaf and Hard of Hearing.

Objective 3.2: The student will evaluate educational placement options for deaf and hard of hearing students.

Goal 4: The student will demonstrate knowledge of current trends used in the education of deaf and hard of hearing learners.

Objective 4.1: The student will implement and reflect upon pedagogical strategies used with learners who are deaf and hard of hearing.

Objective 4.2: The student will identify strategies to support specially designed instruction across educational environments.

Goal 5: The student will demonstrate an understanding of the social, ethical, legal, and human issues that impact programs for deaf and hard of hearing learners.

Objective 5.1: The student will create learning experiences for deaf and hard of hearing learners.

Objective 5.2: The student will analyze case studies to determine specially designed instruction and accommodations for learners who are deaf and hard of hearing.

(30 to 36 credits) – Online
F courses are those that have a field assignment.

**Educational Studies Minor**

A minor in Educational Studies is available for undergraduates who are interested in building a foundation in education without pursuing PDE certification. Six courses are required for the minor:

Substitutions may be made only with the advance approval of the Chair of the Teacher Education Department.

**Five Year M.S. in Special Education - High Incidence**

**5 Year Special Education Programs**

**Urban Teaching Residents. Teacher Scholars High Incidence/Low Incidence**

Cathleen Spinelli, Ph.D., Coordinator 5 Year Programs
Merion Hall 215, 610-660-3064, cspinelli@sju.edu,
James Johnson, Ph.D., Graduate Advisor

Merion Hall 218, 610 660-1585, jjohns01@sju.edu

The graduate students are placed in a clinical experience based on their concentration. They work in the same school for a full year. Graduate students teach a modified schedule with time for their graduate coursework, spending 2/3 of each school day teaching. The school where they are placed utilizes 1) a research-based approach to instruction, 2) ongoing assessments to differentiate and individualize instruction, and 3) leadership and school culture that support teaching every child at his/her own level.

**The focus of each concentration/program of study:**

**The Urban Teaching Residency Program (UTR):**
Candidates earn a special accreditation:

- the International Dyslexia Association (IDA)
- the Wilson Language Program
- Social – Justice focus – including a series of Social-Justice seminars

**The Teacher Scholar High Incidence Program (TSHI):**
Candidates earn a special accreditation:

- the International Dyslexia Association (IDA)
- the Wilson Language Program
- work in small groups with private school students with language-based learning disabilities.

**The Teacher Scholar Low Incidence Program (TSLI):**
Candidates earn:

- the Autism Specialist endorsement
- work with special behavior plans (often ABA)
- work with private school students with physical, mental and/or behavioral disabilities.

Graduate students in any of the concentrations are expected to have obtained their Pennsylvania Instructional I certification prior to admission. They have the option of attaining their Special Education certification upon completion of the program of study.

Interested SJU undergraduates need to apply by January 15th. Applicants must have an overall gpa of at least 3.0.

**Overall Goals for Five Year Special Education Program**

**Goal 1:** The candidate has a thorough knowledge of curriculum content, language structure, behavioral strategies and relationship to literacy, assessment and resources and uses such knowledge to create effective learning experiences for students.

**Goal 2:** The candidate understands cognitive, language and learning processes, how students’ skills and abilities develop, individual strengths and needs and uses this knowledge to create opportunities for each student’s academic, social, behavioral, and emotional development.

**Goal 3:** The candidate understands disabilities, characteristics and consequences, and provides instruction to accommodate diversity.
**Goal 4:** The candidate plans and delivers instruction aligned curriculum maps, lesson plans, instructional routines and knowledge of student needs as identified in their IEPs.

**Goal 5:** The candidate communicates purpose of instructions, uses a variety of evidenced based instructional strategies and approaches that engage each student in the acquisition of lower and higher order skills necessary for academic learning.

**Goal 6:** The candidate communicates clear expectations and procedures and creates a safe respectful learning environment that encourages active, engaged learning, positive interaction and self-motivation for all students.

**Goal 7:** The candidate effectively communicates in the classroom and with the school community by using a variety of communication skills, including verbal and nonverbal techniques, technology, and media.

**Goal 8:** The candidate effectively uses formal and informal assessment strategies to evaluate student progress and inform design of instruction.

**Goal 9:** The candidate works with parents/family members, school colleagues, and community members to support student learning and development.

**Specific Goals for the Urban Teaching Residency Program and Teacher Scholar High Incidence Programs**

**Goal 1:** Structured Language: Phonology

**Objective 1:** Explicitly state the goal of any phonological awareness teaching activity

**Objective 2:** Select and implement activities that match a student’s developmental level of phonological skill

**Objective 3:** Design and justify the implementation of activities that match a student’s developmental level of phonological skill

**Objective 4:** Demonstrate instructional activities that identify, match, blend, segment, substitute, and delete sounds

**Objective 5:** Successfully produce vowel and consonant phonemes

**Objective 6:** Teach articulatory features of phonemes and words; use minimally contrasting pairs of sounds and words in instruction; support instruction with manipulative materials and movement

**Objective 7:** Direct students’ attention to speech sounds during reading, spelling, and vocabulary instruction using a mirror, discussion of articulatory features, and so on as scripted or prompted

**Goal 2:** Structured Language: Phonics

**Objective 1:** Plan lessons with a cumulative progression of word recognition skills that build one on another

**Objective 2:** Explicitly and effectively teach (e.g., information taught is correct, students are attentive, teacher checks for understanding, teacher scaffolds students’ learning) concepts of word recognition and phonics; apply concepts to reading single words, phrases, and connected text

**Objective 3:** Plan and effectively teach all steps in a decoding lesson, including single-word reading and connected text that is read fluently, accurately, and with appropriate intonation and expression

**Objective 4:** Adapt the pace, format, content, strategy, or emphasis of instruction according to students’ pattern of response

**Goal 3:** Structured Language: Spelling

**Objective 1:** Explicitly and effectively teach (e.g., information taught is correct, students are attentive, teacher checks for understanding, a rule for adding suffixes to base words.

**Objective 2:** Select materials and/or create lessons that address students’ skill levels

**Objective 3:** Analyze a student’s spelling errors to determine his or her instructional needs (e.g., development of phonological skills versus learning spelling rules versus application of orthographic or morphemic knowledge in spelling)

**Five Year M.S. for Urban Teaching Residency and Teacher Scholar High Incidence**

Take two SPE courses as electives

**Five-Year Combined B.S./M.S. in Biology, Chemistry, Physics, General Science, and Mathematics**

This program allows a student to complete in five years the requirements for both the B.S. in one of the sciences or mathematics and the M.S. in Education with certification to teach at the secondary level. Interested students should consult the description of the program provided in the curriculum section of this catalog that deals with the content field in which they wish to major.

**Graduate Teacher and Administrative Certification – Curriculum Supervisor and Supervisor of Special Education Certifications**

**Learning Goals and Objectives**

**Goal 1:** Students will demonstrate knowledge of Educational Leadership content, theory and practices.

**Objective 1.1:** Student will develop and articulate a shared school vision, mission, and goals for P-12 student success.

**Objective 1.2:** Students will demonstrate knowledge of school improvement plans based on data and school community input.
Goal 2: Students will demonstrate knowledge of and professional leadership skills in developing a strong, positive school culture to ensure P-12 student success.

Objective 2.1: Students will demonstrate knowledge of an effective instructional program conducive to a positive school culture and P-12 student learning.

Objective 2.2: Students will demonstrate knowledge of the instructional and leadership capacity of school staff and design comprehensive professional growth plans for self and others.

Goal 3: Students will demonstrate the ability to manage democratically the school organization, operations and resources for effective results.

Objective 3.1: Students will develop operational policies and procedures and assess them for long-term school plans and the welfare of the school community.

Objective 3.2: Students will demonstrate knowledge of human, fiscal and technological resources to manage school operations and develop capacity for democratic (distributed) leadership.

Goal 4: Students will demonstrate knowledge of policies, laws and regulations and apply the principles of integrity, equity and fairness in effectively advocating for children and public education.

Objective 4.1: Students will accurately interpret laws, policies and regulations to promote P-12 students success.

Objective 4.2: Students will apply basic Jesuit principles in a plan that promotes social opportunities for P-12 students.

Graduate Teacher and Administrative Certification – Curriculum Supervisor Certification

Learning Goals and Objectives

Goal 1: Students will demonstrate knowledge of Educational Leadership content, theory and practices.

Objective 1.1: Student will develop and articulate a shared school vision, mission, and goals for P-12 student success.

Objective 1.2: Students will demonstrate knowledge of school improvement plans based on data and school community input.

Goal 2: Students will demonstrate knowledge of and professional leadership skills in developing a strong, positive school culture and P-12 student learning.

Objective 2.1: Students will demonstrate knowledge of an effective instructional program conducive to a positive school culture and P-12 student learning.

Objective 2.2: Students will demonstrate knowledge of the instructional and leadership capacity of school staff and design comprehensive professional growth plans for self and others.

Goal 3: Students will demonstrate the ability to manage democratically the school organization, operations and resources for effective results.

Objective 3.1: Students will develop operational policies and procedures and assess them for long-term school plans and the welfare of the school community.

Objective 3.2: Students will demonstrate knowledge of human, fiscal and technological resources to manage school operations and develop capacity for democratic (distributed) leadership.

Goal 4: Students will demonstrate knowledge of policies, laws and regulations and apply the principles of integrity, equity and fairness in effectively advocating for children and public education.

Objective 4.1: Students will accurately interpret laws, policies and regulations to promote P-12 students success.

Objective 4.2: Students will apply basic Jesuit principles in a plan that promotes social opportunities for P-12 students.

Instructional Technologist Specialist Certification

Program Description
Today’s students require educators who understand and know how to use technology in the classroom. Through the Instructional Technology Specialist Certification from Saint Joseph’s University, you will be prepared to take on an important and growing role in the K-12 school environment.

With classes in multimedia production, instructional design, emerging technologies, alternative instruction and more, the online instructional technology specialist certification program from Saint Joseph’s University arms you with the theory and hands-on experience necessary to aid teachers in their quest to bring technology into the classroom. Moreover, graduates are eligible for Instructional Technology Specialist Certification in the Pennsylvania public school system, a credential that can be the basis for educational certification in many other states as well.

Website: http://online.sju.edu/idt/instructional-design-technology-certification

Admissions Requirements
Bachelor’s Degree with an overall GPA of 3.0 or higher

Internship Requirement for the PA Instructional Technology Specialist Certification
Field Experience in a K-12 school setting

Field Experience must take place while taking the Graduate Internship course during a 16 week semester (Spring, Summer, or Fall)

Required Clearances for the Graduate Internship
Prior to beginning the Graduate Internship, students must submit the SJU Background Clearance Document verifying that they have obtained all required clearances for their state.

All clearances must be valid through the end of your Graduate Internship.

Interdisciplinary Doctor of Education Program for Educational Leaders (IDEPEL)

Director, Aubrey Wang, Ph.D.

Program Description
The specific aim of the Interdisciplinary Doctor of Education Program for Educational Leaders (IDEPEL) is to prepare future leaders in Education both theoretically and practically for educational reform, social change, and social justice. Courses within this program connect the role of educational management, ethics, various research paradigms, culture, politics and policy in an interdisciplinary fashion. More generally, the Ed. D. program projects an ongoing vision of the Jesuit ideals of service and intellectual rigor. This is combined in partnership with and among University and community leaders.

Admissions Requirements and Procedures
Admission to IDEPEL
A cohort of approximately twenty-five members is formed every year according to the Admission Procedures and Requirements. Candidates for admission are considered for inclusion in the cohort based upon a faculty review process.

For the start of a new cohort group, each applicant will:
1. Submit a letter of application, completed application form, and $100 nonrefundable application fee;
2. Present official undergraduate and graduate transcripts;
3. Assure that two letters of recommendation are submitted by professionals familiar with the applicant’s academic or work experience, and the capacity to complete a doctoral program;
4. Submit a complete resume or vita to include all professional experience, education, certification, and other relevant information;
5. Submit two personal essays that:
   a. Document one’s own commitment to the education and growth of students and educators;
b. Identify one’s professional goals and how this program will help attain these goals.

**General Admission Requirements**

1. Master’s degree from an accredited institution;
2. Minimum graduate GPA of 3.5;
3. Computer competence and possession of, or access to, a computer with Internet access and printer (specifications to be provided);
4. A commitment to participate in the entire program of study in concert with the cohort group;
5. Participation in interviews with the Program Director and faculty;
6. A demonstrated capacity to complete a doctoral program; and
7. Completion of all application requirements.

**Admission Requirements FOR the Superintendent Letter of Eligibility**

1. A completed Saint Joseph’s University graduate application.
2. Master’s degree.
3. Official sealed transcript(s) of undergraduate/graduate coursework.
4. 3.0 Grade Point Average (GPA) in graduate work.
5. Two letters of recommendations from school district administrators; one of which must be from the applicant’s supervising administrator. Both letters must substantiate the candidate’s leadership potential and qualifications to become an assistant/superintendent of schools.
6. Principal or supervisory certificate.
7. Six years of satisfactory professional certificated service of which three of the six years must have been in a certificated supervisory or administrative capacity.
8. Portfolio items:
   - Essay concerning how superintendent’s shape learning in their schools
   - Resume that includes evidence of leadership potential (other leadership roles)
   - Applicant’s educational philosophy
   - Personal statement—a letter of intention outlining the candidate’s professional goals and educational objectives for attending the program.

Superintendent courses are taken at the doctoral level. Students must achieve a 3.5 GPA across these courses. These three courses may count toward the doctorate, if and only if, the student is admitted into the doctoral program within one year of completion of the three course sequence.

At the doctoral level, the superintendency fieldwork is integrated in the other three core courses. The course equivalence is as follows:

<table>

**Admission Requirements FOR Principal Certification**

1. A completed Saint Joseph’s University graduate application.
2. Official sealed transcript(s) of undergraduate/graduate coursework.
3. 3.0 Grade Point Average (GPA) in undergraduate work.
4. Personal statement – a 500 word statement of intention outlining the applicant’s professional goals and educational objectives for attending a program of their choice.
5. Valid teaching certificate.
6. Five years full-time teaching experience (by the time the degree is awarded).
7. An interview may be required at the discretion of the program director.
8. $35 application fee.
9. Two letters of recommendations from school district administrators; one of which must be from the applicant’s supervising administrator. Both letters must substantiate the candidate’s leadership potential and qualifications to become a school administrator.
10. Portfolio items:
   - Essay concerning how principals shape learning in their schools (500 words)
   - Resume that includes evidence of leadership potential (other leadership roles)
   - Applicant’s educational philosophy
   - A written description of a problem based learning activity (500 words)

For further information regarding the Interdisciplinary Doctor of Education Program for Educational Leaders (IDEPEL), contact the IDEPEL Program Director:

Aubrey H. Wang, Ph.D.
Merion Hall 266
(610) 660-3186
awang@sju.edu

**Program Goals and Learning Objectives**

**Goal 1:** Our graduates will develop strong qualitative and quantitative research skills as a basis for managing change in their fields.

**Objective 1.1:** Students become proficient in qualitative, quantitative, and mixed method research.

**Objective 1.2:** Students develop the capacity to design and implement their dissertation research.

**Objective 1.3:** Students develop the capacity to read and write within the technical requirements of the field.

**Goal 2:** Our graduates will gain experience at integrating theory and practice in their area of concentration.

**Objective 2.1:** Students gain experience at integrating theory and practice in their area of concentration through successful completion of their practicum projects.

**Goal 3:** Our graduates will develop a strong foundation in ethical leadership.

**Objective 3.1:** Students can articulate acceptable ethical norms and standards and can apply ethical or moral lens to leadership decisions.

**Goal 4:** Our graduates will develop mastery of specific skills in their area of concentration.

**Objective 4.1:** Students in the K-12 basic education area of concentration will demonstrate mastery of K-12 education leadership skills.
Objective 4.2: Students in the higher education area of concentration will demonstrate mastery of higher education leadership skills.

M.S. in Education with a Concentration in Educational Leadership with Curriculum Supervisor AND Supervisor of Special Education Certifications

Admission Requirements and Procedures

The Master of Science degree includes a Master of Science with a concentration in Educational Leadership geared towards school leaders, specifically Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents. For students with a previous M.S. degree, Graduate Teacher and Administrative Certificates (post-graduate program) certification programs are offered in each of those same fields (Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents).

The Master of Science degree with a concentration in Educational Leadership is a 36-credit professional degree that may also lead toward certification as a school supervisor (of curriculum and instruction in one's certification area, including special education) or principal. Prior acceptance in the program, an informal phone interview is required. Students are advised to contact the Director of Educational Leadership graduate programs for all advising needs – including academic progress and compliance for certification – on a semester basis.

Students must be formally admitted to the Educational Leadership program for certification eligibility. Five years of teaching experience (minimum three by the time of acceptance in the program) or experience related to the instructional process is required. A valid teaching certification or a chief school administrator’s verification of the completion of three years of relevant professional experience in an educational setting related to the instruction process must be included in the application materials. Students not seeking a certification and only seeking a Master’s with a concentration in Educational Leadership do not need a valid teaching certification and/or five years of full-time teaching experience.

Since Spring 2012, this program is offered online, as well as face-to-face. The curriculum and program requirements are the same for all online and face-to-face students.

In order to be eligible for programs leading to certification within the Educational Leadership combination offerings, applicants must be U.S. citizens or legal permanent residents. Application requirements are as follows:

- A completed Saint Joseph’s University graduate application.
- Official sealed transcript(s) of undergraduate/graduate coursework.
- Grade Point Average (GPA) in undergraduate work.
- Personal statement – a 500 word statement of intention outlining how the applicant’s professional goals fit the stated goals and objectives of the Educational Leadership graduate programs.
- Two letters of recommendations.
- Copy of a valid teaching certificate.
- Five years full-time teaching experience (minimum three by the time of acceptance in the program)
- An informal phone interview with the Graduate Programs Director.
- $35 application fee.

Finally, professional development is offered via the Digital Teacher Professional Development Program. The Digital Teacher Professional Development consists of five courses that are designed to prepare classroom teachers for the successful and seamless integration of technology using the school district’s curriculum.

Course Load

All courses must be completed at the 500 level or above. A full-time course load is three courses (9 credits) per term for fall and spring semesters, and four courses (12 credits) for the summer term. Working professionals may not register for more than two courses (6 credits) for the fall and spring terms and two courses (6 credits) for each summer term. Course load may be further discussed with the academic advisor on a one-on-one basis.

Any exceptions to this policy must be approved by the Graduate Programs Director. Students requesting full time status should submit a letter in writing to the Director of Graduate Education stating that they are working less than 20 hours per week during the semester(s) for which full-time status is being requested.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification.

Criteria for certification are demonstrated by professional behavior in the classroom and in fieldwork. Students who do not meet the high standards of professionalism established by the Pennsylvania Department of Education risk being dismissed from the fieldwork or the program.
Contact information for Graduate Admissions is as follows:

Graduate Operations Office
Saint Joseph’s University
5600 City Avenue
Philadelphia, PA 19131
Telephone: 610.660.1101
Fax: 610.660.1224
http://www.sju.edu/admissions/graduate/

Domestic students (U.S. Citizens, Permanent Residents, Refugees & Asylees) must complete and submit the Application Form, along with all credentials, application documents, and the required $35 USD application fee directly to the Graduate Operations Office. For applications submitted as a result of attendance at an Open House information session, the application fee is waived.

Applicants for admission must possess a Bachelor’s degree from a regionally accredited institution and must provide evidence of their ability and preparedness necessary for the satisfactory completion of graduate work. Specific requirements differ among the programs, and students are advised to consult the appropriate program requirements listed in each program section.

Domestic students who have received degrees from outside the U.S. should review our International Admissions section for information on required documentation. All documents submitted in support of an application will become the property of the University and are not returnable.

Terms of Acceptance
An applicant is afforded “full acceptance” when all admission criteria have been met and all required application materials have been submitted, reviewed and approved.

“Provisional acceptance” may be provided if an application is complete, but academic credentials have not been satisfied. In this case an applicant is allowed a trial semester of up to 9 credits. Candidates must receive a grade of B or better during all courses taken during the trial semester.

Applicants whose application package is incomplete may receive “conditional acceptance,” and permitted to register for up to 3 credits in the first semester. To be granted “conditional” status, an application must at least include and application form and unofficial transcript.

Applications that do not meet at least provisional academic requirements are generally not accepted.

Transfer of Courses
Applicants who have taken graduate courses elsewhere may request transfer of not more than six graduate credits in Arts and Sciences programs. Such requests must be filed at the time of application for admission. Only those courses which are judged to meet program requirements and in which a student has received a grade of B or better will be accepted. In no instance will courses taken more than five years ago be accepted for transfer credit. Under no conditions will Continuing Education units be accepted for transfer credit. However, Alliance for Catholic Education (ACE) approved courses are eligible for transfer.

Fieldwork Requirement
Effective Fall 2015, the three two-credits fieldwork courses (EDL 695, EDL 696, EDL 697) current in 2014-2015 were transitioned into two three-credits fieldwork courses (EDL 695 and EDL 696).

Learning Goals and Objectives

Goal 1: Students will demonstrate knowledge of Educational Leadership content, theory and practices.

Objective 1.1: Student will develop and articulate a shared school vision, mission, and goals for P-12 student success.

Objective 1.2: Students will demonstrate knowledge of school improvement plans based on data and school community input.

Goal 2: Students will demonstrate knowledge of and professional leadership skills in developing a strong, positive school culture to ensure P-12 student success.

Objective 2.1: Students will demonstrate knowledge of an effective instructional program conducive to a positive school culture and P-12 student learning.

Objective 2.2: Students will demonstrate knowledge of the instructional and leadership capacity of school staff and design comprehensive professional growth plans for self and others.

Goal 3: Students will demonstrate the ability to manage democratically the school organization, operations and resources for effective results.

Objective 3.1: Students will develop operational policies and procedures and assess them for long-term school plans and the welfare of the school community.

Objective 3.2: Students will demonstrate knowledge of human, fiscal and technological resources to manage school operations and develop capacity for democratic (distributed) leadership.

Goal 4: Students will demonstrate knowledge of policies, laws and regulations and apply the principles of integrity, equity and fairness in effectively advocating for children and public education.

Objective 4.1: Students will accurately interpret laws, policies and regulations to promote P-12 students success.

Objective 4.2: Students will apply basic Jesuit principles in a plan that promotes social opportunities for P-12 students.

M.S. in Education with a Concentration in Educational Leadership with Curriculum Supervisor Certification

Admission Requirements and Procedures

The Master of Science degree includes a Master of Science with a concentration in Educational Leadership geared towards school leaders, specifically Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents. For students with a previous M.S. degree, Graduate Teacher and Administrative Certificates (post-graduate program) certification programs are offered in each of those same fields (Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents).

The Master of Science degree with a concentration in Educational Leadership is a 36-credit professional degree that may also lead toward certification as a school supervisor (of curriculum and instruction in one’s certification area, including special education) or principal. Prior acceptance in the program, an informal phone interview is required. Students are advised to contact the Director of Educational Leadership graduate programs for all advising needs – including academic progress and compliance for certification – on a semester basis.

Students must be formally admitted to the Educational Leadership program for certification eligibility. Five years of teaching experience (minimum three by the time of acceptance in the program) or experience related to the instructional process is required. A valid teaching certification or a chief school administrator’s verification of the completion of three years of relevant professional experience in an educational setting related to the instruction process must be included in the application materials. Students not seeking a certification and only seeking a Master’s with a concentration in Educational Leadership do not need a valid teaching certification and/or five years of full-time teaching experience.

Since Spring 2012, this program is offered online, as well as face-to-face. The curriculum and program requirements are the same for all online and face-to-face students.

In order to be eligible for programs leading to certification within the Educational Leadership combination offerings, applicants must be U.S. citizens or legal permanent residents. Application requirements are as follows:

- A completed Saint Joseph’s University graduate application.
- Official sealed transcript(s) of undergraduate/graduate coursework.
- Grade Point Average (GPA) in undergraduate work.
- Personal statement – a 500 word statement of intention outlining how the applicant’s professional goals fit the stated goals and objectives of the Educational Leadership graduate programs.
- Two letters of recommendations.
- Copy of a valid teaching certificate.
- Five years full-time teaching experience (minimum three by the time of acceptance in the program)
- An informal phone interview with the Graduate Programs Director.
- $35 application fee.

Finally, professional development is offered via the Digital Teacher Professional Development Program. The Digital Teacher Professional Development consists of five courses that are designed to prepare classroom teachers for the successful and seamless integration of technology using the school district’s curriculum.

Course Load

All courses must be completed at the 500 level or above. A full-time course load is three courses (9 credits) per term for fall and spring semesters, and four courses (12 credits) for the summer term. Working professionals may not register for more than two courses (6 credits) for the fall and spring terms and two courses (6 credits) for each summer term. Course load may be further discussed with the academic advisor on a one-on-one basis.

Any exceptions to this policy must be approved by the Graduate Programs Director. Students requesting full time status should submit a letter in writing to the Director of Graduate Education stating that they are working less than 20 hours per week during the semester(s) for which full-time status is being requested.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification.

Criteria for certification are demonstrated by professional behavior in the classroom and in fieldwork. Students who do not meet the high standards of professionalism established by the Pennsylvania Department of Education risk being dismissed from the fieldwork or the program.

Contact information for Graduate Admissions is as follows:

Graduate Operations Office
Saint Joseph’s University
5600 City Avenue
Philadelphia, PA 19131
Telephone: 610.660.1101
Fax: 610.660.1224
http://www.sju.edu/admissions/graduate/

Domestic students (U.S. Citizens, Permanent Residents, Refugees & Asylees) must complete and submit the Application Form, along with all credentials, application documents, and the required $35 USD application fee directly to the Graduate Operations Office. For applications submitted as a result of attendance at an Open House information session, the application fee is waived.

Applicants for admission must possess a Bachelor’s degree from a regionally accredited institution and must provide evidence of their ability and preparedness necessary for the satisfactory completion of graduate work. Specific requirements differ among the programs, and students are
advise to consult the appropriate program requirements listed in each program section.

Domestic students who have received degrees from outside the U.S. should review our International Admissions section for information on required documentation. All documents submitted in support of an application will become the property of the University and are not returnable.

**Terms of Acceptance**

An applicant is afforded “full acceptance” when all admission criteria have been met and all required application materials have been submitted, reviewed and approved.

“Provisional acceptance” may be provided if an application is complete, but academic credentials have not been satisfied. In this case an applicant is allowed a trial semester of up to 9 credits. Candidates must receive a grade of B or better during all courses taken during the trial semester.

Applicants whose application package is incomplete may receive “conditional acceptance,” and permitted to register for up to 3 credits in the first semester. To be granted “conditional” status, an application must at least include and application form and unofficial transcript.

Applications that do not meet at least provisional academic requirements are generally not accepted.

**Transfer of Courses**

Applicants who have taken graduate courses elsewhere may request transfer of not more than six graduate credits in Arts and Sciences programs. Such requests must be filed at the time of application for admission. Only those courses which are judged to meet program requirements and in which a student has received a grade of B or better will be accepted. In no instance will courses taken more than five years ago be accepted for transfer credit. Under no conditions will Continuing Education units be accepted for transfer credit. However, Alliance for Catholic Education (ACE) approved courses are eligible for transfer.

**Fieldwork Requirement**

Effective Fall 2015, the three two-credits fieldwork courses (EDL 695, EDL 696, EDL 697) current in 2014-2015 were transitioned into two three-credits fieldwork courses (EDL 695 and EDL 696).

**M.S. in Education with a Concentration in Educational Leadership with Principal AND Curriculum Supervisor Certifications**

**Admission Requirements and Procedures**

The Master of Science degree includes a Master of Science with a concentration in Educational Leadership geared towards school leaders, specifically Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents. For students with a previous M.S. degree, Graduate Teacher and Administrative Certificates (post-graduate program) certification programs are offered in each of those same fields.
The Master of Science degree with a concentration in Educational Leadership is a 36-credit professional degree that may also lead toward certification as a school supervisor (of curriculum and instruction in one's certification area, including special education) or principal. Prior acceptance in the program, an informal phone interview is required. Students are advised to contact the Director of Educational Leadership for all advising needs – including academic progress and compliance for certification – on a semester basis.

Students must be formally admitted to the Educational Leadership program for certification eligibility. Five years of teaching experience (minimum three by the time of acceptance in the program) or experience related to the instructional process is required. A valid teaching certification or a chief school administrator’s verification of the completion of three years of relevant professional experience in an educational setting related to the instructional process must be included in the application materials. Students not seeking a certification and only seeking a Master’s with a concentration in Educational Leadership do not need a valid teaching certification and/or five years of full-time teaching experience.

Since Spring 2012, this program is offered online, as well as face-to-face. The curriculum and program requirements are the same for all online and face-to-face students.

In order to be eligible for programs leading to certification within the Educational Leadership combination offerings, applicants must be U.S. citizens or legal permanent residents. Application requirements are as follows:

- A completed Saint Joseph’s University graduate application.
- Official sealed transcript(s) of undergraduate/graduate coursework.
- Grade Point Average (GPA) in undergraduate work.
- Personal statement – a 500 word statement of intention outlining how the applicant’s professional goals fit the stated goals and objectives of the Educational Leadership graduate programs.
- Two letters of recommendations.
- Copy of a valid teaching certificate.
- Five years full-time teaching experience (minimum three by the time of acceptance in the program)
- An informal phone interview with the Graduate Programs Director.
- $35 application fee.

Additional application requirements for the Principal Certification Program include the following portfolio items:

Two letters of recommendations from school district administrators; one of which must be from the applicant’s supervising administrator. Both letters must substantiate the candidate’s leadership potential and qualifications to become a school administrator.

Portfolio items:

- Essay concerning how principals shape learning in their schools (500 words)
- Resume that includes evidence of leadership potential (other leadership roles)
- Applicant’s educational philosophy
- A written description of a problem based learning activity

Finally, professional development is offered via the Digital Teacher Professional Development Program. The Digital Teacher Professional Development consists of five courses that are designed to prepare classroom teachers for the successful and seamless integration of technology using the school district’s curriculum.

Course Load

All courses must be completed at the 500 level or above. Learning Goals and Objectives

Goal 1: Students will demonstrate knowledge of Educational Leadership content, theory and practices.

Objective 1.1: Student will develop and articulate a shared school vision, mission, and goals for P-12 student success.

Objective 1.2: Students will demonstrate knowledge of school improvement plans based on data and school community input.

Goal 2: Students will demonstrate knowledge of and professional leadership skills in developing a strong, positive school culture to ensure P-12 student success.

Objective 2.1: Students will demonstrate knowledge of an effective instructional program conducive to a positive school culture and P-12 student learning.

Objective 2.2: Students will demonstrate knowledge of the instructional and leadership capacity of school staff and design comprehensive professional growth plans for self and others.

Goal 3: Students will demonstrate the ability to manage democratically the school organization, operations and resources for effective results.

Objective 3.1: Students will develop operational policies and procedures and assess them for long-term school plans and the welfare of the school community.

Objective 3.2: Students will demonstrate knowledge of human, fiscal and technological resources to manage school operations and develop capacity for democratic (distributed) leadership.

Goal 4: Students will demonstrate knowledge of policies, laws and regulations and apply the principles of integrity, equity and fairness in effectively advocating for children and public education.

Objective 4.1: Students will accurately interpret laws, policies and regulations to promote P-12 students success.

Objective 4.2: Students will apply basic Jesuit principles in a plan that promotes social opportunities for P-12 students.

1 Students beginning Fieldwork fall 2015 will have 6 hours over a full year in Fieldwork I & II, so they will not need Fieldwork III

M.S. in Education with a Concentration in Educational Leadership with Principal, Curriculum Supervisor AND Supervisor of Special Education Certifications

Admission Requirements and Procedures
The Master of Science degree includes a Master of Science with a concentration in Educational Leadership geared towards school leaders, specifically Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents. For students with a previous M.S. degree, Graduate Teacher and Administrative Certificates (post-graduate program) certification programs are offered in each of those same fields (Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents).

The Master of Science degree with a concentration in Educational Leadership is a 36-credit professional degree that may also lead toward certification as a school supervisor (of curriculum and instruction in one’s certification area, including special education) or principal. Prior acceptance in the program, an informal phone interview is required. Students are advised to contact the Director of Educational Leadership graduate programs for all advising needs – including academic progress and compliance for certification – on a semester basis.

Students must be formally admitted to the Educational Leadership program for certification eligibility. Five years of teaching experience (minimum three by the time of acceptance in the program) or experience...
related to the instructional process is required. A valid teaching certification or a chief school administrator’s verification of the completion of three years of relevant professional experience in an educational setting related to the instruction process must be included in the application materials. Students not seeking a certification and only seeking a Master’s with a concentration in Educational Leadership do not need a valid teaching certification and/or five years of full-time teaching experience.

Since Spring 2012, this program is offered online, as well as face-to-face. The curriculum and program requirements are the same for all online and face-to-face students.

In order to be eligible for programs leading to certification within the Educational Leadership combination offerings, applicants must be U.S. citizens or legal permanent residents. Application requirements are as follows:

- A completed Saint Joseph’s University graduate application.
- Official sealed transcript(s) of undergraduate/graduate coursework.
  - Grade Point Average (GPA) in undergraduate work.
- Personal statement – a 500 word statement of intention outlining how the applicant’s professional goals fit the stated goals and objectives of the Educational Leadership graduate programs.
- Two letters of recommendations.
- Copy of a valid teaching certificate.
- Five years full-time teaching experience (minimum three by the time of acceptance in the program)
- An informal phone interview with the Graduate Programs Director.
- $35 application fee.

Additional application requirements for the Principal Certification Program include the following portfolio items:

- Two letters of recommendations from school district administrators; one of which must be from the applicant’s supervising administrator. Both letters must substantiate the candidate’s leadership potential and qualifications to become a school administrator.
- Resume that includes evidence of leadership potential (other leadership roles)
- Applicant’s educational philosophy
- A written description of a problem based learning activity

In addition, a Superintendent Letter of Eligibility is offered and all Pennsylvania Department of Education prerequisites must be met for admission.

Application Requirements for the Superintendent Letter of Eligibility Program are as follows:

- A completed Saint Joseph’s University graduate application.
- Master’s degree.
- Official sealed transcript(s) of undergraduate/graduate coursework.
  - Grade Point Average (GPA) in graduate work.
- Two letters of recommendations from school district administrators; one of which must be from the applicant’s supervising administrator.
- Copy of principal or supervisory certificate.
- Six years of satisfactory professional certificated service of which three of the six years must have been in a certificated supervisory or administrative capacity.

Finally, professional development is offered via the Digital Teacher Professional Development Program. The Digital Teacher Professional Development consists of five courses that are designed to prepare classroom teachers for the successful and seamless integration of technology using the school district’s curriculum.

Course Load

All courses must be completed at the 500 level or above. A full-time course load is three courses (9 credits) per term for fall and spring semesters, and four courses (12 credits) for the summer term. Working professionals may not register for more than two courses (6 credits) for the fall and spring terms and two courses (6 credits) for each summer term. Course load may be further discussed with the academic advisor on a one-on-one basis.

Any exceptions to this policy must be approved by the Graduate Programs Director. Students requesting full time status should submit a letter in writing to the Director of Graduate Education stating that they are working less than 20 hours per week during the semester(s) for which full-time status is being requested.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification.

Criteria for certification are demonstrated by professional behavior in the classroom and in fieldwork. Students who do not meet the high standards of professionalism established by the Pennsylvania Department of Education risk being dismissed from the fieldwork or the program.

Contact information for Graduate Admissions is as follows:

Graduate Operations Office
Saint Joseph’s University
5600 City Avenue
Philadelphia, PA 19131
Telephone: 610.660.1101
Fax: 610.660.1224
http://www.sju.edu/admissions/graduate/

Domestic students (U.S. Citizens, Permanent Residents, Refugees & Asylees) must complete and submit the Application Form, along with all credentials, application documents, and the required $35 USD application fee directly to the Graduate Operations Office. For applications submitted as a result of attendance at an Open House information session, the application fee is waived.

Applicants for admission must possess a Bachelor’s degree from a regionally accredited institution and must provide evidence of their ability and preparedness necessary for the satisfactory completion of graduate work. Specific requirements differ among the programs, and students are
advised to consult the appropriate program requirements listed in each program section.

Domestic students who have received degrees from outside the U.S. should review our International Admissions section for information on required documentation. All documents submitted in support of an application will become the property of the University and are not returnable.

**Terms of Acceptance**

An applicant is afforded “full acceptance” when all admission criteria have been met and all required application materials have been submitted, reviewed and approved.

“Provisional acceptance” may be provided if an application is complete, but academic credentials have not been satisfied. In this case an applicant is allowed a trial semester of up to 9 credits. Candidates must receive a grade of B or better during all courses taken during the trial semester.

Applicants whose application package is incomplete may receive “conditional acceptance,” and permitted to register for up to 3 credits in the first semester. To be granted “conditional” status, an application must at least include and application form and unofficial transcript.

Applications that do not meet at least provisional academic requirements are generally not accepted.

**Transfer of Courses**

Applicants who have taken graduate courses elsewhere may request transfer of not more than six graduate credits in Arts and Sciences programs. Such requests must be filed at the time of application for admission. Only those courses which are judged to meet program requirements and in which a student has received a grade of B or better will be accepted. In no instance will courses taken more than five years ago be accepted for transfer credit. Under no conditions will Continuing Education units be accepted for transfer credit. However, Alliance for Catholic Education (ACE) approved courses are eligible for transfer.

**Fieldwork Requirement**

Effective Fall 2015, the three two-credits fieldwork courses (EDL 695, EDL 696, EDL 697) current in 2014-2015 were transitioned into two three-credits fieldwork courses (EDL 695 and EDL 696).

**Learning Goals and Objectives**

**Goal 1:** Students will demonstrate knowledge of Educational Leadership content, theory and practices.

**Objective 1.1:** Student will develop and articulate a shared school vision, mission, and goals for P-12 student success.

**Objective 1.2:** Students will demonstrate knowledge of school improvement plans based on data and school community input.

**Goal 2:** Students will demonstrate knowledge of and professional leadership skills in developing a strong, positive school culture to ensure P-12 student success.

**Objective 2.1:** Students will demonstrate knowledge of an effective instructional program conducive to a positive school culture and P-12 student learning.

**Objective 2.2:** Students will demonstrate knowledge of the instructional and leadership capacity of school staff and design comprehensive professional growth plans for self and others.

**Goal 3:** Students will demonstrate the ability to manage democratically the school organization, operations and resources for effective results.

**Objective 3.1:** Students will develop operational policies and procedures and assess them for long-term school plans and the welfare of the school community.

**Objective 3.2:** Students will demonstrate knowledge of human, fiscal and technological resources to manage school operations and develop capacity for democratic (distributed) leadership.

**Goal 4:** Students will demonstrate knowledge of policies, laws and regulations and apply the principles of integrity, equity and fairness in effectively advocating for children and public education.

**Objective 4.1:** Students will accurately interpret laws, policies and regulations to promote P-12 students success.

**Objective 4.2:** Students will apply basic Jesuit principles in a plan that promotes social opportunities for P-12 students.

**M.S. in Education with a Concentration in Educational Leadership with Supervisor of Special Education Certification**

**Admission Requirements and Procedures**

The Master of Science degree includes a Master of Science with a concentration in Educational Leadership geared towards school leaders, specifically Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents. For students with a previous M.S. degree, Graduate Teacher and Administrative Certificates (post-graduate
program) certification programs are offered in each of those same fields (Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents).

The Master of Science degree with a concentration in Educational Leadership is a 36-credit professional degree that may also lead toward certification as a school supervisor (of curriculum and instruction in one's certification area, including special education) or principal. Prior acceptance in the program, an informal phone interview is required. Students are advised to contact the Director of Educational Leadership graduate programs for all advising needs – including academic progress and compliance for certification – on a semester basis.

Students must be formally admitted to the Educational Leadership program for certification eligibility. Five years of teaching experience (minimum three by the time of acceptance in the program) or experience related to the instructional process is required. A valid teaching certification or a chief school administrator’s verification of the completion of three years of relevant professional experience in an educational setting related to the instruction process must be included in the application materials. Students not seeking a certification and only seeking a Master’s with a concentration in Educational Leadership do not need a valid teaching certification and/or five years of full-time teaching experience.

Since Spring 2012, this program is offered online, as well as face-to-face. The curriculum and program requirements are the same for all online and face-to-face students.

In order to be eligible for programs leading to certification within the Educational Leadership combination offerings, applicants must be U.S. citizens or legal permanent residents. Application requirements are as follows:

- A completed Saint Joseph’s University graduate application.
- Official sealed transcript(s) of undergraduate/graduate coursework.
  - Grade Point Average (GPA) in undergraduate work.
- Personal statement – a 500 word statement of intention outlining how the applicant’s professional goals fit the stated goals and objectives of the Educational Leadership graduate programs.
- Two letters of recommendations.
- Copy of a valid teaching certificate.
- Five years full-time teaching experience (minimum three by the time of acceptance in the program)
- An informal phone interview with the Graduate Programs Director.
- $35 application fee.

Finally, professional development is offered via the Digital Teacher Professional Development Program. The Digital Teacher Professional Development consists of five courses that are designed to prepare classroom teachers for the successful and seamless integration of technology using the school district’s curriculum.

Course Load

All courses must be completed at the 500 level or above. A full-time course load is three courses (9 credits) per term for fall and spring semesters, and four courses (12 credits) for the summer term. Working professionals may not register for more than two courses (6 credits) for the fall and spring terms and two courses (6 credits) for each summer term. Course load may be further discussed with the academic advisor on a one-on-one basis.

Any exceptions to this policy must be approved by the Graduate Programs Director. Students requesting full time status should submit a letter in writing to the Director of Graduate Education stating that they are working less than 20 hours per week during the semester(s) for which full-time status is being requested.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification.

Criteria for certification are demonstrated by professional behavior in the classroom and in fieldwork. Students who do not meet the high standards of professionalism established by the Pennsylvania Department of Education risk being dismissed from the fieldwork or the program.

M.S. in Education with a Concentration in Educational Leadership Without Certification

Admission Requirements and Procedures
The Master of Science degree includes a Master of Science with a concentration in Educational Leadership geared towards school leaders, specifically Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents. For students with a previous M.S. degree, Graduate Teacher and Administrative Certificates (post-graduate program) certification programs are offered in each of those same fields (Curriculum Supervisors, Special Education Supervisors, Principals, and Superintendents).

The Master of Science degree with a concentration in Educational Leadership is a 36-credit professional degree that may also lead toward certification as a school supervisor (of curriculum and instruction in one’s certification area, including special education) or principal. Prior acceptance in the program, an informal phone interview is required. Students are advised to contact the Director of Educational Leadership graduate programs for all advising needs – including academic progress and compliance for certification – on a semester basis.

Students must be formally admitted to the Educational Leadership program for certification eligibility. Five years of teaching experience (minimum three by the time of acceptance in the program) or experience related to the instructional process is required. A valid teaching certification or a chief school administrator’s verification of the completion of three years of relevant professional experience in an educational setting related to the instruction process must be included in the application materials. Students not seeking a certification and only seeking a Master’s with a concentration in Educational Leadership do not need a valid teaching certification and/or five years of full-time teaching experience.

Since Spring 2012, this program is offered online, as well as face-to-face. The curriculum and program requirements are the same for all online and face-to-face students.

In order to be eligible for programs leading to certification within the Educational Leadership combination offerings, applicants must be U.S. citizens or legal permanent residents. Application requirements are as follows:
$35 application fee.

Finally, professional development is offered via the Digital Teacher Professional Development Program. The Digital Teacher Professional Development consists of five courses that are designed to prepare classroom teachers for the successful and seamless integration of technology using the school district’s curriculum.

Course Load

All courses must be completed at the 500 level or above. A full-time course load is three courses (9 credits) per term for fall and spring semesters, and four courses (12 credits) for the summer term. Working professionals may not register for more than two courses (6 credits) for the fall and spring terms and two courses (6 credits) for each summer term. Course load may be further discussed with the academic advisor on a one-on-one basis.

Any exceptions to this policy must be approved by the Graduate Programs Director. Students requesting full time status should submit a letter in writing to the Director of Graduate Education stating that they are working less than 20 hours per week during the semester(s) for which full-time status is being requested.

All certification programs meet the General and Specific Standards of the Bureau of Teacher Preparation and Certification of the Department of Education in the Commonwealth of Pennsylvania. Candidates are required to meet certification standards in force at the time of their application for certification.

Criteria for certification are demonstrated by professional behavior in the classroom and in fieldwork. Students who do not meet the high standards of professionalism established by the Pennsylvania Department of Education risk being dismissed from the fieldwork or the program.

**M.S. with Program Specialist Endorsement in English as a Second Language**

**Endorsement in English as a Second Language (ESL)**

Althier Lazar, Director
alazar@sju.edu

The ESL training program at Saint Joseph’s University is designed to prepare teachers who have a valid Pennsylvania Instructional I or II certificate to obtain the Pennsylvania Program Specialist-ESL endorsement. The program aims to help candidates develop theoretical understanding and pedagogical knowledge and skills that are needed in working with students who are learning English as a second language.

**Learning Goals and Objectives**

**Goal 1:** The student will demonstrate an understanding of language as an integrative system.

**Objective 1.1:** The student will describe the components of language (phonology-the sound system; morphology-the structure of words; syntax-phrase and sentence structure; semantics-word/sentence meaning; pragmatics-the effect of context on language).

**Objective 1.2:** The student will demonstrate an understanding of how to apply knowledge of language as an integrated system to help ELLs acquire English.

**Goal 2:** The student will demonstrate an understanding of concepts, theories, research, and practice to facilitate the acquisition of a new language. (understand and apply” instead of ‘demonstrate’)

**Objective 2.1:** The student will apply the theory of comprehensible input to support emergent bilinguals’ development of a new language.

**Objective 2.2:** The student will demonstrate an ability to create a secure, positive, and motivating learning environment for emergent bilinguals.

**Goal 3:** The student will demonstrate an understanding of the role of culture in language development and academic achievement for emergent bilinguals.

**Objective 3.1:** The student will recognize how cultural values and beliefs shape language development.

**Objective 3.2:** The student will apply knowledge about the effects of racism, stereotyping, and discrimination to ESL teaching and learning.

**Goal 4:** The student will demonstrate understandings about the concepts, research, and best practices to plan classroom instruction for emergent bilinguals

**Objective 4.1:** The student will plan instruction based on the concepts, research and practices recommended for emergent bilinguals.

**Objective 4.2:** The student will plan learning experiences based on an assessment of students’ language proficiency and prior knowledge.

**The English as a Second Language Program Specialist-ESL Endorsement Program requires 16 credits plus field experience hours**

This graduate program prepares educators to meet the literacy needs of children. This program is suited to classroom teachers who wish to become reading specialists, or those teachers who want to provide appropriate instruction for the wide range of needs within the regular classroom.

Students in the Reading Specialist program are expected to have obtained their Pennsylvania Instructional I certification. Noncertified students accepted into the program will be expected to complete Pennsylvania Instructional I elementary certification while pursuing the specialist certification or the M.S. degree.

Learning Goals and Objectives

Goal 1: The student demonstrates an understanding of instruction and materials, and an integrated, balanced curriculum to support student learning in reading and writing.

Objective 1.1: The student will demonstrate an understanding of the research and literature that undergirds the reading and writing curriculum and instruction for pre-K–12 students.

Objective 1.2: The student will provide appropriate in-depth instruction for students, especially those who struggle with reading and writing.

Goal 2: The student will understand types of assessments and their purposes, strengths, and limitations.

Objective 2.1: The student will demonstrate an understanding of the literature and research related to assessments and their uses and misuses.

Objective 2.2: The student will administer and interpret appropriate assessments for students, especially those who struggle with reading and writing.

Goal 3: The student will understand the role of cultural diversity in planning literacy instruction.

Objective 3.1: The student will demonstrate an understanding of the ways in which diversity influences students’ reading and writing development.

Objective 3.2: The student will plan and implement literacy instruction based on knowledge of students’ cultural backgrounds.

Goal 4: The student will demonstrate understandings how to create literate environments that foster reading and writing development.

Objective 4.1: The student will demonstrate an understanding of the research on motivation and its effect on literacy learning.

Objective 4.2: The student will design a social environment to optimize students’ motivation and engagement in learning to read and write.

The M.S. degree requires a total of 36 credits, as follows:

Master of Science in Instructional Technology with Instructional Technology Specialist Certification

Program Description

The online instructional design and technology graduate program from Saint Joseph’s University helps you harness the latest technology tools and interactive, multi-media strategies to advance learning and comprehension in an instructional setting. This advanced specialty degree is built on a curriculum of hands-on practice and experience with the cutting-edge technologies that are used daily in modern classrooms and corporate training environments.

With classes in multimedia production, instructional design, emerging technologies, alternative instruction and more, the online instructional design and technology Master’s program from Saint Joseph’s University arms you with the theory and hands-on experience necessary to aid teachers in their quest to bring technology into the classroom, or to position yourself as a leader in delivering effective adult education and training in the private sector. Moreover, graduates are eligible for Instructional Technology Specialist Certification in the Pennsylvania public school system, a credential that can be the basis for educational certification in many other states as well.
Admissions Requirements
Bachelors’ Degree with an overall GPA of 3.0 or higher

Internship Requirement for the PA Instructional Technology Specialist Certification
Field Experience in a K-12 school setting
Field Experience must take place while taking the Graduate Internship course during a 16 week semester (Spring, Summer, or Fall)

Required Clearances for the Graduate Internship
Prior to beginning the Graduate Internship, students must submit the SJU Background Clearance Document verifying that they have obtained all required clearances for their state
All clearances must be valid through the end of your Graduate Internship

Learning Goals and Objectives
Goal 1: Students will develop and implement a shared vision for the comprehensive integration of technology throughout the instructional environment
Objective 1.1: Students will develop technology-infused strategic plans at the district and school level.
Objective 1.2: Students will implement strategies for sustaining technology innovations.

Goal 2: Students will use technology effectively for differentiating student learning
Objective 2.1: Students will create technology-enhanced learning experiences
Objective 2.2: Students will incorporate research-based best practices in instructional design

Goal 3: Students will create effective digital age learning environments to maximize the learning of all students
Objective 3.1: Students will select and evaluate adaptive and assistive technologies to support student learning.
Objective 3.2: Students will evaluate digital tools and resources that enhance teaching and learning.

Goal 4: Students will develop technology-related professional learning
Objective 4.1: Students will conduct needs assessments to inform the content and delivery of technology-related professional learning programs
Objective 4.2: Students will design technology-related professional learning programs

Goal 5: The student will demonstrate the ability to become an agent who can deliver on the Jesuit promise of educational justice.
Objective 5.1: The student will demonstrate the ability to interact positively and respectfully with those of different racial, ethnic, language and socioeconomic backgrounds and sexual orientations through collaboration with their peers.
Objective 5.2: The student will demonstrate the ability to challenge practices and policies that reinforce inequalities and equitable access to technology for all learners.

Master of Science in Special Education (without certification)

The Masters of Education in Special Education without certification requires 36 hours of coursework aimed at preparing educators and practitioners in the foundations of Special Education without state teaching certification.

Program Goals and Objectives

Objective 1.1: The student will be able to identify individual differences and to respond to the needs of individuals with exceptionalities.

Objective 1.2: The student will be able to use general and specialized content knowledge for teaching across curricular content areas to individualize learning for individuals with exceptionalities.
**Objective 2.1:** The student will demonstrate the ability to use motivational and instructional interventions to teach individuals with exceptionalities how to adapt to different environments.

**Objective 2.2:** The student will demonstrate an understanding of ways to collaborate with general educators and other colleagues to create safe, inclusive, culturally responsive learning environments to engage individuals with exceptionalities in meaningful learning activities and social interactions.

**Objective 3.1:** The student will be able to select and use technically sound formal and informal assessments that minimize bias.

**Objective 3.2:** The student will assess performance and provide feedback.

**Objective 4.1:** The student will be able to identify an individual’s abilities, interests, learning environments, and cultural and linguistic factors in the selection, development, and adaptation of learning experiences for individuals with exceptionalities.

**Objective 4.2:** The student will be able to use strategies and technology to enhance language development and communication skills of individuals with exceptionalities.

**Objective 5.1:** The student will demonstrate an understanding that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of special education services.

**Objective 5.2:** The student will demonstrate the ability to develop a variety of education and transition plans for individual with exceptionalities across a wide range of settings and different learning experiences in collaboration with individuals, families and teams.

Merion Hall 227
610-660-3285
krovine@sju.edu

OATCERT is an online, campus-free program which can lead to Pennsylvania secondary teacher certification (grades 7-12) as well as to an MS in Secondary Education. Candidates must hold a bachelor’s degree in one of the content areas for which certification is endorsed:

- English,
- Mathematics,
- Science (Biology, Chemistry, General Science, Physics), and
- Citizenship.

Note: Course requirements (number and topics) subject to change based upon PA Department of Education regulations.

**Goals & Objectives (See Secondary Education Goals & Objectives)**

**Required courses for PA Certification**

- EDU 605 Critical Contemp Ed Issues
- EDU 680 Law & American Ed
- ITS 605 Technology Appl for Classroom
- SPE 630 Design&Tech Differentiated Ins

Other electives may be substituted with the permission of the OATCERT Director.
Organizational Development & Leadership B.L.S.

Learning Goals and Objectives for the Organizational Development & Leadership Program

Goal 1: Students will be able to identify and articulate the history, principles and theories of organization development

Objective 1.1: The student will describe models and theories of learning, group dynamics, consulting and coaching and organizational change.

Objective 1.2: The student will demonstrate their knowledge of the effects of utilizing recommended models, theories, and techniques of feedback in practical scenarios addressing consulting, learning, and leadership.

Objective 1.3: The student will identify patterns of and reactions to organizational change.

Goal 2: Students will foster the development of interpersonal and leadership competencies for lifelong learning in themselves and others.

Objective 2.1: The student will document growth in self-awareness through learning activities and knowledge grounded in current research and models of leadership development.

Objective 2.2: The student will articulate the relationships between learning, leadership, and change.

Objective 2.3: The student will document their experiences of experimenting with various leadership behaviors and evaluate their effectiveness.

Objective 2.4: The student will demonstrate their awareness of the influence of family background; roles, gender, race, ethnicity, and sexual orientation play in individual development.

Goal 3: Students will demonstrate academic research and writing.

Objective 3.1: The student will distinguish the differences between research based theories and philosophies and beliefs.

Objective 3.2: The student will demonstrate skill in using APA style in research writing activities.

Objective 3.3: The student will create a final capstone project that demonstrates ability to apply models and theories to work situations.

Students admitted prior to Summer 2016 entered under the curriculum requirements for the BS in Organizational Development and Leadership. Please see the SJU Academic Catalog for your admit year for additional information.

Special Education: PK-8

Special Education - Program Overview

Saint Joseph's University Department of Special Education centers its philosophical and practical mission on attaining social justice and democracy through the education of reflective, activist-oriented teacher candidates and practicing teachers. Faculty members are committed
to a disposition of academic rigor and professional integrity across our undergraduate, post-baccalaureate, and graduate programs.

The Special Education Department is focused on helping teachers respect the knowledge traditions of students from non-dominant cultural communities as these students have been historically excluded from educational curricula. Such practices provide a framework that incorporates all aspects of learning, cognitive, linguistic, social-emotional, and cultural variables. This includes recognizing students’ “funds of knowledge” and the diversity of cultural capital that exists in all homes and communities. Department faculty strive to support future teachers’ adoption of practices that celebrate the unique personality traits, talents and learning differences of individual learners. This will prepare future teachers to help their students become resilient to unwanted peer pressure and bullying, and who actively challenge these and other negative influences.

Special Education PK-8 must be a double major with Elementary PK-4.

Learning Goals and Objectives

Goal 1: Students will demonstrate knowledge of PK-8 learner development and curricular content

Objective 1.1: The student will be able to identify individual differences and to respond to the needs of individuals with exceptionalities.

Objective 1.2: The student will be able to use general and specialized content knowledge for teaching across curricular content areas to individualize learning for individuals with exceptionalities.

Goal 2: Students will demonstrate the ability to create positive PK-8 learning environments

Objective 2.1: The student will demonstrate the ability to use motivational and instructional interventions to teach individuals with exceptionalities how to adapt to different environments.

Objective 2.2: The student will demonstrate an understanding of ways to collaborate with general educators and other colleagues to create safe, inclusive, culturally responsive learning environments to engage individuals with exceptionalities in meaningful learning activities and social interactions.

Goal 3: Students will demonstrate the use of assessment for diagnosis and progress monitoring

Objective 3.1: The student will be able to select and use technically sound formal and informal assessments that minimize bias.

Objective 3.2: The student will assess performance and provide feedback.

Goal 4: Students will demonstrate knowledge of research-based instructional planning and strategies

Objective 4.1: The student will be able to identify an individual’s abilities, interests, learning environments, and cultural and linguistic factors in the selection, development, and adaptation of learning experiences for individuals with exceptionalities.

Objective 4.2: The student will be able to use strategies and technology to enhance language development and communication skills of individuals with exceptionalities.

Goal 5: Students will demonstrate knowledge of professional ethical practice

Objective 5.1: The student will demonstrate an understanding that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of special education services.

Objective 5.2: The student will demonstrated the ability to develop a variety of education and transition plans for individual with exceptionalities across a wide range of settings and different learning experiences in collaboration with individuals, families and teams.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

Saint Joseph’s University has established a General education program for all undergraduate students: The following courses must be included as GEP courses for education majors:

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses
Goal 1: Students will demonstrate knowledge of PK-8 learner development and curricular content

Objective 1.1: The student will be able to identify individual differences and to respond to the needs of individuals with exceptionalities.

Objective 1.2: The student will be able to use general and specialized content knowledge for teaching across curricular content areas to individualize learning for individuals with exceptionalities.

Goal 2: Students will demonstrate the ability to create positive grade PK-8 learning environments

Objective 2.1: The student will plan, structure, and conduct assessment for instructional planning and strategies

Objective 2.2: The student will demonstrate an understanding of ways to collaborate with general educators and other colleagues to create safe, inclusive, culturally responsive learning environments to engage individuals with exceptionalities in meaningful learning activities and social interactions.

Goal 3: Students will demonstrate the use of assessment for diagnosis and progress monitoring

Objective 3.1: The student will be able to select and use technically sound formal and informal assessments that minimize bias.

Objective 3.2: The student will assess performance and provide feedback.

Goal 4: Students will demonstrate knowledge to use research-based instructional planning and strategies

Objective 4.1: The student will be able to identify an individual’s abilities, interests, learning environments, and cultural and linguistic factors in the selection, development, and adaptation of learning experiences for individuals with exceptionalities.

Objective 4.2: The student will be able to use strategies and technology to enhance language development and communication skills of individuals with exceptionalities.

Goal 5: Students will demonstrate knowledge of professional ethical practice

Objective 5.1: The student will demonstrate an understanding that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of special education services.

Objective 5.2: The student will demonstrated the ability to develop a variety of education and transition plans for individual with exceptionalities across a wide range of settings and different learning experiences in collaboration with individuals, families and teams.

Endorsement Goals and Objectives

Autism Spectrum Disorders Endorsement

Goal 1: Students will demonstrate knowledge of the characteristics and etiology of ASD

Objective 1.1: The student will describe the defining characteristics of and diagnostic criteria for the various Autism Spectrum Disorders and other associated disorders, including common manifestations within communication and verbal behavior, social skills and social adaptation, repetitive and stereotypical behaviors, and patterns of responses to various sensory stimuli.

Objective 1.2: The student will identify and describe various diagnostic instruments and procedures, including their strengths and limitations.

Goal 2: Students will demonstrate an understanding of the use of assessment for instructional planning

Objective 2.1: The student will plan, structure, and conduct assessment for students with ASD.
**Objective 2.2:** The student will identify and demonstrate acceptable accommodations and appropriate adaptations to state- and district-wide assessments for students with ASD.

**Goal 3:** Students will demonstrate the ability to plan instructional interventions and methods across settings and grade levels.

**Objective 3.1:** The student will describe, interpret, utilize, and evaluate instructional strategies based on the principles of applied behavior analysis.

**Objective 3.2:** The student will demonstrated the ability to organize classroom teams to provide effective intervention and instruction by developing and managing a daily schedule for students and multiple staff that specifies appropriate levels.

**Goal 4:** Students will demonstrate the skills necessary to effectively collaborate with families, agencies, and the community

**Objective 4.1:** The student will demonstrate the ability to facilitate family and school collaboration by demonstrating sensitivity to the range of the impact that ASD may have on the family system.

**Objective 4.2:** The student will identify various agencies and community systems that support students with ASD in home, community, and work settings

**Education of the Deaf and Hard of Hearing:**

**Goal 1:** The student will demonstrate knowledge of learners who are deaf and hard of hearing.

**Objective 1.1:** The student will describe the range of programming for a classroom with students who are deaf and hard of hearing.

**Objective 1.2:** The student will analyze case studies of communication modes for deaf and hard of hearing learners.

**Goal 2:** The student will demonstrate an understanding of learners who have hearing losses from mild to profound.

**Objective 2.1:** The student will define the classifications of hearing loss.

**Objective 2.2:** The student will describe the characteristics of learners in a classroom where a variety of hearing losses and methods of communication occur.

**Goal 3:** The student will demonstrate knowledge of appropriate practices encountered in the education of deaf and hard of hearing learners.

**Objective 3.1:** The student will define the eight areas of concern of the Pennsylvania Agenda for Students who are Deaf and Hard of Hearing.

**Objective 3.2:** The student will evaluate educational placement options for deaf and hard of hearing students.

**Goal 4:** The student will demonstrate knowledge of current trends used in the education of deaf and hard of hearing learners.

**Objective 4.1:** The student will implement and reflect upon pedagogical strategies used with learners who are deaf and hard of hearing.

**Objective 4.2:** The student will identify strategies to support specially designed instruction across educational environments.

**Goal 5:** The student will demonstrate an understanding of the social, ethical, legal, and human issues that impact programs for deaf and hard of hearing learners

**Objective 5.1:** The student will create learning experiences for deaf and hard of hearing learners.

**Objective 5.2:** The student will analyze case studies to determine specially designed instruction and accommodations for learners who are deaf and hard of hearing.

**Wilson Reading Program Certification**

**Objective 1.1:** Demonstrate mastered lesson plan procedure through Step 4.2 (documented by Wilson Trainer).

**Objective 1.2:** Demonstrate understanding of language concepts through accurate teaching with multisensory procedures through Step 4.2 (documented by Wilson Trainer).

**Objective 1.3:** Demonstrate student success and mastery of decoding/encoding skills through Step 4.2 (documented by Wilson Trainer).

**Objective 2.1:** Based on readings and course content, understand the research base for multisensory structured language teaching.

**Objective 2.2:** Based on readings and course content, understand the necessary principles of instruction used to teach students with a language-based learning disability.

**Objective 2.3:** Based on knowledge of the Wilson Reading System, demonstrate an understanding of the content and methods of teaching Steps 1-3 of the Wilson Reading System.

**Objective 2.4:** Based on knowledge of research based reading programs, utilize multisensory strategies to teach sight words, vocabulary, and comprehension

**Objective 3.1:** Based on an understanding of the nature and causes of dyslexia, be able to critically analyze and synthesize readings on dyslexia.

**Objective 3.2:** Based on readings and course content, understand the nature and causes of dysgraphia.

**Objective 3.3:** Based on readings and course content, understand the research base for multisensory structured language teaching.

**Objective 3.4:** Based on readings and course content, understand the necessary principles of instruction used to teach students with a language-based learning disability

**Objective 3.5:** Based on knowledge of the Wilson Reading System, demonstrate an understanding of the content and methods of teaching Steps 4-6 of the Wilson Reading System.

**Objective 3.6:** Based on knowledge of the Wilson Reading System, demonstrate how to incorporate non-controlled text reading within the Wilson Reading System Lesson Plan.

**Objective 4.1:** Based on knowledge of the Wilson Reading System Lesson Plan procedures, demonstrate mastery in the teaching of decoding, encoding, fluency, comprehension, and vocabulary.

**Objective 4.2:** Based on knowledge of the Wilson Reading System, demonstrate diagnostic skill assessment and planning for a student with reading challenges.
Objective 4.3: Demonstrate an understanding of the language concepts through accurate teaching with multisensory procedures

Objective 4.4: Demonstrate student success and mastery of decoding and encoding skills

Objective 4.5: Demonstrate understanding of and ability to implement progress monitoring

Prerequisites

Students applying for Special Education certification must have a valid Pennsylvania Instructional I Teaching Certification. In the event that Pennsylvania Instructional I has not yet been acquired, the student must be in the process of obtaining it. A Master’s degree in Special Education is available with 3 additional courses (electives); the various suggested tracks are listed below.

Certification Requirements PK-8 or 7-12

- GPA
- Pass ES Pearson Spec Ed PK-8 Module 1 (8011) and Spec Ed PK-8 Module 2 (8012) (www.nesinc.com)

Supervisor of Special Education Certification

This program is a cooperative effort of the Education Leadership Program and the Special Education Program of the Saint Joseph’s Graduate Education Unit. It combines the strength of two programs for the preparation of tomorrow’s leaders in inclusive schools. Students take coursework in organizational culture, management functions, curriculum and supervision, research and measurement, and gain additional expertise in elementary/secondary and special education (K-12).

The Supervisor of Special Education Certification Program requires 24 credits, which can be taken in conjunction with the M.S. in Education degree program (36 credits). In addition, by taking a few additional courses, Special Education Supervisor candidates can obtain a Curriculum Supervisor and/or a Principal’s Certification. Students are urged to maintain continued contact with the Special Education Department Chair to assure certification program compliance. Students must be formally admitted into the Special Education Supervisory Program for certification eligibility. In the event that certain content is missing in a student’s transcript, prerequisite courses may be deemed necessary before the Supervisory Certification Program can commence.

Learning Goals and Objectives

Goal 1: The student will demonstrate an understanding of and the ability to promote the success of all P-12 students by facilitating the shared school vision of learning supported by the stakeholders.

Objective 1.1: The student will collaboratively develop a shared vision of learning for a school that promotes the success of all P-12 students.

Objective 1.2: The student will articulate the components of this vision for a school and the leadership processes necessary to implement and support the vision.

Goal 2: The students will demonstrate an understanding of how to articulate a plan for a school culture that is conducive to P-12 student learning.

Objective 2.1: The student will create and evaluate a comprehensive, rigorous, and coherent curricular and instructional school program.

Objective 2.2: The student will develop a plan for the future supervision of the instructional and leadership capacity.

Goal 3: The student will demonstrate an understanding of the role of Special Education within the school and school district.

Objective 3.1: The student will demonstrate knowledge of the needs of Special Education programs in relation to budgeting and curriculum and instruction.

Objective 3.2: The student will demonstrate an understanding of standardized testing results for students with IEPs.

To earn the MS Degree in Educational Leadership – an additional 4 courses (12 credits) must be completed
Beginning in January 2012, the courses in this program will be offered either online or in a hybrid format.

Certification Requirements

- Pass PRAXIS Test 10410: Supervisor-Principal-Educational Leadership (www.ets.org/praxis)
- A valid Special Education teaching certificate
- At least 5 years of full-time teaching experience as a certified special education teacher

Department Overview

Through its challenging and rewarding program of study, the English Department introduces students to the formative traditions of British, Irish, American, and Anglophone literature. We supplement these historical, critical, and generic courses with specialized courses that
1. offer an in-depth examination of individual authors and critical problems,
2. balance theory with the practice of rhetoric, and
3. develop creative talents.

Throughout our program, we integrate close reading and extensive writing, and we present fundamentals of research in order to foster intellectual maturity and to prepare our students for more advanced study in literature and writing.

Because we wish our English majors to explore their particular interests, we offer four tracks to guide their course selections:
1. literature,
2. writing,
3. theatre/drama, and
4. journalism.

There is a general major option as well for students who do not wish to declare a track. The English major thus equips our students to enter many careers, including teaching, publishing, editing, writing, and business. Current English graduates include college professors, teachers, journalists, novelists, poets, lawyers, pharmacists, physicians, and public-relations specialists. Dual English/Secondary Education majors do not declare a track.

Departmental Mission

Crucial to the centuries-old Ignatian vision that guided the establishment of Jesuit colleges and universities are two concepts: caring for the student as an individual (cura personalis) and imparting to the student a skill in thoughtful, imaginative, and well-organized language (eloquentia perfecta).

The English Department and its curriculum encourage the growth of our students in these traditions. Our courses guide them to appreciate imaginative literature and to master rhetorical skills traditionally associated with Jesuit education—including cultivating an individual and discerning voice in both writing and speaking.

We remain committed to the University’s mission by connecting faith, intellectual commitment, and social justice in our teaching. By offering service-learning and diversity courses and by developing mentoring relationships between faculty and students, we encourage a striving for the greater intellectual and social good.

The English Department supports the University mission by calling upon our students to embrace:
• A life-long openness to imaginative, moral, and spiritual growth
• A confidence in their own intellectual reach and competence
• A commitment to being men and women with and for others
• A commitment to social justice

Variable Core-Art or Literature

Students who wish to satisfy the Art or Literature portion of the GEP by completing a course in English literature may select from the list of GEP-appropriate courses at the 200 level or from the 300- and 400-level literature courses in the English program listing.

Professor: Ann E. Green, Ph.D.; April Lindner, Ph.D.; David R. Sorensen, D.Phil.; Jo Alyson Parker, Ph.D.; Melissa A. Goldthwaite, Ph.D.; Owen W. Gilman, Jr., Ph.D.; Peter Norberg, Ph.D.; Richard Fusco, Ph.D.

Assistant: Grace Wetzel, Ph.D.; Kersti Tarien Powell, D.Phil.; Laura Pattillo, Ph.D.; Shenid Bhayroo, Ph.D.; Thomas Coyne, M.F.A.

Chair: Norberg

Undergraduate Major
• English Major (p. 254)

Undergraduate Minors
• English (p. 258)
• Creative Writing (p. 258)
• Journalism (p. 259)
• Educational Studies (p. 258)

Graduate Degree
• Master of Arts in Writing Studies (p. 256)

Adult Undergraduate
• English and Professional Writing (p. 253)

English 200-Level Courses

Courses offered at the 200 level include courses geared toward non-majors wishing to fulfill the GEP Art/Literature requirement, intersession courses, and introductory courses in the major. Many of the courses numbered 200-219 are particularly appropriate for the GEP Art/Literature requirement. Courses numbered 220-299 are introductory-level major courses. The following are typically offered each semester:

<table>

ENG 402 Shakespeare: Early Works is offered each fall. ENG 403 Shakespeare: Later Works is offered each spring. Other 400-level courses are offered on two-year to four-year cycles.
ENG 140 Adult Learning Seminar (3 credits)
In this seminar, adult learners will study the idea of work through reading fiction and nonfiction on jobs, employment, and careers. Students will read stories about work and write narratives of work histories that will provide the context and experience for the course. In the second part of the course, students will reflect and theorize on these histories as either empowering sources of vocation, discouraging instances of alienation, or some combination of both. In the final part of the course, students will then engage with either their own present work or future work by preparing cover letters and resumes for their future job applications and writing a significant piece of communication (business proposal, conflict resolution, grant application, etc.) within their current or prospective professional career. Available only to students enrolled in the PLS or HDC programs
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Adult Learning Seminar

ENG 150 First Year Seminar (3 credits)
The First-Year Seminar is designed to introduce students to the adventures of learning in a college context. First-Year Seminars focus in depth on a question or topic of disciplinary or interdisciplinary interest. By means of its specific focus, the seminar will explore the thinking, research, and writing practices in a particular field. Discussions based on careful reading of texts, writing assignments, both reflection and research types, and in-class student presentations will be supplemented, as appropriate, with activities including guest lecturers, museum trips, attendance at local cultural events and/or field excursions. Topics vary according to individual instructors. First year seminar.
Attributes: First-Year Seminar, Undergraduate

ENG 196 English Elective (3 credits)
ENG 201 Major American Writers (3 credits)
Study of selected works of those writers who have most influenced the continuity and development of our national literature. Among those considered may be Irving, Poe, Emerson, Fuller, Hawthorne, Stowe, Melville, Whitman, Twain, Dickinson, Chopin, Gilman, Frost, Hemingway, Faulkner, and Morrison.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 202 Global English Literature (3 credits)
This course examines English as a global literary language through works of fiction and film. Students will read works by authors who represent diverse regions of the English-speaking world beyond the United Kingdom (excluding the U.S.) that expand the English language, rethink the present-day legacy of the British Empire, and redefine conceptions of Englishness. Specific course topics and reading lists vary with each course offering. Diversity/Globalization/Non-Western overlay.
Attributes: English Area 4- British/Irish, GEP Art/Literature, Non-Western Studies (GEP), Undergraduate

ENG 203 The Poet's Voice (3 credits)
The primary emphasis will be on the reading of major poems in English seen as performances in language requiring close attention to the text. The historical and cultural concerns reflected will also receive attention.
Attributes: GEP Art/Literature, Undergraduate

ENG 204 Drama (3 credits)
Critical study of various forms of drama.
Prerequisites: ENG 1105 or ENG 113
Attributes: GEP Art/Literature, Undergraduate

ENG 205 Cultural Diversity (3 credits)
Specific focus of the course will depend on the instructor. Approaches to the issue of cultural diversity in literature may include the courses such as the following: American Voices; British Multiculturalism and the Booker Prize, or Multiethnic Literature. Diversity Globalization/Non-Western overlay.
Prerequisites: ENG 101 or ENG 111
Attributes: Africana Studies Course, Diversity Course (New GEP), English Diversity, GEP Art/Literature, Undergraduate, Writing Intensive Course-GEP

ENG 206 Public Speaking & Presentation (3 credits)
A practical course in the oral presentation of carefully crafted material. Based on principles of rhetoric, new and old, the course helps students in discovering, structuring, and expressing ideas with conviction and confidence. Some attention will be given to the appreciation of significant speech texts within these rhetorical traditions. Students will make multiple presentations and engage in peer critiques.
Attributes: English Area 1 - Writing, BUAD FBEN LEOS ILC Area Course, Undergraduate

ENG 207 Images of Women in Literature (3 credits)
Specific focus of this course will be the female character in literature and the construction of gender identity. Primarily literary and historical in approach, but may include the psychological and the mythic. Works by a variety of authors in several genres will be examined.
Attributes: English Diversity, GEP Art/Literature, Undergraduate

ENG 208 Special Topics in Literature (3 credits)
Depending on the instructor, the course will focus on a particular topic of interest in literature (e.g., American West in Imagination, Psychology and Literature).
Prerequisites: ENG 101 or ENG 111
Attributes: GEP Art/Literature, Undergraduate

ENG 209 Literature and Film (3 credits)
This course deals with film treatments of significant literary texts. Specific focus of the courses depends on the instructor (e.g., King Arthur In Literature and Film, American War Literature and Film: Vietnam to Now, Horror in Literature and Film, etc.).
Attributes: GEP Art/Literature, Undergraduate

ENG 210 The Roaring Twenties (3 credits)
Exploration of diverse writers who were part of the “make it new” challenge in the tumult of cultural change during the 1920s in America, with particular attention given to contributions by Anderson, Fitzgerald, Millay, Cummings, Parker, Hemingway, Faulkner, O'Neill, and Hughes.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 211 Black Popular Culture (3 credits)
Beginning with W. E. B. Du Bois’s 1897 essay “The Problem of Amusement” we trace the trajectory of the literary interpretations of Black popular culture in the U.S. paying particular attention to its evolution through detective fiction, graphic novels, new media, and science fiction. Likely authors include: Kyle Baker, Octavia Butler, Chester Himes, Nalo Hopkinson, Aaron McGruder, Mia McKenzie, and Walter Mosely. Diversity/Globalization/Non-Western overlay Africana Studies.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate
ENG 215 Passing Narratives - Black Lit (3 credits)
Prerequisites: ENG 101 or ENG 111
Attributes: American Studies Course, Diversity Course (New GEP), English Area 5 - American Lit, GEP Art/Literature, Undergraduate, Writing Intensive Course - GEP

ENG 216 Re-Reading the Sixties (3 credits)
Exploration of representative texts from diverse parts of the universe-in-revision that was the 1960s—from Kubrick’s Dr. Strangelove to Vonnegut’s Slaughterhouse-Five, from Sylvia Plath’s Ariel to Dennis Hopper’s Easy Rider, from Nikki Giovanni’s poetry to Bonnie and Clyde; from Tom Wolfe’s Electric Kool-Aid Acid Test to Pynchon’s The Crying of Lot 49. We start with "Berkeley in the Sixties," and it never ends.
Attributes: Diversity Course (New GEP), English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 217 Music & American Literature (3 credits)
This course will study the relation of words to music in several different forms: songs, musical shows, an opera, and references to music in poems and novels. It will cover mostly popular music of the twentieth century, including ragtime, blues, jazz, and rock. The class will listen to music and learn some elementary reading of music. Broader topics will involve race, ethnicity, gender, romance, and youth culture.

ENG 218 Lesbian & Gay Narrative (3 credits)
Lesbian and Gay Narrative is designed to introduce students to works by and about lesbian, gay, bisexual, transgendered and queer or questioning persons. Our survey will include works in a variety of genres: plays, novels (including one graphic novel and one bio mythography), essays and poetry. These will come from a range of historical periods.

ENG 222 SophSem:Critical App Lit Study (3 credits)
A seminar, ideally taken by English majors in the sophomore year, to explore a variety of significant texts in the British and American tradition, each to be examined from diverse critical perspectives, including (but not limited to) the following: formalist/New Critical, structuralist, New Historicist, feminist, deconstruction/poststructuralist, Marxist, psychoanalytic, race/ethnic/postcolonial studies. Restricted to English majors and minors.
Restrictions: Enrollment is limited to students with a major in English.
Attributes: GEP Art/Literature, Undergraduate

ENG 231 Introduction to Theater (3 credits)

ENG 231: Creative Writing Intro Workshop (3 credits)
Exploration of at least two creative genres (fiction, nonfiction, poetry, plays). For models and inspiration, students will examine selected works by contemporary creative writers in varied styles. Writing workshop format.
Attributes: English Area 1 - Writing, GEP Art/Literature, Undergraduate

ENG 261 News Reporting (3 credits)
This course introduces students to reporting and writing for the news media. In frequent assignments throughout the semester, students will practice the basic principles of journalism with an emphasis on structure, accuracy, clarity, and style, key for journalists working in any medium. They will gain experience in story pitching and development and in newsgathering methods, including interviewing, fact gathering and fact checking. Additionally, students will study timely topics related to journalism ethics and the law as well as journalism’s transition into the digital age. While this course is based in the classroom, students are expected to learn and adhere to professional newsroom standards. Does not fulfill GEP Art/Lit requirement.
Prerequisites: ENG 101 or ENG 111
Attributes: English Area 1 - Writing, English Journalism Track, Undergraduate

ENG 263 Writing for Organizations (3 credits)
Comprehensive examination of various forms of writing that are produced in managing organizations, including email, memonara, letters, reports, brochures, guidelines, and slide share presentation materials. Writing Intensive overlay.
Prerequisites: ENG 101 or ENG 111
Attributes: Undergraduate, Writing Intensive Course - GEP

ENG 264 Techniques of Bus Presentation (3 credits)
An examination of the business planning cycle with emphasis on the final delivery stage—with concern for developing an effective format and style of both oral and written presentations. The role of technology in all forms of presentation will be considered. Does not fulfill GEP Art/Lit requirement.

ENG 265 Writing for Public Relations (3 credits)
This course introduces students to the basic strategies and techniques of public relations writing through the creation and evaluation of a variety of materials commonly used in PR. Students will gain core knowledge of the following: AP style, branding, crisis communication, social media (Facebook, Twitter, and LinkedIn), audience targeting, blogging, media kits, media tracking, fact sheets, press releases, feature articles, and brochures. Does not fulfill GEP Art/Lit requirement.
Prerequisites: ENG 101
Attributes: Undergraduate

ENG 266 Case Studies: PR & Advertising (3 credits)
A study of effective and ineffective cases in the history of public relations and advertising.

ENG 267 Negotiations, Writing & Conflict (3 credits)
The course involves students in an eclectic writing process that includes legal research, conflict analysis and public speaking. Modeled in part upon the Harvard Negotiation Project’s Getting To Yes methodology, the course also involves newly emerging practices that challenge the notion of argument and encourage exchange between disputing parties. The thesis of the course is that, when individuals embroiled in a conflict begin to hear and understand one another’s stories, they have the option to change and to grow. Although courtrooms and trials will be examined, quite unlike a law course, the format for our class includes dramatic performance, passages from fiction and poetry as well as essays to reveal the common sense that can provide peace between warring interests. The focused goal of this sequence of readings, dramatic exercises and writing is for each student to evolve and to articulate communication strategies for crisis situations.
ENG 268 Persuasion/Influence in Media (3 credits)
In this course, we will examine some of the theories, concepts, and research associated with persuasion and their application for ethical and effective interaction in personal, professional and mass media settings. In addition, emphasis will be placed on social influence, compliance gaining and deception. Class activities, discussions, readings and assignments are designed to facilitate a "better understanding of how persuasion functions, an improved knowledge of ways to maximize our own persuasive efforts, and a greater ability to resist influence attempts, especially unscrupulous influence attempts, by others" (Gass, Seiter, 2007).

ENG 301 Middle English Literature (3 credits)
This course will provide an overview of Middle English literature, excluding Chaucer, by beginning with the earliest Middle English texts and ending with Sir Gawain and the Green Knight. We will focus on language, translation, and close reading to start, with the goal of arriving at a broader consideration of the Middle English literary tradition and its role in the creation of English literature as we now know it.
Attributes: English Area 2 - Medieval/Ren, English Early Lit, GEP Art/Literature, Undergraduate

ENG 302 Renaissance Non-dramatic Lit (3 credits)
Was the Renaissance the age of the individual? Was poetry – the dominant literature of the day – a means to power, a force for good or instead a corrupting agent? This course will consider divergent views on the English Renaissance alongside major works by authors such as Sidney, Spenser and Milton.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English.
Attributes: English Area 2 - Medieval/Ren, English Early Lit, English Literary Theory, GEP Art/Literature, Undergraduate

ENG 303 Renaissance Drama (3 credits)
A study of the drama of Tudor and Jacobean England, excluding Shakespeare. The plays of Marlowe, Jonson, Webster, and Ford and their distinctive dramatic qualities will be emphasized. Acceptable for Theatre/Drama track.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English.
Attributes: English Area 2 - Medieval/Ren, English Theatre/Drama, English Early Lit, GEP Art/Literature, Undergraduate

ENG 305 Eighteenth Century English Lit (3 credits)
This course deals with the literature of the Restoration and eighteenth-century, a time of intellectual, cultural, and political revolutions. Among the writers who may be studied are Behn, Dryden, Swift, Pope, Haywood, Defoe, Richardson, Fielding, Johnson, Sterne, Burney, Inchbald, and Wollstonecraft. Depending on the instructor, the course may focus on a particular genre or it may deal with a specialized topic, such as "The Rise of Gender in the Novel," "The Idea of Authorship in the 18th Century," or "The Satiric Mode."
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English.
Attributes: GEP Art/Literature, Undergraduate

ENG 306 Nineteenth Century English Lit (3 credits)
Depending on the instructor, the course may be focused in a variety of ways, all exploring different developments in literature in England in the 19th Century (Major Romantic Poets, The Nineteenth-Century English Novel, Rebels-Reactionaries: Victorian Romanticism, Victorian Literature).
Attributes: English Area 4- British/Irish, GEP Art/Literature, Undergraduate

ENG 307 Modernism: British & Irish Lit (3 credits)
A study of representative authors of British and Irish Modernism, including Auden, Conrad, Eliot, Forster, Joyce, Lawrence, Woolf, and Yeats. Depending on the instructor, this course may also explore works by Bowen, Ford, Lewis, Moore, O'Brien, Wilde, or other authors.
Attributes: English Area 4- British/Irish, GEP Art/Literature, Undergraduate

ENG 310 20th Century Irish Literature (3 credits)
Investigates crucial authors and stages in the development of Irish literature in English from the period of Gregory, Joyce, O'Casey, Synge, and Yeats, through the mid-century period of Beckett, Behan, Bowen, Kavanagh, and O'Brien, to works by late twentieth-century authors (for example, Banville, Boland, Carr, Enright, Friel, and Heaney)
Attributes: English Area 4- British/Irish, GEP Art/Literature, Undergraduate

ENG 311 Contemporary Brit & Irish Lit (3 credits)
A study of contemporary, representative British and Irish novelists, playwrights, and poets from the Thatcher era to the present
Prerequisites: ENG 101
Attributes: English Area 4- British/Irish, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 315 Literature of South Asia (3 credits)
This course examines contemporary fiction and film from the Indian subcontinent (primarily India, but with some focus on Pakistan as well). Works studied include both Anglophone texts and texts in translation read alongside major events of twentieth- and twenty-first century South Asian history, particularly Independence and Partition. Featured authors may include: Mulk Raj Anand, Saadat Hasan Manto, R.K. Narayan, Arundhati Roy, and Salman Rushdie. Diversity/Globalization/Non-western overlay.
Attributes: English Area 4- British/Irish, English Diversity, GEP Art/Literature, Non-Western Studies (GEP), Undergraduate

ENG 317 Literature of South Africa (3 credits)
This course provides a historical view of South African literature, focusing on apartheid, its segregationist precedents, and its present-day legacies. Utilizing novels, historical and legal documents, and creative nonfiction, as well as short fiction and film, the course introduces students to the writings of South Africans who represent diverse subject positions and experiences, but who are all united in the common goal of re-examining and working through South Africa's traumatic past. Diversity/Globalization/Non-western overlay.
Africana Studies.
Attributes: Africana Studies Course, Eng, British/Irish/World Lit, English Diversity, GEP Art/Literature, Globalization Course (New GEP), Non-Western Studies (GEP), Undergraduate

ENG 319 Postmodernism (3 credits)
Engagement with a wide range of writers whose work represents both radical extension and rejection of the earlier modernist movement, with exploration of texts by Fowles, Barth, Barthelme, Calvino, Heller, Vonnegut, Pynchon, Smith, Eggers.
Restrictions: Enrollment limited to students with the Honors Program Student attribute.
Attributes: English Area 4- British/Irish, English Area 5 - American Lit, GEP Art/Literature, GEP Art/Literature, Honors Course, Undergraduate
ENG 320 Contexts of Faith in Modern Literature (3 credits)
This course examines representations of religious faith in a variety of literary genres (fiction, drama, poetry, film) from the 20th century to the present. Students will consider to what extent the texts studied reflect and develop traditional expressions of religion and the degree to which they engage readers in an evaluation of faith as a source of knowledge. Acceptable for Faith and Reason GEP requirement.
Attributes: GEP Art/Literature, Undergraduate

ENG 321 Early American Literature (3 credits)
A study of the literary genres that emerged from the colonization of North America and the establishment of the federal republic of the United States, with a focus on the role of literature in defining American national identity. Readings will include histories, journals, sermons, poems, autobiographies, and novels by authors including John Winthrop, Anne Bradstreet, Mary Rowlandson, Benjamin Franklin, Olaudah Equiano, Nathaniel Hawthorne, Harriet Beecher Stowe, as well as explorers, Indigenous people, and other early national authors.
Attributes: English Area A5 - American Lit, Early Lit, GEP Art/Literature, Undergraduate

ENG 322 American Literature 1865-1915 (3 credits)
A survey of American literature between the Civil War and World War I, from realism to naturalism, with consideration of such writers as Twain, Howells, James, Crane, Dickinson, Robinson, Cable, Wharton, Norris, and Dreiser.
Attributes: English Area A5 - American Lit, GEP Art/Literature, Undergraduate

ENG 323 Twentieth Century American Literature (3 credits)
An exploration of a century of dramatic change in the American literary landscape—from Dreiser’s Sister Carrie to Toni Morrison’s The Bluest Eye; through poets as diverse as E. E. Cummings, Allen Ginsberg, and Rita Dove; with options that may include key work from William Faulkner, Richard Wright, Sylvia Plath, Don DeLillo, and Louise Erdrich.
Attributes: English Area A5 - American Lit, GEP Art/Literature, Undergraduate

 ENG 324 Contemporary American Literature (3 credits)
An exploration of representative American works (creative non-fiction, fiction, poetry) from the past 25 years—including books from Jhumpa Lahiri, Joy Harjo, Tobias Wolff, Junot Diaz, Mark Doty, Kevin Powers, David Eggers and Cheryl Strayed.
Prerequisites: ENG 101
Attributes: English Area A5 - American Lit, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 327 Southern Literature (3 credits)
An overview of Southern literature from the nineteenth century to the present, with consideration of both poetry and fiction. Selected authors may include Poe, Twain, Faulkner, Welty, Warren, Taylor, Styron, Smith, Edgerton, and McCorkle.
Attributes: GEP Art/Literature, Undergraduate

ENG 328 African American Literature (3 credits)
This thematic survey explores how African American authors write about what it means (and has meant) to be a Black person in the U.S. Exploring poetry, autobiography, drama, short stories, novels, essays, and films we grapple with the multifaceted experiences of “Blackness” in literary texts produced from the era of slavery to the present. Through our reading we develop an understanding of specific African American literary traditions.
Attributes: Africana Studies Course, Diversity Course (New GEP), GEP Art/Literature, Undergraduate

ENG 329 Black Women’s Literature (3 credits)
Linked by history, race, gender, and fate, but arguably little else, how do Black women writing in the U.S. write themselves into the idea of America? This course examines exclusively Black women’s literature in order to answer this question. Covering a minimum of three traditional African American literary periods, students are positioned to question notions of privilege and power driven by the intersectionalities of gender and race. Diversity/GLOBALIZATION/Non-western Africana Studies.
Attributes: Diversity Course (New GEP), GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 330 Caribbean Lit in English (3 credits)
This course explores the intersectionalities of racial, ethnic, and linguistic identities within Anglophone and Francophone Caribbean literary traditions. In dialogue these literary traditions complicate a monolithic Caribbean narrative. With careful study of language, class, color, and identity we determine how authors contest with and memorialize French, British, and American imperialisms in the Caribbean. Likely authors include: Michelle Cliff, Edwidge Danticat, Merle Hodge, Thomas Glave, George Lamming, and Jamaica Kincaid. Diversity/GLOBALIZATION/Non-western Africana Studies.

ENG 331 Modern Drama (3 credits)
Major English and continental dramatists of the modern period from Ibsen to the present; a survey emphasizing not only major writers but also significant changes in dramatic form.
Attributes: GEP Art/Literature, Undergraduate

ENG 332 Playwriting (3 credits)
This course offers students the experience of creating original material for stage presentation, with particular focus on the one-act play structure and concern for character, scene, and plot development.
Attributes: English Area A1 - Writing, English Theatre/Drama, GEP Art/Literature, Undergraduate

ENG 333 Read/Write/Adapt Theatre Drama (3 credits)
Examination of the diverse functions of the dramaturge developing background perspective for bringing dramatic texts to the stage, adapting various texts for stage presentation, writing interpretive notes for staged productions. Students will adapt literary texts for Reader’s Theatre performance.
Attributes: English Area A1 - Writing, English Theatre/Drama, GEP Art/Literature, Undergraduate
ENG 341 Poetry Workshop (3 credits)
Exploration of poetry by reading and writing. Each student will be responsible for creating a set of poems. Writing workshop format.
*Attributes*: English Area 1 · Writing, GEP Art/Literature, Undergraduate

ENG 342 Fiction Workshop (3 credits)
Exploration of fiction by reading and writing. Each student will be responsible for creating a set of stories. Writing workshop format.
*Attributes*: English Area 1 · Writing, Undergraduate

ENG 343 Nonfiction Workshop (3 credits)
Exploration of creative nonfiction by reading and writing, with particular focus on the form of the personal essay. Each student will be responsible for creating a set of essays. Writing workshop format.
*Attributes*: English Area 1 · Writing, GEP Art/Literature, Undergraduate

ENG 344 Screenwriting (3 credits)
Exploration of screenwriting in a workshop format with consideration of the whole process involved in development of screen projects, including feature-length film projects. Does not fulfill GEP Art/Lit requirement.
*Attributes*: English Area 1 · Writing, Undergraduate

ENG 345 Tutor Prac, Writ Cntr Thy Pr (3 credits)
This course introduces students to writing center history, theories, and practices. Readings include landmark and contemporary texts about writing pedagogy in general and the tutoring of writing specifically. Additionally, students study issues and strategies of relevance to ESL writers for whom English is not their first or home language. Students are introduced to the practices of peer tutoring through class discussions and through observation and tutoring in the University Writing Center. Upon successful completion of this course, they are eligible to be hired in subsequent semesters as writing tutors. Open to students from all majors who are interested in writing and/or the teaching of writing. Permission of instructor required. Writing Intensive. Does not fulfill GEP Art/Lit requirement.
*Prerequisites*: ENG 101
*Attributes*: Undergraduate, Writing Intensive Course · GEP

ENG 346 Writing for Digital Platforms (3 credits)
This course explores the changing role and style of writing in our digital age. Students will practice multiple genres of writing across a variety of digital platforms, including journalistic writing, business writing and personal writing. Students will practice adapting and revising stories for multimodal delivery to target specific audiences while maintaining accuracy and consistency in content. Does not fulfill GEP Art/Lit requirement.

ENG 350 Digital Platforms (3 credits)

ENG 360 Feature Writing (3 credits)
At its most basic definition, feature writing is journalism that tells a story—generally, the kind of story that you don’t soon forget, that lingers for many moments, or days, or years after you first encounter it. In this course, students study outstanding examples of feature stories and multimedia feature packages. From those examples, they learn how to combine the best reporting practices with the best storytelling practices in order to produce their own powerful features that marry in-depth reporting and research with captivating and creative storytelling skills. Students should have taken ENG 261 or have prior journalism experience before enrolling in this course. Does not fulfill GEP Art/Lit requirement.

ENG 361 Mobile Journalism (3 credits)
This course examines the impact of mobile technology on news organizations around the world and the ways in which these organizations capitalize on mobile technology as a delivery platform. On a practical (and practiced) level, students spend the semester using mobile technology as journalists. They explore social media platforms of particular use to journalists as well as produce their own media content using various mobile tools. Students should have taken ENG 261 or have prior journalism experience before enrolling in this course. Does not fulfill GEP Art/Lit requirement.
*Attributes*: English Area 1 · Writing, Undergraduate

ENG 362 Photojournalism (3 credits)
This is an introductory course in photojournalism presented in a multimedia context. Students will be required to have access to either point-and-shoot cameras or (ideally) DSLR camera kits. The course will be taught as a hands-on workshop. Instruction will progress from basic camera operation and single image assignments to more comprehensive visual storytelling. Does not fulfill GEP Art/Lit requirement.
*Attributes*: English Area 1 · Writing, English Journalism Track, Undergraduate

ENG 363 Sports Journalism (3 credits)
This hands-on, multimedia course covers all aspects of current sports journalism, from reporting and telling stories in print and broadcast media as well as in blogs, podcasts and social media. In addition to learning how to break news across multiple platforms, students will practice the kind of in-depth reporting and compelling storytelling that leads to profiles and full-length features. Students should have taken ENG 261 or have prior journalism experience before enrolling in this course. Does not fulfill GEP Art/Lit requirement.
*Attributes*: English Area 1 · Writing, English Journalism Track, Undergraduate

ENG 364 History of Journalism (3 credits)
This course surveys the history of journalism and mass media in the United States (from the colonial press to contemporary news media). Topics include the Revolutionary period; the emergence of the penny press; yellow journalism; women's stunt journalism; the African American Press; muckraking; and the evolution of "modern" mainstream journalism. Students will gain an understanding of the role of journalism in the U.S., while also becoming critical consumers of news media. Does not fulfill GEP Art/Lit requirement.

ENG 365 Multimedia Reporting (3 credits)
This course examines the defining place of writing in the directing, the editing and the scripting of texts for video and cinema. To learn the many kinds of composition involved in this process, students will work to construct documentary, advertising and dramatic film productions. In this process, students will become knowledgeable of the digital cameras and editorial computer technologies involved in filmmaking; however, the writing of prose and dialogue will be the main concentration of the course.
*Attributes*: English Area 1 · Writing, English Journalism Track, Undergraduate
ENG 370 Independent Study: Jr. Level (3 credits)
The chief purpose of the junior-level independent study project is for the student to acquire knowledge in a particular area of literature (reading and research project) or to produce a substantial piece of writing, either creative or discursive (writing project). For the reading and research project, the student will develop a course of study with the project director that may utilize audiovisual as well as printed material. In addition to a reading program, the student will write a substantial paper that develops from that reading program; the paper should use primary texts and have a textual perspective—historical, critical, aesthetic, or mythic. For the writing project, the student will develop a program of reading and writing with the project director. Minimum GPA of 3.0 (or cumulative average of 3.4 or higher for courses in the major field).
Attributes: GEP Art/Literature, Undergraduate

ENG 381 History of the Eng Language (3 credits)
A survey of the outer and inner history of the English language, from its Indo-European origins to its present American and worldwide use, including dialectal variations in modern American English. This course fulfills requirements within the Linguistics Major and Minor. See LIN 381.
Attributes: English Early Lit, Undergraduate

ENG 382 Lit Theo:Plato to Poststructur (3 credits)
Examination of some of the major issues in literary theory from the time of Plato to the present, including, but not limited to, the rhetorical effect of literature, the relationship between the text and the world, notions of the expressive power of literature, the formal qualities of the literary text, and poststructuralist notions of language. The course provides students with the opportunity to draw upon theory for their own literary analyses and prompts them to formulate their own theories about what literature is and does. Does not fulfill GEP Art/Lit requirement.
Attributes: English Literary Theory, GEP Art/Literature, Undergraduate

ENG 383 Seminar in Rhetorical Theory (3 credits)
Focused examination of some key factors in rhetoric over the ages: for example, invention strategies, the ethics of writing, methods of delivery. Does not fulfill GEP Art/Lit requirement.
Prerequisites: ENG 2031 or ENG 2035 or ENG 382
Attributes: GEP Art/Literature, Undergraduate

ENG 384 The Essay (3 credits)
A comprehensive study of the essay form through time, with special concern for identifying forces of change upon the style and function of the essay within selected cultural contexts. Acceptable for GEP Art/Lit requirement.
Attributes: English Area 1 - Writing, GEP Art/Literature, Undergraduate

ENG 401 Chaucer & the Medieval World (3 credits)
An examination of the development of various medieval narrative forms, including the romance, and the climax of their development in the poetry of Geoffrey Chaucer. The major historical focus will be on work written in England from 1300 to 1485; there will be some continental material included.
Attributes: English Area 2 - Medieval/Ren, English Area 4 - British/Irish, English Early Lit, GEP Art/Literature, Undergraduate

ENG 402 Shakespeare: Early Works (3 credits)
Shakespeare’s early plays and poems before 1601, primarily the histories and comedies. Close attention will be given to the dramatic structure in Shakespeare’s plays with special emphasis on the poetic.
Attributes: English Area 2 - Medieval/Ren, English Area 3 - Shakespeare, English Area 4 - British/Irish, European Studies Course, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 403 Shakespeare: Later Works (3 credits)
A reading of Shakespeare’s plays from Hamlet to The Tempest. Close attention will be given to the dramatic structure in Shakespeare’s plays with special emphasis on the poetic. A special study of the problem plays and the tragedies.
Prerequisites: ENG 101
Attributes: English Early Lit, European Studies Course, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 404 Eng, Irish, Angophone Authors (3 credits)
An in-depth study of one to two significant authors of a particular period, the choice to be made by the instructor.
Prerequisites: ENG 101 or ENG 111
Attributes: European Studies Course, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 405 Henry VIII: Writing & Tyranny (3 credits)
A study of writings from and about Henry VIII and his court, with a particular focus on the controversial personalities of Thomas Wolsey, Thomas More, Thomas Cromwell, Anne Boleyn, Katherine of Aragon, and Henry himself. May include poems by Wyatt and Surrey, Cavendish’s Life of Wolsey, Shakespeare and Fletcher’s play Henry VIII, More’s Utopia and other of his works, the second novel in Hilary Mantel’s Wolf Hall series (Bring up the Bodies), and selected writings about Henry’s first divorce.
Ethics Intensive overlay
Prerequisites: ENG 101
Attributes: English Area 4 - British/Irish, European Studies Course, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 407 20thCenturyBritish/Irish Novel (3 credits)
A study of major developments in British and Irish fiction from World War I to the present, including Conrad, Forster, Joyce, Lawrence, Woolf, and Beckett. Depending on the instructor, this course may also explore works by Bowen, Ford, Fowles, Greene, Lewis, Moore, O’Brien, or other authors.
Attributes: English Area 4 - British/Irish, GEP Art/Literature, Undergraduate

ENG 410 Irish Gothic Fiction (3 credits)
Interrogating issues of genre and historical context, this course traces the evolution of Irish gothic and ghost stories from the early nineteenth century to the present.
Attributes: English Area 4 - British/Irish, English Literary Theory, GEP Art/Literature, Undergraduate

ENG 411 Black British Literature (3 credits)
This course focuses on narrative and criticism by Black British writers since the 1948 arrival of the Empire Windrush. We examine the way “Blackness” in Britain has been called upon to both unite and exclude while exploring the contested perception that Black experience in Britain should be examined solely in terms of race and identity. Likely authors include: Sam Selvon, Kwame Kwei-Armah, Jackie Kay, Andrea Levy, Caryl Phillips, and Zadie Smith. Diversity/Globalization/Non-western overlay.
Africana Studies.

ENG 415 Postcolonial Studies (3 credits)
An examination of diverse literary texts, films and theoretical essays that engage the idea of “post colonialism,” the circumstances and effects of one nation having sovereign power over another. We will emphasize works with a relationship to the British Empire (e.g., Forster, Conrad, Rushdie, Collins, Dickens, Joyce, Winterson), but we will not be limited to this particular historical context. Diversity/Globalization/Non-western overlay.
Attributes: Africana Studies Course, GEP Art/Literature, Globalization Course (New GEP), Undergraduate, Writing Intensive Course- GEP
ENG 416 Rebellious Women Writers (3 credits)
This course explores how British and American women of the late seventeenth to early twentieth centuries used writing to rebel against the status quo. We will examine both the historical circumstances in which women found themselves and the literary production that resulted. We will examine a wide variety of women's texts—narrative fictions, poetry, political polemics, conduct books, letters, autobiographies, social theories, sermons, and protest leaflets—and we will discuss the effects of these different responses to women's plight. We will look closely at the influences that British and American writers exerted upon one another. Diversity
Attributes: Diversity Course (New GEP), English Area 4- British/Irish, English Early Lit, English Diversity, GEP Art/Literature, Undergraduate

ENG 417 Post-Soul Black Literature (3 credits)

ENG 420 American Authors (3 credits)
An in-depth study of one or two significant American authors, the choice to be made by the instructor.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 421 American Novel, 19th 20th Cent (3 credits)
A study of the evolution of the novel in America; may include novels by Cooper, Hawthorne, Melville, Twain, Chesnutt, Wharton, James, Hemingway, Pynchon, Bellow, Updike, Kesey, Tan, Silko, or others depending on the instructor.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 423 Amer.Poetry, 19th & 20th Cent. (3 credits)
An analytical study of poetic development, with emphasis on Romantic and modern theory and practice. Among those studied: Poe, Whitman, Dickinson, Stevens, and Frost.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 424 Contemporary American Poetry (3 credits)
An exploration of the American poetry scene, from the 1950s to the present, including representative works from a number of movements: the Beats, the Confessionals, the Black Arts movement, women's poetry, the New York School, deep image poetry, and most recently, Language Poetry and New Formalism. The course is writing-intensive, with a student response journal and various assignments—including creative imitations, an explication, an analytical essay, and a review of a poetry collection.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 425 American Drama (3 credits)
A critical study of selected plays. The emphasis will be on the works of O'Neill, Wilder, Williams, Miller, MacLeish, and Albee. Acceptable for Theatre/Drama track.
Attributes: English Area 5 - American Lit, English Theatre/Drama, GEP Art/Literature, Undergraduate

ENG 426 Nature Writing in America (3 credits)
Examination of the literary treatment of nature in American culture, from Thoreau's Walden through the environmentalist writers of the contemporary period.
Prerequisites: ENG 101
Attributes: English Area 1 - Writing, English Area 5 - American Lit, Undergraduate, Writing Intensive Course- GEP

ENG 427 The Harlem Renaissance (3 credits)
Black artists in Harlem (and other densely populated urban areas) produced a significant collection of work remarkable for its breadth and complexity during the anachronistically named Harlem Renaissance (1922-1941). This course explores that creative explosion in an attempt to develop a comprehensive understanding of what compelled the movement and why the Harlem Renaissance continues to be so influential in Black literature and culture today. ENG 215, 328, or 329 recommended. Diversity/Globalization/Non-western overlay. Africana Studies.
Prerequisites: ENG 101 or ENG 111
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 428 The Beat Rebellion (3 credits)
A study of writers in the 1950s and early 1960s whose work reflected rebellion with regard to social and cultural norms.
Attributes: English Area 5 - American Lit, GEP Art/Literature, Undergraduate

ENG 429 ReadingWritingCivil Right Move (3 credits)
Consideration of how writing—speeches, poetry, fiction, and autobiography—both responded to and documented the Civil Rights movement and how writing was used to shape a social change agenda—with a close look at the rhetorical strategies involved in a wide range of texts; authors will include Martin Luther King, Jr., Malcolm X, Maya Angelou, James Baldwin, Taylor Branch, John Steinbeck, Alice Walker, and Eudora Welty. Diversity/Globalization/Non-western overlay.
Attributes: Diversity Course (New GEP), English Area 1 - Writing, English Area 5 - American Lit, English Diversity, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 431 Special Topics in Theater (3 credits)
Course content to be determined by instructor.
Attributes: English Theatre/Drama, GEP Art/Literature, Undergraduate

ENG 432 Theater Performance Practicum (3 credits)
Rehearsal and performance of a campus production (produced by the Cap and Bells Dramatic Society and directed by a faculty director) with the student in the role of actor or stage manager. Comprehensive study of the rehearsal and performance processes which culminates in the writing of a final research paper of ten pages in length. In order to register for this course, the production must be the third campus production in which the student has served as cast member or stage manager. Instructor approval required.
Attributes: English Theatre/Drama, GEP Art/Literature, Undergraduate

ENG 433 Writing and Environmt Justice (3 credits)

ENG 441 Literacy as a Social Practice (3 credits)
An investigation of literacy as a social practice, using composition theory, ethnography, fiction, autobiography, and popular culture to define literacy and ask questions about it. With concern for the defining forces of race, class, and gender, the course explores different uses of literacy and considers the concept of a literacy "crisis." Students will compose narratives of their own literacy practices and pursue independent research on some aspect of literacy and its applications to schools, society, and quality of life. Diversity. Does not fulfill GEP Art/Lit requirement.
Attributes: English Area 1 - Writing, English Diversity, GEP Art/Literature, Undergraduate
ENG 443 Special Topics in Writing (3 credits)
In this course, students will engage in writing projects based on an initial research to the submission of a final proposal. Students will first work together to consult for a single non-profit, while learning about the components of a strong grant proposal and the grant-making process overall. Then, each student will be paired with a local nonprofit organization, as volunteer consultants for that organization. Students will work with their nonprofit organization to identify a new or existing project that needs funding. They will then take what they learn in class about the grant-making process and apply it to meet the needs of their nonprofit “client,” with the ultimate goal of producing a complete grant proposal that can be submitted to funders.

Attributes: English Area 1 - Writing, Undergraduate

ENG 445 Gender & Narrative (3 credits)
A writing course designed to explore alternative and experimental genres that combat sexism and do social and political work, with particular focus on narratives developed to challenge dominant cultural structures and practices. Diversity. Acceptable for GEP Art/Lit requirement.

Attributes: English Area 1 - Writing, English Diversity, GEP Art/Literature, Undergraduate

ENG 446 Writing the Grant Proposal (3 credits)
This course introduces students to the grant-making process from initial research to the submission of a final proposal. Students will first work together to consult for a single non-profit, while learning about the components of a strong grant proposal and the grant-making process overall. Then, each student will be paired with a local nonprofit organization, as volunteer consultants for that organization. Students will work with their nonprofit organization to identify a new or existing project that needs funding. They will then take what they learn in class about the grant-making process and apply it to meet the needs of their nonprofit “client,” with the ultimate goal of producing a complete grant proposal that can be submitted to funders.

Attributes: English Area 1 - Writing, Undergraduate

ENG 450 Hospital Stories (3 credits)
In this course, students explore how race, class, gender, and sexuality are depicted through the writing of caregivers, medical professionals, and patients in essays, memoirs, and creative nonfiction. The course focuses on how cultural difference affects access to medical care and perceptions of the female body. Other possible topics include mental illness and AIDS/HIV. Acceptable for GEP Art/Lit requirement.

Prerequisites: ENG 101
Attributes: Diversity Course (New GEP), English Area 1 - Writing, English Diversity, GER Art/Literature, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 452 Writing and Reading Animals (3 credits)
This hybrid literature and writing course considers the representation of animals in a range of texts and explores how the depiction of animals as companions, gods, guides, objects, heroes, or monsters reflects changes in relationships between humans and nature. Students will also use the literary forms we study (fiction, nonfiction, and poetry) to reflect on their own experiences with animals (pets, animals in captivity or in the wild, and in books and films). Acceptable for GEP Art/Lit requirement, Writing Intensive overlay

ENG 461 Food Writing (3 credits)
This class explores the political, spiritual, and economic aspects of eating and offers students the chance to practice writing about food in different modes, from restaurant reviews to blog posts to personal essays. Does not fulfill GEP Art/Lit requirement.

Attributes: Undergraduate

ENG 462 Travel Writing (3 credits)
This course explores the elements of crafting narratives about journeys. Using students’ previous experiences of travel (and current experiences when applicable), students explore the elements of creative nonfiction writing. Students complete a variety of writing exercises, including a detailed travel journal, and other exercises on detail and description. After the exercises, students will write longer narratives that may include a profile of a person or place, a reflective memoir, and an essay about some aspect of another culture’s cuisine or cultural differences. Acceptable for GEP Art/Lit requirement.

Prerequisites: ENG 2041 or ENG 261
Attributes: English Area 1 - Writing, English Journalism Track, Undergraduate

ENG 463 Literary Journalism (3 credits)
This reading-intensive course provides an historical overview of a genre most often referred to as “literary journalism,” once called “new journalism,” and now sometimes dubbed “new journalism” or “immersion journalism.” Students may read works by writers such as Nellie Bly, Stephen Crane, John Hersey, Joan Didion, Truman Capote, Tom Wolfe, Hunter S. Thompson, Ted Konover, Sonia Nazario, Adrian Nicole LeBlanc, and Susan Orlean, among others. In addition to their literary consumption and interrogation of the field, students will produce several short exercises in the style of the genre and one final project. Does not fulfill GEP Art/Lit requirement.

ENG 465 Special Topics in Journalism (3 credits)
Focus on a particular issue in journalism, examination of some trend, or consideration of selected columnists/distinctive voices in journalism. Prerequisite: ENG 261: Introduction to Reporting & Writing, or permission of instructor. Does not fulfill GEP Art/Lit requirement.

Prerequisites: ENG 101 or ENG 111
Attributes: English Area 1 - Writing, English Journalism Track, Undergraduate

ENG 466 Journalism & Entrepreneurship (3 credits)
This course prepares and inspires students to approach journalism from the start-up perspective. The theories and practices of entrepreneurial journalism will be studied and simulated, with a special emphasis on the interplay between new venture creation, cutting-edge business strategy and state-of-the-art storytelling techniques. Students should have taken ENG 261 or have prior journalism experience before enrolling in this course. Does not fulfill GEP Art/Lit requirement.

ENG 467 Ethics in Journalism (3 credits)
At a time when the news media’s role in society, its accepted practices and its storytelling tools and platforms are all undergoing radical transformations, adhering to ethical standards is more important than ever for veteran and aspiring journalists. This course examines and challenges those ethics, their significance in the public sphere and the principles and theories serving as their foundation. Students should have taken ENG 261 or have prior journalism experience before enrolling in this course. Does not fulfill GEP Art/Lit requirement.
ENG 468 Global Journalism (3 credits)
This course explores the growing influence and impact of international journalism from native and non-native perspectives. The history and current state of foreign correspondence and war reporting will also be studied, along with the challenges and opportunities of practicing journalism in various parts of the world. Does not fulfill GEP Art/Lit requirement.

ENG 469 The Art of Editing (3 credits)
This course will introduce students to three basic levels of editing: substantive editing, copyediting, and proofreading. The course may include guest editor presentations as well as intensive review of grammar and writing skills and an introduction to copyediting marks. Finally, students will try on the multi-faceted roles of an editor—and experience the challenges of balancing aesthetic and pragmatic concerns—through several major writing and editing projects, including one multi-media project. Does not fulfill GEP Art/Lit requirement.

Attributes: Undergraduate

ENG 470 Independent Study: Senior Level (3 credits)
The senior-level independent study is for students to engage in faculty mentored research and writing. Students will develop a course of study with the faculty mentor that results in a substantial piece of scholarship, creative writing, or journalism. Minimum GPA of 3.0 (or cumulative average of 3.4 or higher for courses in the major field).

Attributes: GEP Art/Literature, Undergraduate

ENG 481 Literary Forms & Styles (3 credits)
Specific focus of the course will depend on the instructor. Approaches to the study of genres may be The Satiric Mode, The Lyric, The Short Story in America, Autobiography, The Sonnet, Science Fiction, and Books That Cook.

Prerequisites: ENG 101
Attributes: English Literary Theory, GEP Art/Literature, Globalization Course (New GEP), Undergraduate, Writing Intensive Course- GEP

ENG 482 Literature & Culture (3 credits)
Specific focus of the course will depend on the instructor. Approaches to considering the relationship between literature and culture may be Three Catholic Southern Writers: Dubus, O’Connor, Percy; The Mythic Imagination; Death, Mourning and Consolation; Representing the Irish Troubles; and Religion in Nineteenth-Century British Poetry.

Prerequisites: PHL 154
Attributes: Africana Studies Course, GEP Art/Literature, Undergraduate

ENG 483 Seminar in Narrative Form (3 credits)
Drawing on both fictional and theoretical texts, the course explores how narrative attempts to give meaning and coherence to experience and how readers process narrative. Literary texts include linear and nonlinear narratives and range from early modern to postmodern texts. Theoretical perspectives include structuralist, poststructuralist, and feminist. Acceptable for GEP Art/Lit requirement.

Prerequisites: ENG 101
Attributes: English Literary Theory, GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

ENG 484 Spec Topics in Critical Theory (3 credits)
This course provides an intense focus on a particular area of contemporary literary theory. Depending on the instructor, the course may cover major theoretical movements (e.g., feminist theory, deconstruction, new historicism) or concentrate on certain major figures (e.g., Bakhtin, Derrida, Cixous, Foucault). Does not fulfill GEP Art/Lit requirement.

Prerequisites: ENG 101
Attributes: English Literary Theory, Undergraduate, Writing Intensive Course- GEP

ENG 485 Nature Writing in America (3 credits)

ENG 490 Journalism Internship (3 credits)
The primary purpose of this internship is to introduce a student to journalism experience at a media outlet. In addition to helping students enhance their journalism skills, that experience should also help them to develop their understanding of the journalist’s role in society. Students will normally work from ten to fifteen hours per week at an appropriate site and will meet with their English-department mentor regularly during the semester. Students will maintain a portfolio of work completed, keep a journal or field notes of their work experience, secure an assessment of their work performance from a supervisor, and submit a final reflection essay and an updated resume that includes the internship experience. Restricted to English majors and journalism minors.

Attributes: English Literary Theory, Undergraduate, Writing Intensive Course- GEP

ENG 491 Independent Study: Community Svc (3 credits)
The primary purpose of this independent study is to introduce a junior or senior to professional writing, editorial, and related skills in a community-service setting. Students will normally work from ten to twenty hours per week at an appropriate site and will meet with their English-department mentors regularly during the semester. Acceptable venues include nonprofit organizations, private and public schools, and other suitable sites. Students will maintain a portfolio of work completed, keep a journal or field notes of their work experiences, secure assessment from a supervisor of their work performance, and submit a final reflection and updated resume that includes the internship experience. Restricted to English majors and minors. Minimum GPA of 3.0 (or cumulative average of 3.4 or higher for courses in the major field), or permission of mentor and chair.

Attributes: Undergraduate

ENG 492 English Internship (3 credits)
The primary purpose of this independent study is to introduce a junior or senior to professional writing, editorial, and related skills in a community-service setting. Students will normally work from ten to twenty hours per week at an appropriate site and will meet with their English-department mentor regularly during the semester. Acceptable venues include magazines, academic journals, publishing companies, television stations, radio stations, public relations firms and departments, advertising agencies, governmental and university departments, and other suitable sites. Students will maintain a portfolio of work completed, keep a journal or field notes of their working experience, secure assessment from a supervisor of their work performance, and submit a final reflection and updated resume that includes the internship experience. Restricted to English majors and minors. Minimum GPA of 3.0 (or cumulative average of 3.4 or higher for courses in the major field), or permission of mentor and chair.

Attributes: Undergraduate

ENG 493 Indep Research Project (Fall) (3,6 credits)
Includes College Honors theses. Requirements for college honors are listed above and under ‘Honors Program’.

Attributes: GEP Art/Literature, Undergraduate
ENG 494 Indep Research Project (SPR) (3 credits)
Includes College Honors theses. Requirements for college honors are listed above and under ‘Honors Program’
Attributes: GEP Art/Literature, Undergraduate

ENG 550 The Practice of Writing (3 credits)
An overview of the work of a practicing writer, with explorations of particular genres of interest to individual students in the course. Assignments may include a writer’s history (autobiographical account of interest in writing) and a writer’s apprenticeship (in-depth examination of a writer admired by the student).
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 560 Rhetoric Then & Now (3 credits)
Consideration of the history of rhetoric, from the Sophists to the present day, with particular concern both for the ethical considerations involved in persuasive uses of language and for the stylistic choices in developing written work.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 600 Poetry Today (3 credits)
Exploration of the current poetry scene, particularly in America, reading collections from a wide variety of poetic schools and from the theoretical positions that inform the poems. Movements covered may include feminist and identity poetics, the New York School, poetry of witness, neo-confessional, Language Poetry, and the New Formalism. Use of imitation to experiment with difference poetic stances and styles.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 605 Readers/Writers in Victorian Age (3 credits)

ENG 610 What is an Author? (3 credits)
This course will focus on reading and critiquing a number of important biographies, in order to see how various professional biographers have approached their task. Concomitantly, each student will be asked to choose a contemporary subject worthy of a biography (not a relative), who lives within a 50-mile radius of Philadelphia. Students will search out publications that often include biographical essays/profiles, gather detailed information about their subjects from various sources they determine to be important, and do the necessary interviews, with the aim of writing a biographical essay/profile.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 614 Lit Imagin: Arthurian Legend (3 credits)
This course focuses on reading and writing short stories with a particular focus on single-author contemporary and classic short story collections and their significance. Authors that maybe considered include Atwood, Diaz, Fitzgerald, Hurston, Lahiri, Munro, Millhauser, Poe, and Twain.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 615 Road to Revolution in 1960s (3 credits)
A study of the American cultural scene during the 1960s including how racial discrimination, gender discrimination, sexual repression and anti-war activism appeared in writing and culture. Writers may include: Jack Kerouac, Nikki Giovanni, Eldridge Cleaver, Kurt Vonnegut, Joseph Heller, Betty Freidan, and some Beat poets. Films were also consequential both in propelling and in reflecting revolutionary changes in American life through the 1960s. Several key films that may be considered include In the Heat of the Night, Bonnie and Clyde, The Graduate, Easy Rider.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 616 Writing and Inciting (3 credits)
This course will explore how Irish novelists and short-story writers have represented "the Troubles"—a protracted period of politically motivated violence in Northern Ireland, Great Britain, and the Republic of Ireland, which began in the late 1960s and has not fully ended today. Key questions include the following: What is the role of the artist in representing politically motivated and other types of violence? Should artists offer solutions or only pose problems? What are the moral and aesthetical stakes involved in making art out of atrocity? How might studying the fiction of the Northern Irish "Troubles" provide students in the M.A. in Writing Studies with thematic, technical and ethical insights for their own artistic investigations of the many forms of violence within their own societies?
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 617 Writing and the Other Arts (3 credits)
Study of relationship between the work of writers and that produced by other kinds of creative people (in music, in architecture, in painting and drawing, in film) in order to get a full sense of any particular cultural moment (the Renaissance, the Age of Enlightenment, the Roaring 20's, the Rebellious 60's).
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 618 Idea of the Book: CodeX-Hypertext (3 credits)

ENG 619 Young Adult Lit Coming Age Narrative (3 credits)
In this course we immerse ourselves in a range of contemporary literary texts written for, read by, assigned to, or kept from young adults (ages 12-18). Our goals will be to become both more familiar with the wide variety of texts geared toward adolescents and more attuned to our own experiences as readers and writers of young adult literature. At the same time, we will be attempting to think through the multiple ways in which adults (particularly parents and teachers) and adolescent readers interact with these texts and with each other.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 620 Special Topics in Lit/Culture (3 credits)
This course will consider a particular aspect of literature and culture relevant to contemporary writers. Content will vary according to the instructor. Course can be repeated when content varies.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 630 Composition Theory (3 credits)
Exploration of theories of composition, with particular emphasis on contributions to the field in the past half century.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.
ENG 635 The Writing Teacher Writing (3 credits)
Consideration of the writing that teachers can do in order to develop their approach to the teaching of writing.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 636 Writing & Empowerment (3 credits)
ENG 638 Pedagogies Old & New (3 credits)
ENG 639 Writing & Cultural Conflict (3 credits)
ENG 640 Experiments in Narrative (3 credits)
Through examination of fictional and nonfiction narratives and narrative theories, this course considers such issues as the shift from oral to print hypertext narratives, linear and nonlinear structure, writing "taboo" subjects, and the impact of social-cultural-historical circumstances upon narrative form and function. Content varies with instructor.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 641 Rhetorical Theory: Special Topics (3 credits)
Study of select issues in the domain of rhetoric, to be determined by the instructor.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 642 Style (3 credits)
ENG 643 Special Topics in Essay (3 credits)
An exploration of a particular topic related to the essay. Topics may include women essayists, personal essays, writing and memory, or other topics.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 646 Multi-Media Writing (3 credits)
The objective of this course is to widen our conceptions of storytelling to include sounds and images as well as words and broaden our understanding of how stories strengthen community. We will spend part of the class learning to use digital storytelling tools that the university will supply, but most of the course will be spent finding, making and critically evaluating stories. These stories will come from American Radioworks, The Moth, The BBC and other sources from around the world. wide range of considerations relative to the work of the writer presenting work through the World Wide Web.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.
Attributes: English Area 2 - Medieval/Ren

ENG 655 Autobiography (3 credits)
Consideration of the writing that comes directly from life experience and development of an autobiographical narrative that reflects past achievements in this genre. Can satisfy Area I.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 668 Creative Nonfiction Workshop (3 credits)
Workshop course in creative nonfiction; several pieces of nonfiction will be prepared for submission. Can be repeated with the permission of the graduate director.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 669 Poetry Writing Workshop (3 credits)
In-depth look into the concerns of a publishing poet. Students will hone their own work, putting together a final portfolio of polished writing, and will explore publication options including chapbooks and literary magazines. Toward this end, the class will include workshopping and one-on-one conferences with the instructor, as well as reading and responding to contemporary poetry, with attention to the practical concerns of the poet. Can be repeated with the permission of the graduate director.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 670 Fiction Writing Workshop (3 credits)
Workshop method of critique, with students expected to put together a portfolio of polished short stories. Published short stories will be read as models, and there will be discussion of strategies of getting fiction published. Content varies with the instructor. Fiction-writing workshop I can be taken either before or after Fiction writing workshop II. Can be repeated with the permission of the graduate director.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 671 Fiction Writing Workshop II (3 credits)
Workshop method of critique, with students expected to put together a portfolio of polished short stories or a short section of a novel or novella. Published short stories and novels will be read as models, and there will be discussion of strategies of getting fiction published in a variety of locations. Content varies with the instructor. Fiction-writing workshop II can be taken either before or after Fiction writing workshop I. Can be repeated with the permission of the graduate director.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 673 Screenwriting Workshop (3 credits)
 Exploration of screenwriting in a workshop format with consideration of the whole process involved in development of screen projects.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 675 Special Topics Writing Workshop (3 credits)
Exploration of a particular topic not covered in other writing workshops. Examples include "Playwriting," "Writing and Memory," "Writing through Race, Class, and Gender," "Food Writing," and "Nature Writing." Content varies according to instructor. Course may be repeated with permission of the graduate director.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 676 Writing for Publication (3 credits)
Successful freelance publishing begins with an awareness of what editors and their readers want. It demands knowledge of the manuscript market and familiarity with the requirements of specific publications: subject, length, organization, style. Unpublished writers can perfect their skills by analysis and imitation of authors who already write for the publications in which learners wish to appear. The course requires that assignments be composed—from the beginning—for specific publications and that completed work will be submitted for publication. Content can be fiction, nonfiction, or journalism and varies with the instructor. Can be repeated with the permission of the graduate director.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.
ENG 677 Case Study: Public Relations (3 credits)
Comparative analysis of several public relations campaigns, with consideration of the rhetorical principles involved in the effort to sway public opinion.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 678 Case Study: Magazine Publishing (3 credits)
Exploration of magazine publishing, and the study of several magazines—their histories and editorial styles—with consideration for changing demographics and the practical considerations of achieving success in the magazine market. Consideration of the state of magazine publishing in both print and the web, and the development of articles from pitch to publication.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 679 Special Topics in Journalism (3 credits)
Exploration of a particular topic in journalism. May include sports journalism, literary journalism, or other topics as determined by the instructor.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 680 Writing the Grant Proposal (3 credits)
The course will explore various rhetorical strategies used to develop grant proposals and related writing such as the letter of inquiry, letter of intent, and mini-proposal. Students will examine and critique samples of actual grant-related submissions and practice developing relevant writing skills. Project budgeting will also be discussed and practiced. For their final project, students will be guided through selecting a non-profit organization, researching the organization’s history, mission, needs and other background, and creating a professional-quality grant proposal that the non-profit could choose to submit.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 682 New Media (3 credits)
Exploration of new communications media as the hypertext world expands and technology continues to make possible increased broadcast media opportunities.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 683 Editing Practicum (3 credits)
Assignment to a specific, actual editing project, with expectation that the student will engage in several editorial functions in preparing manuscripts for publication.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 684 Health Writing (3 credits)
Are pharmaceutical makers influencing scientific research? What emerging infectious disease is likely to be the next big scare? What are the pros and cons of universal healthcare? Is chocolate really good for the heart? This course will teach students how to report and write on some of the pressing health issues of the day and encourage them to become more discerning consumers of medical news. Students will learn how to analyze research studies, conduct interviews of doctors, scientists and patients, and translate findings into lively and informative stories for the lay reader. The course will explore the connection between the environment and disease and examine trends in medicine as technology advances and funding shrinks. Students will get the latest information from guest speakers who are leaders in the fields of medical research, public relations and the media. This course will help prepare students for a career in health-related writing or sharpen their communication skills for whatever field they are pursuing.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English. Enrollment is limited to Graduate level students.

ENG 770 Directed Readings (3 credits)
ENG 771 Directed Research (3 credits)
ENG 772 Directed Writing (3 credits)
ENG 773 Directed Fieldwork (3 credits)
ENG 791 Graduate Internship (3 credits)
Students have workplace internship assignments in areas of career interest that involve writing (research, editing, writing). A component of the course will be research in the internship field, in addition to writing of various kinds about the actual internship activity, some of it done with an eye to publication. Each placement involves approximately 200 hours of work over the course of the internship, a letter from a supervisor upon completion of the internship, and a journal documenting the work of the intern.
Restrictions: Enrollment is limited to students with a major, minor, or concentration in English or Writing Studies. Enrollment is limited to Graduate level students.
ENG 793 Thesis Project I (3,6 credits)
The thesis project can involve either an analytical study in some area covered by the program or a collection of original creative material. Each project will have a faculty director, selected by the student in consultation with the Writing Studies Program Director. For a project to be completed in one registration period, register for ENG 793 and ENG 794, 3 credits each, for a total of 6 credits. For a project to be completed in two separate registration periods, register first for ENG 793 for 3 credits, then later, for ENG 794 for the remaining 3 credits. It is recommended that each project also be read by a second reader, who will be chosen by the student and thesis director, and approved by the graduate director. At the completion of the thesis project, students will make a formal presentation of it in one of three ways: (1) A public reading of a selected portion of the project, (2) A formal defense whereby the thesis will be explained and questions about it entertained, or (3) A public reading coupled with a formal defense. The method of public presentation would be agreed upon by the student and the thesis director. The English Department will host opportunities for public readings two or three times a year (in September, December, and May) close to expected completion of degree requirements and the thesis project. Once complete, thesis projects will receive a P (pass). In progress thesis projects will be graded as Incomplete. Nota Bene: The Writing Studies diploma will not be conferred until the candidate has successfully completed the above steps, as well as submitted the thesis project in the correct format for binding. Details about the procedure for binding the thesis can be found on the Writing Studies website. Restrictions: Enrollment is limited to students with a major, minor, or concentration in Writing Studies. Enrollment is limited to Graduate level students.

ENG 794 Thesis Project II (3 credits)

English and Professional Writing
B.L.S.

Peter Norberg, Ph.D., Chair
Aisha Lockridge, Ph.D., Program Director, English and Professional Writing

Program Overview

The Department of English seeks to enlarge and refine the imaginative intelligence of its students—to enrich their intellectual lives as well as to help them develop their professional ones. The disciplined study of both literature and professional writing and speaking provides the means to those ends. Although the variety of the curriculum makes possible a student-determined emphasis on one or the other of these concentrations, the program requires competence in both. The English major offers both a humane and a liberalizing experience, while at the same time making available to its students the opportunity to acquire and practice the skills in professional writing and speaking that will enhance their careers.

For students who select the study of literature as their major concentration, the Department seeks to give an introduction to the most formative traditions—generic, historical, and critical—of British and American letters. Critical and analytical skills are developed by courses and seminars which offer an in-depth examination of a single author or specific topic. Because of their innate value in fostering intellectual maturity and as a preparation for more advanced study, the fundamentals of research will be systematically made available.

For those who emphasize the Professional Writing and Speaking concentration, the program stresses the study of the theories and techniques of rhetoric as they are applied in particular professional fields including business communications, advertising, public relations, and journalism. Many of the courses in this program are offered in an accelerated format, i.e., in modules of eight weeks. Frequent practice in these techniques encourages students to communicate coherently, imaginatively, and with impact.

Learning Goals and Objectives

Goal 1: Acquire knowledge of significant texts in the British, Irish, American, and Anglophone literary traditions.

Objective 1.1: Students will demonstrate a familiarity with British, Irish, American, and Anglophone key texts and an understanding of the historical continuities among literary conventions and imaginative traditions.

Goal 2: Develop rhetorical skills.

Objective 2.1: Students will recognize and use various rhetorical modes, including (but not limited to) narrative, exposition, analysis, and argument.

Goal 3: Develop creative abilities.

Objective 3.1: Students will exercise their imaginations in crafting their own creative works and performances, particularly through creative writing workshops and theatre courses.

Goal 4: Acquire knowledge of significant schools of literary theory.

Objective 4.1: Students will demonstrate an understanding of the historical development of literary theory and draw upon these models for their own literary analyses.

Objective 4.2: Students will formulate their own theories about what literature is and does.

Goal 5: Acquire knowledge of research fundamentals in English.

Objective 5.1: Students will locate, assess, and incorporate secondary sources (including electronic ones) into their own arguments.

Goal 6: Develop revision strategies and editing skills.

Objective 6.1: Students will demonstrate an understanding of revision.

Objective 6.2: Students will practice editing skills through examining their own writing and the writing of their peers.

Students admitted prior to Summer 2016 entered under the curriculum requirements for the BA in English. Please see the SJU Academic Catalog for your admit year for additional information.

General Education Program Courses
(See Curricula (https://academiccatalog.sju.edu/arts-sciences/professional-liberal-studies-gep))

GEP Integrative Learning Component

Two courses

Any two courses offered through the College of Arts & Sciences (not English Courses). Students are encouraged to discuss these choices with their faculty advisor in the English Department.
Major Concentration

Major Concentration Courses:
- One course in British Literature before 1832 or American Literature before 1860
- One course in British/Irish/World Literature course
- One course in American Literature course
- One Writing course (creative, journalism, rhetoric, pedagogy)
- Six major Electives. Students may choose to pursue a track in Literature or a track in Professional Writing and Speaking.

Minor in English

PLS students may also pursue a minor in English. For minor requirements, please see the Undergraduate Programs English section of the catalog.

English Major

Learning Goals and Objectives

Goal 1: Acquire knowledge of significant texts in the British, Irish, American, and Anglophone literary traditions.

Objective 1.1: Students will demonstrate a familiarity with British, Irish, American, and Anglophone key texts and an understanding of the historical continuities among literary conventions and imaginative traditions.

Goal 2: Develop rhetorical skills.

Objective 2.1: Students will recognize and use various rhetorical modes, including (but not limited to) narrative, exposition, analysis, and argument.

Goal 3: Develop creative abilities.

Objective 3.1: Students will exercise their imaginations in crafting their own creative works and performances, particularly through creative writing workshops and theatre courses.

Goal 4: Acquire knowledge of significant schools of literary theory.

Objective 4.1: Students will demonstrate an understanding of the historical development of literary theory and draw upon these models for their own literary analyses.

Objective 4.2: Students will formulate their own theories about what literature is and does.

Goal 5: Acquire knowledge of research fundamentals in English.

Objective 5.1: Students will locate, assess, and incorporate secondary sources (including electronic ones) into their own arguments.

Goal 6: Develop revision strategies and editing skills.

Objective 6.1: Students will demonstrate an understanding of revision.

Objective 6.2: Students will practice editing skills through examining their own writing and the writing of their peers.

Requirements for the English Major

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses

See this page about Signature courses (p. 26). Six courses

General Education Variable Courses

See this page about Variable courses (p. 26). Six to Nine courses

General Education Integrative Learning Component

See this page about Integrative Learning Component (p. 27). Three courses

GEP Electives

Thirteen to sixteen courses, depending on how many courses are required in the variable core

Major Requirements

Diversity within the Major

One course within the ten must be an English diversity course, which can be taken at any level and can overlap with other English requirements. This course does not satisfy the diversity, globalization or non-Western area studies degree requirement in the GEP.

Internship policy

One internship can count toward the major. Additional internships must be taken as general electives.

All English majors will be assigned a Departmental advisor with whom they will consult during the course of their studies and who will help them select a pattern of courses appropriate to their talents, interests, and possible careers.
Integrated Learning Courses

In consultation with, and with the approval of their faculty advisor, English Majors must complete three additional courses within the College of Arts & Sciences but outside the English major, with no more than two classes taken from the same department.

Track Options

Students also take four courses in one of the four track options:

- Literature,
- Writing,
- Theatre/Drama,
- Journalism.

See below for information about the English/Education Dual Major requirements beyond the core.

Literature Track

The Literature track requires one Medieval/Renaissance course, one Literary Theory or Genre Studies course, one literature course of any period (including dramatic literature), and one English elective.

Writing Track

The Writing Track requires three writing courses and one elective. With the chair’s permission, some Professional Writing and Speaking courses (PWS), offered in the College for Professional and Liberal Studies, may be taken in fulfillment of writing requirements.

Drama/Theatre Track

The Drama/Theatre Track requires MTF 161 Introduction to Theatre, two additional drama/theatre courses taken in the English Department, and one elective, which may be an English literature or writing course or one of the following Music, Theatre and Film courses:

<table>
<thead>
<tr>
<th>Code</th>

</tr>
</tbody>
</table>

Students in the Journalism Track are also encouraged to consider the Communication Studies Minor.

Interdisciplinary Programs in Africana, American, Ancient, Asian, European, Gender, and Medieval/Renaissance/Reformation Studies

English majors are eligible to participate in the Program in Africana Studies, the Program in American Studies, the Program in Ancient Studies, the Program in Asian Studies, the Program in Gender Studies, and the Program in Medieval, Renaissance, and Reformation Studies described elsewhere. All of these minors work well with the major.

Seminars and Writing Workshops

Seminars and writing workshops offered by the Department are designed to fit into a seminar room, with class size optimized at 16; the main purpose of any such seminar will be to give the student experience in intensive reading or writing experience. Literature seminars often involve closely supervised research in a specific area of literary studies. Writing workshops involve development of creative texts (poems, stories, creative nonfiction essays).

Independent Studies and Internships

English majors who have completed four regular semesters with an overall grade point average of 3.0 (or a cumulative average of 3.4 or higher for courses in English) may apply for credit in an independent study program, generally involving a topic that is not typically offered in the English curriculum and that will enrich the major program. At the end of the sophomore or early in the junior year, interested students may submit a written proposal describing, with particulars, the planned study project. The minimum requirement for such a proposal is that it include a substantial critical or creative writing project. If the proposal is accepted, the student will be assigned a faculty mentor who will oversee the writing project, offer advice on readings, help with the selection of courses, and establish a timetable for the completion of the writing project. The project may extend over one or two semesters. Serious and satisfactory work for one semester will earn three credits. A student who successfully completes the two-semester project will receive six credits. Internship independent studies are intended to introduce a junior or senior to professional writing, editorial, and related skills in a particular communications area. See the following under Course Descriptions for additional information:

<table>

</tbody>
</table>
The Center also offers online tutoring as well as assistance with digital writing such as blogging, social media, and slide share presentations. Projects and analytical essays, as well as résumés, cover letters, and graduate school personal statements.

Students who are interested in becoming peer tutors take ENG 345 Tutor Practicum, Writing Center Theory and Practice. The Tutor Practicum course is open to students in any major, and it is particularly appropriate for pre-law, pre-med and Education majors, as well as English majors and anyone interested in writing as a profession. Permission of the instructor is required; applications for the fall semester course are available in the spring.

**English/Secondary Education Double Major**

The English/Secondary Education Double Major requires two literature courses, including dramatic literature, and two writing courses. The three Integrative Learning Courses for the Education Track are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPE 160/160F</td>
<td>Intro to Special Education</td>
<td>3</td>

<tr>
<td>SPE 310/310F</td>
<td>Assessment &amp; Progress Monitor</td>
<td>3</td>
</tr>
<tr>
<td>SPE 203/203F</td>
<td>Tchng Adolescents Inclus Envir</td>
<td>3</td>
</tr>
</tbody>
</table>

The following are recommended for satisfying both Education and GEP requirements: first-year EDU 150/EDU 150F Schools in Society for the first-year seminar, EDU 157/EDU 157F Adolescent Development for the social and behavioral science requirement, and a Linguistics course for the Art/Lit requirement.

**Teacher Certification for Secondary Schools**

Students majoring in English who complete the double major in Secondary Education may apply to obtain an Instructional I, Secondary Education (12) Teaching Certificate from the State of Pennsylvania. In addition to their English advisor, English/Secondary Education double majors will also be assigned an advisor from the Education Department who will guide them through their required Education courses. The Education advisor will also assist students seeking teacher certification in formally applying for the teacher certification program, usually in the spring semester of their sophomore year. Students must have an overall GPA of 3.0 or higher to enroll in EDU 497 Secondary Student Teaching in their senior year. Students must maintain an overall GPA of 3.0 or higher to obtain teacher certification upon graduation.

Pennsylvania’s Secondary (referred to as “secondary” or “7-12”) preparation program guidelines require a professional core of courses, early and varied field experiences, and student teaching. In addition to the subject-specific content requirements for secondary programs that are met by the student’s major, candidates for the 7-12 teaching certificate in Pennsylvania must complete a prescribed sequence of coursework, which includes the specific requirements for Accommodations and Adaptations for Diverse Learners in Inclusive Settings and Meeting the Needs of English Language Learners under §49.13(4)(i)).

Below is the recommended program for students who will be eligible for a PA Level I teaching certificate in Secondary Education.

**Writing Studies M.A.**

**Graduate Arts and Sciences**

Tenaya Darlington, M.F.A., Director, Writing Studies
113 Merion Hall
610-660-3271
tdarling@sju.edu

**Program Description**

The Writing Studies program is unique to the Philadelphia area. Our program bridges the gap between traditional master’s degrees in English and creative writing degrees by emphasizing that all writing is creative. Our students take a wide variety of courses in order to explore the craft of writing from various perspectives.

This innovative program has several distinguishing features: it offers excellent training for magazine or journal editors and freelance writers; it provides rich growth opportunities for teachers of writing at the secondary or community college level; it provides important experience for traditional journalists; it incorporates collaborative workshops to stimulate creativity; and it develops skills important for success in corporate communications and public relations.

All of the teachers in the Writing Studies program are practicing writers who write in the genre that they teach. In other words, our public relations writing courses are taught by public relations writers, and published novelists teach our novel writing courses. All of our courses are small—typically fifteen students or less—to enable each student to get individual feedback from the instructor and detailed feedback from peers.

The students in the Writing Studies program are diverse in age, race, occupation, gender, and belief systems. The diversity of our students contributes to the success of our program. In addition to world-class writing faculty, students in our M.A. bring a wide range of ideas, creativity, and energy to our classes. Each class becomes its own community of writers.

In the Jesuit tradition of *Eloquentia Perfecta*, all Writing Studies courses engage students in using speech and writing effectively, logically, gracefully, persuasively, and responsibly. Students focus on developing the craft of a professional writer through drafting, revising,
and incorporating feedback from peers and instructors as the writing progresses toward publication. We hope all of our students will become working writers who write for a wide variety of audiences.

This program is designed to position its graduates to be very competitive in the broad field of professional writing and communications. The courses in the program are all focused, in one way or another, on the work of the writer. Graduates will pursue careers in a wide range of areas: public relations, magazine and book editing, freelance writing (fiction and nonfiction), print and broadcast journalism, corporate communications, and the teaching of writing. The Writing Studies program accommodates both full-time and part-time students.

**Admission Requirements and Procedures**

The Writing Studies program is designed to provide advanced training for people who have a good undergraduate foundation in the writing area and/or people who may have substantial work experience in professional writing or communications. Application forms are available online at http://www.sju.edu/academics/cas/grad/index.html.

Applicants should submit the following:

- a completed Saint Joseph’s University graduate application.
- official sealed transcript(s) of undergraduate/graduate coursework. Saint Joseph’s University graduates do not have to obtain their transcripts. The program will access your transcripts.
- a current résumé
- two letters of recommendation appraising the candidate's promise and capacity for graduate study, reflecting, from a professional's point of view, the candidate’s ability to pursue a rigorous, independent course of study at the graduate level. Often one of these comes from a former faculty member and one from a current employer, but two employer references or two academic references are acceptable.
- a two-to-three page (500 to 750 words) personal statement outlining the candidate’s professional goals and educational objectives for the program, including the applicant's rationale for program choice and professional study
- Two samples of writing (preferably published work – whether in college publications or in other places). Samples can be up to 20 pages, and can represent a variety of your writing (i.e., a short story and a newspaper article; a selection of poems and a newsletter. See below)
- $35 application fee – waived if attended an Open House or an SJU graduate.

The Graduate Committee looks for both a strong academic record and signs of serious interest in the work of a writer. The personal statement is a particularly important aspect of the application; a prospective student should use the personal statement to articulate his or her reasons for selecting this particular M.A. program and to discuss his or her strengths as writer in some detail. Writing samples can be analytical, creative, journalistic, or persuasive, and they can vary in length (up to 20 pages for the two samples. Many of our successful applicants submit one piece of creative writing and one piece of analytic writing to support their applications. A personal interview with the applicant may be requested.

**Learning Goals & Objectives for Writing Studies M.A. Program**

**Goal 1:** Acquire knowledge of the writing process

Students will be able to:

**Objective 1.1:** Exercise patterns of invention for creating original work by following a process-oriented approach to writing that includes brainstorming, drafting, and revision.

**Goal 2:** Develop editorial skills

Students will be able to:

**Objective 2.1:** Formulate constructive responses to the work of their peers regarding stylistic choices and organizational principles in one or more creative literary forms (poetry, fiction, creative nonfiction).

**Objective 2.2:** Practice editing skills through examining their own writing.

**Goal 3:** Acquire knowledge of the publishing process

Students will be able to:

**Objective 3.1:** Locate publishing venues and prepare a manuscript for submission in one or more genres, such as fiction, nonfiction, poetry, journalism, academic writing, or online content.

**Goal 4:** Develop rhetorical skills through analysis and practice

Students will be able to:

**Objective 4.1:** Demonstrate knowledge of rhetorical concepts, such as audience, purpose, and medium.

**Objective 4.2:** Practice analyzing appeals to character, emotion, and logic in persuasive discourse.

**Goal 5:** Develop long-form writing skills

Students will be able to:

**Objective 5.1:** Exercise the ability to plan, write, revise, and edit a work of at least 60–80 pages.

**Degree Requirements**

The M.A. in Writing Studies requires 30 credits of graduate work. Six credits will come from a thesis project (either an analytical study or a collection of original creative material, 700 level). The remaining credits involve courses at the 500 and 600 level. The program includes provisions for internships and directed individual projects of various kinds.

All students in the program will take two core courses: **ENG 550 The Practice of Writing** and **ENG 560 Rhetoric Then and Now**. These courses provide breadth of perspective on all of the general issues and circumstances faced by writers in the process of engaging an audience and making a living through the craft of language. Other courses in the program are organized in three complementary areas:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>AREA I: Writing and Culture (ENG 600-ENG 629)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>AREA II: Rhetoric and Composition: Theory and Practice (ENG 630-ENG 659)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>AREA III: Professional Writing (ENG 660-ENG 699)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

All graduates of the program are required to have at least one course from each area; two courses in an area would create a concentration. All of the courses are designed to have writing as the center of concern, and
many of the courses will emphasize writing for publication, from blogs to print. Some courses may count in multiple areas; consult the graduate director for details.

**Creative Writing Minor**

**Learning Goals and Objectives**

**Goal 1:** Develop creative abilities.

**Objective 1.1:** Exercise their imaginations in crafting their own creative works.

**Goal 2:** Develop revision strategies and editing skills.

**Objective 2.1:** Improve their creative work through revision and editing.

**Goal 3:** Practice a range of creative writing genres, including but not limited to: fiction, poetry, creative nonfiction, screenwriting, playwriting.

**Objective 3.1:** Write in various creative writing genres with an understanding of the conventions of each.

**Goal 4:** Learn to critique and revise creative work by way of the workshop format.

**Objective 4.1:** Critique the creative work of others in a constructive and insightful manner.

The minor in Creative Writing requires four creative writing courses beyond the common courses (ENG 101 and ENG 102).

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 241</td>
<td>Creative Writing: Intro Wrkshop</td>
<td>3</td>

</tbody>
</table>

Select three 300 or 400 level creative writing courses, including:

- ENG 370 | Independent Study: Jr. Level | 3 |
- or ENG 470 | Independent Study: Senior Level | 3 |

English Majors are not permitted to minor in Creative Writing. Instead, English Majors are encouraged to do the Creative Writing Track in the English Major.

**Educational Studies Minor**

**Learning Goals and Objectives**

**Goal 1:** Acquire knowledge of significant texts in the British, Irish, American, and Anglophone literary traditions.

**Objective 1.1:** Students will demonstrate a familiarity with British, Irish, American, and Anglophone key texts and an understanding of the historical continuities among literary conventions and imaginative traditions.

**Goal 2:** Develop rhetorical skills.

**Objective 2.1:** Students will recognize and use various rhetorical modes, including (but not limited to) narrative, exposition, analysis, and argument.

**Goal 3:** Develop creative abilities.

**Objective 3.1:** Students will exercise their imaginations in crafting their own creative works and performances, particularly through creative writing workshops and theatre courses.

**Developmental Course**

Select one of the following:

- EDU 151 | Develop, Cognition, & Learning |
- EDU 121 | Child Development |
- EDU 157 | Adolescent Development |

**Additional Courses**

Select two of the following:

- EDU 155 | Foundations of Early Childhood |
- EDU 231 | Assessment and Evaluation |
- EDU 232 | Reading Literature I |
- EDU 241 | Social Motor Development |
- EDU 247 | Literacy in the Content Areas |
- SPE 200/203 | Teaching in Inclusive Environ |

For More Information contact: 

*Dr. Frank M. Bernt,* Chair

**Teacher Education Department**

**Note:** A minor in Educational Studies is not sufficient to satisfy coursework for PDE Level 1 certification.

**English Minor**

**Learning Goals and Objectives**

**Goal 1:** Acquire knowledge of significant texts in the British, Irish, American, and Anglophone literary traditions.
Objective 1.1: Demonstrate a familiarity with British, Irish, American, and Anglophone key texts and an understanding of the historical continuities among literary conventions and imaginative traditions.

Goal 2: Develop rhetorical skills.

Objective 2.1: Recognize and use various rhetorical modes, including (but not limited to) narrative, exposition, analysis, and argument.

Goal 3: Develop creative abilities.

Objective 3.1: Exercise their imaginations in crafting their own creative works and performances, particularly through creative writing workshops and theatre courses.

Goal 4: Develop revision strategies and editing skills

Objective 4.1: Demonstrate an understanding of revision.

Objective 4.2: Practice editing skills through examining their own writing and the writing of their peers.

The minor in English requires four English courses beyond the common courses (ENG 101 and ENG 102) of the GEP. Students may choose any combination of English major courses in literature, writing, journalism, or drama/theater, including Independent Study (ENG 370 or ENG 470).

Journalism Minor

Learning Goals and Objectives

Goal 1: Develop an understanding of the vital role that media organizations play in sustaining democracies.

Objective 1.1: Demonstrate an understanding of the rights and responsibilities of a free press as well as an understanding of the various economic and social factors that influence the creation, dissemination, and consumption of journalism.

Goal 2: Learn basic journalism principles and accepted tenets of journalism ethics and the law, in part by way of significant moments in journalism history.

Objective 2.1: Develop and produce stories, and adhere to reporting practices, that reflect an understanding of basic journalism principles and that follow ethical guidelines such as those outlined in the Society of Professional Journalists Code of Ethics.

Goal 3: Develop reporting skills, from story ideation and discovery to pitching, sourcing, interviewing and information gathering.

Objective 3.1: Produce a variety of journalism, from breaking news or game day stories to full-length features or multimedia packages, that reflects learned skills in story ideation and reporting.

Goal 4: Develop writing skills that help them produce engaging journalistic content, including but not limited to news and feature stories, with particular attention paid to writing strong leads, organizing and focusing story angles and materials, and incorporating quotes.

Objective 4.1: Produce a variety of journalism, from breaking news or game day stories to full-length features or multimedia packages, that reflects learned skills in the development of story angles, in organization of sourced materials and in writing.

Goal 5: Acquire skills with common and emerging multimedia tools, platforms and programs, aiding in the creation, hosting and promotion of journalistic work.

Objective 5.1: Demonstrate familiarity with various multimedia tools and programs, and in particular, an understanding of the use of social media platforms for journalists and news organizations.

Goal 6: Develop revision strategies and copy editing skills consistent with accepted journalism practice and style.

Objective 6.1: Practice revision strategies and demonstrate knowledge of copy editing skills and journalism style.

The minor in Journalism requires six journalism courses beyond the common courses (ENG 101 and ENG 102) of the GEP.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

English Majors may also minor in Journalism.
ENVIRONMENTAL SCIENCE

Environmental Science in the GEP (See Curricula)
The GEP requires that all students take EITHER one semester of a lab-based natural science course (6 contact hours) OR two semesters of lecture-only natural science courses.

Non-science majors Environmental Science GEP courses:

<table>
<thead>
<tr>
<th>Code</th>

Undergraduate
• Environmental Science (p. 261)

Undergraduate Minors
• Environmental Science (p. 263)
• Environmental and Sustainability Studies (p. 260)

ENV 102 Environ Theory & Ethics Sem (3 credits)
An introduction to the political, economic, social, scientific, and philosophical concerns involved in environmental issues. Students will read, discuss, and write about current and controversial topics or problems integrating the aforementioned disciplines of study. A major goal of this course is to expose the students to the interdisciplinary nature of environmental science and the challenges of solving environmentally related problems. This course satisfies the Ethics Intensive Overlay.
Prerequisites: (ENV 105 or ENV 106) and PHL 154
Attributes: Ethics Intensive (New GEP), Undergraduate

ENV 103 Intro to Planet Earth (3 credits)
ENV 105 The Environment (3 credits)
An examination of the fundamental themes of ecology with an emphasis on the impact of humans on their environment. Included are discussions of current interest topics such as oil spills, nuclear waste, and rain forest destruction. This course fulfills a lecture-only natural science course requirement for the GEP natural science area.
Restrictions: Students cannot enroll who have a major in Biology, Chemistry, Chemical Biology or Physics.
Attributes: GEP Natural Science, Undergraduate

ENV 106 Exploring the Earth (4 credits)
A lab-based course that provides an overview of the functioning of the Earth. Ecology, basic biology, environmental science, and current events are used to examine the earth. Topics include natural resources, population, pollution, ecosystems, biogeochemical cycles, and biodiversity. This course satisfies the Natural Science requirement of the GEP.

ENV 106L Exploring the Earth Laboratory (0 credits)

ENV 150 Global Change Biology (3 credits)
ENV 216 Environment and Public Health (3 credits)
ENV 270 Special Topics (3 credits)
ENV 301 Environmental Chemistry (3 credits)
ENV 302 Environmental Geology (3 credits)
ENV 390 Environmental Science Seminar (0 credits)
This series of speakers will introduce majors and minors to current environmental science research, career options and experts in relevant disciplines inside and outside of the natural sciences.
Attributes: Undergraduate

ENV 490 Environmental Sci Internship (3 credits)
The Environmental Science Internship entails spending a minimum of ten (10) hours each week in a supervised fieldwork experience or approved environmental field course. Grading is based on student reports during weekly meetings with internship instructor, preparation of an internship journal, academic papers, exams, and formal evaluation by internship supervisor. Junior and senior Environmental Science majors and Environmental Science and Studies minors only
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Environmental Science.
Attributes: Undergraduate

ENV 493 Undergraduate Research in Env (3 credits)

Environmental And Sustainability Studies Minor
The environment is receiving significant attention in recent years in light of issues such as climate change, declining energy resources, and other sustainability related issues. A minor in Environmental and Sustainability Studies is meant to serve a broad student population and will provide students with an extensive understanding of environmental and sustainability issues. The minor will yield graduates who are truly "men and women for others" by preparing students for careers that will identify and study the causes and effects of current and future environmental challenges, educate others about the environment, and help write and analyze related policy.
Learning Goals and Objectives for the minor in Environmental and Sustainability Studies

Goal 1: Students will develop an understanding of the importance of the environment, the extent to which societal actions impact it, the need for sustainability and how that sustainability can be achieved.

Objective 1.1: Students will be able to describe the basic environmental challenges facing the world today, their causes, and possible solutions.

Objective 1.2: Students will be able to describe the scientific, ethical, and moral imperatives behind the need to protect and sustain a healthy environment, and the role of environmental science and environmental scientists in those efforts.

Goal 2: Students will develop an understanding of the importance of the environment, the extent to which societal actions impact it, the need for sustainability and how that sustainability can be achieved.

Objective 2.1: Students will demonstrate an understanding of the linkages between environmental science and non-natural science disciplines such as business, economics, history, politics, sociology, etc.

Requirements for the Minor

Students must take six courses for the Minor in Environmental and Sustainability Studies. Courses taken to fulfill requirements of the minor may also fulfill the GEP or overlay (Ethics, Globalization /Diversity, Writing Intensive) requirements as well as the student’s major.

All students will take (in this sequence):

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENV 106</td>
<td>Exploring the Earth</td>
<td>4</td>
</tr>
<tr>
<td>ENV 102</td>
<td>Environ Theory &amp; Ethics Sem</td>
<td>3</td>
</tr>
</tbody>
</table>

ENV 102 is currently offered every other year and fulfills the Ethics Intensive overlay.

Students are required to take four additional courses from the following four groups (Groups A-D). Courses do not need to be taken in any particular order, but some courses may require prerequisites. No more than two courses can be taken from each group.

Note for Natural Science majors: Students majoring in Biology, Chemistry, Chemical Biology, or Physics may minor in Environmental and Sustainability Studies. These students should fulfill at least three of their elective from groups B-D. The fourth can be chosen from Group A or B of the Environmental Science Major.

Environmental Science Major

Program Overview

The Environmental Science Program provides an interdisciplinary perspective on today’s many environmental concerns and prepares students for careers in the ever-growing field of environmental science. Emphasis is placed on developing an understanding of environmental issues from the perspectives of biological science, physical science, and a range of relevant disciplines in the social sciences, humanities and business. The strength and uniqueness of the Environmental Science Program at Saint Joseph’s University is a strong foundation in the natural sciences, which is critical to understanding the scientific concepts that underlie all environmental issues. Majors will work through a course of study that will develop an understanding of the basic principles and concepts of biology, chemistry, physics, and mathematics, then move on to a series of upper-level courses in biological sciences, physical sciences, and environmental studies. By choosing upper division courses in the areas that most interest them, each student will have the ability to design a unique course of study that will prepare him or her for a particular environmentally related career. A semester-long internship affords students the opportunity to gain hands-on experience working in the field of environmental science.

Learning Goals and Objectives for the B.S. in Environmental Science Major

Goal 1: Students will develop an understanding of the importance of the environment, the extent to which societal actions impact it, the need for sustainability and how sustainability can be achieved.

Objective 1.1: Students will be able to describe the basic environmental challenges facing the world today, their causes, and possible solutions.

Objective 1.2: Students will be able to describe the scientific, ethical, and moral imperatives behind the need to protect and sustain a healthy environment, and the role of environmental science and environmental scientists in those efforts.

Goal 2: Students will develop an understanding of the opportunities and challenges facing efforts to protect the environment and developing a sustainable society.

Objective 2.1: Students will demonstrate an understanding of the linkages between environmental science and non-natural science disciplines such as business, economics, history, politics, sociology, etc.
Goal 3: Students will develop a strong foundation in the physical and natural sciences, including environmental science, biology, chemistry, and physics.

Objective 3.1: Students will demonstrate knowledge of basic biology, including cell biology, genetics, and organismal biology

Objective 3.2: Students will demonstrate knowledge of general chemistry and physics.

Goal 4: Students will develop the skills needed for a successful career in Environmental Science, including experimental design, surveying of scientific literature, data collection, data reduction and the presentation of scientific conclusions to a range of audiences.

Objective 4.1: Students will demonstrate competency in operating basic laboratory equipment required to quantify and measure accurately.

Objective 4.2: Students will apply skills in data reduction including choosing and interpreting appropriate statistical tests.

Objective 4.3: Students will be able to develop cogent, well structured, and researched written and oral presentations of scientific material.

Goal 5: Students will understand the types of careers available to environmental scientists, create connections with people in the field of environmental science, and receive hands-on experience in the working world.

Objective 5.1: Students will demonstrate an understanding of the role of environmental science and scientists in societal efforts towards sustainability and complete an internship applying their knowledge to real-world issues alongside environmental professionals.

Requirements for the Environmental Science Major

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

### Environmental Science Minor

**Learning Goals and Objectives for the minor in Environmental Science**

**Goal 1:** Students will develop an understanding of the importance of the environment, the extent to which societal actions impact it, the need for sustainability and how that sustainability can be achieved.

**Objective 1.1:** Students will be able to describe the basic environmental challenges facing the world today, their causes, and possible solutions.

**Objective 1.2:** Students will be able to describe the scientific, ethical, and moral imperatives behind the need to protect and sustain a healthy environment, and the role of environmental science and environmental scientists in those efforts.

**Goal 2:** Students will develop a strong foundation in the physical and natural sciences, including environmental science, biology, chemistry, and physics.

**Objective 2.1:** Students will demonstrate knowledge of basic biology, including cell biology, genetics, and organismal biology.

**Objective 2.2:** Students will demonstrate knowledge of general chemistry and physics.

**Goal 3:** Students will understand the types of careers available to environmental scientists, create connections with people in the field of environmental science, and receive hands-on experience in the working world.

**Objective 3.1:** Students will demonstrate an understanding of the role of environmental science and scientists in societal efforts towards sustainability and complete an internship applying their knowledge to real-world issues alongside environmental professionals.

The minor in environmental science requires completion of the following (along with their respective laboratory sections) and three additional courses representing at least two of the course groups (A, B and C).

EUROPEAN STUDIES

The European Studies Program offers certificate program.

Major In European Studies

As of fall 2016, students will no longer be able to declare European Studies as their major.

Director

• Buckley

Undergraduate Certificates

• European Studies (p. 265)

European Studies Certificate

The certificate program in European studies is designed to give students majoring in diverse fields such as Art, Economics, English, Finance, French, German, History, International Relations, Italian, Marketing, Music, Theatre and Film, Philosophy, Political Science, Spanish, and Theology the possibility of focusing their major and elective courses in the area of European Studies. Serving as preparation for graduate studies or work in the fields of international commerce and foreign affairs, the program provides considerable study of a continental European language of the student’s choice aimed at complementing studies in the major concentration.

Requirements for the program in European studies include a minimum of six courses in French, German, Italian, or Spanish (201/202 - for German and Italian - or 202/301 - for French and Spanish + four approved advanced courses at the 300 or 400-level) and a minimum of four approved 300 or 400-level courses dealing with European studies in one or several of the following areas:

• Economics
• Art
• English
• Music, Film and Theater
• Finance
• History
• Philosophy
• International Relations
• Political Science
• Marketing
• Theology

Courses taken to satisfy requirements of the program may also serve to satisfy GEP, major and elective requirements, as appropriate. Students completing program requirements will be awarded a Certificate in European Studies.

Students must choose at least two courses from Group I in economics, finance, history, international relations, marketing, or political science; one from Group II in philosophy or theology; and one from Group III in art, music, theater and film or European literature. A list of the courses contained in each of these groups may be obtained from the Director of the program, who must be consulted by students when selecting courses.
FAITH-JUSTICE STUDIES MINOR

Students deciding to pursue a minor in Faith-Justice Studies are strongly advised to contact the Faith-Justice Institute during their sophomore year.

Students seeking the minor are required to successfully complete 6 courses from the program's listings with no more than three from one’s major area and at least one Theology course which directly addresses Catholic Social Thought. The following courses address Catholic Social Thought: THE 261, THE 361, THE 366, THE 372, and THE 373. By the end of their senior year, students need to submit a brief portfolio of their work to the Director of the Faith Justice Studies program.

Students are permitted to convert one upper division course into a Faith-Justice studies course provided that they observe the following guidelines:

1. student will obtain written permission from the instructor of the course and the Director of the Faith-Justice Studies program within the first six weeks of the course,
2. student will submit a written plan indicating how the course will satisfy Faith-Justice Studies course criteria,
3. student will submit a brief 3-4 page report at the end of the semester outlining how Faith-Justice Studies objectives have been met, along with supporting written materials (examinations, journals, projects, etc.).

Students may also use 3 credits of a senior independent project (for example an honors thesis project) to satisfy one of the course requirements provided they submit a proposal signed by a faculty mentor or departmental chair from their major within the first six weeks of the semester during which the three credits will be earned.

The courses listed below are a partial listing of courses which may apply towards the Faith-Justice Studies minor. Students are advised to refer to course schedules and to meet with the Director of the Faith-Studies program during the registration period to determine which sections of each course apply: not all sections of every course necessarily satisfy requirements for the Faith-Justice studies minor.

GENDER STUDIES

Department Overview

Gender Studies is an interdisciplinary field drawing from scholarship in the humanities, social sciences, natural sciences, and business. The Gender Studies program provides students with an intellectually challenging and engaging way of examining the world through the lens of "gender." Gender Studies courses explore how social structural categories such as gender, race, class, and sexuality influence human behavior and social interactions, structure access to opportunities and impact the lived experiences of women and men. Gender Studies courses apply current feminist/gender theories to issues in literature, art, history, philosophy, political science, psychology, religious studies, science, sociology, and business.

Gender as a social construction acts as the organizing principle for all Gender Studies courses. In addition, implicit in all Gender Studies courses is a basic tenet of feminist scholarship—that all academic work should connect to social justice work outside of the academy. The Gender Studies program encourages its minors to pursue this connection through internships, independent studies, and service-learning experiences that connect academic inquiry to social justice advocacy and action in community agencies and organizations.

Undergraduate Minor

- Gender Studies (p. 267)

GEN 200 Feminist Theories (3 credits)
This course provides a survey of feminist frameworks for thinking about sex, gender and oppression. The course begins with a consideration of whether the distinction between gender and sex is tenable, what it means to say that a category is socially constructed and how socially constructed categories can be oppressive. Given women's diversity, the latter part of the course considers critiques of attempts to provide a single systematic feminist framework. This will lead us to rethink the project of feminist theory and consider its possible new directions.

Attributes: Diversity Course (New GEP), Gender Studies Course, Undergraduate

GEN 201 Seminar In Feminist Studies (3 credits)

GEN 470 Independent Study (3 credits)
An independent study course, typically undertaken in the Senior year, in which the student develops and presents a research project in her or his major field of study which incorporates gender perspectives and feminist theories. Prerequisites: GEN 201, the approval of an independent study director in the student’s major, and the approval of the Director of Gender Studies.

Gender Studies Minor

Requirements for the Gender Studies Minor

Students seeking a minor are required to select six courses from the program’s listings with no more than three from the same academic discipline. GEN 201 Seminar in Feminist Theories must be one of the six courses. Students are encouraged, but not required, to take GEN 470 Selected Topics in Gender Studies. Students may select courses from the following list:

GENERAL STUDIES

Program Overview
The Bachelor of Liberal Studies Degree in General Studies grants the flexibility, industry-focus and knowledge required to be competitive in today's dynamic job market. Concentrations include humanities, social sciences, professional studies, and autism studies. The scope of these concentrations provides each student the opportunity to gain marketable skills and applicable concepts specific to their interests.

Please note: Students admitted prior to Summer 2016 entered under the curriculum requirements for the BS in Professional and Liberal Studies. Please see the SJU Academic Catalog for your admit year for additional information.

General Studies Concentrations
- General Studies (Autism Studies Concentration) (p. 270)
- General Studies (Humanities Concentration) (p. 272)
- General Studies (On-campus Professional Studies Concentration) (p. 269)
- Professional and Liberal Studies (Online Professional Studies Concentration) (p. 269)
- General Studies (Social Science Concentration) (p. 270)

B.L.S. in General Studies (On-campus Professional Studies Concentration)

Concentration Overview
Professional Studies is an interdisciplinary concentration in the General Studies major that builds effective communication skills and develops organizational development skills for the workplace. The Professional Studies concentration may be completed either on campus or online. Professional Studies concentration requires 24 credit hours and complements the P.L.S. General Education Program. Professional Studies is ideal for students who want to maximize credits completed at other accredited universities or colleges and apply them toward a bachelor's degree. Professional Studies concentration students apply their sharpened communication and interpersonal skills in the business or work place and set their goals for higher purposes after graduation.

Learning Goals and Objectives for the General Studies Program (Professional Studies Concentrations)
Goal 1: Knowledge of learning theories, group dynamics, and organization development.

Objective 1.1: Student will describe the effects on organizations when various learning theories, group dynamics, and organizational models are introduced into any professional setting.

Goal 2: Strong effective communication in professional settings.

Objective 2.1: Students will demonstrate mastery in APA writing for grammar, mechanics, style, and referencing.

Objective 2.2: Students will support claims with research evidence and effectively proofread writing for clarity and organization.

Objective 2.3: Students will demonstrate professional skills in oral language, voice, and body expression for presentations and public speaking.

Goal 3: Application of theories to work-related environments.

Objective 3.1: Students will become aware of the impact of individual identities (family background, roles, gender, race, ethnicity, religion, and sexual orientation) on organizations.

Objective 3.2: Students will describe various leadership styles and explain one's reasons for choosing one style over another in group settings.

General Education Program Courses
(See Curricula [https://academiccatalog.sju.edu/arts-sciences/professional-liberal-studies-gep])

GEP Integrative Learning Component
Any two courses in the social sciences, math, education, humanities, or natural science.

Select two introductory level Social Science courses

Two approved major electives offered in Health Administration, Organizational Development & Leadership (other than the courses listed above), Management, Professional Writing, Leadership & Organizational Sustainability, or Managing Human Capital.

B.L.S. in General Studies (Social Science Concentration)

Concentration in Social Science
Matthew J. Anderson, Ph.D., Associate Dean, Social Sciences

Learning Goals and Objectives for the General Studies Program (Social Science Concentrations)

Goal 1. Students will develop content knowledge of the social sciences.

Objective 1.1: Students will demonstrate knowledge of the key theories, concepts, and issues within the social sciences.

Goal 2. Students will develop effective written, oral, and technological communication skills.

Objective 2.1: Students will demonstrate effective written communication that is consistent with the format and standards of social science disciplines.

Objective 2.2: Students will demonstrate effective and professional oral communication skills.

Objective 2.3: Students will demonstrate effective communication using appropriate technology.

Goal 3. Students will develop an understanding of the methods of inquiry and critical thinking that typify the social sciences.

Objective 3.1: Students will demonstrate the ability to locate appropriate sources by searching electronic and print databases.

Objective 3.2: Students will demonstrate the ability to analyze empirical data and draw reasonable conclusions from them.

Goal 4. Students will develop an understanding of how social science disciplines apply the Ignatian principles of social justice, ethics, and service to others within our diverse society.

Objective 4.1: Students will demonstrate an understanding of ethical and socially responsible behaviors as they relate to social science disciplines.

Objective 4.2: Students will demonstrate an understanding of diverse human beliefs, abilities, experiences, identities, or cultures.

General Studies (Autism Studies Concentration)

Concentration in Autism Studies
Michelle Rowe, PhD, Chair, Health Services
Eileen Sullivan, Pharm.D., Program Director
Learning Goals and Objectives for the General Studies Program (Autism Studies Concentration)

Objective 1.1: Demonstrate knowledge of the current theories on the causes of autism spectrum disorders.

Objective 1.2: Demonstrate knowledge of the frequency, characteristics, symptoms, and diagnostic criteria of individuals with autism spectrum disorders.

Objective 1.3: Demonstrate knowledge of the nature of stereotypes, stigma, and discrimination of individuals with autism spectrum disorders.

Objective 2.1: Identify the behavioral needs of children and adults with autism spectrum disorders and demonstrate the current behavioral approaches to treating behavioral issues of individuals with autism using Applied Behavior Analysis and medically related therapeutic services.

Objective 2.2: Demonstrate the ability to communicate orally and in writing in the language of the discipline and particularly on the principles of Applied Behavior Analysis.

Objective 3.1: Demonstrate the roles and responsibilities of behavior analysts, therapists, allied health professionals and related staff, and demonstrate understanding of ethics guidelines in working with individuals with autism.

Objective 3.2: Graduates will act as responsible citizens, embracing personal and career objectives that honor and serve individuals with autism and their families.

Objective 4.1: Identify the impact on parents, siblings, families, and friends of individuals with autism spectrum disorders and demonstrate how to best help these individuals cope with associated stress.

Objective 4.2: Identify the impact of political issues, including funding and approval of services, around autism spectrum disorders.

Objective 5.1: Collect data on the progress of individuals with autism and develop behavioral plans; or collect data for the purpose of conducting research on a particular topic in the field of autism.

Objective 5.2: Identify and demonstrate methods to empirically assess and evaluate the progress of individuals with autism spectrum disorders for the purpose of developing intervention plans.

If pursuing the Board Certified Assistant Behavioral Analyst (BCaBA) credential, the Behavioral Analyst Certification Board (BACB) requires a grade of “C” or better in the behavioral analysis and practicum courses (IHS 466 – IHS 482). Courses must be completed in the sequence outlined above.

Experience Requirement for the Board Certified Assistant Behavioral Analyst (BCaBA) Credential

Students who plan to pursue the BCaBA credential must complete an experience requirement under the supervision of a Behavioral Analyst Certification Board (BACB) approved supervisor. For additional information on options for completing this experience requirement, please see the BACB website at www.bacb.com.

The SJU adult learner program offers an intensive practicum to meet the BACB experience requirement. This includes three (3) practicum courses (IHS 480, IHS 481 and IHS 482) which require 19+ hours per week on site, supervised by a BACB approved supervisor. As an alternative, students may opt to complete the experience requirement through independent supervised fieldwork.

If a student opts to not complete the intensive practicum courses at SJU, substitute courses may be completed for the degree requirements. IHS 480 may be replaced with an approved alternate upper division social science course. IHS 481 and IHS 482 may be replaced with free electives.
General Studies (Humanities Concentration)

Concentration in Humanities

Shawn M Krahmer, Ph.D., Associate Dean for Humanities

Learning Goals and Objectives for the General Studies Program (Humanities Concentration)

Goal 1. Students will develop content knowledge of the disciplines of the humanities.

Objective 1.1: Students will demonstrate knowledge of key theories, concepts, and/or issues within the study of History, Languages, Literature, Philosophy, Religious Studies, Theology, and/or the Arts.

Goal 2. Students will develop an understanding of the methods of inquiry and critical thinking that typify the study of the humanities.

Objective 2.1: Students will closely read, accurately analyze, and evaluate primary texts and/or works of art.

Objective 2.2: Students will discuss how the texts/art works studied contribute to larger historical conversations, debates, and cultural traditions.

Objective 2.3: Students will analyze texts or works of art as resources for understanding and appreciating the complexities of human identity, dignity, and experience.

Bioethics represents a complex intellectual phenomenon. Although an analysis of some of the important topics in bioethics. Students will familiarize themselves with the ethical questions surrounding major topics in contemporary bioethics. The course will focus on one or more of the following topics: medical research with human subjects, the new genetic medicine, social justice and the development of techniques for human reproduction.

HCE 500 Topics in Bioethics (3 credits)

This course will introduce the student to the basic theological concepts, frameworks, and analyses that have been used by both Catholic and Protestant theologians in their discussions of bioethics. After reviewing the various relationship between religion and medicine and the role that the theological reflection can play in bioethics, several topics will be discussed and analyzed in depth. Topics such as assisted reproduction technologies, abortion, genetic control, care of severely handicapped neonates, death and dying, and the meaning and application of “quality of life” to contemporary issues will be discussed in both lecture and seminar formats.

Restrictions: Enrollment is limited to Graduate level students.

HCE 552 Theological Issues Bioethics (3 credits)

The course will study from a philosophical perspective the various ethical theories that have influenced the development of bioethics. The course will use a historical method and concentrate, among others, on the ethical theories of virtue, teleology and deontology in their historical contexts. These theories will then be placed in the context of the development of contemporary bioethics in the United States and Europe.

Restrictions: Enrollment is limited to Graduate level students.

HCE 553 Phil Eth Theories in Bioethics (3 credits)

This course will examine how social justice is addressed in bioethics. Attention will be paid to the relationship between micro-ethics and macro-ethics. Different theories of justice will be presented along with specific moral problems facing contemporary health care. These may include globalization, recourse allocation, rationing, access to health care, preventative medicine and public health (e.g., which may include how we responsibly attend to epidemics, outbreaks, and/or bioterrorist attacks), compensation for organs or participation in research protocols (e.g., egg donation for SCNT and stem cell technology), and managed care and the role of evidence-based medicine. In addition, the course may include a section on how decisions are made from a social perspective on research agendas (i.e. why do we/should we pursue high-tech, high-priced medicine versus allocating those funds to do other initiatives).

Restrictions: Enrollment is limited to Graduate level students.

HCE 570 Clinical Bioethics & Rel Trad (3 credits)

This course will introduce the student to the basic theological concepts, frameworks, and analyses that have been used by both Catholic and Protestant theologians in their discussions of bioethics. After reviewing the various relationship between religion and medicine and the role that the theological reflection can play in bioethics, several topics will be discussed and analyzed in depth. Topics such as assisted reproduction technologies, abortion, genetic control, care of severely handicapped neonates, death and dying, and the meaning and application of “quality of life” to contemporary issues will be discussed in both lecture and seminar formats.

Restrictions: Enrollment is limited to Graduate level students.

HCE 571 Healthcare Disparities (3 credits)

This course will define the major health care disparities that exist in our society (gender, race, ethnicity, income, education, disability, geographical location and sexual orientation), how to measure disparities, the impact on individual and societal health, how to resolve disparities through cross cultural respect, current issues and future directions.

Restrictions: Enrollment is limited to Graduate level students.

HCE 572 Social Justice and Bioethics (3 credits)

The course is an analysis of some of the important topics in bioethics. Students will familiarize themselves with the ethical questions surrounding major topics in contemporary bioethics. The course will focus on one or more of the following topics: medical research with human subjects, the new genetic medicine, social justice and the delivery of healthcare, organ transplantation, death and dying, and the development of techniques for human reproduction.

Restrictions: Enrollment is limited to Graduate level students.

HCE 573 Death & Dying:Decision Making (3 credits)

This course surveys ethical issues and norms that pertain to healthcare for patients who are near the end of life. Various topics will be covered such as: extraordinary/ordinary means, medical futility, pain management, hospice, palliative care, living wills/advance directives, Do Not Resuscitate orders, Durable Powers of Attorney for Health Care and current topics in end-of-life decision making.

Restrictions: Enrollment is limited to Graduate level students.
HCE 574 Spirituality and Healthcare (3 credits)
HCE 600 Fieldwork Clinical Bioethics (3 credits)
Individuals will arrange specific types of clinical bioethical field work in an approved health care environment. Students need the permission of the program Director before registering. This course is designed to meet individual professional goals and may only be taken once during a student’s completion of this degree program.
Restrictions: Enrollment is limited to Graduate level students.
HCE 601 Issues in Neonatology (3 credits)
HCE 700 Integrative Capstone Bioethics (3 credits)

Health Care Ethics M.S.

Health Care Ethics Minor

Program Overview

The Interdisciplinary Minor in Health Care Ethics seeks to encourage learning and thinking from an interdisciplinary perspective and to foster a critical analysis of bioethical topics through the interplay between moral theory and medical practice. More and more people are beginning to realize the inherent importance of ethics in the clinical setting. Health care professionals are confronted with numerous complex ethical dilemmas that they may not be well prepared to handle. Therefore, it is imperative that they or those preparing to work in the field of health care be trained to understand the principles of ethics and how they can be utilized in clinical decision-making.

The Minor program is open to all majors in the university. Students have the option to pursue either the Basic Track or the Global Track. Both tracks are designed to expose students to the complex and growing field of biomedical ethics.

The Basic Track comprises one required course (THE 366: Christian Medical Ethics), Five electives and an exit interview. The Global Track is more rigorous. It requires the student to either take the Just Health Care in Developing Nations course (THE 368), that requires a study abroad for 2 weeks, or design a research project as part of an Independent Study that has been approved by a faculty member associated with the Minor program and the Institute of Clinical Bioethics. The idea is to encourage the student to explore many complex ethical dilemmas on the global scale, especially as they pertain to underdeveloped countries. Among the many issues to be considered are: the devastating impact of HIV/AIDS on Sub Sahara Africa, the ethics of human research in the developing world and the moral responsibility of developed countries to the health care needs of developing countries.

In addition to the course work, minors are encouraged to attend the events sponsored by the Institute of Clinical Bioethics especially the annual McCormick lecture.

Learning Goals and Objectives

The Minor Program in Health Care Ethics offers several learning goals and objectives for its students:

Goal 1.0: Students will gain an appreciation of philosophical and theological ethics both within the curriculum and through extracurricular activities.

Objective 1.1: Students will demonstrate the ability to discuss and argue positions on a wide range of ethical issues related to health care.

Goal 2.0: Students will gain insight into the clinical side of health care as well as the pharmaceutical industry, the health care insurance industry, health care administration and education and medical research.

Objective 2.1: Students will apply ethical theories and principles to the resolution of “real life” ethical dilemmas.

Goal 3.0: Students will possess the skills to analyze topics in health care from an ethical perspective.

Objective 3.1: Students will articulate ethical positions from the perspective of varied disciplines (Theology, Philosophy, Law, Business, Sociology, Public Health etc.).

Objective 3.2: Students will craft an ethical analysis of a designated bioethics topic and propose policy solutions or program development initiative. In addition, students will:

- Develop a basic understanding of moral philosophy and theology.
- Understand the basic ethical principles – beneficence, non-maleficence, autonomy and justice.
- Learn how to apply risk vs. benefit analysis to concrete ethical situations.
- Develop basic proficiency in the analysis of case studies in bioethics.
- Understand the distinction and interrelationship between ethics and law.
- Appreciate how advances in technology pose complex ethical questions for society.
- Identify a wide range of ethical challenges facing the medical, pharmaceutical and insurance industries.
- Understand the importance of bioethics for those who aspire to be health professionals.
- Attend and participate in events sponsored by the Institute of Catholic Bioethics, such as lectures, panels, service experiences, etc.
- Integrate ethical principles in the analysis of a topic in bioethics.

Basic and Global Tracks

Students seeking the Interdisciplinary Health Care Ethics Minor are required to complete six (6) courses from at least 3 departments; no more than 3 courses from any one department may count for credit toward the minor. The prerequisite course is PHL 154: Moral Foundations.

Basic Track

Six (6) Minor courses are required for this track. Students are expected to complete:

HEALTH SERVICES

Department Overview
Health care is one of the most rapidly growing career fields in the United States. Aging baby boomers, new medical technology and interest in maintaining healthy lifestyles created demand for committed and compassionate professionals with a strong understanding of the bio psychosocial aspects of health and wellness. The B.S. in Interdisciplinary Health Services (IHS) prepares students for health care positions in hospitals, public health departments, human service agencies, clinical research and the healthcare industry. The majority of IHS graduates proceed to clinical or graduate school to study allied health fields, such as nursing, physical therapy, occupational therapy, speech therapy, physician assistants, pharmacy, or public health. Of the graduates who seek employment immediately after graduation, 61% work in health/ medicine/biotechnology, 17% in human and community service, 11% in insurance and 11% in education or government. Careers include health administrators, managed care analysts, health educators, program coordinators, patient representatives, and patient care technicians.

The IHS program offers comprehensive education in the natural sciences, public health, health care systems, and social sciences. Students are introduced to a broad array of medical issues such as heart disease, diabetes, stroke, addictions, injuries, violence, autism, and adverse childhood experiences. Courses address the socio-cultural influences of health, health behaviors, health care systems, legal and ethical concerns, nutrition, mental health, integrative medicine, epidemiology and health promotion. The IHS major provides flexibility so that students may tailor coursework based upon interests and career goals. The health services faculty represent many years of experience in health care and are able to guide students in developing their own unique career paths. Students are encouraged to complete prerequisites needed for graduate programs, study abroad or minor in biology, chemistry, psychology, sociology or business. Consistent with our Jesuit mission of cura personalis and social justice, the department encourages majors to learn inside and outside of the classroom. Volunteering with local service agencies interning in a local hospital, or participating in summer scholars, allows students to experience different healthcare careers and to build professional portfolios. The Department models interdisciplinary, collaborative approaches, encouraging students learn to partner with patients, family members, community organizations and colleagues in other disciplines to face the challenges of emerging and re-emerging diseases.

Graduate Arts and Sciences
Michelle Rowe, Ph. D. Professor and Chair
Department of Health Services

lhorvath@sju.edu

Mission Statement
Consistent with our Jesuit roots and Ignatian goals of education, the graduate programs in Health Services are built on a liberal arts foundation with an emphasis on ethics, social justice, and professional competency. By enhancing skills in verbal communication, writing, critical thinking, quantitative analysis, globalization, and diversity, health services graduate programs prepare graduates to confront current and emerging issues in healthcare.

Department Programs
The Department of Health Services offers Master’s degree programs designed to meet the interests, needs, and personal and professional growth of health and medical professionals. Programs in Health Administration, Health Education, a joint program in Health Administration and Health Education are offered. Concentrations in Informatics and Organizational Development and Leadership are designed to provide rigorous and comprehensive study for those seeking to enhance professional credentials. Core philosophies are professional competence, creative problem solving, respect for all persons, social justice in health care and medicine, and collaborative approaches to health promotion and disease prevention.

Admission Requirements and Procedure
The Health Services graduate programs are designed to provide advanced training for people who have two or more years of work experience in the health professions. Application forms are available online at http://www.sju.edu/academics/cas/grad/index.html.

Applicants should submit to the Office of Graduate Admissions the following:

- a completed Saint Joseph’s University graduate application.
- Official sealed transcript(s) of undergraduate and any graduate coursework. Saint Joseph’s University graduates do not have to obtain their transcripts. The program will access your transcripts.
- a current résumé
- two letters of recommendation appraising the candidate’s promise and capacity for graduate study, reflecting, from a professional’s point of view, the candidate’s ability to pursue a rigorous, independent course of study at the graduate level. Often one of these comes from a former faculty member and one from a current employer, but two employer references or two academic references are acceptable.
- a two-to-three page (500 to 750 words) personal statement outlining the candidate’s professional goals and educational objectives for the program, including the applicant’s rationale for program choice and professional study.
- $35 application fee – waived if attended an Open House or if a SJU graduate.

The Graduate Committee looks for both a strong academic record and serious interest in the health professions. The personal statement should articulate reasons for selecting this particular program and discuss the applicant’s personal goals and strengths. A personal interview may be required if additional or further information is needed.

Course Load
In order to meet the needs of working adults, courses are offered in a variety of formats, including the traditional one evening per week format; a five-day, weekend format, or on-line and hybrid formats. A full-time course load is three courses (9 credits) per term for fall and spring semesters and two courses (6 credits) for the summer term. Students who are working full-time should take no more than two courses (6
credits) in the fall and spring terms, and one course (3 credits) for each summer term.

The Director of Graduate Health Services Programs must approve any exceptions to this policy. Students requesting full time status should submit a letter in writing to the Director stating that they are working less than 20 hours per week during the semester(s) in which full-time status is sought.

Professor: M. Michelle Rowe, Ph.D.; Sally Kuykendall, Ph.D.
Assistant: Anne Fetherston, Ph.D., BCBA-D; Eileen L. Sullivan, Pharm.D.; Reecha Sharma, M.D.

• Health Administration (p. 280)

Adult Undergraduate Certificates
• Post-Baccalaureate Pre-Health Services (p. 287)

Health Administration
HAD 101 Intro to Health Administration (3 credits)
An introduction to health care services focusing on current components, practices, issues, and trends in the health delivery system. Emphasis is placed on the social, political, economic, legal, and technological forces that affect health care.
Attributes: Undergraduate

HAD 110 Prin Publ Hlth & Epidem (3 credits)
A survey of environmental, communicable, chronic, and genetic health problems and the public health and epidemiological responses to them. Basic epidemiological concepts, strategies, research, methodologies, and statistical tools will be introduced.
Attributes: Undergraduate

HAD 115 Research Methods in HAD (3 credits)
Health Services Research explores the history of health research, basic principles and types of research in order that health administrators will be able to critically evaluate research in healthcare. This course is a combination of lecture, discussion and experiential learning designed to instill a critical understanding of the research process for application to professional practice.

HAD 120 Fin Mgt Hlth Care Organization (3 credits)
An advanced application of the current issues and techniques affecting financial management in the health care system. Topics include cost accounting, cost benefit analysis, accountability in for-profit/non-profit institutions, prospective and third party payments, management information systems for operational and fiscal control, and cost containment.
Prerequisite: HAD 101.

Attributes: Undergraduate

HAD 200 Health Care Law & Ethics (3 credits)
An overview of the legal and ethical issues central to the health care delivery system and their impact on individual institutions and professionals. The relationships among biomedical and research technology, societal changes, court rulings, and governmental legislation within the context of the health care system will be examined.

Prerequisite: HAD 101.

Restrictions: HAD 2605 or HAD 100 or HAD 101

Attributes: Undergraduate

HAD 210 Plan & Mktg Health Care Org (3 credits)
An introduction to general strategic planning and marketing for health care systems with particular emphasis on the evolution from a provider-controlled environment to a consumer market. Review of key factors such as rising costs, increasing competition, legislation/regulation, technological advancements, and increased consumer sophistication.

Attributes: Undergraduate

HAD 210 Practicum (3 credits)
Field practicum. Students must have permission before enrolling.

Attributes: Undergraduate

HAD 220 Health Policy (3 credits)
An overview of how health care policy is enacted in the U.S. Analysis of how the expansion of government programs and regulations since 1965 have influenced health care delivery. Emphasis will be placed on current policy questions and important health care policy debates.

Prerequisites: HAD 2605 or (HAD 100 or HAD 101)

Restrictions: Enrollment is limited to PLS/HDC level students.

Attributes: Undergraduate

HAD 220 Practicum (3 credits)
Field practicum. Students must have permission before enrolling.

Attributes: Undergraduate

HAD 300 Practicum in Health Adm (3 credits)
An advanced application of the current issues and techniques affecting financial management in the health care system. Topics include cost accounting, cost benefit analysis, accountability in for-profit/non-profit institutions, prospective and third party payments, management information systems for operational and fiscal control, and cost containment.

Prerequisites: HAD 101, 110, 120, 200, 210, and 220.

Restrictions: Enrollment is limited to PLS/HDC level students.

Attributes: Undergraduate
HAD 346 Admin Health Care Organization (3 credits)

HAD 551 Managed Health Care (3 credits)

HAD 552 Health Administration (3 credits)
An introduction to the principles of administration within health and human services organizations and the basic concepts of leadership and organizational theories relevant to effective administration of healthcare institutions. Organizations are viewed as open systems requiring constant interactions with the environment. Considerable emphasis is placed on quality improvement and organizational change.

Restrictions: Enrollment is limited to Graduate level students.

HAD 553 Health Care Organization (3 credits)
An overview of the organization, structure, and financing of the healthcare delivery system in the United States. The various elements comprising the system will be presented, along with an exploration of the basic concepts and measures of health, disease, needs, quality, and utilization. Issues in healthcare resourcing, institutions, and system organization will be examined.

Restrictions: Enrollment is limited to Graduate level students.

HAD 554 Health Care Law (3 credits)
An examination of the major legal issues encountered in the health care field by administrators and practitioners. Among the topics to be included are principles of liability, legal aspects of medical ethics, and legislative and regulatory factors in health care delivery.

Restrictions: Enrollment is limited to Graduate level students.

HAD 555 Acc for Health Care Organiztns (3 credits)
An introduction to basic accounting techniques used in the healthcare industry. Prerequisites: three core courses — HAD 552, HAD 553, HAD 600, HSV 550, or HSV 551.

Prerequisites: HAD 552 and HAD 553 and HAD 600 and HSV 550 and HSV 551

Restrictions: Enrollment is limited to Graduate level students.

HAD 556 Fin Manag of Health Care Org. (3 credits)
An introduction to the basic theories and practices of financial management as they relate to healthcare organizations. Course includes budgeting principles. Prerequisites: HAD 552, HAD 553, HAD 600, HSV 550, and HSV 551.

Prerequisites: HSV 500 and HAD 600 and HAD 553 and HAD 552 and HAD 555

Restrictions: Enrollment is limited to Graduate level students.

HAD 557 Health Care Strat Plan & Mktg (3 credits)
An introductory course that examines the foundations, principles, and basic applications of this field. Internal and external forces that shape marketing policies and planning are explored. Topics include the development of marketing strategies and programs, as well as marketing mix variables and general healthcare planning. Prerequisites: HAD 552, HAD 553, HAD 600, HSV 550, and HSV 551.

Restrictions: Enrollment is limited to Graduate level students.

HAD 558 Hospital Administration (3 credits)
In depth study of hospital operations with emphasis on not-for-profit/nonprofit settings; focus on departmental operations, role of administration, the board, and medical staff. Includes legal and reform trends affecting hospitals, financial mechanisms, budgeting, labor relations and corporate restructuring. Prerequisites: HAD 552, HAD 553, HAD 600, HSV 550, and HSV 551.

Restrictions: Enrollment is limited to Graduate level students.

HAD 559 Health Policy (3 credits)
The formulation and analysis of health policy at federal, state, local, and corporate levels. This course presents an overview of the legislative, regulatory, and political processes and their effect on the health care system. This course will provide a conceptual and analytic framework for bioethical policy analysis regarding policy formulation, adoption, implementation, operation, evaluation, and termination. Pragmatic application of policy analysis tools is included.

Restrictions: Enrollment is limited to Graduate level students.

HAD 560 Health Care Informatics (3 credits)
A survey of the current use of information technology in the clinical and management practice for the healthcare delivery enterprise. Students will become familiar with the basic terminology, strategies, and utilization of IT as a key component in the delivery of patient care. Prerequisites: HAD 552, HAD 553, HAD 600, HSV 550, and HSV 551.

Restrictions: Enrollment is limited to Graduate level students.

HAD 561 Health Care and the Internet (3 credits)
Examination of the specific roles that internet technology plays in healthcare. Observations and trends that play a significant role in improving the quality of healthcare delivery will be discussed. Various components such as intranets, extranets, knowledge management and web design concepts will be explored.

Restrictions: Enrollment is limited to Graduate level students.

HAD 562 Hlth Info Mgt Sys Data & Infra (3 credits)
Analysis and case study of IT networks, internets, data interchange, data access, and data management. Prerequisite: for Healthcare Informatics students only and HAD 560 is preferred.

HAD 563 Hlth Info Mgt Syst Appl (3 credits)
Case study of the foundation and incorporation of the critical IT applications in the modern healthcare delivery enterprise. Specific applications will be explored with an emphasis placed on the practice of Managed Care. Note: This course is available for Healthcare Informatics students only. It is preferred that students have taken both HAD 560 and HAD 562 before taking this course.

HAD 564 Computer-Based Patient Record (3 credits)
An in-depth analysis of the Institute of Medicine's (IOM) standards, requirements, attributes, and benefits of the CPR and its use in the healthcare delivery enterprise. The use of data warehouses, data repositories, and integration technology will be explored relevant to CPR development along with the various issues and strategies for implementation.

HAD 565 Decision Support & Data Analy (3 credits)
HAD 566 Hlth Info Syst Res Mngt (3 credits)

HAD 567 Leadership, Strat & Plan HIMSS (3 credits)

HAD 570 Psy ch Aspects Chmc Ill & Disb (3 credits)
A survey of psychological, social, and behavioral theories and principles as they relate to the experiences of chronic illness and disability. The course will emphasize the impact of these experiences on the patient in terms of motivation and life satisfaction, restructuring social support systems, and changes in psychosocial/developmental needs. Attention will be given to the changing role of the health professional as direct care provider, manager, consultant, and advocate. Prerequisites: HAD 552, HAD 553, HAD 600, HSV 550, and HSV 551.

Restrictions: Enrollment is limited to Graduate level students.
HAD 600 Ethics of Health Care (3 credits)
A critical examination of the central ethical issues in the healthcare field. Issues to be treated include euthanasia, life-prolonging medical technologies, abortion, screening for genetic defects, experimentation and informed consent, distribution of scarce medical resources, the right to healthcare, and its implications for the healthcare delivery system. Necessary background in moral philosophy will be provided.
Restrictions: Enrollment is limited to Graduate level students.

HAD 601 Fieldwork in Health Admin (3 credits)
Students who have a GPA of 3.5 or higher may pursue experiential learning through fieldwork or internship in an approved healthcare facility or nonprofit organization. Prerequisites: HAD 552, HAD 553, HAD 600, HSV 550, HSV 551 plus one administrative course (either HSV 554, HAD 555, HAD 556 or HAD 560).
Restrictions: Enrollment is limited to Graduate level students.

HAD 602 Directed Resrch in Health Serv (3 credits)
The Health Services Department provides opportunities for selected students to conduct independent research under the supervision of department faculty. Students desiring to participate in Directed Research must identify and meet with a faculty mentor, submit a formal research proposal with proposed timeline for completion, and obtain approval for the project from the faculty mentor, program director, department chair and associate dean. Prerequisites: HAD 552, HAD 553, HAD 600, HSV 550, HSV 551 plus one administrative course (either HSV 554, HAD 555, HAD 556 or HAD 560).
Restrictions: Enrollment is limited to Graduate level students.

HED 551 Map Hlth Res, Pln, Pol Dev&Mkt (3 credits)
Based on the ARCVIEW Geographic Information Systems (GIS), this course is a practical introduction to the use of computer mapping and spatial analysis. The course uses the most current GIS technology to understand the environment and how it impacts public health. There is a large computer lab component to the course.
Restrictions: Enrollment is limited to Graduate level students.

HED 552 Epidemiology and Com Health (3 credits)
An introductory course exploring the basic concepts of epidemiology as a public health science, including rates and ratios, risk and association, causation and investigation of outbreak.
Restrictions: Enrollment is limited to Graduate level students.

HED 553 Program Planning for Wellness (3 credits)
A foundation course in the development of health education programs for hospitals, work sites, community, and schools. Discusses models for health behavior, assessment of health education needs, design and implementation of interventions, program marketing, and evaluation of efficacy.
Restrictions: Enrollment is limited to Graduate level students.

HED 554 Curric Strat for Hlth Educatrs (3 credits)
Techniques combining the cognitive, affective, and psychomotor domains in individual and group learning are discussed. Leading models for curriculum development and implementation are emphasized. Mechanics for construction of goals, curriculum design, objective writing, and learning behaviors are stressed. Models for evaluation and needs analysis are examined. The role of the trainer in the organization is also explored, along with strategies for maximizing one’s position in the organization. Ethical, legal, and moral questions arising in the health education arena are examined. Prerequisite: HED 553
Restrictions: Enrollment is limited to Graduate level students.

HED 560 Bio-Psycho Char:Aging American (3 credits)
Areas of study include theories of aging, bio-psychosocial/spiritual characteristics of older people, family systems and non-systems, resources, policy, legislation, and activism.
Restrictions: Enrollment is limited to Graduate level students.

HED 561 Human Sexuality (3 credits)
Content provides sexual awareness and personal growth in the area of interpersonal sexuality. Through participation in a variety of class activities, students increase comfort level in communicating about sexual attitudes, feelings, and behaviors. Sexually transmitted infections, reproductive inefficiencies, and cultural issues are discussed.
Restrictions: Enrollment is limited to Graduate level students.

HED 562 Hlth Care of Childrn in Commun (3 credits)
An overview course designed to provide the knowledge and skills necessary to help organize, develop, manage, and evaluate employee assistance programs. Emphasis is placed on the positive role of health promotion as a preventive tool. Course explores the role of addictions, family, financial, and legal issues in the life of the impaired employee or student and codependent.
Restrictions: Enrollment is limited to Graduate level students.

HED 563 Behvrl Hlth of Childrn & Youth (3 credits)
Basic concepts of mental health and illness. A range of theories and psychotherapies, and psychological aspects of health, illness, and addiction are studied.
Restrictions: Enrollment is limited to Graduate level students.

HED 564 Women and Health Care (3 credits)
Inquiry into the health needs of women and their treatment by the health care system. Study includes history, role of women as healers, epidemiology, access to and utilization of health care services, health research, and legislation affecting women’s health issues.
Restrictions: Enrollment is limited to Graduate level students.

HED 567 Concepts of Nutrition & Health (3 credits)
A comprehensive examination of the principles of good nutrition during the life cycle. Emphasis is placed on practical applications, including the use of food composition theory to evaluate food intakes, regional, cultural, and religious influences on food habits, fads, preventive health promotion, and health restoration through health education.
Restrictions: Enrollment is limited to Graduate level students.
HED 575 Stress and Crisis Management (3 credits)
Study of health problems related to stress and exploration of methods to reduce the impact of stressors to improve bio-psychosocial health. Demonstrates how to identify, isolate, and manage a crisis and how to foresee future crises, as well as how to develop contingency plans. Physiology of stress, relaxation, biofeedback, fear control, and cognitive reacting are skills studied in relation to stress management.
Restrictions: Enrollment is limited to Graduate level students.

HED 576 Addictions (3 credits)
The study of the nature, causes, and intervention of substance abuse. Historical and sociocultural trends are evaluated in view of current addiction theories. Emphasis is placed upon the relation of addiction to family and work environments, as well as the development of alternate lifestyles.
Restrictions: Enrollment is limited to Graduate level students.

HED 577 Health Education in HIV/AIDS (3 credits)
The retrovirus of AIDS, the people, and the society it infects are the center upon which this course is based. Current public health policy, ethics, and politics of AIDS are examined. Emphasis is placed on skill-building in health education, counseling, and referrals for persons with AIDS, their families, and those individuals who test positive. The school and corporate sectors are explored, as well as high risk groups and global AIDS.
Restrictions: Enrollment is limited to Graduate level students.

HED 578 Experiential Counseling (3 credits)
Theories and applications of counseling. Conceptual emphasis on the "here and now" phenomenologic theory. Psychodrama is stressed. Ethics, risk reduction, and the biopsychosocial/spiritual impactors on both the counselor and the client are integral.
Restrictions: Enrollment is limited to Graduate level students.

HED 579 Principles of Administration (3 credits)
This course will provide an introduction to behavioral health issues related to children and adolescents. Problems, risk factors, diagnosis and treatment will be considered in the context of developmental theory.
Restrictions: Enrollment is limited to Graduate level students.

HED 580 Leadership Principles (3 credits)
An introductory course to acquaint the learner with needs and roles in supervisory activity. Management styles, functions, and analyses, as well as behavioral theory, are evaluated. Planning and decision-making, dealing with the change process, motivation, coaching and counseling techniques, performance appraisal, and control are examined.

HED 581 Physical Assessment: Nurse Anesthesia (3 credits)

HED 600 Dir Research in Hlth Ed (3 credits)
An opportunity to conduct a research project under the supervision of a faculty member. Note: students may register for a directed research study only after (a) submitting a research proposal to the program director; (b) arranging for a faculty member to serve as mentor; and (c) receiving explicit approval from the department chair.

HED 601 Fieldwork in Health Education (3 credits)
Individually arranged fieldwork in approved health education environment. Students need permission of the program director before registering. The program is designed to meet individual professional goals and may only be taken once during a student’s completions of this degree program. All five core courses must be taken prior to enrolling in this course.

HED 650 School Nurse Practicum (3 credits)
HED 651 School Nurse Practicum (3 credits)
HED 770 Special Topics in Hlth Educatn (3 credits)
The learning objectives of this course will be geared toward a specific topic of current interest in the field of health education. The specific topics and perquisites will be announced in the course schedule.
Restrictions: Enrollment is limited to Graduate level students.

Health Services
HSV 550 Health Services Research (3 credits)
Explores the history of health research, basic principles and types of research in order that health professionals will be able to critically evaluate research in their respective fields. This course is a combination of lecture, discussion and experiential learning designed to instill a critical understanding of the research process for application to clinical practice.
Restrictions: Enrollment is limited to Graduate level students.

HSV 551 Managed Health Care (3 credits)
This course is an introduction to managed care including current and evolving models, terminology, and differences among insurers and payer types. The course will focus on the use of financial incentives to restrain healthcare costs and the role of utilization review, peer review, provider.
Restrictions: Enrollment is limited to Graduate level students.

HSV 700 Integ Capstne Crs in Hlth Serv (3 credits)
An integrative capstone course in which the student is expected to integrate and synthesize prior course work and to demonstrate competence in health services through the analysis of complex cases in health services delivery and management and the development of a case of his/her own based on experience and observation. Integrative Capstone should be the final course in the curriculum. Prerequisites: HAD 552, HAD 553, HAD 555, HAD 556, HAD 560, HAD 600, HSV 550, HSV 551, and HSV 554
Prerequisites: HAD 552 and HAD 553 and HAD 555 and HAD 556 and HAD 560 and HAD 600 and HSV 550 and HSV 551
Restrictions: Enrollment is limited to Graduate level students.

Health Administration
Michelle Rowe, Ph.D., Chair, Department of Health Services
Eileen Sullivan, Pharm.D., Program Director

Program Overview
Health care is a complex, multi-faceted industry. Administrators play a key role in identifying needs, managing resources and maintaining vital communities. The Bachelor of Liberal Studies in health administration empowers students with the professional knowledge and skills needed to lead and enact best practices in healthcare organizations and communities.

Courses cover various areas of health administration, such as health administration, finance, marketing, healthcare law and ethics, health policy and health information management. Industry-focused coursework equips students for positions as health administrators in hospitals, clinics, and non-profit organizations. The major builds on foundational coursework in biology, history, philosophy and economics, equipping graduates to be well-informed leaders. The program culminates in a professional capstone seminar.

Learning Goals and Objectives for the Health Administration Program
Goal 1: Graduates will be able to understand and apply the principles of effective management to healthcare systems.

Objective 1.1: Graduates will be able to explain current healthcare systems and effective healthcare systems management.

Objective 1.2: Graduates will commit to the stability, health and well-being of a healthcare organization.

Objective 1.3: Graduates will be able to train, delegate, coordinate, evaluate, and negotiate with others to promote health and well-being of a population.

Objective 1.4: Graduates will be able to work with, inspire and motivate others to promote population health.

Goal 2: Graduates will demonstrate effective oral and written communication skills.

Objective 2.1: Graduates will be able to develop and present reports and proposals using the medical, technical, and business language of the healthcare field.

Objective 2.2: Graduates will convey confidence, competence, maturity and professionalism in interactions with others.

Goal 3: Graduates will critically evaluate health information in order to identify and apply best practices in health administration.

Objective 3.1: Graduates will be able to read, understand, and critically analyze health data.

Objective 3.2: Graduates will be able to understand, critically evaluate and apply current research in health administration to professional practice.

Goal 4: Graduates will understand and follow ethical codes of conduct of the health professions.

Objective 4.1: Graduates will follow and promote honest and ethical business conduct.

Objective 4.2: Graduates will demonstrate the maturity to make decisions and to take responsibility for those decisions.

Students admitted prior to Summer 2016 entered under the curriculum requirements for the BS in Health Administration. Please see the SJU Academic Catalog for your admit year for additional information.

Health Administration M.S.

Louis D. Horvath, MA
Graduate Director Campus and Online Programs
Department of Health Services
100 Post Hall
610-660-2907
lhorvath@sju.edu

Program Description
The M.S. in Health Administration curriculum is designed to enhance knowledge, technical skills and professional competencies for those seeking advancement or entry into management of health care organizations. Program goals and objectives reflect the professional competencies defined by the American College of Healthcare Executives. The M.S. Health Administration offers concentrations in Health Informatics, and Organizational Development and Leadership.

Goals and Objectives

Goal 1: Graduates of the HAD MS Program will understand and apply the principles of public policy, effective governance, management and leadership to healthcare systems.

Objective 1.1: Graduates will demonstrate an understanding of healthcare systems and effective healthcare systems management, including the history, structuring, marketing, and positioning.

Objective 1.2: Graduates will adhere to sound financial principles of health organizations; will utilize data analysis to support decision-making; and will commit to the stability, health and well-being of an organization.

Objective 1.3: Graduates will be able to manage human resources in diverse environments such as hospitals, long term care institutions, behavioral health organizations, home care agencies, clinics, insurance companies, government agencies, and pharmaceutical companies.

Objective 1.4: Graduates will be able to demonstrate conflict and change management in diverse communities by applying principles of the social and behavioral sciences.
Goal 2: Graduates of the HAD MS Program will demonstrate effective oral and written communication skills (application).

Objective 2.1: Graduates will be able to develop and present reports and proposals using the medical, technical, and business language of the healthcare field.

Objective 2.2: Graduates will convey confidence, poise, presence, maturity and empathy in professional interactions with others.

Goal 3: Graduates of the HAD MS Program will critically evaluate health information in order to identify and apply best practices in health services administration.

Objective 3.1: Graduates will demonstrate the ability to manage information including the collection of data, qualitative and quantitative analysis, evaluation of the validity of data, and to summarize the information for effective decision making.

Objective 3.2: Graduates will understand, critically evaluate and apply current research in health services administration to professional practice.

Objective 3.3: Graduates will employ quality assessment of business practices and health care delivery focusing on outcomes measurement, processes, outcomes, and methods for process improvement.

Goal 4: Graduates of the HAD MS Program will understand the legal principles applicable to the US Health Care Delivery System, follow ethical codes of conduct of the health professions, and model Jesuit values serving those in need.

Objective 4.1: Graduates will operationalize legal principles in health management, follow honest and ethical business conduct, and adhere to the best practices of the health professions.

Objective 4.2: Graduates will demonstrate the maturity to make decisions and to take responsibility for those decisions.

Objective 4.3: Graduates will act as global citizens, holding personal and career objectives that honor and serve communities and people in need.

Health Informatics Concentration

The Informatics Concentration trains health care professionals in the strategic use of information technology (IT) so they may lead planning, design, integration, implementation, and evaluation of clinical, financial and administrative information systems in various healthcare organizations. The Informatics concentration consists of 14 courses (42 credits): the required courses from the HAD curriculum (10 courses) plus Health Informatics courses (4 courses).

Louis D. Horvath, MA  Graduate Director Campus and Online Programs
Department of Health Services
Health Education Mission

The mission of the Health Education program is to contribute to the health of all people through advances in theory and research, excellence in practice, and the promotion of public policies conducive to health. The program focuses on the professional code of ethics, standards for professional competence, research, and practice; on-going professional development; and public outreach. Core competencies match the public health model of health promotion, performing a needs assessment, planning, implementing, and evaluating an effective program, acting as a resource in health education, health communications, application of research principles, and advancing the profession in practice. The curriculum reflects the responsibilities and competencies of Certified Health Education Specialists (National Commission for Health Education Credentialing, Inc., 2010).

Learning Goals and Objectives

**Goal 1:** Graduates of the Masters of Science degree in Health Education Program will be able to coordinate effective health education programs.

**Objective 1.1:** Graduates will be able to perform a needs assessment, plan, design, implement and evaluate health education programs specific to community needs.

**Objective 1.2:** Graduates will apply health theories to health education practice and research.

**Goal 2:** Graduates of the Masters of Science degree in Health Education Program will demonstrate information literacy in the field of Health Education.

**Objective 2.1:** Graduates will be able to analyze, critically evaluate, and draw conclusions from regional, national and global health data.

**Objective 2.2:** Graduates will be able to critically evaluate and apply current research in health education practice.

**Goal 3:** Graduates of the Masters of Science degree in Health Education Program will be able to will communicate effectively using the language of the health education profession.

**Objective 3.1:** Graduates will be able to write grants and reports using the language of health education.

**Objective 3.2:** Graduates will convey a professional image of confidence, competence and maturity in verbal and written assignments in order to engage audiences and encourage evidence-based interventions and practices.

**Goal 4:** Graduates of the Masters of Science degree in Health Education Program will be able to apply the principles of effective management to healthcare systems.

**Objective 4.1:** Graduates will commit to the stability, health and well-being of a healthcare organization.

**Objective 4.2:** Graduates will be able to train, delegate, coordinate, evaluate, and negotiate with others to promote health and well-being of a population.

**Goal 5:** Graduates of the Masters of Science degree in Health Education Program will have knowledge of and follow ethical codes of conduct.

**Objective 5.1:** Graduates will follow and promote ethical conduct reflecting Jesuit values, specifically the values of honesty, respect for persons, and justice.

**Objective 5.2:** Graduates will demonstrate the maturity to make decisions and to take professional responsibility for those decisions.

**Objective 5.3:** Graduates will act as global citizens, holding personal and career objectives that honor and serve the beneficence of people in need.

The M.S. in Health Education requires completion of twelve courses (36 credits hours): core Health Education courses (6 and electives in health studies or other related area (6 courses)). Core courses should be completed early in the program. Electives are selected based on personal and professional goals.

Interdisciplinary Health Services Major

Interdisciplinary Health Services Program Mission

The undergraduate program in Interdisciplinary Health Services focuses on improving the quality of life for students and the people they serve by providing a rigorous and comprehensive education in health, health care, and health related issues. Core philosophies are professional competence, creative problem solving, respect for all persons, social justice in medicine, and a collaborative approach to disease prevention and health promotion.

Goals and Objectives

Goal 1: Graduates of the Interdisciplinary Health Services Program will know and understand the biological, psychological, and social determinants of health and well-being.

Objective 1.1: Graduates will demonstrate knowledge of how race, social class, gender, culture, geographic location, and disability influence physical and mental health.

Objective 1.2: Graduates will demonstrate knowledge of the primary health issues at each stage of life and how healthcare needs change across the lifespan.

Goal 2: Graduates of the Interdisciplinary Health Services Program will apply health theories to health practice and research.

Objective 2.1: Graduates will demonstrate knowledge of health promotion planning, needs assessment, program development, and evaluation by developing and implementing a health promotion project.

Objective 2.2: Graduates will be able to foster health behavioral change by applying systematic, measurable, and supportive (empathic) approaches.

Goal 3: Graduates of the Interdisciplinary Health Services Program will demonstrate literacy in the language of health professions.

Objective 3.1: Graduates of the Interdisciplinary Health Services Program will effectively use the terminology and language of the health professions.

Objective 3.2: Graduates will be able to analyze regional, national and global health data and to draw logical conclusions based on health data.

Objective 3.3: Graduates will be able to critically evaluate and apply current research in the health professions to health promotion and disease prevention practice.

Goal 4: Graduates of the Interdisciplinary Health Services Program will collaborate with others in order to promote health and well-being of people in need.

Objective 4.1: Graduates will demonstrate an understanding of healthcare systems and effective healthcare systems management.

Objective 4.2: Graduates will be able to educate, delegate, and coordinate with others to promote health and well-being of a population.

Goal 5: Graduates of the Interdisciplinary Health Services Program will follow ethical codes of conduct of the health professions.

Objective 5.1: Graduates will follow and promote ethical conduct reflecting Jesuit values, specifically the values of honesty, respect for persons, and justice.

Objective 5.2: Graduates will demonstrate the maturity to make decisions and to take professional responsibility for those decisions.

Objective 5.3: Graduates will act as global citizens, holding personal and career objectives that honor and serve the beneficence of people in need.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses

### Interdisciplinary Health Services Minor

#### Goals and Objectives

**Goal 1:** Graduates of the Interdisciplinary Health Services Program will know and understand the biological, psychological, and social determinants of health and well-being.

**Objective 1.1:** Graduates will demonstrate knowledge of how race, social class, gender, culture, geographic location, and disability influence physical and mental health.

**Objective 1.2:** Graduates will demonstrate knowledge of the primary health issues at each stage of life and how healthcare needs change across the lifespan.

**Goal 2:** Graduates of the Interdisciplinary Health Services Program will apply health theories to health practice and research.
Objective 2.1: Graduates will demonstrate knowledge of health promotion planning, needs assessment, program development, and evaluation by developing and implementing a health promotion project.

Objective 2.2: Graduates will be able to foster health behavioral change by applying systematic, measurable, and supportive (empathic) approaches.

Goal 3: Graduates of the Interdisciplinary Health Services Program will demonstrate literary in the language of health professions.

Objective 3.1: Graduates of the Interdisciplinary Health Services Program will effectively use the terminology and language of the health professions.

Objective 3.2: Graduates will be able to analyze regional, national and global health data and to draw logical conclusions based on health data.

Objective 3.3: Graduates will be able to critically evaluate and apply current research in the health professions to health promotion and disease prevention practice.

Goal 4: Graduates of the Interdisciplinary Health Services Program will collaborate with others in order to promote health and well-being of people in need.

Objective 4.1: Graduates will demonstrate an understanding of healthcare systems and effective healthcare systems management.

Objective 4.2: Graduates will be able to educate, delegate, and coordinate with others to promote health and well-being of a population.

Goal 5: Graduates of the Interdisciplinary Health Services Program will follow ethical codes of conduct of the health professions.

Objective 5.1: Graduates will follow and promote ethical conduct reflecting Jesuit values, specifically the values of honesty, respect for persons, and justice.

Objective 5.2: Graduates will demonstrate the maturity to make decisions and to take professional responsibility for those decisions.

Objective 5.3: Graduates will act as global citizens, holding personal and career objectives that honor and serve the beneficence of people in need.

Students may minor in Interdisciplinary Health Services by taking four core courses and two IHS elective courses.

M.S. Health Administration and Health Education Joint Degree

The M.S. in Health Administration and Health Education is designed for health professionals who are interested in both health management and health promotion. The curriculum develops student expertise in health care management, community health program planning, healthcare law and ethics.

The M.S. in Health Administration and Health Education requires the completion of sixteen courses (48 credits): the core HAD-HED curriculum (10 courses) plus Health Administration electives (3 courses) and Health Education electives (3 courses).

Master of Science in Health Education without Certification

The U.S. Bureau of Labor and Statistics projects that ABA and healthcare will steadily increase over the next ten years and beyond. The Masters of Arts in Health Education with a concentration in Applied Behavior Analysis (ABA) is a 36-credit course sequence approved by the Behavior Analyst Certification Board (BCBA). This degree prepares highly educated and trained students for careers as Board Certified Behavior Analysts. Students completing this graduate degree will be uniquely positioned for a rewarding career in behavior analysis and the ability to work within the entire United States and other areas around the World. This coursework is specifically designed to expose students to the world of health care and behavior analysis simultaneously. Once complete, students work in a variety of setting in the field such as general and special education, mental health, behavioral health, geriatrics, disability, business, and institutions of higher learning.
Topics covered include: GIS Mapping and health patterns, Epidemiology, Program Planning for Wellness, Curriculum Strategies, Health Services Research, Capstone, Principles of Behavior, Applied Behavior Analysis as well as consulting, behavioral development, clinical behavior analysis and ethics in behavior analysis.

**Post-Baccalaureate Pre-Health Science Certificate**

*Jean M. Smolen, Ph.D., Associate Dean, Math, Natural Sciences, Computer Science*

The Post-Baccalaureate Pre-Health certificate program is designed for students who are pursuing admission to medical, dental, optometry, veterinary, or podiatry programs. The program focuses on the core courses required for admission to these schools and that are useful for taking the Medical College Admission Test (MCAT), Dental Admission Test (DAT), and the Optometry Admission Test (OAT). Note that additional pre-requisite courses may be required by certain professional schools.

Pre-Health Advising resources are available to all students as they prepare for application to professional programs. If a student completes a minimum of ten courses at SJU, they will be eligible to be considered for review by the SJU Health Professions Advisory Committee.

A 3.0 GPA is required for admission to the certificate program. This program is open only to those who already possess a non-science baccalaureate degree. Up to two courses may be transferred to SJU to be used towards the certificate requirements.

This certificate program is eligible for federal financial aid.

1 Students may take the Biochemistry course offered through the Biology Department (BIO 404) as an alternative if they have completed the required biology pre-requisites (BIO 101, BIO 102, and BIO 201) in addition to the chemistry pre-requisites.

2 Suggested Elective options. Other electives may be considered based on the student’s interests and professional goals.

Social science courses, calculus, and statistics are recommended if not completed as part of the student’s undergraduate program.
Department Overview
The History Department offers a signature course in the General Education Program (GEP) that is required of all undergraduates at the University. HIS 154, Forging the Modern World, provides students with the opportunity to use the tools of historical inquiry to gain insight on the key events, ideas, individuals and groups that have shaped the world in which we live. The Department’s advanced courses continue to emphasize the investigation of the ideas and institutions—religious, political, social, and economic—through which people have endeavored to order their world. Advanced courses, with their more precise focus on place, time, and method, allow students to gain a deeper understanding of the field and its practices. The Department also offers internships and independent research opportunities to enhance students’ preparation for the future.

Professor: James Carter, Ph.D.; Katherine A. S. Sibley, Ph.D.; Randall M. Miller, Ph.D.
Associate: Alison Williams Lewin, Ph.D.; Melissa Chakars, Ph.D.
Assistant: Amber Abbas, Ph.D.; Brian James Yates, Ph.D.; Christopher W. Close, Ph.D.; Jeffrey Hyson, Ph.D.
Visiting: Leslie Rogne Schumacher, Ph.D., FRSA

Chair: Carter

Undergraduate Major
• History (p. 295)

Undergraduate Minor
• History (p. 297)

HIS 100 Forging the Modern World (3 credits)
HIS 101 Western Civ 1 (3 credits)
HIS 102 Western Civ 2 (3 credits)
HIS 150 First Year Seminar (3 credits)
HIS 154 Forging the Modern World (3 credits)
Students will analyze primary and secondary sources to understand the predominant structures and relationships that have transformed our world from the early modern era to the twentieth century. Topics will include the development of political and economic ideas and systems (e.g., democracy, liberalism, conservatism, nationalism, fascism, colonialism, capitalism, socialism), changing conceptions of culture and identity (e.g., race, gender, ethnicity, art), and the conflicts and opportunities born of this transformation (e.g., anti-colonial movements, social revolutions, world wars, international organizations, globalization, religious and cultural conflicts). Readings and discussions will emphasize understanding how modern systems of political, economic and social meaning and exchange, including Western dominance, emerged.
Attributes: Signature Course (New GEP), Undergraduate

HIS 156 Topics in Global History (3 credits)
HIS 196 AP World History Credit (3 credits)
HIS 200 Historical Methods (3 credits)
HIS 201 American History to 1877 (3 credits)
A survey dealing with the origin and development of American institutions and traditions, with emphasis on the political, economic, and social history of the period after 1763. These courses may be taken in any order.
Attributes: Undergraduate

HIS 202 American Hist. 1865 to Present (3 credits)
A survey dealing with the origin and development of American institutions and traditions, with emphasis on the political, economic, and social history of the period after 1763. These courses may be taken in any order.
Attributes: International Relations Course, Undergraduate

HIS 203 Historical Intro to Latin Am (3 credits)
This course will provide students with a deeper understanding of the processes that led migrants from Latin America and the Caribbean to the United States, and their experiences after arrival. The course focuses on three interdisciplinary topics: community formation; the variety of individual and group experiences; and current policy questions for the hemisphere. This course has been designated as an ethics intensive and diversity course under the GEP. Latin American Studies.
Prerequisites: HIS 154
Attributes: Diversity Course (New GEP), Ethics Intensive (New GEP), Faith Justice Course, International Relations Course, Latin American Studies Course, Undergraduate

HIS 204 Latin American-U.S. Migration (3 credits)
This course will provide students with a deeper understanding of the Islamic world from the seventh century to the present, including: the expansion and consolidation of Islamic states; relations with Western powers; the rise and fall of empires; and social, cultural, and intellectual developments.
Attributes: Africana Studies Course, International Relations Course, Undergraduate

HIS 205 His Intro to the Islamic World (3 credits)
The course will provide students with a deeper understanding of the Islamic world from the seventh century to the present, including: the expansion and consolidation of Islamic states; relations with Western powers; the rise and fall of empires; and social, cultural, and intellectual developments.
Attributes: Africana Studies Course, International Relations Course, Undergraduate

HIS 206 Historical Intro to East Asia (3 credits)
HIS 207 Historical Intro to South Asia (3 credits)

HIS 208 Historical Intro to Asian Civ (3 credits)
This course will introduce students to the culture, politics, geography, art, and religious traditions of the major countries of East and South Asia. It will also give a historical overview from earliest times to the present. The course will focus primarily on the Indian subcontinent, China and Japan, with some attention also to Korea and Southeast Asia. Throughout the course students will also learn how questions of history and culture shape identities and animate public life in contemporary Asia.
Attributes: International Relations Course, Undergraduate

HIS 209 AP European History Credit (3 credits)
Students who receive a 4 or 5 on the AP European History exam, or the IB equivalent, will receive credit for this course.
Attributes: International Relations Course
HIS 210 Historical Intro to Mod. Africa (3 credits)
This course will examine the social, political, and economic history of Africa from pre-colonial times to the twentieth century. It will emphasize themes such as the early formation of states and empires, the impact of the Trans-Atlantic slave trade, the European colonization of the continent, and the struggles and successes of modern African nation states. The course is designed to provide the students with a background for understanding the most important forces that have shaped Africa and continue to affect the lives of people throughout the continent. This course has been designated as a non-western studies course under the GEP.
Attributes: Africana Studies Course, Diversity Course (New GEP), International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 211 Historical Intro Pre-Mod. Africa (3 credits)

HIS 239 Ireland 1798-1998 (3 credits)

HIS 296 AP World History Credit (3 credits)

HIS 301 United States and Latin Am (3 credits)
An exploration of the complex relationship between the United States and the Latin American nations in the nineteenth and twentieth centuries. Latin American Studies.
Attributes: International Relations Course, Undergraduate

HIS 302 Colonial Mexico (3 credits)
This Course examines social and cultural relations and conflicts in the Spanish colony that later became Mexico and the southwestern United States. Emphasis is placed on the seventeenth and eighteenth century. Latin American Studies.
Attributes: Non-Western Studies (GEP), Undergraduate

HIS 303 History of Modern Mexico (3 credits)
A study of the major social, political, and economic factors that have shaped Mexico in the twentieth century. This course has been designated as a non-western studies course under the GEP. Latin American Studies.
Prerequisites: (HIS 1521 or HIS 203) and (HIS 1571 or HIS 206)
Attributes: International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 304 Social Protest in Latin Am His (3 credits)
An examination of upheaval in Latin American history, from village riots to social revolutions. Students will analyze relevant theoretical and historiographical literature on social protest and explore case studies that will test the explanatory strength of these different models. This course has been designated as a non-western studies course under the GEP. Latin American Studies.
Attributes: International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 310 Modern Germany (3 credits)
This course will enable students to assimilate historians’ differing conceptions regarding exceptionalism in German history and to examine key political, economic, and cultural developments in Germany over the past two hundred years. Students will contemplate how one might go about de-provincializing German history by situating the varying iterations of German nationhood in a wider European and global context.
Attributes: International Relations Course, Undergraduate

HIS 311 Nazism & Fascism Global Persp (3 credits)

HIS 314 Living in Ancient Med World (3 credits)

HIS 315 The Glory that was Greece (3 credits)
From Homer to Alexander, the Greeks of antiquity made their mark on the world both of their own time and of the present. While many know the names of great philosophers and artists, such as Plato and Sophocles, few are acquainted with the historical circumstances that often served to inspire these founders of Western civilization. Through original historical and literary texts, this course will help students better to understand the complex context of military prowess, intellectual curiosity, and artistic inspiration that created the glory that was Greece. This course satisfies the Art/Lit requirement under the GEP.
Attributes: Ethics Intensive (New GEP), Undergraduate

HIS 316 The Grandeur that was Rome (3 credits)
From its beginnings as a muddy village, Rome grew to create the largest empire and greatest uniformity the Western world has ever known. This course will: trace the course of Rome's development in the areas of military, political, social and legal history; examine the effects of Christianity and endless expansion upon the empire; and critically assess various theories explaining its demise. This course has been designated as writing intensive within the GEP.
Prerequisites: HIS 154
Attributes: Ancient Studies Course, European Studies Course, Undergraduate

HIS 317 The Rise of the West: 400-1200 (3 credits)
In recent years, scholarly debate has raged over the effects of "The Fall of Rome"; what was once viewed as a catastrophe faces re-evaluation from historians, archeologists, and sociologists. The slow merger of Roman, barbarian, and Christian cultures created a unique civilization, focused intently on survival in this world and salvation in the next. The course will examine the mental and physical constructs of this civilization, with the goal of appreciating the extraordinary creativity of a society with few hard and fast rules or institutions to guide it. This course has been designated as writing intensive under the GEP.
Prerequisites: ENG 101
Attributes: Ancient Studies Course, Undergraduate, Writing Intensive Course- GEP

HIS 318 Italian Renaissance 1100-1600 (3 credits)
Extraordinary creativity in all arenas flourished in Italy during the Renaissance. New forms of political theory and organization, finance, art, literature and views about human nature itself all drew on Roman and medieval traditions, and bloomed against a backdrop of constant warfare. The course will examine the formation and evolution of the northern Italian city-states and the culture they created. This course has been designated as writing intensive within the GEP.
Attributes: Undergraduate
HIS 319 Revolutions 1517-1648 (3 credits)
Through readings in primary and secondary sources, combined with weekly classroom discussions, this course will encourage students to decide for themselves how “revolutionary” the Reformation was. We will examine the historical roots of the Protestant Reformation and analyze the extent to which it was traditional and innovative. We will investigate the Reformation’s impact on the religious practice of regular people during the sixteenth and seventeenth centuries, as well as the works of the Reformers and the Catholic Church’s response. Finally, we will look at the long-term effects of the Reformation on European society and attempt to evaluate it as a motor of modernity. This course has been designated as a Faith-Reason course under the GEP.
Prerequisites: PHL 154 and (THE 154 or THE 221)
Attributes: Faith-Reason Course (New GEP), Undergraduate

HIS 320 Absltsm & Enlghtnmnt:1650-1789 (3 credits)
Ideas of human freedom and individual rights first spread widely while states attempted to impose strict controls on their subjects. The course will examine the works of absolutist and Enlightenment thinkers, the political machinery of the (would-be) absolutist state, the tensions and accommodations between the two, and the culture and society that surrounded them.
Attributes: Undergraduate

HIS 321 French Revolution and Napoleon (3 credits)
This course will examine the causes of the French Revolution of 1789, the revolutionary governments and the Napoleonic era.
Attributes: International Relations Course, Undergraduate

HIS 322 Europe in 20th Cent, 1914-1939 (3 credits)
A study of the First World War and its impact upon the general course of European history, as well as a treatment of the political, economic, social, and diplomatic history of the period between the world wars.
Attributes: International Relations Course, Undergraduate

HIS 323 Europe in 20th Cent, Since1939 (3 credits)
A course emphasizing the Second World War and the recovery of Europe in the post-war era.
Attributes: International Relations Course, Undergraduate

HIS 324 Modern International Socialism (3 credits)
A study of political, diplomatic, social, economic and religious trends from the fall of Napoleon Bonaparte to the outbreak of the First World War.
Attributes: International Relations Course, Undergraduate

HIS 325 France 1814-1914 (3 credits)
A study of political, diplomatic, social, economic and religious trends from the fall of Napoleon Bonaparte to the outbreak of the First World War.
Attributes: International Relations Course, Undergraduate

HIS 326 The Age of Empire (3 credits)
A study of European imperialism and anti-imperialism in Africa and Asia from the late eighteenth century to the present, with special emphasis on the nineteenth century and on the British Empire.
Attributes: International Relations Course, Undergraduate

HIS 327 Trans in Early Mod Europe (3 credits)
This course examines some of the key transformations in European history between the years 1400-1800. This period is commonly referred to by historians as “Early Modern Europe,” a term that may seem somewhat odd to us who claim to live in a “modern” world. This course will investigate the term early modern, testing what it means and whether or not it is an appropriate label to place on a period encompassing four centuries. Topics will include the Renaissance, the Reformation, the Dutch Revolt, the English Civil War, European encounters with the “New World,” Absolutism and the rise of the nation state, the Scientific Revolution, the French Revolution, and many more.
Attributes: Medieval, Ren & Reform Studies, Undergraduate

HIS 328 European Dipl His, 1814-1914 (3 credits)
This course analyses the development of European crime and punishment from 1200-1840. It explores the evolution of different legal traditions by comparing the growth of inquisitorial procedures in continental Europe to the practice of common law in England. It examines in detail the social role of judicial torture, physical punishment, and public execution in European society. The operation of large institutional court systems such as the Roman and Spanish inquisitions receive great attention, with students reenacting a series of trials from Spanish Inquisition courts. After investigating the legal backdrop to sensational crimes such as regicide and witchcraft, the course concludes by studying the shift away from physical punishment toward punishment by prison in the eighteenth and nineteenth centuries through the lens of Philadelphia’s own relic of the criminal justice past, Eastern State Penitentiary.
Attributes: European Studies Course, Medieval, Ren & Reform Studies

HIS 330 Eng: Danes to Tudors, 700-1485 (3 credits)
This course will examine the ways in which official decrees—royal, noble, and ecclesiastical—affected people in all walks of life, and will furthermore explore the various roles English men and women constructed for themselves. In so doing, students will gain insight into the ways inhabitants of this island thought of themselves and the world around them.
Attributes: Undergraduate

HIS 331 Tudor-Stuart Eng, 1485-1714 (3 credits)
Age of the Tudor and Stuart monarchs. Topics include Henry VIII and the Reformation, Elizabethan England, Puritanism, the English Civil War, Cromwell, the Restoration, the Glorious Revolution, the growth of the early modern state, the scientific revolution, social change, and cultural life.
Attributes: European Studies Course, Undergraduate

HIS 332 Age of Aristocy: Brit 1689-1832 (3 credits)
The evolution of Britain from a preindustrial toward an industrial society between the Glorious Revolution and the first reform of Parliament; the political world of the Stuart and Hanoverian oligarchy; the industrial revolution; the Empire, particularly the British Atlantic world, and slavery; the Evangelical revival; radical social and political movements; warfare and the consolidation of British national identity; reform and the unraveling of the confessional state in the years after Waterloo; the arts, from Classical to Romantic.
Attributes: International Relations Course, Undergraduate

HIS 333 Victorian Britain, 1815-1901 (3 credits)
The course is a study of Britain from 1815 to 1901 transformed by the urban and industrial revolutions; the growth of the modern state; social and political reforms; the evolution of the Liberal and Conservative parties; religious, cultural, and intellectual developments; labor movements; British foreign policy and growth of the British Empire.
Attributes: European Studies Course, International Relations Course, Undergraduate

HIS 334 Twentieth Century Britain (3 credits)
Topics will include Edwardian England; Armageddon, 1914-1918; the trials of the inter-war years and appeasement; the Finest Hour, 1939-1945; from Empire to Commonwealth to European Union; the welfare state and the politics of prosperity.
Attributes: International Relations Course, Undergraduate
This course will examine the impact of the French Revolution and Napoleon on the German states, the development of the German Confederation and the Zollverein, the contest between Austria and Prussia for German leadership, the Bismarck era and the rule of William II. 

**Attributes:** European Studies Course, International Relations Course, Undergraduate

**HIS 336 The Weimar Republic & Nazi Germany (3 credits)**

This course will focus on the German Revolution of 1918, the creation, development and collapse of the Weimar Republic, the rise of Adolf Hitler and the history of the twelve-year Third Reich. 

**Attributes:** International Relations Course, Undergraduate

**HIS 337 History of Russia, 1682-1881 (3 credits)**

A survey of the major political, social, economic, and cultural developments in Russia from Kievan Rus to the emancipation of the serfs. Topics will include Kievan Rus; the Golden Horde; the Rise of Muscovy; the consolidation of the Romanov autocracy; the expansion of the empire; and the Great Reforms. 

**Attributes:** International Relations Course, Undergraduate

**HIS 338 Russia-Soviet Union 1861-1991 (3 credits)**

A survey of the major political, social, economic, and cultural developments of the Russian Empire from 1861 to 1917 and of the Soviet Union from its foundation to its break-up in 1991. Topics will include the decline of tsarism; the Russian revolutions; Stalinism; World War II; the Cold War; the "thaw years" under Khrushchev; the "stagnation years" under Brezhnev; and the reforms under Gorbachev. 

**Attributes:** International Relations Course, Undergraduate

**HIS 339 The Mongol Empire 1100-1500 (3 credits)**

In the thirteenth century, the Mongols built the largest contiguous land empire the world has ever known. This course will cover the rise, running, and fall of this empire. It will explore the society and culture of the Mongols, the world’s most famous nomadic conquerors. In addition, the course will examine how the Mongol Empire impacted the course of Eurasian history. It will explore how the empire affected not only the Mongols themselves, but also the many peoples whom they conquered. This course has been designated as a non-western studies course under the GEP.

**Attributes:** Asian Studies Course, Non-Western Studies (GEP), Undergraduate

**HIS 340 Stalinism 1920 to 1950 (3 credits)**

This course examines the Soviet Union under the leadership of Joseph Stalin from 1928 to 1953. This period was repressive, but also transformative. The course will address not only the suffering inflicted by Stalin’s steep repression, but also the social, cultural, and economic impact of his policies. Course readings will focus on the experiences of ordinary people to demonstrate that Stalin’s rule brought both opportunity, as well as great tragedy. Stalinism, historians argue, was more than a political ideology such as Marxism and Leninism, but a way of life and civilization distinct from anything the modern world had yet experienced.

**Attributes:** International Relations Course, Undergraduate

**HIS 341 Genocide/Human Rights 20th Century (3 credits)**

Examines and compares four twentieth-century genocides: the Turkish genocide of the Armenians (1915-1917), the Holocaust (1933-1945), the Pol Pot genocide in Cambodia (1976-1979), and the genocide against the Tutsi in Rwanda (1994). The course will explore the concept of genocide and the development of national and global laws to prevent it, promote human rights, and prosecute abusers. In doing so, it will offer a historiography of genocide studies. Also, through primary and secondary source readings, students will study genocidal violence as a particularly vicious form of state policy and also as a human and personal experience of terror and murder.

**HIS 343 African Ethnicities (3 credits)**

This course is designed to inform students on not only the general schools of ethnic construction, but also Africa’s unique contribution to the development of the field. There will be several case studies given in the class which represent some of the extremely varied African experiences with ethnicity. In this course students will develop an understanding of ethnic construction that can be used as a foundation for further inquiry. This course has been designated as a non-western studies course under the GEP.

**Attributes:** International Relations Course, Non-Western Studies (GEP)

**HIS 344 The Middle East Since 1798 (3 credits)**

**HIS 345 Africa: Transatlantic Slave Trade (3 credits)**

This class will examine the role of religious thought and cultural philosophies in conflict and peace in Africa. The class will begin as a survey of the history, cultures and religions of Africa. After which, several case studies will be presented that put specific North-African interpretations of Judaism, Islam, Christianity or traditionalist beliefs at the center of either conflict or consensus in this region. A final extended case study will examine the Somali, where one has a unity of language, culture and religion, but due to decades of civil wars, no functional state. These case studies will focus on the specific religious beliefs or practices that either endeared religious groups to each other or transcended religious denominations to provide concrete examples for the ways in which the proponents of faiths and secularity coexist or cause conflict in Africa.

**Attributes:** Faith-Reason Course (New GEP), International Relations Course

**HIS 347 Beyond Hercules: Spain & Portugal (3 credits)**

This course will examine popular and educated belief in the supernatural during the early modern period in Europe, beginning with late medieval concepts of magic and finishing with the end of witchcraft trials during the eighteenth and nineteenth centuries. It will focus especially on the “witch-craze” that occurred across Europe and its American colonies during the sixteenth and seventeenth centuries. Readings will include trial records, journals, and demonology tracts, as well as secondary sources treating witchcraft as a crucial component of early modern beliefs about law, religion, and culture.

**Attributes:** Undergraduate
HIS 349 Irish His. Place of Sml Country (3 credits)

HIS 350 Exchng & Conq in Mod E. Asia (3 credits)
This course is a chronological survey of East Asian history from 1500 to the present, emphasizing the reciprocal influences of East Asia and the West. The primary focus will be on China and Japan, with attention also to Korea and Vietnam. Major topics will include the Jesuits in East Asia; approaches to modernization in China and Japan; the decline of China and the rise of Japan in the nineteenth century; colonialism and anti-colonial movements; the challenges of global culture; and debates over human rights in the late twentieth century.
Attributes: Asian Studies Course, International Relations Course, Undergraduate

HIS 351 Gndr, Ideology & Rev in E. Asia (3 credits)
This course will examine the institutional and ideological connections between gender roles and social unrest in East Asia since 1600, with an emphasis on the twentieth century. Questions central to the class will be: changing notions of the ideal man and woman, and how changes in society and politics have been reflected in gender roles for men and women. Topics may include traditional East Asian societies; foot binding; revolutionary movements including communism, nationalism and feminism; family-planning; the Japanese samurai ideal; and gender roles in film and fiction.
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 352 Late Imperial China (3 credits)
Chinese social, political, intellectual, and cultural history during the Ming and Qing dynasties. Major topics will include Ming voyages of discovery, Ming art and literature, the Manchu conquest, War of the Three Feudatories, Taiping Rebellion, and the advent of Western imperialism. This course has been designated as a non-western studies course under the GEP.
Attributes: Asian Studies Course, Non-Western Studies (GEP), Undergraduate

HIS 353 Modern China (3 credits)
Chinese social, political, intellectual, and cultural history from 1900 to 2000. Major topics will include the Opium Wars, emergence of Chinese nationalism, the Boxer Rebellion, collapse and fall of the Qing dynasty, the May Fourth Movement in literature and politics, competing strands of Chinese communism, warlords, the anti-Japanese war, the founding of the People’s Republic, the Great Leap Forward, Cultural Revolution, Deng Xiaoping’s Reforms, social protest of the 1980s, and the challenging of rapid economic development. This course has been designated as a non-western studies course under the GEP.
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 354 Japan Since 1800 (3 credits)
The central theme of this course is the coexistence of traditional and modern Japan during the last 200 years. Major topics include traditional Japanese social structure, bushido and samurai culture, Perry and the opening of Japan, the Meiji Restoration, militarism and modernization, expansion onto the Asian continent, Showa democracy, the Pacific War, the American Occupation, political and economic reconstruction, cinema and literature of post-war Japan. This course has been designated as a non-western studies course under the GEP.
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 355 Clnlism & Ntnlism SE Asia (3 credits)
This course will focus on the experience of colonialism and the development of independent modern nation-states in Vietnam, Cambodia, Laos, and Indonesia, and to a lesser extent, Malaysia, Singapore, Burma, and the Philippines. The course seeks to help students understand how colonialism redefined pre-existing relations among the peoples of the region and how modern nationalism and independence movements emerged in this context. Although political and economic interests are essential parts of this story, the course will focus on intellectual, cultural, and social factors.
Attributes: Asian Studies Course, International Relations Course, Undergraduate

HIS 356 Modern South Asia (3 credits)
The nation-states of India, Pakistan, Bangladesh, Sri Lanka, Bhutan, Nepal and the Maldives Islands (and sometimes Afghanistan)—comprise incredible diversity of language, culture, religion, art, dress, architecture, and cuisine. This course places the region into historical, political and socio-economic context. It offers a thematic and chronological study of modern South Asia with thorough examinations of the British colonial period, the movements for independence and the social activism that grew out of them. The course will then examine selected topics in contemporary South Asia including gender, caste, minorities, territorial sovereignty conflicts, popular culture and film, development economies, and the South Asian diaspora. This course has been designated as a non-western studies course under the GEP.
Attributes: International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 357 History of Islam in Asia (3 credits)
This course explores the early history of Islam, and the ways it grew beyond the Arabian peninsula and ultimately took hold in Central, South, Southeast Asia and East Asia. The course examines the expansion of Islam throughout Asia, its relationship with existing systems and geopolitics, the relationship between Islam and statecraft, and questions of gender, identity, belonging as well as the pressures of globalization, including the most current events affecting Asian Muslims.
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 358 Contemporary China (3 credits)
The history of China since 1976. Major topics covered will be the death of Mao and the end of the Cultural Revolution; the opening of relations with the United States; Deng Xiaoping’s rise; opening and reform; China’s “economic miracle”; the one-third policy; the 1989 democracy movement and its aftermath; China’s rise as a global economic and political power; the environmental challenge accompanying China’s economic development; and the Communist Party’s strategies and tactics to maintain power. Usually offered as part of the SJU-in-China summer program. This course has been designated as a non-western studies course under the GEP.
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate

HIS 359 India & Pak: Colony to Nation (3 credits)
This course will examine the emergence of anti-imperialists and nationalist leaders and the evolution of their thinking; the politics of Indian nationalism; Muslim nationalism; the history of the partition and its reverberations and the challenges of state building after independence from Britain. This course has been designated as a non-western studies course under the GEP.
Attributes: Asian Studies Course, International Relations Course, Non-Western Studies (GEP), Undergraduate
**HIS 360 Colonial America (3 credits)**
A survey of the social, economic, cultural, and political developments in colonial America with special emphasis on the origins and evolution of the plantation system, slavery, religious diversity, cities, and scientific inquiry.
*Attributes*: Diversity Course (New GEP), Undergraduate

**HIS 361 Amer Hist in Age of Revolution (3 credits)**
A survey of American history from the era of the American Revolution through the mid-nineteenth century with special emphasis on Independence, the 1800 revolution in politics, the transportation, agricultural, and industrial revolutions, and the social revolution accompanying modernization in the nineteenth century.
*Attributes*: Undergraduate

**HIS 362 The Civil War Era (3 credits)**
A survey of the middle period of American history with special emphasis on the Civil War and Reconstruction— the causes, management, and consequences of the war in society, economics, politics, and culture. This course has been designated as an ethics intensive course under the GEP.
*Prerequisites*: PHL 154
*Attributes*: Africana Studies Course, Ethics Intensive (New GEP), Undergraduate

**HIS 363 The Elections of 2020 (3 credits)**
An analysis of the presidential, congressional, and gubernatorial races of 2020. The course will offer the student a basis for understanding the ongoing election cycle of 2020, especially drawing upon the changes that have taken place in American politics since the 1980s and the history of electioneering in America, especially in the modern era. This will include discussion of partisan realignment, the growing importance of personality and interest group politics, and the role of issues in influencing electoral choice. Particular attention will be devoted to understanding the tactics and strategies of the two major parties as they position themselves for and then campaign in the Elections of 2020.
*Attributes*: Undergraduate

**HIS 364 Ethnic America (3 credits)**
A survey of the development of cities and the process of urbanization in America with special emphasis on urban institutions—government, police, voluntary associations—and the changing character and functions of cities in the modern period.
*Attributes*: Africana Studies Course, Undergraduate

**HIS 365 Urban America (3 credits)**
A survey of the development of cities and the process of urbanization in America with special emphasis on urban institutions—government, police, voluntary associations—and the changing character and functions of cities in the modern period.
*Attributes*: Africana Studies Course, Undergraduate

**HIS 366 Progressive Era to New Deal (3 credits)**
Reform affected all levels of U.S. politics and society in the first half of the twentieth century, linking the first Roosevelt administration to the last. Besides cleaning up at home, Progressives and New Dealers also tried to save the world abroad with varying success. This course will examine the origins, nature, contradictions and social and political consequences of these important Reforming Decades.
*Attributes*: International Relations Course, Undergraduate

**HIS 367 Postwar Am, 1945 to the Presnt (3 credits)**
This course will explore recent American history through an examination of political, social, and cultural developments, with particular emphases on the expanding role of the presidency, social movements embracing racial, class, and gender issues, and emerging cultural crosscurrents since World War II.
*Attributes*: International Relations Course, Undergraduate

**HIS 368 Am Ideas: Col Era to Civil War (3 credits)**
This course explores the history of American thought and culture from the Puritans to the Civil War, largely through primary source readings by major intellectual figures. The emphasis will be on social, political, and religious thought, but students will also discuss developments and trends in the arts, literature, and philosophy. Key topics include Puritanism and revivalism; liberalism, republicanism, and democracy; cultural nationalism and Transcendentalism; and abolitionism and antebellum reform.
*Attributes*: Undergraduate

**HIS 369 Am Ideas: Giled Age to Pres (3 credits)**
This course explores the history of American thought and culture from the late nineteenth century to the present, largely through primary source readings by major intellectual figures. The emphasis will be on social and political thought, but students will also discuss developments and trends in philosophy religion, the arts, and literature. Key topics include Victorianism and modernism; pragmatism and Progressivism; liberalism and conservatism; and postmodernism and multiculturalism.
*Attributes*: Undergraduate

**HIS 370 Topics in History (3 credits)**
The course introduces students to recent theoretical or practical topics of interest in history. Content and structure of the course are determined by the course supervisor. The special topic(s) for a given semester will be announced prior to registration.
*Attributes*: Undergraduate

**HIS 371 Directed Readings in Asian His (3 credits)**

**HIS 372 Directed Rdgs in European His (3 credits)**

**HIS 373 Afr Amer Hist Since Civil War (3 credits)**
This course will explore the history of African-Americans from Reconstruction to the present day. Students will examine the unity and diversity of the African-American experience, including the myriad social, cultural, political, and economic conditions that created this experience, the ways in which African-Americans have shaped American history and culture, and African-American efforts, in concert with other Americans, to subvert, transcend, and otherwise reform a discriminatory landscape and reassert the founding principles of the American republic.
*Prerequisites*: HIS 154
*Attributes*: Africana Studies Course, Diversity Course (New GEP), Undergraduate

**HIS 380 Am Foreign Policy, 1775-1914 (3 credits)**
This course explores the origins of United States foreign relations from their earliest days during the Revolution until the First World War. The course takes a broad approach, embracing such issues as independence, expansion, sectionalism, nationalism, idealism and imperialism.
*Attributes*: International Relations Course, Undergraduate
HIS 381 US in the World, Wilson-Reagan (3 credits)
This course covers the enhanced profile of the United States in the world from 1917 until the end of the Cold War. The nation’s transformation from a hesitant embrace of international commitments to an expansive vision of global involvement is a major theme, as are the resultant crusades and conflicts this generated domestically.
Attributes: International Relations Course, Undergraduate

HIS 382 American Foreign Policy (3 credits)
This course offers an interdisciplinary perspective on the United States’s role in global events emphasizing both historical understanding and theoretical approaches. Beginning with World War I, the course will develop major themes and challenges for U.S. foreign policy in the 20th century and beyond: isolationism vs. internationalism, hegemony vs. empire, citizens’ rights vs. state interests, and the extent to which the pursuit of national security (national power and prosperity) should recognize ethical limits.
Attributes: Undergraduate

HIS 383 Food in American History (3 credits)
Examines how food has shaped and reflected American culture, society, economy, and politics.
Attributes: Undergraduate

HIS 384 The Civil Rights Mov in Am (3 credits)
A survey of the modern civil rights movement in the United States, with special emphasis on the desegregation struggles in the American South and the personalities, strategies, and ideologies of the civil rights movement as it became a national movement through the 1960s and 1970s.
Attributes: Africana Studies Course, Undergraduate

HIS 385 His of Women in Am Since 1820 (3 credits)
This course will explore the history of American women from the beginnings of the antebellum period to the dawn of the post-Cold War era. It will focus upon the evolution of women’s family and work roles as well as their involvement in social reform and political movements and will emphasize both the unity and the diversity of women’s historical experiences, based upon factors such as race, ethnicity, class, and region. (DGNW overlay)
Attributes: Diversity Course (New GEP), Undergraduate

HIS 386 American Environmental History (3 credits)
This course will describe our historical place in the natural landscape. It will tell that story through the methods of “environmental history,” examining ecological relationships between humans and nature, political and economic influences on the environment, and cultural conceptions of the natural world. Drawing on methods from the natural sciences, the social sciences, and the humanities, the course will survey over 500 years of North American environmental history, with topics ranging from urban pollution and suburban sprawl to agricultural practices and wilderness protection.
Attributes: Ethics Intensive (New GEP), Undergraduate

HIS 387 Popular Culture in the US (3 credits)
This course will explore the production and consumption of commercialized leisure in the United States from the mid-nineteenth century to the present day. Throughout the nation’s history, American popular culture has both reflected and shaped society’s values, often serving as an arena of conflict among classes, races, and genders. By investigating selected sites on this contested terrain—from novels, stage shows, and movies to radio, television, and popular music—students will learn to think seriously, critically, and historically about the mass-produced culture that surrounds us every day.
Attributes: Communication Studies ILC Crs, Undergraduate

HIS 388 Reacting to the Past (3 credits)
This course will immerse students in moments of historical controversy through a series of extended role-playing games. By reading primary sources, conducting additional research, and participating in first-person debates, students will develop a more active, engaged, and empathetic understanding of both historic events and historical practice. Students will also participate in the play testing of new “Reacting” games, thereby contributing to the development of an innovative interactive pedagogy.
Attributes: Undergraduate

HIS 389 Gender/Sexuality Mod Euro & US (3 credits)
HIS 391 American Military History (3 credits)
This course assesses the development of the American military from the period of the Spanish-American War to the present. Emphasis will be placed on growth and change in the military within a broader social, political and economic context.
Attributes: Undergraduate

HIS 394 Middle East (3 credits)
HIS 458 Epidemiology (3 credits)
HIS 460 Research Seminars (3 credits)
HIS 462 Seminar in European History (3 credits)
HIS 470 Seminar in American History (3 credits)
Lectures, readings, and discussions focusing on an announced theme in United States history. Each student undertakes a major research project associated with the selected theme.
Attributes: Undergraduate

HIS 471 Seminar in American History (3 credits)
HIS 472 Seminar in European History (3 credits)
Lectures, readings, and discussion focusing on an announced theme in European history. Each student undertakes a major research project associated with the selected theme. This course has been designated as a writing intensive course, and an ethics intensive course under the GEP.
Prerequisites: ENG 101
Attributes: Ethics Intensive (New GEP), European Studies Course, Undergraduate, Writing Intensive Course- GEP

HIS 473 Seminar in Eurasian History (3 credits)
Lectures, readings, and discussion focusing on an announced theme in Latin American history. Each student undertakes a major research project associated with the selected theme. This course has been designated as a writing intensive course under the GEP.
Prerequisites: ENG 101 and HIS 154
Attributes: Undergraduate

HIS 474 Seminar in Latin Am His (3 credits)
Lectures, readings, and discussion focusing on an announced theme in Latin American history. Each student undertakes a major research project associated with the selected theme. Latin American Studies. Latin American Studies.
Attributes: Undergraduate

HIS 475 Seminar in Latin Am His (3 credits)
HIS 476 Seminar in Asian History (3 credits)
Lecture, readings, and discussion focusing on an announced theme in Asian history. Each student undertakes a major research project associated with the selected them. This course has been designated as a writing intensive course under the GEP.
Attributes: Asian Studies Course, Undergraduate
HIS 477 Seminar in African History (3 credits)
Lectures, readings, and discussion focusing on an announced theme in African history. Each student undertakes a major research project associated with the selected theme. This course has been designated as a writing intensive course under the GEP.
Attributes: Africana Studies Course, Diversity Course (New GEP), Undergraduate

HIS 478 Seminar in Global/Comp His (3 credits)
Lectures, readings and discussion focusing on an announced theme in global and/or comparative history. Each student undertakes a major research project associated with the selected theme. This course has been designated as a writing intensive course under the GEP.
Prerequisites: ENG 101
Restrictions: Enrollment is limited to students with a major in History.
Attributes: International Relations Course, Undergraduate, Writing Intensive Course- GEP

HIS 479 Seminar in Global/Comp His (3 credits)
HIS 480 Directed Readings in Amer Hist (3 credits)
HIS 481 Directed Rdgs in European Hist (3 credits)
HIS 482 Directed Rdgs in Asian Hist (3 credits)
HIS 483 Directed Rdgs in African Hist (3 credits)
HIS 484 Directed Rdgs in Latin Am Hist (3 credits)
HIS 489 Directed Readings (3 credits)
HIS 491 Philadelphia Area Internship (3 credits)
The Philadelphia Area Internship Program supports student internships in public sector, private sector, and non-government organizations. The course focuses on developing multiple skills. Students work at the organization a designated number of hours per week, keep a journal, read and analyze materials relevant to their internships, and produce written work that connects their internship experiences with relevant scholarly research. This course has been designated as writing-intensive under the GEP.
Prerequisites: ENG 101
Attributes: International Relations Course, Undergraduate, Writing Intensive Course- GEP

HIS 493 Honors Resrch and Ind Study I (3 credits)
Independent research leading to the successful completion and defense of an Honors Thesis.
Attributes: Undergraduate

HIS 494 Honors Research & Ind Study II (3 credits)
Independent research leading to the successful completion and defense of an Honors Thesis.
Attributes: Undergraduate

History Major

Goal 1: Articulate key differences in human experience across time and place.

Objective 1a: Students will be able to identify, articulate, and analyze the context, causes and consequences of historical events and epochs in different regions of the world and different time periods.

Goal 2: Assess competing assertions about the processes and dynamics of change over time.

Objective 2a: Students will be able to distinguish and evaluate the characteristics of multiple theoretical perspectives and methodological practices used to interpret the past.

Goal 3: Evaluate arguments based on empirical assertions and evidence rooted in the discipline

Objective 3a: Students will be able to recognize the characteristics of different kinds of sources (primary and secondary) and understand how they are used.

Objective 3b: Students will be able to discover different kinds of sources and evaluate their credibility and utility in specific circumstances.

Goal 4: Produce clear and persuasive analyses of relevant research questions based on the conventions of the discipline.

Objective 4a: Students will be able to practice the discipline's professional standards, including acknowledging and building on the work of others.

Objective 4b: Students will be able to apply a variety of tools, methods, and perspectives to investigate and interpret the past in an independently developed, supervised research undertaking.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:
1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses
Integrated Learning Component (ILC) of the General Education Program (GEP) for History Majors

History majors can complete the Integrated Learning Component of the GEP by completing three courses from any one track shown below. Courses taken as part of the History Department’s ILC may count toward a minor or a second major. They may not, however, count for credit elsewhere in the GEP. Subject to departmental approval, and under their advisor’s guidance, students may petition to construct a different ILC.

1. The Arts and Letters Track consists of any three courses that count toward majors in any of the following departments:
   - English
   - Art
   - Modern and Classical Languages
   - Music, Theater and Film
   - Philosophy
   - Theology and Religious Studies

2. The Social Sciences Track consists of any three courses in any of the following majors:
   - Criminal Justice
   - Economic
   - Education
   - Political Science
   - Sociology

3. The Multi-disciplinary Track consists of three non-history courses that are all part of the same multi-disciplinary College of Arts and Sciences Program, including:
   - Africana Studies
   - American Studies
   - Ancient Studies
   - Asian Studies
   - Faith Justice Studies
   - Gender Studies
   - International Relations
   - Latin American Studies
   - Medieval/Renaissance/Reformation Studies

GEP Free Electives

Ten courses

Major Requirements

Major Concentration

HIS 201 and HIS 202, plus ten additional approved courses numbered from HIS 203 and above.

These ten additional courses must include:

- at least one upper division course in U.S. history, one upper division course in European history, and one upper division course in history that does not focus on the United States or Europe.
- at least two courses that focus on a time period prior to 1800 CE (an updated list of appropriate courses is available on the department web site).

- at least two research seminars (HIS 460-HIS 479), ideally one in the junior year and one in the senior year. A senior Honors thesis may substitute for one of the seminars.

With approval of the chair, and according to general university policies, credit in the major can be granted for courses taken in other programs at the university, Advanced Placement courses, International Baccalaureate courses, or courses taken at other universities, including study abroad programs. History majors with credit transferred from other institutions must complete at least four courses taught by the history faculty of Saint Joseph’s University. Students who undertake a double major that includes history must consult the department chair for assistance in scheduling history courses and completing requirements for the major.

Honors Requirements

To receive Honors, students enroll in the senior year in HIS 493-HIS 494, two consecutive semesters of course-based research and study to produce a senior thesis. For students in the University Honors program, these two courses may be counted toward the eight course University Honors requirement. To be eligible for College Honors, a student must have a 3.5 GPA. If you are interested in completing the College Honors project during your senior year, please contact the department chair early in the spring semester of your junior year. Specific requirements for the College Honors thesis may be found in this catalog under the Honors Program.

Internships

Qualified history majors are eligible to participate in a variety of internships for academic credit with historical, cultural, educational, governmental, and other organizations. See the HIS 491 course description below.

Teacher Certification for Secondary Schools

Dual Major in History and Secondary Education

History majors are eligible to complete a double major in History and Secondary Education. In addition to the subject-specific content requirements for secondary school teacher certification that are met by completing the major, dual majors become candidates for the Grades 7-12 teaching certificate in Pennsylvania by completing a prescribed sequence of coursework, which includes the specific requirements for Accommodations and Adaptations for Diverse Learners in Inclusive Settings and Meeting the Needs of English Language Learners under PA §49.13(4)(i).

Below is the recommended program for students to be eligible for a PA Level I teaching certificate in Secondary Education.

Note: Candidates for Secondary School Teacher Certification must also complete two courses in Mathematics. One course is satisfied by the Mathematics GEP requirement. For History majors, the second Mathematics courses is taken as a free elective. It is recommended that MAT 118 be taken.

Also note that HIS/EDU double majors must take POL 111 as their POL 1** course.

Students seeking the double major are urged to declare their intentions as early as possible in their undergraduate careers and must register with the Teacher Education Department, which will guide candidates through their required Teacher Education courses and also assist students through the certification requirements of the Pennsylvania Department of Education. Students must have an overall Grade Point Average (GPA) of 3.0 or higher to be accepted into the teacher certification program and must have an overall GPA of 3.0 as one of the requirements to obtain teacher certification. See the Teacher Education Department section of the Catalog for more information.

History Course Sequences and Cycles

HIS 154 is offered every semester. HIS 201 is generally offered in the Fall semester. HIS 202 is generally offered in the Spring semester. Other courses will generally be offered on a two-to-three year cycle, meaning that those not taught in the current academic year will most likely be offered some time in the following two years. New or revised courses not currently listed in the catalog may be added.

Research Seminars (HIS 460 through HIS 479) will be scheduled each semester, with the topics and professors announced in advance. Each will offer the opportunity for in-depth study and completion of a major research project.

Directed Readings Courses (HIS 480-HIS 489) focus on significant themes and periods chosen by consultation between individual students and a faculty tutor. Prior approval from the Department Chair is required. Generally, these courses are restricted to students in the Honors Program.

Senior Honors Research (HIS 493-HIS 494) is a two-semester course sequence that requires independent research during the senior year under the direction of a faculty tutor, leading to the completion of a College Honors Thesis and its defense before a committee of faculty members from different disciplines.

History Minor

Goal 1: Articulate key differences in human experience across time and place.

Objective 1a: Students will be able to identify, articulate, and analyze the context, causes and consequences of historical events and epochs in different regions of the world and different time periods.

Goal 2: Assess competing assertions about the processes and dynamics of change over time.

Objective 2a: Students will be able to distinguish and evaluate the characteristics of multiple theoretical perspectives and methodological practices used to interpret the past.

Goal 3: Evaluate arguments based on empirical assertions and evidence rooted in the discipline

Objective 3a: Students will be able to recognize the characteristics of different kinds of sources (primary and secondary) and understand how they are used.

Objective 3b: Students will be able to discover different kinds of sources and evaluate their credibility and utility in specific circumstances.

Goal 4: Produce clear and persuasive analyses of relevant research questions based on the conventions of the discipline.

Objective 4a: Students will be able to practice the discipline's professional standards, including acknowledging and building on the work of others.

Objective 4b: Students will be able to apply a variety of tools, methods, and perspectives to investigate and interpret the past in an independently developed, supervised research undertaking.

The minor in history requires completion of HIS 154 and any five History courses numbered HIS 201 or higher.
HONORS PROGRAM

Program Overview
The Honors Program offers qualified and interested students an enriched and challenging alternative to their General Education Program and an opportunity for intensified independent research or creative work in their major concentration.

University Honors
Honors Courses in the General Education Program (GEP) or in individual majors are intellectually rigorous and may be taught by more than one faculty member, each from a different department of the University. Honors faculty are selected by the honors director working closely with the Honors Committee and department chairs. Graduation with University Honors requires successful completion of eight honors courses. These become part of the student's regular program and the Honors Program imposes no additional courses. Students must also have a cumulative GPA of 3.5 to receive University Honors.

College Honors
College Honors is a mandatory senior thesis or capstone experience that all Honors students must complete successfully in order to receive University Honors. College Honors is awarded to those students who have completed a two semester independent research/thesis or capstone project in the senior year, under the supervision of a faculty mentor. An oral presentation of work is required of all candidates for College Honors pursuing the thesis option, who make the arrangements for this presentation with their faculty mentor and their department chair. Interdisciplinary projects involving the student's minor as well as major are encouraged, but these require the specific written approval of the Honors Director and the Department Chairs of both the student's major and minor. Whether senior thesis or capstone experience, College Honors will satisfy two of the eight Honors requirements for completion of University Honors. In order to be eligible for College Honors, Honors students must have a minimum overall GPA of 3.5 in all course work at the end of their junior year and must be on track for the completion of their eight required Honors courses for University Honors. The Honors Program, upon the completion of academic review of Honors Program juniors, will establish a list of all students who meet these eligibility requirements.

College Honors may be offered to non-Honors students who have a minimum 3.5 GPA. This will be at the discretion of the department in which the thesis or capstone experience will be conducted. College Honors is an optional experience for non-Honors students.

Membership in the Honors Program
Membership in the Honors Program is by invitation of the Honors Director prior to the student’s first year at the University. Occasionally, interested non-Honors students may enroll in Honors courses with permission of the Director and instructor.

Honors Recognition
Successful completion of the requirements for University Honors and College Honors thesis or capstone project, is noted on the student's academic transcript.

Honors in the GEP
Many Honors courses can be used to satisfy one of several university GEP requirements. Students must notify the Registrar's office, the Honors Program, and their academic advisor which GEP requirement is being satisfied by which course. This must be done in writing.

Students are encouraged to consult with the Honors Director or Associate Director to assure that their course schedules are arranged in such a way as to integrate the fulfillment of University requirements with those of the Honors Program.

College Honors Requirements
To receive College Honors credit, a student must undertake two consecutive semesters of research/study culminating in a senior thesis or capstone project. These two courses may be counted toward the eight course Honors requirement. To be eligible for College Honors, a student must have a 3.5 GPA.

College Honors Thesis: A Description
Individual departments and interdisciplinary programs may determine their own College Honors experience by requiring either a two semester thesis or a two semester capstone experience, or in some cases offering students a choice of thesis or alternative capstone. Honors students completing College Honors should consult their major departments/programs to determine the required College Honors experience, whether capstone or thesis. Specific requirements, procedures, guidelines, and timelines for capstone projects will be supplied by the departments/programs.

Departments requiring the College Honors thesis should follow these particular guidelines. The Thesis should be original in its conception and analysis. This may mean the discovery of new knowledge, the reinterpretation of standard methods, theories and assumptions, or the formulation of data produced from fresh investigations. The College Honors Thesis should be the result of serious research, original thinking and a clear understanding of the context in which this research is conducted. The College Honors Thesis may take many forms: traditional narrative/analysis, in-depth study of specific texts or themes, empirical research, practical applications or a creative/inventive endeavor. Students submitting a proposal for a College Honors Thesis should provide evidence of background knowledge and requisite skills before they begin their work. The final result will be shared in an oral presentation, as well as in a written thesis, and should place the specific topic in a broader scholarly context by demonstrating familiarity with the authoritative literature and research on the subject.

Projects involving empirical research should develop a coherent hypothesis, and test it professionally and systematically. Length may vary according to each subject; however, it is expected that the College Honors Theses will be substantial in scope, length, and bibliography, and that it will be documented in accordance with the standards of the relevant discipline and include an abstract, title-page, table of contents, introduction, notes and bibliography. The final copy of the thesis should be clean, readable, and grammatically consistent and correct.

Procedures and Deadlines
In mid-February of their junior year, candidates planning to write a College Honors thesis should contact the Director of the Honors Program, who will arrange to have them meet members of the senior class working on College Honors Thesis projects. These sessions will be administered
either by the Director or the Associate Director of the Honors Program, and the focus will be on the requirements, preparation and contents of the various theses. By April 15 of their junior year, students should confirm with the Director of the Honors Program their intention to pursue the College Honors thesis. The College Honors application is available online at www.sju.edu/honors. They will be expected to outline a general area of research and to name a primary mentor for the project. They will also be required to attend one of the oral presentations being given by senior students towards the end of the semester, and to select their mentor for the College Honors Thesis. Students will be expected to remain in touch with their mentors throughout the summer months as they conduct preliminary research into their topics. By September 1, each student must submit a College Honors thesis proposal contract, which can be obtained online at www.sju.edu/honors. This form, which will outline the work load, general objectives and schedule of meetings to be held during the semester, should be signed and approved by their mentor. By October 1, each candidate should also select a second reader for the thesis, after consulting with their mentor. The second reader should be from a different department, who has a compatible interest in the thesis topic. The second reader will serve to offer advice, criticism and suggestions throughout the process of the College Honors Thesis. By November 15, a joint meeting including the Honors Director or Associate Director, the College Honors thesis candidate, the mentor and the second reader should be arranged. At this meeting, the student will provide a clear progress report of the work completed and an outline of what lies ahead.

A first draft of the entire project must be presented to the mentor for critical review by March 1 of the senior year. By April 20th, the student must submit a final draft to his/her mentor, to the members of the examination committee consisting of at least two additional faculty members (including the second reader), normally from the disciplines in which the research has been carried out, and to the Honors Director. An oral presentation of the project to the examination committee and the Honors Program Committee will occur sometime before the end of the final examination period. The members of the examination committee are asked to sign a copy of the project which will indicate that the student has passed the oral exam. The grade for the entire research project will be determined by the mentor. A copy of the signed, completed project is to be filed with the Honors Director and the appropriate department chair before recognition can be given at graduation.

**Honors Program B.A./B.S.**

**Honors Degrees**

Students who successfully complete their University Honors requirements and mandatory College Honors thesis or capstone project qualify for the special degree Bachelor of Arts (Honors) or Bachelor of Science (Honors), whichever is appropriate. The distinctiveness of these degrees is acknowledged on the diploma and on the student’s transcript.

**Honors Program Learning Objectives and Their Alignment With Goals**

**Goal 1:** Students will pursue a program of study of interdisciplinary courses and courses offered in traditional disciplines.

**Objective 1.1:** Explore issues in a multiplicity of disciplines and integrate knowledge from those disciplines.
Objective 1.2: Demonstrate analytic and critical skills in examining literary, artistic, historical, philosophical, theological, sociological, political, scientific, legal, linguistic, or business texts.

Goal 2: Students will engage in rigorous thought, critical analysis, and synthesis in the context of problem solving.

Objective 2.1: Engage in independent scholarly or creative research, analysis, and synthesis that prompt them to invent written arguments that reflect the acquisition of knowledge, insights, and skills.

Objective 2.2: Demonstrate confidence and clarity in speaking in classroom presentation, discussion, and debate that demand data gathering, analysis, and critical reflection.

Objective 2.3: Address topical, social, scientific, cultural, or business issues either inside or outside the classroom, and propose original, creative, and enduring solutions to real world issues and problems.

Objective 2.4: Engage in self-reflection and self-evaluation to promote intellectual self-confidence or spiritual humility.

Goal 3: Students will produce a scholarly or creative project or capstone experience under the guidance of members of the Honors faculty.

Objective 3.1: Engage in independent scholarly or creative research, analysis, and synthesis that prompt them to invent written arguments that reflect the acquisition of knowledge, insights, and skills.

Objective 3.2: Explore aesthetic dimensions in creative works — stories, poems, plays, paintings, sculpture, architecture, film, and music — and learn the style, perspective, and techniques of a major artist or movement.

Goal 4: Students will create an intellectual environment through scholarly, creative, social, cultural, or business activities.

Objective 4.1: Engage in independent scholarly or creative research, analysis, and synthesis that prompt them to invent written arguments that reflect the acquisition of knowledge, insights, and skills.

Objective 4.2: Explore aesthetic dimensions in creative works — stories, poems, plays, paintings, sculpture, architecture, film, and music — and learn the style, perspective, and techniques of a major artist or movement.

Objective 4.3: Address topical, social, scientific, cultural, or business issues either inside or outside the classroom, and propose original, creative, and enduring solutions to real world issues and problems.

Successful completion of University Honors requires at least eight semesters of Honors courses. Students typically schedule Honors coursework in each of the eight semesters, although adjustments may be made to this schedule on the advice of the Honors Director. The following further restrictions apply to the minimum eight-course requirement:

- At least two courses must be team-taught interdisciplinary Honors courses.
- At least two courses must be honors courses satisfying Philosophy or Theology GEP requirements. One of these two must be in the Faith & Reason or Philosophical Anthropology area of the GEP.
- Two courses must be the mandatory College Honors senior thesis or capstone, as determined by individual departments. The College Honors thesis or capstone will satisfy two of the eight courses required for the University Honors diploma.

To remain in the Honors program, students are expected to maintain a 3.50 GPA, which is the minimum required for graduation with University Honors. Students who are not making reasonable progress toward the eight-course requirement or whose GPA is below 3.50 are subject to removal from the Honors Program.

Students are assigned an advisor from the department in which they declare a major. They should, however, consult with the Honors Director and Associate Director to assure that their course schedules are arranged in such a way as to integrate the fulfillment of university requirements with those of the Honors Program.
INTERNATIONAL RELATIONS

Director
• Fukuoka

Undergraduate Major
• International Relations (p. 301)

Undergraduate Minor
• International Relations (p. 304)

IRT 211 World Regional Geography (3 credits)
World Regional Geography is a course of social and spatial inquiry; it helps students compare and contrast societies and cultures. For nearly every area of the globe, this course explores how physical geography, the environment, politics, population, culture, and economy have shaped and continue to shape the diverse lives of people living on this increasingly connected planet. Furthermore, as a geography course, special attention is paid to how issues of place and scale influence and are influenced by human activity. Thus this course not only sheds light on what is out there in the world, but also the major patterns and processes that cut across regions and explain why what is out there is where it is.

Attributes: Globalization Course (New GEP), International Relations Course, Undergraduate

IRT 250 Research & Writing in INTR (3 credits)
This course exposes students to some classical theories in international and comparative studies. It will also introduce students to different methodologies appropriate for performing undergraduate research in International Relations. Throughout the semester, students will work on developing and completing their own research project, and the final product will be a significant paper which they will write in multiple drafts.

Prerequisites: POL 113 (may be taken concurrently) and POL 115 (may be taken concurrently) and ENG 101
Restrictions: Enrollment is limited to students with a major in International Relations or Political Science.

Attributes: International Relations Course, Undergraduate

IRT 493 Honors Rdgs & Research in IR (3 credits)
These courses are for students pursuing College Honors. Students must both have a 3.5 GPA as junior and generate a research proposal for a year-long project to be completed under the supervision of a member of the IR Committee. Interested students apply to the Honors Program by April 15 of their junior year for the right to perform Departmental Honors. Majors then work on their project from the summer prior to and throughout their final year at the University. For more information, please consult the Honors Program or the Director of the International Relations Program.

Attributes: International Relations Course, Undergraduate

IRT 494 Honors Rdgs & Research in IR (3 credits)
These courses are for students pursuing College Honors. Students must both have a 3.5 GPA as junior and generate a research proposal for a year-long project to be completed under the supervision of a member of the IR Committee. Interested students apply to the Honors Program by April 15 of their junior year for the right to perform Departmental Honors. Majors then work on their project from the summer prior to and throughout their final year at the University. For more information, please consult the Honors Program or the Director of the International Relations Program.

Attributes: International Relations Course, Undergraduate

IRT 495 IR Senior Capstone Seminar (3 credits)
Designed to be a culminating experience for all senior International Relations majors, this course provides students with an opportunity to pursue research on a topic of their choosing and present their papers to the class.

Prerequisites: (POL 231 or IRT 250) and ENG 101
Restrictions: Enrollment is limited to students with a major in International Relations or Political Science.

Attributes: International Relations Course, Undergraduate

International Relations Major

Program Overview
International Relations is a degree program that offers the student a truly interdisciplinary course of study. The major concentration emphasizes modern history, economics, and political science. The IR faculty encourages its majors to enhance the interdisciplinary nature of their studies by taking a double major or a minor concentration in modern language, economics, history, political science, business, or one of the interdisciplinary and area studies programs that the University offers (Asian Studies, Latin American Studies, Gender Studies, American Studies); by studying abroad; and/or by participating in the Washington and Philadelphia Internship Programs.

Students majoring in International Relations acquire valuable skills in communication and analysis, independent judgment, appreciation of different societies and cultures, and knowledge of world affairs and trends, all of which are critical in the increasingly global environment of today and tomorrow.

International Relations is a major rooted in the Jesuit tradition of liberal arts, especially suited to those whose orientation may be toward graduate or legal studies, government service, international business, communications, and education.

Learning Goals and Objectives

Goal 1: Students will gain a general knowledge of the field of International Relations, with exposure to the three core fields of the program, global politics, international economics, and modern history.

Objective 1.1: Students will identify and demonstrate knowledge of contemporary scholarship in the areas they have studied.

Objective 1.2: Students will identify and demonstrate knowledge of major historical and contemporary events in world affairs.

Goal 2: Students will be able to read and critically assess academic literature, orally articulate ideas, conduct research, and analyze data, appropriate to the undergraduate level.

Objective 2.1: Students will apply relevant theoretical concepts to assess real world issues.

Objective 2.2: Students will communicate an argument verbally to real world issues by analyzing or synthesizing relevant theories and concepts and/or analyzing and evaluating appropriate evidence.

Objective 2.3: Students will ask their own research question and conduct well-organized, empirically-oriented, written analysis of it by identifying, analyzing and synthesizing relevant theories and concepts, and collecting, analyzing and evaluating appropriate evidence.
Requirements or the International Relations Major

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses

See this page about Signature courses (p. 26). Six courses

General Education Variable Courses

General Education Overlays

See this page about Overlays (p. 27).

General Education Integrative Learning Component

See this page about Integrative Learning Component (p. 27). Three courses

GEP Integrative Learning Component

International Relations majors must take three classes to satisfy the Integrated Learning Component of the GEP. Classes will stem from three groups or “types” of course, with two classes coming from one group and the third class coming from another group. Students may choose from which group they take two courses and which group they take a single course. The three groups are:

1. Analytical Tools
2. Foreign Languages and Literature (Modern and Classical Languages)
3. Social Justice

The Analytical Tools category includes:

- Any math course (MAT) (does not include “Beauty”)
- Any computer science (CSC) course
- Econometrics (ECN 410—requires ECN 101, ECN 102, MAT 118 or equivalent)
- Logic (PHL 220)
- Symbolic Logic (PHL 240)
- Statistics for the Social Sciences (PSY 211—requires PSY 100, PSY 101, and MAT 118 or instructor permission)
- Social Research Methods I (SOC 312)
- Social Research Methods II (SOC 313)

The Foreign Languages and Literature category includes:

All classes in Modern and Classical Languages numbered 202 or higher. Must be in addition to the courses used to fulfill the GEP Non-Native Language Requirement. Or, study of a different (new) language beyond the GEP Non-Native Language Requirement may count towards this requirement. See the IR Director for more information.

The Social Justice category includes:

Any class designated as Faith-Justice or additional GEP Overlay “Diversity” (beyond GEP DGNW requirement).

Students may petition the IR committee for non-Faith-Justice courses to count toward this requirement.

Foundational Courses (Classes of 2018 and 2019)

- ECN 101 Introductory Economics Micro: 3
- POL 113 Intro to Comparative Politics: 3
- POL 115 Introduction to Global Politics: 3
- IRT 211 World Regional Geography: 3

Foundational Courses (Class of 2020 and beyond)

- ECN 101 Introductory Economics Micro: 3
- POL 113 Intro to Comparative Politics: 3
- POL 115 Introduction to Global Politics: 3

Core Courses (Classes of 2018 and 2019)

- IRT 250 Research & Writing in INTR: 3
- or POL 231 Soph Sem: 1989/2011: 3

- IRT 495 IR Senior Capstone Seminar: 3
- or POL 403 Nations and Nationalism: 3
- or POL 404 Contemporary Peacebuilding: 3
- or POL 409 Contemporary Intern Immigration: 3

Core Course (1 course) (Classes of 2020 and beyond)

Capstone Course from: POL 403, POL 404, or POL 409. 1

IR majors who double-major in POL must complete a second Senior Capstone Course to fulfill the POL major requirements. In addition, Capstone Courses do not count towards the Upper Division Course requirements for either major.

Experiential Learning: (1 course) (Class of 2020 & beyond):

POL Internship Course (POL 411, POL 412, POL 413, POL 414, or POL 491 HIS 491) or any Service Learning course (with SLR attribute).

Upper Division Courses: (8 courses) (Classes of 2018 and 2019)

- Majors will select a total of 8 courses from the list of approved IR courses (see below). In completing this requirement, students must take (1) at least two upper division IR courses in History and (2) at least one upper division course each in Economics and Political Science. Course descriptions can be found in the relevant Departmental listings of the catalog.

Upper Division Courses: (9 courses) (Classes of 2020 & beyond) 2
Majors will select a total of 9 courses from the list of approved IR courses (see below). In completing this requirement, students must take (1) at least one upper division IR course in Economics, (2) at least two upper division IR courses in History, and (3) at least two upper division IR courses in Political Science. Course descriptions can be found in the relative Departmental listings of the catalog.

- POL 491 Philadelphia-Area Internship

### International Relations
- IRT 493 Honors Rdgs & Research in IR
- IRT 494 Honors Rdgs & Research in IR

1 The Department strongly recommends that all students take the appropriate introductory and upper division courses prior to enrolling in a Capstone.

2 IR majors who double-major in POL may not count more than 3 Upper Division courses towards either degree requirement.

### Internships
The Washington Internship is described under Special Programs and allows students to work in Washington for a whole semester and earn course credits (POL 411/POL 412 Washington Internship). The Philadelphia-Area Internship Program is described under the Political Science Program (as POL 491) and History Program (as HIS 491). IR students can take both HIS 491 and POL 491. However, only one of the two courses will be counted towards the IR course requirements.

### University Honors Requirements
To receive University Honors credit, an Honors Program student who is an International Relations major must have a 3.5 GPA, complete the
Honors curriculum of 8 courses as specified, and must undertake two consecutive semesters of research/study in the form of a senior thesis with a faculty mentor. These two courses may be counted toward the student’s total upper division international relations courses. Specific requirements for the Honors thesis may be found under the Honors Program.

**International Relations Minor**

**Learning Goals and Objectives**

**Goal 1:** Students will gain a general knowledge of the field of International Relations, with exposure to the three core fields of the program, global politics, international economics, and modern history.

**Objective 1.1:** Students will identify and demonstrate knowledge of contemporary scholarship in the areas they have studied.

**Objective 1.2:** Students will identify and demonstrate knowledge of major historical and contemporary events in world affairs.

**Goal 2:** Students will be able to read and critically assess academic literature, orally articulate ideas, conduct research, and analyze data, appropriate to the undergraduate level.

**Objective 2.1:** Students will apply relevant theoretical concepts to assess real world issues.

**Objective 2.2:** Students will communicate an argument verbally or in writing in response to real world issues by analyzing or synthesizing relevant theories and concepts and/or analyzing and evaluating appropriate evidence.

**Objective 2.3:** Students will ask their own research question and conduct well-organized, empirically-oriented, written analysis of it by identifying, analyzing and synthesizing relevant theories and concepts, and collecting, analyzing and evaluating appropriate evidence.

Minors in International Relations will complete 6 courses that satisfy the following requirements:

Undergraduate Minors
• Justice and Ethics in Law (p. 305)

Justice and Ethics in Law Minor

Objectives
The Justice and Ethics in the Law (JEL) minor emphasizes the ethical, business, social, and political structures that underlie the law. This interdisciplinary minor examines how justice is defined in legal regimes as well as the ethical issues raised by the enforcement of law, legal procedure, conflicting rights, and the making (and maintaining) of constitutions. All students will have the opportunity for an internship. JEL emphasizes skills that may be applied to academic and professional life: analytic and problem solving skills; critical reading ability of complex texts; writing skills including preparing and revising papers; oral communication and listening abilities; and research and time-management skills. Given the number of writing intensive, diversity, globalization, social science, and ethics intensive classes listed in the minor, students may satisfy much of the General Education Program through the minor.

Internships must be related to justice, ethics, or law, please see JEL Director for permission to approve course.

Goal 1: Students will develop logical reasoning skills.
Objective 1.1: Demonstrate ability to analyze legal cases.

Goal 2: Students will demonstrate an understanding of the interrelationship between law, ethics and justice in a multi-disciplinary context.
Objective 2.1: Demonstrate basic knowledge of similarities and differences in the concept of justice in moral, historical, or legal contexts.
Objective 2.2: Identify and explain fundamental questions of ethics.
Objective 2.3: Describe how justice is defined in legal (as opposed to ethical) contexts.

Goal 3: Students will demonstrate an understanding of the relationship between law and social justice in a multi-disciplinary context.
Objective 3.1: Define conceptions of social justice.
Objective 3.2: Compare and contrast conceptions of social justice in moral, historical, or legal contexts.

Requirements for the Justice and Ethics in the Law Minor
Total of 6 courses:
• Two core courses in legal reasoning (one each from HSB and CAS)
• Two ethics-intensive courses (see approved list)
• Two electives (see approved list)

Note: No more than three courses may be taken in the same department and no class may count twice as part of the minor.

Legal Reasoning
Minors must take two courses (one each from HSB and CAS) that expose students to logical reasoning, reading cases, writing briefs, and/or research. Students may take more LR courses and count them as electives.

**Latin American Studies Minor**

Students in the Latin American Studies Program explore the region through a variety of lenses, which they develop through an individualized and multi-disciplinary course of study. Students select from courses primarily in history, language, literature and culture; and political science, as well as economics, theology, sociology and art history. This multi-disciplinary approach to the region prepares students for graduate study or careers in government, nonprofit, education, and business environments. Study abroad in Latin America is strongly encouraged.

Students complete the Minor in Latin American Studies with six courses. Since a level of proficiency in one of the region’s languages is a key component of the minor, students must complete relevant language courses, usually Spanish, through the 202 level or demonstrate proficiency through other means. In addition, to ensure the interdisciplinary focus of the minor, courses from at least three participating departments must be represented among the six courses completed. Students may petition the Latin American Studies Advisory Board to receive credit for courses not listed below, such as courses taken abroad. Students participating in study abroad or a study tour to Latin America are encouraged to ask the program director about the Charles Shreiner Scholarships.

Linguistics

The Linguistics Program

The SJU Linguistics Program is designed to heighten students’ awareness of the complex nature of language and communication and their important, but often overlooked, role in daily life. Linguistics courses aim to increase students' knowledge and understanding of human communication and to understand the nature of language in general, bringing students to a point where they can apply this knowledge in particular fields such as criminal justice, education, forensics, languages, law, psychology, sociology, speech therapy, or translation. Linguistics students will be prepared to become language professionals, pursue graduate studies in linguistics or TESOL, or to practice the skills of a linguist in a variety of professional fields.

Linguistics is the study of how languages work, where they come from, how they are used in society, how they change over time and how they are learned. Linguists serve as translators, interpreters, speech therapists, professors, researchers, and language teachers, to name a few professional roles. They also investigate issues including language acquisition, literacy, bilingualism, speech pathology, and language planning or policy. Linguists sometimes speak or have knowledge of more than one language though depending on their specialization, some speak only their native language. Contact the Linguistics Program Director, Dr. Jennifer Ewald (jewald@sju.edu), for more information and visit the Linguistics Program website at https://sites.sju.edu/mcl/linguistics.

Linguistics in the GEP

Linguistics Program Director

- Dr. Jennifer Ewald

Faculty

- Dr. Elaine Shenk

Undergraduate Major

- Linguistics (p. 312)
LIN 260 Language and the Law (3 credits)
This course is an introduction to linguistic issues that influence interaction in a variety of legal contexts. It explores the role of language used in court cases and police investigations while paying special attention to particular discourse contexts such as courtroom talk, interpreter interactions and police interrogations/ interviews. Particular emphasis will be placed on recognizing and understanding ethical issues related to linguistic sources of disadvantage before the law for both educated and uneducated native speakers, minority speakers and non-native speakers of a given language. This course will help prepare students for careers in which a particular sensitivity to, and understanding of, the use of language is vital. By looking closely at areas studied by linguists, we will seek to uncover the role and the ethical nature of oral and written interactions that take place in the legal field. These linguistic issues affect the concept of justice as well as its application in the legal system and also influence how humans are perceived and, in turn, treated by those who apply the law (police officers, lawyers, judges, etc.). This course fulfills the GEP Ethics-Intensive overlay requirement; it also fulfills a requirement in the Sociology and Criminal Justice majors/minors. This course is open to students from all academic majors and there is no prerequisite.

Prerequisites: PHL 154
Attributes: Ethics Intensive (New GEP), Undergraduate

LIN 270 Topics in Linguistics (3 credits)
This course is an introduction to the study of how language is represented in the human mind and what processes are involved in language use, including producing, comprehending, and storing both spoken and written language. Together, we will explore questions such as the following: How do humans store and recognize words? How do we analyze speech? What processes are involved when we speak and read? We will study spontaneously-occurring speech errors and misperceptions and carry out experimental investigations on language production and comprehension. This course is open to students from all academic majors and there is no prerequisite.

Attributes: Undergraduate

LIN 280 Lang. Acquisition & Learning (3 credits)
Language, Acquisition, and Learning focuses on the study of existing approaches to explaining first and second language acquisition and learning. Drawing on current research in the field of linguistics, we will explore various aspects of language (e.g., negation, questions, references to the past) as well as particular factors (e.g., age, motivation, anxiety, personality, learner beliefs) that affect the acquisition and learning of specific languages. Paying particular attention to English language learning, we will devote significant course time to understanding L2 developmental sequences as they relate to theories of acquisition and learning based on social, psychological, and educational frameworks. Students will also be challenged to consider the relationship between their understanding of and experiences with language acquisition and learning as well as the relationship between language learning theories and language teaching. This course is open to students from all academic majors.

LIN 301 Teaching Lang at Home/Abroad (3 credits)
Teaching Language at Home and Abroad is an introduction to language teaching and is designed for students interested in teaching a second or foreign language for professional, academic or personal reasons. It will help prepare students to tutor or teach English as a second language (ESL), English as a foreign language (EFL), or other languages such as French, German, Italian, or Spanish in a variety of educational settings at home and abroad. In addition to a career in language teaching, other future opportunities might include teaching positions in community service ESL classes, the Peace Corps, or through grants/fellowships including Fulbrights, among others. In this course, we will explore topics such as language acquisition, teaching methods, materials preparation and assessment. This course is open to students from all academic majors.

Attributes: Undergraduate

LIN 317 Sociolinguistics (3 credits)
This course focuses on the use of language within its social context. In this course, we will gain an appreciation for the diversity that exists in human language and for the communicative values inherent in every language variety; scrutinize assumptions about linguistic identity and difference; examine issues of subordination and privilege in our own and others’ lives as related to issues of language; explore the relevance of social categories (e.g., class, age, gender, ethnicity, other social groups) as related to language variation; explore how sociolinguistic research informs policy decisions in classrooms and government legislation; and become familiar with data-collection and research methodologies used to investigate specific topics within the field of sociolinguistics. This course fulfills the GEP Social Science and the GEP diversity overlay requirements. It also counts for a Sociology major/minor. See SOC 317. This course is open to students from all academic majors and there is no prerequisite.

Attributes: Communication Studies ILC Crs, Diversity Course (New GEP), GEP Social Science, Undergraduate

LIN 318 Psycholinguistics (3 credits)
This course is an introduction to the study of how language is represented in the human mind and what processes are involved in language use, including producing, comprehending, and storing both spoken and written language. Together, we will explore questions such as the following: How do humans store and recognize words? How do we analyze speech? What processes are involved when we speak and read? We will study spontaneously-occurring speech errors and misperceptions and carry out experimental investigations on language production and comprehension. This course is open to students from all academic majors and there is no prerequisite.

Attributes: Communication Studies ILC Crs, Undergraduate
LIN 320 Phonetics (3 credits)
This course explores the repertory of sounds found in human language. As a field of study, phonetics includes three areas: (a) articulatory phonetics (how humans create speech sounds); (b) acoustic phonetics (how sounds are transmitted through the air); and (c) perceptual phonetics (how humans perceive sounds based on changes in air pressure). In this class we will focus primarily on the first area, along with an introduction to the second. To this end we will examine the anatomy of the human vocal tract to understand how speech sounds are created. We will also study the International Phonetic Association (IPA) transcription alphabet, create broad and narrow transcriptions, and practice producing and classifying sounds of various world languages. Time will also be spent on prosodic characteristics of human speech, including pitch, stress, tempo, and loudness. Finally, we will discuss how the study of phonetics is applied within fields such as Speech-Language Pathology (SLP), Teaching English to Speakers of Other Languages (TESOL), or teaching languages (e.g., Mandarin, French, Japanese, etc.). This course is open to student from all academic majors and there is no pre-requisite. This course counts for a major elective course toward the Autism Behavior Studies major, the Autism Studies minor, and IHS Area Studies.
Attributes: Undergraduate

LIN 330 Discourse, Style & Presupp (3 credits)
This course builds on Sociolinguistics. Here we examine issues of register, variety (dialect), discourse structure, style, presupposition. The student will be invited to (1) examine discourse samples to analyze presupposition, implications, and fallacies. The insights of argument structure will organize this approach.
Attributes: Undergraduate

LIN 340 Communication in Soc Contexts (3 credits)
Communication in Social Contexts analyzes how people communicate with each another in various social contexts. We will focus on recent research topics in discourse analysis and explore particular contexts of discourse such as that which takes place in the legal field (police interrogations; naturalization interviews); family interactions (homecoming routines; ventriloquizing); childhood settings (apologies, sporting events), the workplace (medicine, business, media) and the classroom (teacher-student, student-student, teacher-teacher interactions). Special attention will be given to classroom discourse, the area of applied linguistics research that investigates empirical linguistic data from classroom interaction. This course is open to student from all academic majors and there is no pre-requisite. This course fulfills the GEP Social Science requirement and counts for the American Studies minor.
Attributes: Communication Studies ILC Crs, GEP Social Science, Undergraduate

LIN 381 History of the Eng Language (3 credits)
A survey of the outer and inner history of the English language, from its Indo-European origins to its present American and world-wide use. The course will be based on modern linguistic methods and information. See ENG 381.
Attributes: Undergraduate

LIN 401 Bilingualism & Lang Diversity (3 credits)
This course is an exploration of bilingualism and linguistic diversity both within the U.S. and beyond its borders. Bilingualism is examined from both sociolinguistic and psycholinguistic perspectives, as we identify historical, geographical and socio-political issues that shape the identity of bilinguals in the U.S. who come from languages and cultures other than our own. In addition to examining the theoretical and methodological issues in bilingualism research, students will also engage this reality through community observations and interviews with representatives of the bilingual communities. This course is open to students from all academic majors and there is no prerequisite. This course fulfills the GEP Diversity overlay requirement.
Attributes: Diversity Course (New GEP), Undergraduate

LIN 470 Topics in Linguistics (3 credits)
The purpose of this course is to explore specific topics within the field of linguistics. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic.
Attributes: Undergraduate

LIN 474 Language and Thought (3 credits)
Rene Descartes held a view called “mind-body dualism”, according to which human persons are fundamentally thinking substances that are somehow causally linked to particular physical substances: bodies. One of his reasons for holding this view was that he believed that the human faculty of language could never, even in principle, be adequately explained by any purely physical description of things. Language, as he saw it, is evidence of mind, and indeed he believed that where language is absent, mind is also absent. Creatures without language are, in Descartes’ view, mindless organic automatons. Few today would defend Descartes’ view in all details, but the general sense that language is an important “mark of the mental” has not gone away. Instead, it has given rise to a cluster of narrower but interesting and important questions: Are certain kinds of mental states impossible without language? Does the specific language that we speak influence our thoughts in some way? Do our innate tendencies of thought force our languages to take certain forms? We could restate these questions in a somewhat different way. Does language hold thought on a leash? Does thought hold language on a leash? This course does not fulfill the GEP Philosophical Anthropology requirement. See PHL 474.
Attributes: Undergraduate

LIN 475 Language and Meaning (3 credits)
This course examines the core issues in the philosophy of language, including the nature of meaning, problems of reference, and the relation between language and thought. Further issues include the status of propositions, the problem of whether linguistic competence implies innate knowledge of some sort, the nature of metaphor, the private language problem, the indeterminacy of translation and language as symbolic capital. This course does not fulfill the GEP Philosophical Anthropology requirement. See PHL 475.
Attributes: Undergraduate
LIN 490 TESOL Internship (3 credits)
This course is a practicum in which the student applies his/her knowledge of Linguistics in a professional work environment. The majority of the work for this course is that performed at the internship site. The student is responsible for securing the internship site and will meet with the professor prior to the semester in which the internship is to take place. During the practicum, the student will reflect upon his/her experience at the internship site in written assignments and in regular meetings with the professor. At the end of the semester, the student will submit a final paper or deliver a final presentation based on his/her internship experience. This course is intended as an advanced course for Linguistics majors or TESOL minors who have completed the other course requirements.
Attributes: Undergraduate

LIN 491 Linguistics Internship (3 credits)
This course is a practicum in which the student applies his/her knowledge of Linguistics in a professional work environment. The majority of the work for this course is that performed at the internship site. The student is responsible for securing the internship site and will meet with the professor prior to the semester in which the internship is to take place. During the practicum, the student will reflect upon his/her experience at the internship site in written assignments and in regular meetings with the professor. At the end of the semester, the student will submit a final paper or deliver a final presentation based on his/her internship experience. This course is intended as an advanced course for Linguistics majors/minors who have completed the other course requirements.
Attributes: Undergraduate

LIN 493 Ind Research in Linguistics (3 credits)
This will allow the student to round out the major/minor with a supervised research project that will help expand the student’s interests and development.
Attributes: Undergraduate

LIN 494 Ind Research in Linguistics (3 credits)
This will allow the student to round out the major/minor with a supervised research project that will help expand the student’s interests and development.
Attributes: Undergraduate

LIN 496 Special Topics Transfer Course (3 credits)
LIN 497 Special Topics Transfer Course (3 credits)

Linguistics Major

Program Goals/Learning Objectives

Goal 1: Students will know what the field of linguistics is and understand how language works.

Objective 1.1: Identify the main areas of linguistic analysis by providing relevant examples and explaining how linguistic analysis is used to describe how language works.

Goal 2: Students will know how to perform linguistic research.

Objective 2.1: Conduct original linguistic research according to standards within the field.

Goal 3: Students will discuss linguistic topics and apply what they learn to real-life settings.

Objective 3.1: Communicate effectively in oral presentations and discussions on linguistic-related topics.

Objective 3.2: Analyze linguistic issues or problems (qualitatively or quantitatively) in real-life settings and formulate creative responses.

Goal 4: Students will be aware of and appreciate language differences that exist among speakers of the same or different languages in light of their own language background.

Objective 4.1: Identify particular aspects of linguistic beauty and creativity in their various forms (i.e., sounds, instances of lexical variation, acquisition stages, morphological irregularities, etc.).

Objective 4.2: Identify their own language beliefs and values as well as those of others and respectfully discuss linguistic differences that characterize speakers from various linguistic backgrounds.

The Linguistics Program, housed within the Department of Modern and Classical Languages, offers two majors and two minors.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies, 2. Ethics Intensive, and 3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

Major Requirements

Course requirements for the Linguistics Major include a general introduction to the field and at least one course in several of the main areas of linguistics (applied linguistics, sociolinguistics, psycholinguistics, phonetics, and pragmatics). Specific course requirements and options are listed below. Course requirements for the Linguistics Major-TESOL concentration include a general introduction to the field of linguistics, an English grammar course, a course on language acquisition, a language teaching methods course, phonetics, and a required internship in English language teaching.

Below are the requirements for each of these specializations. Please note that students may also choose to combine a major in Linguistics with a minor in TESOL (a total of at least 13 courses) or to complete
a double minor in both Linguistics and TESOL (a total of at least 9 courses). (Please contact Dr. Jennifer Ewald, jewald@sju.edu, for more information.)

1 Please note that students who are double majoring/minoring may count a maximum of 3 courses toward requirements in each area.

Select one of the following Pragmatics options: 3

- LIN 260 Language and the Law
- LIN 250 Social Media Discourse
- LIN 340 Communication in Soc Contexts

Select one of the following Applied Linguistics options:

- LIN 280 Lang. Acquisition & Learning (Applied Linguistics options)
  or LIN 301 Teaching Lang at Home/Abroad

Select one of the following Sociolinguistics options: 3

- LIN 317 Sociolinguistics
- LIN 318 Psycholinguistics
- LIN 401 Bilingualism & Lang Diversity
- SOC 317 Sociolinguistics

Select one of the following Phonetics options: 3

- LIN 320 Phonetics
- SPA 466 Spanish Dialectology
- SPA 468 Spanish Phonetics & Phonology

Select any five additional courses from the following: 15

- Any LIN course
- ENG 381 History of the Eng Language
- PHL 220 Logic
- PHL 240 Symbolic Logic
- PHL 474 Language and Thought
- PHL 475 Language and Meaning
- SOC 260 Language and the Law
- SPA 375 Translation 1
- SPA 380 Intro to Spanish Linguistics 1
- SPA 460 A Ling Approach to Oral Com 1
- SPA 461 Methods for Teaching Spanish 1
- SPA 466 Spanish Dialectology 1
- SPA 467 Lang Contact & Pol in U.S. 1
- SPA 468 Spanish Phonetics & Phonology 1
- SPA 480 Topics in Spanish Linguistics 1

Select any three of the following ILC’s in consultation with the LIN Major advisor:

- EDU 151 Develop, Cognition, & Learning
- EDU 246 Literacy, Language and Culture
- ENG 206 Public Speaking & Presentation
- IHS 331 Statistics & Research Methods
- IHS 465 Intro:Autism Spectrum Disorder
- LAT 411 Advanced Latin Grammar
- PSY 120 Lifespan Development

- SPA 466 Spanish Dialectology 1
- SPA 467 Lang Contact & Pol in U.S. 1
- SPA 468 Spanish Phonetics & Phonology 1
- SPA 480 Topics in Spanish Linguistics 1

Select any three of the following ILC’s:

- MCL 101-MCL 302 2

- EDU 151 Develop, Cognition, & Learning
- ENG 206 Public Speaking & Presentation
- HIS 203 Historical Intro to Latin Am
- HIS 206 Historical Intro to East Asia
- HIS 207 Historical Intro to South Asia
- HIS 210 Historical Intro to Mod.Africa
- LAT 411 Advanced Latin Grammar

Please note that this course has a prerequisite (PSY 100 Introductory Psychology) and also requires the instructor’s permission for registration for non-PSY students. Students who are interested in taking PSY 222 should take PSY 100 to satisfy their GEP Social Science requirement.

3 MCL language courses beyond those used to satisfy the GEP language requirement (e.g., American Sign Language, Chinese, French, German, Greek, Italian, Latin, or Spanish).
Program Goals/Learning Objectives

Goal 1: Students will know what the field of linguistics is and understand how language works.

Objective 1.1: Identify the main areas of linguistic analysis by providing relevant examples and explaining how linguistic analysis is used to describe how language works.

Objective 1.2: Conduct original linguistic research according to standards within the field.

Goal 2: Students will know how to perform linguistic research.

Objective 2.1: Identify particular aspects of linguistic beauty and creativity in their various forms (i.e., sounds, instances of lexical variation, acquisition stages, morphological irregularities, etc.).

Objective 2.2: Identify their own language beliefs and values as well as those of others and respectfully discuss linguistic differences that characterize speakers from various linguistic backgrounds.

Goal 3: Students will discuss linguistic topics and apply what they learn to real-life settings.

Objective 3.1: Communicate effectively in oral presentations and discussions on linguistic-related topics.

Objective 3.2: Analyze linguistic issues or problems (qualitatively or quantitatively) in real-life settings and formulate creative responses.

Goal 4: Students will be aware of and appreciate language differences that exist among speakers of the same or different languages in light of their own language background.

Objective 4.1: Identify particular aspects of linguistic beauty and creativity in their various forms (i.e., sounds, instances of lexical variation, acquisition stages, morphological irregularities, etc.).

Objective 4.2: Identify their own language beliefs and values as well as those of others and respectfully discuss linguistic differences that characterize speakers from various linguistic backgrounds.

The Linguistics Program, housed within the Department of Modern and Classical Languages, offers two majors and two minors.

A student may minor in Linguistics by taking six courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LIN 200</td>
<td>Introduction to Linguistics</td>
<td>3</td>
</tr>
</tbody>
</table>

Select five additional preapproved courses

Those approved include all courses taught in Linguistics (LIN) and some courses in English, French, Philosophy, Psychology, Sociology, and Spanish. Contact the Linguistics Program Director, Dr. Jennifer Ewald (jewald@sju.edu), for more information and visit the Linguistics Program website at http://www.sju.edu/int/academics/cas/linguistics/index.html.

Students who are interested in English language teaching may also want to consider adding a second minor in TESOL (Teaching English to Speakers of Other Languages). For more information, visit the TESOL website at http://www.sju.edu/majors-programs/undergraduate/minors/teaching-english-speakers-other-languages-tesol.
Visit the TESOL website (http://www.sju.edu/majors-programs/undergraduate/minors/teaching-english-speakers-other-languages-tesol) for more information. Students who minor in TESOL may also want to consider adding a second minor in Linguistics. For more information, contact Dr. Jennifer Ewald (jewald@sju.edu) and visit the Linguistics Program website (http://www.sju.edu/int/academics/cas/linguistics/index.html)

A TESOL minor consists of 6 courses (18 credits) including the following:

<table>
<thead>
<tr>
<th>Code</th>

¹ except in exceptional cases, students must complete 4 LIN courses, including LIN 301, before enrolling in this English language teaching internship.

As an increasingly interdisciplinary field, Linguistics is closely related to many other academic fields including Autism Studies, Classical and Modern Languages, Communication Studies, Computer Science, Criminal Justice, Education, English, Philosophy, Political Science, Psychology, Sociology, and TESOL. Students of Linguistics often pursue careers as clinical psychologists, educators, information technology specialists, lawyers, linguists, marketing and advertising consultants, social workers, speech pathologists, speech therapists, teachers, translators and interpreters. For that reason, several courses in other SJU programs count toward a major or minor in Linguistics while fulfilling requirements in their respective programs:

MATHEMATICS

Department Overview
The Department of Mathematics offers a B.S. degree in mathematics, a B.S. degree in actuarial science and a five-year B.S./M.S. program in mathematics and secondary mathematics education. The objective of the bachelor’s degree program in mathematics is to prepare students for professional careers in a variety of industries and for graduate programs leading to the M.S. and Ph.D. Students also may opt for advanced degrees in education, business administration, law, or medicine. A creative imagination is required for success.

Professor: David Hecker, Ph.D.; Kristopher Tapp, Ph.D.; Paul Klingsberg, Ph.D.; Sam Smith, Ph.D.; Sandra Fillebrown, Ph.D.
Associate: Rachel Hall, Ph.D.; Richard A. Cavaliere, Ph.D.; Tetyana Berezovski, Ph.D.
Assistant: Elaine Terry, Ph.D.; Hongjun Ha, Ph.D.; Rommel Regis, Ph.D.
Visiting: Greg Manco, Ph.D.; Patricia Bobo, M.S., A.S.A.; Robert Deliberato, FCAS, MAAA; Vivian M Evangelista

Chair: Smith

Undergraduate Major
- Bachelor of Science in Mathematics (p. 321)
- Five-Year Combined B.S. in Mathematics, M.S. in Secondary Mathematics Education Option (p. 325)

Undergraduate Minors
- Mathematics (p. 322)

Graduate Program
- Master of Science in Secondary Mathematics Educations (p. 322)

MAT 097 Logic (0 credits)
MAT 098 Algebra Review (0 credits)
MAT 099 Logic & Problem Solving (0 credits)
MAT 101 Mathematical Explorations I (3 credits)
For humanities majors, the course covers set theory and a number of its applications, topics from logic including propositions, truth tables, number systems, and elementary geometry. Other topics may be covered at instructor’s discretion. Satisfies GEP requirement for PLS students only. Open to PLS students only.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

MAT 102 Mathematical Explorations II (3 credits)
This is a second course for humanities majors. The course covers elementary probability, including independent and dependent events, conditional probability, binomial probability, and certain applications in a wide variety of situations. MAT 1015 is not required for MAT 102. Other topics may be covered at instructor’s discretion. Satisfies GEP requirement for PLS students only. Open to PLS students only.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

MAT 103 Quantitative Appl in Business (3 credits)
Topics in finite mathematics: matrices, solving linear systems, optimization using linear programming, simplex algorithm. Pre-calculus topics: linear, quadratic, exponential, and logarithmic functions and their graphs, mathematical models, and certain applications. Prerequisite: 2 years of high school algebra. Satisfies GEP requirement for PLS and HDC students only. Open to PLS and HDC students only.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

MAT 104 Calculus Appl in Business (3 credits)
Introduction to Calculus: mathematical models using polynomial, rational, exponential, and logarithmic functions, rates of change and the derivative, optimization using the derivative, and integration. Prerequisite: MAT 103 or Pre-Calculus Math. Satisfies GEP requirement for PLS students and HDC only. Open to PLS and HDC students only.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

MAT 105 Finite Math with Appl in Bus (3 credits)
MAT 106 Brief Business Calculus (3 credits)
MAT 107 Contemporary Topics in Math (3 credits)
This course is designed to enable the student to recognize, understand and apply various mathematical concepts and principles that are the foundation for many things that we take for granted in our everyday lives, such as Voting, Traveling, Finances, Government and the wonders of Nature. Satisfies GEP requirement for PLS students only. Open to PLS students only.
Attributes: Undergraduate

MAT 108 Exploration of Statistics (3 credits)
Descriptive statistics: histograms, mean and standard deviation, introduction to probability, the normal distribution, introduction to sampling and statistical inference, the central limit theorem, hypothesis testing.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

MAT 110 Fundamental Math for Educators (3 credits)
MAT 111 The Mathematics of Patterns (3 credits)
MAT 112 Math Model Middle Sch Teachers (3 credits)
MAT 118 Introduction to Statistics (3 credits)
Introduction to statistics and probability: measures of central tendency, variability, correlation, regression, chance and randomness, random variables, probability distributions, law of large numbers, central limit theorem. Students will be required to use a computer software package to solve various statistical problems. Designed for Social Science majors. This course does not fulfill the GEP Mathematics requirement. Students may NOT receive credit for this course and for MAT 128.
Attributes: Undergraduate

MAT 119 Applied Business Calculus (4 credits)
Review of mathematical models using polynomial, rational, exponential and logarithmic functions with business applications. Introduction to calculus including limits, rates of change and the derivative, optimization using the derivative, integration. This course does not fulfill the GEP Mathematics requirement. Students may NOT receive credit for both this course and for any of the following courses: MAT 104 (formerly MAT 106), MAT 123, MAT 155, or MAT 161.
Attributes: Undergraduate
MAT 120 The Mathematics of Modeling (3 credits)
Algebra: factoring, simultaneous equations, polynomial, rational, and exponential functions, binomial theorem, word problems. Trigonometry: basic functions, formulae, graphs. Analytic Geometry: straight line, circle, conic sections. This course does not fulfill the GEP Mathematics requirement.
Prerequisites: Math Placement with a score of MA120
Attributes: Undergraduate

MAT 121 Math Modeling for MS Teachers (3 credits)
Designed for students who will become middle school teachers, this course will explore mathematical topics in the context of building of building models to solve problems. The emphasis will be on using multiple representations to develop mathematical models that describe some phenomena and learning the mathematical techniques necessary for working with the model in order to use effectively to answer questions about the situation being modeled. Students will interpret results given the context of the model and develop their communication skills for explaining mathematics. This course does not fulfill the GEP Mathematics requirement.

MAT 123 Differential Calculus (3 credits)
Review of mathematical models using polynomial, rational, exponential and logarithmic functions with business applications Introduction to differential calculus including limits, rates of change and the derivative, optimization using the derivative. This course does not fulfill the GEP Mathematics requirement. Students may NOT receive credit for both this course and for any of the following courses: MAT 104 (formerly MAT 106), MAT 119, MAT 155 or MAT 161.

MAT 128 Applied Statistics (3 credits)
Introduction to statistics and probability: design of a study, measures of central tendency, variability, correlation, regression; probability, random variables, probability distributions, central limit theorem; inferential statistics, hypothesis testing, etc. Students will be required to use a computer software package to solve various statistical problems. Data analysis projects will be assigned. This course does not fulfill the GEP Mathematics requirement. Students may NOT receive credit for both this course and for MAT 118.
Attributes: Undergraduate

MAT 130 Whole Truth about Whole Number (3 credits)
This course involves studying properties of natural numbers and integers. Topics include divisibility, prime numbers, the Euclidean Algorithm and the RSA Encryption system for putting messages into code. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 131 Linear Methods (3 credits)
This course studies basic properties and applications of matrices and vectors. Then, matrices and vectors will be used in a variety of applications, including vector geometry, elementary graph theory, solving word problems involving systems of linear equations, least-squares functions, and geometric transformations. The course also covers some topics in basic logic, including logical operators, the conditional, truth tables, quantifiers, and syllogisms. Students in this course will be required to have a graphing calculator that can perform standard matrix operations. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 132 Math of Games & Politics (3 credits)
This course will focus on both computational and theoretical aspects of probability theory, game theory and social choice theory. Topics include expected value, counting methods and conditional probability, dominant strategies, combinatorial games, Nash equilibria, social dilemmas and, for zero sum games, saddle points and the Minimax theorem. Social choice theory topics include voting methods, weighted voting, fairness criteria and impossibility theorems. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 134 Math of Uncertainty:Rules/Prob (3 credits)
This course provides students with an in-depth introduction to probability and its many real-life applications. Students will study counting techniques including permutations, combinations, binomial coefficients, occupancy problems and runs within random orderings and will prove combinatorial identities. Students will study topics in probability including sample spaces, DeMorgan's Laws, conditional probability, independent events, Bayes Theorem, random variables and expected value. Students will examine many of the classical problems in probability theory including Prisoner's Dilemma, Gambler's Ruin and the Birthday Problem as well as lotteries, card games and random walks. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate
MAT 135 Sounding Number: Music & Math (3 credits)
Music has many connections to mathematics. The ancient Greeks discovered that chords with pleasing sounds are related to simple ratios of integers. Other connections include equations describing the sounds of musical instruments, the mathematics of digital recording, the use of symmetry in composition, and the systematic exploration of patterns by African and Indian drummers. This course introduces basic concepts in trigonometry, set and group theory, and combinatorics and investigates their applications in the analysis, recording, and composition of music. Along the way, we consider the role of creativity in mathematics and the ways in which mathematics has inspired musicians. The course will involve hands-on laboratory work in audio engineering and music composition. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 136 Mathematics & Visual Arts (3 credits)
This course will explore connections between mathematics and the arts. Mathematics - itself an aesthetic endeavor - has made fundamental contributions to art history and continues to be a source of inspiration to many contemporary artists. We will begin with the study of mathematical perspective, and of optical devices, such as the camera obscura, which assisted artists and illustrators in depicting the world around them. At the beginning of the twentieth century, artists turned to non-Euclidean geometries and higher dimensional spaces for inspiration and to break free from the constraints of linear perspective. We will take some time to understand these geometries as well. The remaining topics will be chosen according to the interests and talents of the students in the course. Possibilities include fractals, math and music, math and architecture, and advanced perspective topics. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 137 Ethnomathematics (3 credits)
This course aims to strengthen and expand students’ understanding of fundamental mathematics – number systems, arithmetic, geometry, combinatorics, and mathematical reasoning – through study of the mathematics of world cultures. In addition, the course is designed to explore the connections between mathematics and the arts, to engage students’ imagination and creativity, and to increase the diversity of offerings in the mathematics classroom. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 138 Symmetry (3 credits)
"Symmetry" is a ubiquitous concept in modern mathematics and science. Certain shapes and images seem more symmetric than others, yet is not immediately obvious how to best measure and understand an object’s symmetry. In fact, the quest to more precisely quantify the concept of symmetry has been a driving force in science and mathematics, and will form the central theme of this course. This course fulfills the GEP Mathematics Requirement.
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 139 Mathematics, Culture & Society (3 credits)
The course considers the relationship of mathematics to other areas of human thought and culture and to the society in which it develops. Several periods in the history of mathematics will be considered, from the beginnings of mathematics to modern times. This course fulfills the GEP Mathematics Requirement. Students may NOT receive credit for both this course and for MAT 150 – Art, Poetry, Mathematics and Society (First Year Seminar).
Prerequisites: Math Placement with a score of BEAUT
Restrictions: Students cannot enroll who have a major in Actuarial Science, Biology, Chemistry, Chemical Biology, Environmental Science, Information Technology, Mathematics or Physics.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 150 First Year Seminar (3 credits)

MAT 155 Fundamentals of Calculus (3 credits)
This course covers the fundamentals of differential calculus (limit, continuity, and the derivative) and introduces the definite integral and its connection to the antiderivative. In addition, we discuss the historical roots of calculus and the challenges faced in establishing a rigorous logical foundation for its concepts. This course fulfills the GEP Mathematics Requirement. Prerequisite: MAT 120 or adequate performance on calculus readiness test. Students may NOT receive credit for both this course and for any of the following courses: MAT 104 (formerly MAT 106), MAT 119, MAT 123 or MAT 161
Prerequisites: MAT 120 or Math 155 Placement with a score of 1 or Math 161 Placement with a score of 1 or Math Placement with a score of MA155
Attributes: Math Beauty (New GEP), Undergraduate

MAT 156 Applied Calculus II (3 credits)
This course covers the definite integral, techniques of integration, solving differential equations and the calculus of several variables. The emphasis is on applications to the Business and Social Sciences. Prerequisite: MAT 155 or MAT 161. This course does not fulfill the GEP Mathematics requirement. Students may NOT receive credit for both this course and for MAT 162.
Prerequisites: (MAT 1251 or MAT 1255 or MAT 155 or MAT 161 or MAT 1351)
Attributes: Undergraduate
MAT 161 Calculus I (4 credits)
Limits; slopes, rates of change and the derivative; techniques of differentiation; implicit differentiation; derivatives of transcendental functions; related rates; linear approximation; L’Hospital’s Rule; the Mean Value Theorem; applications of differentiation (including curve sketching and optimization); introduction to integration; the Fundamental Theorem of Calculus. This course fulfills the GEP Mathematics Requirement. Prerequisite: MAT 120 or adequate performance on calculus readiness test. Students may NOT receive credit for both this course and for any of the following courses: MAT 104 (formerly MAT 106), MAT 119, MAT 123 or MAT 155. 
Prerequisites: MAT 120 or Math 161 Placement with a score of 1 or Math Placement with a score of MA161
Attributes: Math Beauty (New GEP), Undergraduate

MAT 162 Calculus II (4 credits)
Techniques of integration; applications of integration; improper integrals; exponential growth; infinite sequences and series; power series and Taylor series. Prerequisite: a grade of C or better in MAT 161 or permission of department. This course fulfills the GEP Mathematics Requirement. Students may NOT receive credit for both this course and for MAT 156. 
Prerequisites: MAT 161 or Math 161 Placement with a score of 1 or Math Placement with a score of MA162
Attributes: Math Beauty (New GEP), Undergraduate

MAT 162 Calculus II (4 credits)
Techniques of integration; applications of integration; improper integrals; exponential growth; infinite sequences and series; power series and Taylor series. Prerequisite: a grade of C or better in MAT 161 or permission of department. This course fulfills the GEP Mathematics Requirement. Students may NOT receive credit for both this course and for MAT 156. 
Prerequisites: MAT 161 or Math 161 Placement with a score of 1 or Math Placement with a score of MA162
Attributes: Math Beauty (New GEP), Undergraduate

MAT 180 Theory of Numbers (3 credits)
Division Algorithm; Mathematical induction; Euclidean algorithm; fundamental theorem of arithmetic; linear Diophantine equations; modular arithmetic; number theoretic functions; prime numbers; Fermat’s last theorem; quadratic residues, primitive roots, Chinese Remainder theorem. This course fulfills the GEP Mathematics requirement but is at a more advanced level that courses in the MAT 130 - MAT 139 range. 
Attributes: Math Beauty (New GEP), Undergraduate

MAT 213 Calculus III (4 credits)
Vector geometry in R2 and R3; polar coordinates; introduction to the calculus of vector-valued functions (velocity, speed, acceleration, curvature, parametric equations); differentiation of functions of several variables (partial derivatives, the differential, chain rules, directional derivatives); applications of differentiation (linear approximation, optimization, the method of Lagrange multipliers); integrals of functions of several variables; applications of integration. Also, if time permits, cylindrical and spherical coordinates; some surface integrals; the Change of Variable theorem. This course fulfills the GEP Mathematics Requirement. Prerequisite: a grade of C or better in MAT 162 or permission of department chairperson. 
Prerequisites: MAT 1361 or MAT 162
Attributes: Math Beauty (New GEP), Undergraduate

MAT 226 Introduction to Linear Algebra (4 credits)
Linear systems, vector spaces, dimension, linear transformations, matrices, inner product, orthogonality, characteristic polynomials, diagonalization, eigenvalues, and eigenvectors. Prerequisite: MAT 225 or permission of the chair of Mathematics. 
Prerequisites: (MAT 1371 or MAT 1375) or MAT 213
Attributes: Math Beauty (New GEP), Undergraduate

MAT 231 The Mathematics of Music (3 credits)
Music has many connections to mathematics. The ancient Greeks discovered that chords with a pleasing sound are related to simple ratios of integers. The mathematics of rhythm has also been studied for centuries—in fact, ancient Indian writers discovered the celebrated Fibonacci sequence in the rhythms of Sanskrit poetry. Other connections between math and music investigated in this course include the equations describing the sounds of musical instruments, the mathematics behind digital recording, the use of symmetry and group theory in composition, the exploration of patterns by African and Indian drummers, the application of chaos theory to modeling the behavior of melodies, and the representation of chords by exotic geometric objects called orbifolds. Along the way, we discuss the role of creativity in mathematics and the ways in which mathematics has inspired musicians. Prerequisite: MAT 162 and some musical training (ART 1511 or equivalent). Students with exceptional performance in Calculus I (or AP) and musical training will be admitted on a case-by-case basis as determined by the chair of Mathematics. 
Prerequisites: (MAT 162 or MAT 1361) and (ART 151 or ART 1511)
Attributes: Math Beauty (New GEP), Undergraduate

MAT 233 History of Mathematics (3 credits)
Development of mathematical ideas over 2500 years, beginning with Greek geometry and including Euclid, Archimedes, Newton, Euler, Gauss, and Poincare. Prerequisite: MAT 213 or permission of the chair of Mathematics. 
Prerequisites: MAT 162 or MAT 1361
Attributes: Math Beauty (New GEP), Undergraduate

MAT 234 Differential Equations (3 credits)
Solution of ordinary differential equations using analytic, numerical, and qualitative techniques. Modeling via differential equations, systems of differential equations. Laplace transforms; discrete dynamical systems. Use of a computer software package is required. Prerequisite: MAT 213 or equivalent. 
Prerequisites: MAT 1371 or MAT 213
Attributes: Math Beauty (New GEP), Undergraduate

MAT 239 Problem Solving (3 credits)
The course is designed to involve students in an active way in the mathematical process by having them participate in the major activity of both pure and applied mathematics: the solving of problems. Problems will be chosen from many areas of mathematics, and an attempt will be made to develop general approaches to and general paradigms for problem solving. Prerequisite: MAT 225. 
Prerequisites: MAT 1431 or MAT 180
Attributes: Math Beauty (New GEP), Undergraduate
MAT 240 Advanced Calculus (4 credits)
This course covers three main groups of topics. I) Calculus of functions from R^n to R^k: Differentials, Inverse Function Theorem, Implicit Function Theorem, Jacobian, change of variables. II) Vector calculus. Vector fields, line and surface integrals, Green's Theorem, Stokes's Theorem, the Divergence Theorem. III) Sequences and series of functions. Pointwise and uniform convergence; continuity, differentiation and integration of sequences and series; Fourier series; Taylor series for functions of several variables. Prerequisite: MAT 213 or equivalent.
Prerequisites: MAT 213 or MAT 1371
Attributes: Math Beauty (New GEP), Undergraduate

MAT 293 Mathematical Symmetry (3 credits)

MAT 311 Numerical Analy & Comp Tech (3 credits)
An introduction to numerical methods for solving a variety of problems. Included will be rootfinding, numerical integration and differentiation, polynomial approximation, systems of equations, ordinary differential equations, and discussion of convergence issues, error analysis and machine arithmetic. Prerequisite: MAT 213. Concurrent enrollment in or prior completion of MAT 226 would be beneficial.
Prerequisites: (MAT 1371 or MAT 1391) or MAT 213
Attributes: Math Beauty (New GEP), Undergraduate

MAT 313 Mathematical Optimization (3 credits)
The course covers basic ideas in optimization beginning with linear programming, the simplex method and duality and finishes with non-linear optimization and algorithms and conditions leading to a solution of non-linear problems. Prerequisite: MAT 226 or permission of the chair of Mathematics.
Prerequisites: MAT 1391 or MAT 226 or MAT 1461
Attributes: Math Beauty (New GEP), Undergraduate

MAT 316 Operations Research (3 credits)
The course will cover some of the basic models and techniques used in operations research. Topics include: linear programming, the simplex method, duality, network problems, transportation problems, and time permitting, game theory. Prerequisite: MAT 226 or permission of the chair of Mathematics.
Prerequisites: MAT 1461 or MAT 226 or MAT 1391
Attributes: Math Beauty (New GEP), Undergraduate

MAT 321 Probability (3 credits)
The first part of a two-semester sequence, this course includes discrete probability and counting methods, conditional probability and independence, Bayes' Theorem, discrete and continuous random variables, expectation, variance, moment-generating functions, special probability distributions, joint distributions, marginal and conditional distributions, independent random variables, covariance and correlation, conditional expectations, and distributions of functions of random variables. Co-requisite: MAT 213.
Prerequisites: (MAT 1371 or MAT 1391) or MAT 213
Attributes: Math Beauty (New GEP), Undergraduate

MAT 322 Mathematical Statistics (3 credits)
Random samples, statistics and sampling distributions, the Central Limit Theorem, point and interval estimation, hypothesis testing (one-sample and two-sample tests), analysis of variance, correlation, regression analysis and Chi Square goodness of fit and other nonparametric methods. Applications. Data analysis projects will be assigned.
Prerequisite: MAT 321
Prerequisites: MAT 2211 or MAT 321
Attributes: Undergraduate

MAT 332 Geometry (3 credits)
Prerequisites: MAT 225 or MAT 1391
Attributes: Math Beauty (New GEP), Undergraduate

MAT 334 Combinatorics & Graph Theory (3 credits)
Introduction to combinatorics and graph theory and to methods by which each theory is applied to the other. Topics include basic counting formulas; generating functions; the principle of inclusion-exclusion; counting labeled trees (Cayley's Theorem, Kirchhoff's Theorem, Prüfer's Theorem); directed Euler circuits; Pólya-deBruijn theory; Möbius inversion. Prerequisite: MAT 162.
Prerequisites: MAT 162 or MAT 1361
Attributes: Math Beauty (New GEP), Undergraduate

MAT 336 Logic & Foundations (3 credits)
Cantorian set theory and the crisis in foundations (Cantor's paradox, Russell's paradox); the intuitionist challenge and the formalist response; formal logic and meta mathematics (Propositional Calculus, Predicate Calculus, formal number theory); Goedel's incompleteness theorems of 1931. Prerequisite: MAT 162.
Prerequisites: MAT 162 or MAT 1361
Attributes: Math Beauty (New GEP), Undergraduate

MAT 403 Abstract Algebra (3 credits)
Group theory, including finite groups, subgroups, cyclic groups, permutation groups, group isomorphisms, and cosets; introduction to rings and fields, including integral domains, polynomial rings, unique factorization domains and Euclidean domains. Prerequisite: MAT 225.
Prerequisites: (MAT 1431 or MAT 1571) or MAT 180
Attributes: Undergraduate

MAT 404 Abstract Algebra II (3 credits)
A more in-depth treatment of rings and fields including integral domains, fields, field extensions, homomorphisms, and the insolvability of the quintic by radicals. Galois theory. Prerequisite: MAT 403.
Prerequisites: MAT 2031 or MAT 403
Attributes: Math Beauty (New GEP), Undergraduate

MAT 409 Real Analysis (3 credits)
Elementary topology of Euclidean spaces, including open, closed and compact sets; convergence of sequences and series; least upper bound axiom and its equivalents; sequences of functions, pointwise and uniform convergence, continuity, differentiation and integration of sequences. Topics which overlap MAT 240 will be covered in more depth in this course. Prerequisite: MAT 213 and 225.
Prerequisites: MAT 1371 or MAT 213
Attributes: Math Beauty (New GEP), Undergraduate

MAT 410 Complex Analysis (3 credits)
Analytic functions; complex integration; singularities. Prerequisite: MAT 240, MAT 409, or permission of the chair of Mathematics.
Prerequisites: MAT 2091 or MAT 409
Attributes: Math Beauty (New GEP), Undergraduate

MAT 415 Differential Geometry (3 credits)
Tangent vectors and directional derivatives; mappings and differential forms on E3; Frenet fields; covariant derivatives; frame fields; Cartan structural equations; orientation; Euclidean geometry; surfaces in R3; calculus on surfaces; integration of forms; shape operators; normal and Gaussian curvature; geometry of surfaces. Prerequisite: MAT 409.
Prerequisites: (MAT 1371 or MAT 1391) or MAT 213
Attributes: Math Beauty (New GEP), Undergraduate
MAT 418 Topology of Point Sets (3 credits)
Open and closed sets, closure and interior, continuity, metric spaces, connectivity, compactness; the Heine- Borel and Bolzano-Weierstrass Theorems. The Classification of Surfaces may also be covered. Prerequisite: MAT 409 or equivalent.
Prerequisites: MAT 409 or MAT 2091 or MAT 2093
Attributes: Undergraduate

MAT 423 Applied Statistical Methods (3 credits)
Statistical models, design and analysis of experiments, regression, Monte Carlo methods, and other advanced topics in statistics. Prerequisites: MAT 1261 or MAT 156 or MAT 162 or MAT 1361
Attributes: Math Beauty (New GEP), Undergraduate

MAT 491 Mathematics Internship (3 credits)
The course goals are: to gain first-hand experience of the daily activities of professionals in mathematics and related fields, to verify an interest in a particular area of mathematics, to develop and hone skills required for mathematical professions, to establish contacts outside the academic community who will facilitate a career in mathematics. An internship journal and an academic paper are also required.

MAT 492 Mathematics Internship II (3 credits)
The course goals are: to gain first-hand experience of the daily activities of professionals in mathematics and related fields, to verify an interest in a particular area of mathematics, to develop and hone skills required for mathematical professions, to establish contacts outside the academic community who will facilitate a career in mathematics. An internship journal and an academic paper are also required.

MAT 493 Independent Research (3 credits)
Students need to complete the application form for independent study (available in the Dean’s Office) and have the approval of the department chair and Associate Dean in order to register. Honors Research (6 credits) Must be elected in junior year to allow adequate research time. Students need to complete the application form for independent study (available in the Dean’s Office) and have the approval of the department chair, Associate Dean and the Honors Program Director in order to register. Honors Students must complete this sequence.
Attributes: Math Beauty (New GEP), Undergraduate

MAT 494 Independent Research (3 credits)
Students need to complete the application form for independent study (available in the Dean’s Office) and have the approval of the department chair and Associate Dean in order to register. Honors Research (6 credits) Must be elected in junior year to allow adequate research time. Students need to complete the application form for independent study (available in the Dean’s Office) and have the approval of the department chair, Associate Dean and the Honors Program Director in order to register. Honors Students must complete this sequence.
Attributes: Math Beauty (New GEP), Undergraduate

Mathematics B.S.

Learning Goals and Objectives for the B.S. in Mathematics

Goal 1: Students will gain a general knowledge of the field of mathematics including knowledge of the application of mathematics to other fields.

Objective 1.1: Students will know the mathematical theory underlying fundamental developments in mathematics.

Objective 1.2: Students will understand and be able to communicate the nature of proof and the sequence of observing examples, making conjectures and proving or disproving mathematical statements in a variety of mathematical disciplines

Objective 1.3: Students will have knowledge of the diverse branches of mathematics.

Objective 1.4: Students will have knowledge of areas closely related to mathematics including Computer Science and at least one branch of the Natural Sciences.

Goal 2: Students will master specific skills in mathematics.

Objective 2.1: Students will be able to perform basic computations such as calculating derivatives, integrals and various operations with matrices.

Objective 2.2: Students will be able to identify and apply the appropriate method to solve a specific mathematical problem.

Objective 2.3: Students will be able to identify and apply the appropriate proof technique to prove a mathematical statement.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses
Open ILC courses:
Any two additional CAS courses that relate to the major. Advisor and Chair approval required in advance.

GEP Electives
Seven courses

Major Requirements
Major Concentration
Fourteen courses

Teacher Certification for Secondary Schools
Advisor
Dr. Tetyana Berezovski

Students who are pursuing Secondary Teacher Certification in Mathematics and who do not want to pursue a graduate degree, double major in Mathematics and Secondary Education. Their primary major is Mathematics. If they complete their student teaching during their senior year, they are exempt from one of the mathematics elective courses required for the Mathematics major. For more information on this option and the required courses, consult the department's web page, the Secondary Education sequence listed in the Education section of the Catalog, and consult with the Departmental advisor.

Actuarial Science
Actuarial Science is an inter-college major with combined coursework from the Haub School of Business and the College of Arts and Sciences. Please see the separate major listing "Actuarial Science" at the beginning of the College of Arts and Sciences section of this catalogue. A minor in Actuarial Science is also available.

Overlapping Course Groupings
MATH Students may not take overlapping courses for credit. Please note the following five overlapping course groupings.

Mathematics Minor
Advisor
Dr. Klingsberg

With the approval of the department, students may minor in mathematics. Upon acceptance, they will be assigned an advisor within the department who will assist the students in selecting courses appropriate for their area of interest.

Learning Goals and Objectives for the minor in Mathematics

Goal 1: Students will gain a general knowledge of the field of mathematics including knowledge of the application of mathematics to other fields.

Objective 1.1: Students will know the mathematical theory underlying fundamental developments in mathematics.

Objective 1.2: Students will understand the nature of mathematical proof.

Objective 1.3: Students will gain knowledge of applications of mathematics to other fields.

Goal 2: Student will master specific skills in mathematics.

Objective 2.1: Students will be able to perform basic computations from calculus such as derivatives and integrals.

Objective 2.2: Students will be able to identify and apply the appropriate method to solve a specific mathematical problem.

Students desiring a minor in mathematics must take or receive AP credit for six courses at the level of MAT 161 or higher. The course being used to satisfy the GEP math requirement may not be used toward the minor. The grade in each course must be C+ or better, or the average of the six classes must be at least 2.7.

Secondary Mathematics Education M.S.
Graduate Arts and Sciences
Tetyana Berezovski, Ph.D., Director
Five-year Mathematics Education Program
Barbelin Hall 237
**Program Description**

The combined B.S/M.S. program in mathematics and secondary mathematics education offers students the opportunity to complete both an undergraduate major in mathematics and an M.S. in Mathematics Education, and obtain Commonwealth of Pennsylvania Secondary Teacher Certification in Mathematics. The curriculum emphasizes the unique character of mathematics learning theory, technology, and techniques for effective teaching in the discipline. The program strengthens traditional certification programs by incorporating a research experience.

**Admission Requirements and Procedures**

The five-year program is open only to undergraduate mathematics majors at Saint Joseph's. Students will be evaluated for acceptance into the program after the completion of the first semester of their junior year. Applicants must complete the standard graduate admissions application, including a complete undergraduate transcript, two letters of recommendation, and a personal essay describing the student’s goals by April 15 of the junior year. A cumulative grade point average of 3.0 or better is required.

**Program Goals and Objectives**

Students in the Five-year BS/MS in Mathematics and Mathematics Education Program complete all requirements of the undergraduate Mathematics major in the first four years and all requirements of the Secondary Education major by the end of the fifth year. In addition to the goals and objectives for those two programs, students in the 5-Yr Math and Math Education program will meet the following.

**Goal 1**: Students will demonstrate knowledge of the mathematical content required for teaching secondary mathematics.

**Objective 1.1**: Students will know how to solve mathematical problems using multiple representations and using multiple mathematical approaches.

**Objective 1.2**: Students will understand the nature of proof and the sequence of observing examples, making conjectures and proving or disproving mathematical statements in a variety of mathematical disciplines.

**Goal 2**: Students will be able to plan and align curriculum and assessment according to Pennsylvania State standards, Common Core State Standards and the standards put forth by the National Council of Teachers of Mathematics.

**Objective 2.1**: Students will be aware of current issues in and the evolving nature of mathematics education including the use of technology.

**Objective 2.2**: Students will be able to draw on a variety of resources including the research literature in mathematics education to enhance their teaching and examine curricular change.

Students must complete all requirements for the undergraduate B.S. in Mathematics as described in the Undergraduate Catalog. To receive the M.S. in Mathematics Education, students must take an additional 30 credits at the graduate level in Education or Mathematics Education during the following summer and academic year. Graduate coursework must include:

Specialty Area Test of Praxis

1 Courses taken as mathematics electives as part of the major requirements
2 MED courses may be used to satisfy requirements of the undergraduate mathematics major only with the approval of the Department Chairperson

**M.S. Program in Secondary Mathematics Education (without certification)**

Tetyana Berezovski, Ph.D., Director
Secondary Mathematics Education Program
Barbelin Hall 237
610-660-1554
tberezov@sju.edu
Program Description
The M.S. program in secondary mathematics education offers students the opportunity to complete a graduate degree emphasizing both mathematical content knowledge and mathematical pedagogical knowledge. Students are required to complete course work in both areas and have the option of incorporating a research experience. Designed for in-service teachers, the program aims to increase the mathematical knowledge needed for teaching at the secondary level and to support teachers’ growth as reflective practitioners.

The art of imparting mathematical knowledge to others can be traced back to ancient Greek and Babylonian culture. Teachers and students worked together on clay tablets, with sticks and rocks to solve practical mathematical problems encountered in daily living. Today mathematics has grown into a science that does much more than solve practical problems. This evolution has forced educators to rethink the way they teach mathematics. It is clear that changes in pedagogy have been and continue to be necessary for the sustained advancement of the science of mathematics. Thus the mission of the program leading to the degree of Science in Secondary Mathematics Education emphasizes both the acquisition of mathematical knowledge as well as innovative techniques for instruction.

Program Description
The M.S. program in secondary mathematics education offers students the opportunity to complete a graduate degree emphasizing both mathematical content knowledge and mathematical pedagogical knowledge. Students are required to complete course work in both areas and have the option of incorporating a research experience.

Learning Goals and Objectives

Goal 1: Students will demonstrate knowledge of the mathematical content required for teaching secondary mathematics.

Objective 1.1: Students will know how to solve mathematical problems using multiple representations and using multiple mathematical approaches.

Objective 1.2: Students will understand the nature of proof and the sequence of observing examples, making conjectures and proving or disproving mathematical statements in a variety of mathematical disciplines.

Goal 2: Students will be able to plan and align curriculum and assessment according to Pennsylvania State standards, Common Core State Standards and the standards put forth by the National Council of Teachers of Mathematics.

Objective 2.1: Students will be able to critically assess mathematics curricula.

Objective 2.2: Students will be able to use a variety of pedagogical approaches and assessment tools in their teaching of mathematics.

Objective 2.3: Students will be aware of current issues in and the evolving nature of mathematics education including the use technology.

Objective 2.4: Students will be able to draw on a variety of resources including the research literature in mathematics education to enhance their teaching.

Admission Requirements and Procedures
The MS Program in Secondary Mathematics Education is designed for practicing mathematics teachers but is open to anyone with a sufficiently strong background in mathematics and education. Typically we require a BS in a STEM discipline (science, technology, engineering or math); however, we would consider applicants with an undergraduate degree in any field with appropriate teaching experience in mathematics. In addition, students who have not had Calculus I, II and III would be required to take these courses before being fully admitted.

Applicants must complete the standard graduate admissions application, including all undergraduate and graduate transcripts, two letters of recommendation, and a personal essay describing the student’s goals.

Program Structure and Curriculum
Students are required to complete 30 credits; usually ten 3-credit courses but other combinations are possible. Students must complete at least 6 credits (2 courses) from the list of MED Content Courses and at least 6 credits (2 courses) from the list of MED Pedagogy Courses. The remaining 18 credits (6 courses) may be any combination of MED courses. In addition, with permission of the program director, up to 6 of these 18 credits (2 of the 6 courses) may be taken in Teacher Education (EDU), Special Education (SPE) or Educational Leadership (EDL). All research courses are arranged as independent studies with faculty mentors.

Content Courses
Offered every two years on a rotating basis:

The Five-Year Combined B.S. in Mathematics, M.S. in Secondary Mathematics Education Option

Program Director

• Dr. Berezhovski

This program offers students the opportunity to complete an undergraduate major in mathematics, receive Commonwealth of Pennsylvania Secondary Teacher Certification in mathematics, and earn a M.S. in Secondary Mathematics Education. This curriculum emphasizes the unique character of mathematics learning theory, technology, and techniques for effective teaching in the discipline. The program strengthens the traditional certification programs by incorporating modern teaching/learning strategies and an opportunity to participate in research in the field.

Undergraduate mathematics majors at Saint Joseph’s University who apply for the five-year combined B.S./M.S. program will be evaluated for acceptance into the program after the completion of the first semester of their junior year. A cumulative grade point average of 3.0 or better is normally required. For more information, contact the Department of Mathematics or the Graduate Arts and Sciences office. Requirements of the program and course offerings are listed in the Graduate Catalog under Mathematics Education. Courses in mathematics education are designated by MED and may be taken for undergraduate credit with the approval of advisor and chair.

Students interested in the five year program should speak to the Program Director as early in their academic careers as possible.

Learning Goals and Objectives for the Five-year BS/MS in Mathematics and Mathematics Education

Students in the Five-year BS/MS in Mathematics and Mathematics Education Program complete all requirements of the undergraduate Mathematics major in the first four years and all requirements of the Secondary Education major by the end of the fifth year. In addition to the goals and objectives for those two programs, students in the 5-Yr Math and Math Education program will meet the following.

**Learning Goal 1:** Students will demonstrate knowledge of the mathematical content required for teaching secondary mathematics.

**Objective 1.1:** Students will know how to solve mathematical problems using multiple representations and using multiple mathematical approaches.

**Objective 1.2:** Students will understand the nature of proof and the sequence of observing examples, making conjectures and proving or disproving mathematical statements in a variety of mathematical disciplines.

**Goal 2:** Students will be able to plan and align curriculum and assessment according to Pennsylvania State standards, Common Core State Standards and the standards put forth by the National Council of Teachers of Mathematics.

**Objective 2.1:** Students will be aware of current issues in and the evolving nature of mathematics education including the use of technology.

**Objective 2.2:** Students will be able to draw on a variety of resources including the research literature in mathematics education to enhance their teaching and examine curricular change.

Minor in Medieval, Renaissance, and Reformation Studies

The Medieval, Renaissance and Reformation Studies program includes courses offered by the departments of History, Fine and Performing Arts, English, Modern and Classical Languages, Philosophy, Political Science and Theology. Courses taken to satisfy requirements of this program may also serve to satisfy GEP or major requirements, including Integrative Learning courses where appropriate. Participants choose a minimum of six courses from those listed below, with at least one from each group and no more than three from any one department. Substitutions may be approved upon request to the directors. Students who successfully complete the program requirements earn a Minor in Medieval, Renaissance, and Reformation Studies.

MODERN AND CLASSICAL LANGUAGES

Mission
In an increasingly interdependent world community, the mission of the Department of Modern and Classical Language is to help students become articulate, knowledgeable and culturally aware, in accordance with the values and traditions of Saint Joseph's University and the Society of Jesus. We pursue this mission by:

• Fostering language proficiency
• Promoting an appreciation for the richness and complexity of language
• Deepening students' understanding of cultural diversity
• Encouraging student engagement in active, collaborative and critical learning
• Emphasizing a learner-centered pedagogy and care for the individual

Art/Literature through Modern and Classical Languages in the GEP
(See Curricula (p. 26))

Students who wish to satisfy the Literature/Fine Arts portion of the GEP by completing a course in Modern and Classical Languages should select one of the following:

Completion of GEP non-native language requirement

Most students fulfill their GEP non-native language requirement by taking a two-semester course sequence (101-102, 102-201, 201-202, 202-301) in the following languages: American Sign Language, Chinese, French, German, Italian, Japanese, Russian and Spanish. Students placed in 301 (Conversation) are only required to take one semester of a non-native language.

English as a Second Language

All international students whose primary language is not English or who have English language deficiencies ought to take ESL 201 and ESL 202, Composition and Critical Thinking for Non-Native Speakers of English, in their first two semesters. ESL 201 and ESL 202 will satisfy the GEP non-native language requirement for students whose native language is not English.

Non-Native Language Courses outside the University

Students wishing to study a non-native language to fulfill the General Education Program requirements on either the introductory or intermediate level not offered at Saint Joseph’s University may be permitted to pursue such study at a four-year college or university of their choice. Permission will come from the appropriate academic Dean with the approval of the chair of the Department of Modern and Classical Languages.

In such cases, the student will pay Saint Joseph's University full tuition, and Saint Joseph's University will pay the institution in which the student is taking the course(s), an amount up to but not exceeding one fifth of the student’s semester tuition (excluding fees). If there is a tuition charge remaining at the institution where the courses are being taken, the student will be responsible for the remaining charges.

Upper Division Courses Taken in Study Abroad Programs

The Department will count a maximum of four upper division courses toward the major. This represents half of the upper division courses required. A total of three courses taken abroad may count for the minor.

Majors in Francophone Studies, French, German, Italian, Italian Studies, Linguistics or Spanish

Generally speaking, the major comprises ten courses, organized in a general progression that begins by strengthening students’ language skills and knowledge, then continues by developing more advanced-level skills and by introducing them to more challenging theoretical, historical, literary and/or cultural content, culminating in advanced readings, discussions and research of a specialized nature. For more specific information about majors in specific areas, see the appropriate sections below.

Minors in Chinese, French, German, Italian, Linguistics, Spanish or TESOL

With the approval of the Department of Modern and Classical Languages, a student may elect to minor in Chinese Culture, French, German, Italian, Linguistics, Spanish or TESOL by taking six courses at the appropriate level. (See individual language programs for details.)

Other Related Programs

In addition to the Spanish major and minor, a minor in Latin American Studies is also available. See the Latin American Studies Program website at: www.sju.edu/int/academics/cas/latinamerstudies.

A student may wish to consider a major/minor in Linguistics or TESOL. See the Advisor for Linguistics and TESOL Minors, Dr. Jennifer Ewald, for more information and visit the Linguistics Program website at: http://www.sju.edu/academics/cas/linguistics/index.html.

Modern Languages/Secondary Education Double Major

The Modern Languages/Secondary Education Double Major requires a course in culture and civilization in the modern language, as well as a course in basic or applied linguistics. The three Integrative Learning Courses for the Education Track are as follows: SPE 160/160F Introduction to Special Education; SPE 310/310F Assessment: Identification and Progress Monitoring, and SPE 203/203F: Teaching in Inclusive Environments. The following are recommended for satisfying both Education and GEP requirements: first-year EDU 150/150F Schools in Society for the first-year seminar, EDU 157/157F Adolescent Development for the social and behavioral science requirement, and a Linguistics course for the Art/Lit requirement.
Teacher Certification for Secondary Schools

Students majoring in French, German, Italian and Spanish who complete the double major in Secondary Education may apply to obtain an Instructional I, Secondary Education (12) Teaching Certificate from the State of Pennsylvania. In addition to their Modern Languages advisor, Modern Languages/Secondary Education double majors will also be assigned an advisor from the Education Department who will guide them through their required Education courses. The Education advisor will also assist students seeking teacher certification in formally applying for the teacher certification program, usually in the spring semester of their sophomore year. Students must have an overall GPA of 3.0 or higher to enroll in EDU 497 Secondary Student Teaching in their senior year. Students must maintain an overall GPA of 3.0 or higher to obtain teacher certification upon graduation.

Professor: Maria Marsilio, Ph.D.
Associate: Elaine Shenk, Ph.D.; Jennifer Ewald, Ph.D.; Konstantinos P. Nikoloutsos, Ph.D.; Kristen Grimes, Ph.D.; Kristin Burr, Ph.D.; Paola Giuli, Ph.D.
Assistant: Robert R. Daniel Jr., Ph.D.; Thomas Buckley, Ph.D.
Enrique Téllez-Espiga, Ph.D.; Theresa Zmukewycz

Chair: Buckley

Undergraduate

- French (p. 348)
- Francophone Studies (p. 347)
- German (p. 349)
- Italian (p. 350)
- Italian Studies (p. 351)
- Spanish (p. 352)

Undergraduate Minors

- Chinese (p. 347)
- French (p. 349)
- German (p. 350)
- Spanish (p. 354)

French

FRE 101 Beginning French I (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice low/mid-level according to ACTFL – American Council on the Teaching of Foreign Languages. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of FR101
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the French 102 Placement, French 201 Placement, French 202 Placement or French 301 Placement attributes may not enroll.
Attributes: Undergraduate

FRE 102 Beginning French II (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice mid/high level according to ACTFL – American Council on the Teaching of Foreign Languages. Fulfills the GEP non-native language requirement.
Prerequisites: FRE 101 or French 102 Placement with a score of 1 or Language Placement with a score of FR102
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the French 201 Placement, French 202 Placement or French 301 Placement attributes may not enroll.
Attributes: Undergraduate

FRE 201 Intermediate French I (3 credits)
Fundamentals of grammar and pronunciation. Extensive oral drill and practice in conversation based on graded readings. Audio-visuals and language laboratory sessions. Fulfills the GEP non-native language requirement.
Prerequisites: FRE 101 or FRE 111
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

FRE 202 Intermediate French II (3 credits)
Fundamentals of grammar and pronunciation. Extensive oral drill and practice in conversation based on graded readings. Audio-visuals and language laboratory sessions. Fulfills the GEP non-native language requirement.
Prerequisites: FRE 201 or French 201 Placement with a score of 1 or Language Placement with a score of FR201
Restrictions: Students with the French 202 Placement or French 301 Placement attributes may not enroll.
Attributes: Undergraduate
FRE 301 French Conversation (3 credits)
This course is designed to help students improve their oral communication skills in French through participation in interactive tasks. Much attention will be paid to the practice of new vocabulary. Discussion of grammar and communicative strategies will be integrated as needed in order to facilitate students' attempts at various rhetorical functions, such as describing, narrating, explaining, defining, expressing and supporting opinions, and tailoring the discourse to the audience and context. This course is aimed at developing the intermediate mid/high level according to ACTFL — American Council on the Teaching of Foreign Languages. Counts toward the Francophone Studies Program. Fulfills the GEP non-native language requirement.
Prerequisites: FRE 202 or French 301 Placement with a score of 1 or Language Placement with a score of FR301
Attributes: Undergraduate

FRE 302 French Composition (3 credits)
This course is designed to improve students' ability to communicate in written French and to develop the writing skills they will need to succeed in advanced French courses. Skills are developed through a process-oriented approach to writing, including steps related to vocabulary generation, organizing an outline, writing a draft, editing and revising, and writing a final version. Pre-req: completion of the GEP language requirement in French. Fulfills the GEP Writing-Intensive Overlay requirement.
Prerequisites: FRE 301 or French 302 Placement with a score of 1
Attributes: Undergraduate, Writing Intensive Course - GEP

FRE 309 Love and Hatred (3 credits)
Love and hatred are emotions that are at once universal and complicated. Studying these two themes will allow us to discover Francophone literature from diverse genres and time periods. In addition, the course will incorporate videos, music and art to enhance our understanding of the roles played by love and hatred in the Francophone world across the centuries

FRE 310 Intro to Literary Analysis (3 credits)
Study of variety of genres including theater, essays, fiction and poetry, with an emphasis on the methods for analyzing each genre. Fulfills the Art/Literature requirement of the GEP. Pre-requisite FRE 301 or FRE 302 or placement.
Prerequisites: Language Placement with a score of FR310
Attributes: GEP Art/Literature, Undergraduate

FRE 315 Comp Stylistics & Translation (3 credits)
Students will compare the linguistic structures and modes of expression in English and in French, doing exercises in translation (English-French and French-English) as a means of acquiring a better understanding of both languages and improving their expression in written and spoken French.

FRE 320 History of the French Language (3 credits)

FRE 321 Love & Desire in Med Fr Lit (3 credits)
Study of the origin and development of the literature and culture of the Middle Ages. Students will read a selection of texts that evoke love and desire in a variety of thematic form and we will also examine representations of love in desire in music, images, and other cultural products and practicess. Fulfills the GEP Art/Literature requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 322 Making our Voices Heard (3 credits)
A study of representations of women in works written by French women writers of the Middle Ages and Renaissance, with special emphasis on issues of female identity and voice in the texts. Fulfills the GEP Art/Lit requirement., Diversity course, Gender Studies course, Medieval, Ren & Reform Studies.
Prerequisites: FRE 301 or FRE 302

FRE 325 The Francophone World (3 credits)
This course is an introductory course for the Francophone Studies major while serving simultaneously as a language and culture course for French majors organized around the notion of “Francophonie.” There are four major intellectual components to the course: 1) the historical background of French and Belgian colonization (through research and readings), with particular reference to North America, to the Caribbean, to North Africa and to Subsaharan Africa; 2) a sampling of critiques of French colonialism; 3) select texts in postcolonial theory; 4) an overview of the contemporary Francophone world.
Attributes: Undergraduate

FRE 330 Medieval to Early Mod France (3 credits)
This course offers a cultural orientation to the French nation, focusing on the development of languages, ideas, art, architecture and social, political and economic structures within the geographical area sometimes identified as “The Hexagon,” from the tenth century to the seventeenth. Prerequisite: FRE 301 or FRE 302 or permission of the instructor. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 331 France: Enlightenment to Today (3 credits)
This course offers a cultural orientation to France and the francophone world, focusing on the evolution of ideas, artistic and literary movements, and political, social and economic structures, from the eighteenth century to the twenty-first. Prerequisite: FRE 301 or FRE 302 or permission of the instructor. Fulfills the GEP Art/Lit requirement.
Attributes: European Studies Course, GEP Art/Literature, Undergraduate

FRE 340 Current Events in the Fr Media (3 credits)

FRE 351 French Canada (3 credits)
In this course, we will explore the culture, history, and literature of French-speaking Canada, concentrating specifically on Quebec and Acadia. By focusing on questions of language, heritage, and identity, students will examine what it means to be a Francophone in Canada, deepen their knowledge of the unique cultural contributions made by these communities, and enhance their understanding of the complex identities of French speakers in eastern Canada. Fulfills the GEP Art/Lit requirement.

FRE 352 Francophone America (3 credits)
In this course, we focus on the question of identity. What does it mean to be a part of a Francophone community in the United States? By exploring the culture, history, and literature of Louisiana and New England—as well as the places where we see French influence in Philadelphia and at SUJ — students will deepen their appreciation of the richness of Francophone communities in the United States and enhance their understanding of the challenges facing members of a group whose language and heritage sets them apart. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature
FRE 366 Current Events in Fr-LangMedia (3 credits)
This course is intended to give students a better understanding of the contemporary French-speaking world and its cultures through analysis and discussion of current events covered in the Francophone news media, both in France and elsewhere. The course will develop listening and reading skills, as well as writing and speaking skills. Pre-requisite FRE 301 or FRE 302.
Prerequisites: FRE 301 or FRE 302
Attributes: Undergraduate

FRE 370 Special Topics in French (3 credits)
The purpose of this course is to explore specific topics within the literatures and/or cultures of the French-speaking world. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. Pre-requisite FRE 301 or FRE 302.
Prerequisites: Language Placement with a score of FR370
Attributes: Undergraduate

FRE 396 French AP Course (3 credits)

FRE 402 Advanced French Composition (3 credits)

FRE 403 A Just Society (3 credits)
This conversation course focuses on current events and contemporary culture, paying particular attention to ethical thinking and the notion of fairness as a principle of social organization. Discussion of controversial topics will be an important aspect of students' work. The course will be informed by the work of John Rawls and others. Participants will be asked to reflect on and to analyze issues as they are represented in television news reports, newspapers and magazine articles, popular songs, film and other media in French.
Prerequisites: FRE 301 or FRE 302
Attributes: Ethics Intensive (New GEP)

FRE 409 Love and Hatred (3 credits)

FRE 410 The French Novel (3 credits)
Reading, discussion and analysis of novels from a period ranging from the 17th century to the present. The period(s) of study will be selected by the professor. Fulfills the Art/Literature requirement of the GEP. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 412 Short Nar in Francophone Lit (3 credits)
Reading, discussion, and analysis of short stories and folktales from a variety of French-speaking areas, including Europe, North America, Africa, and the Caribbean. We will seek to define the genres and examine how their content and form change over time and by region, which will foster an understanding of how the tales reflect the culture(s) in which they were produced. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 413 French Poetry (3 credits)
A study of the various forms of French poetry with a particular emphasis on the evolution of the genre from Romanticism to Modernism. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 414 The French Essay (3 credits)
Reading, discussion, and analysis of selected works of representative essayists from the 16th to the 21st century, including Montaigne, Pascal, Diderot, Gide, Camus, Sartre, Barthes, Foucault, and Derrida. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 421 Love & Desire Med Fr Lit & Cul (3 credits)
Study of the origin and development of the literature and culture of the Middle Ages. Students will read a selection of texts that evoke love and desire in a variety of thematic form and we will also examine representations of love in desire in music, images, and other cultural products and practices. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 422 Fr Wom Writ of Mid Ages & Ren (3 credits)
Please see the description for FRE 322. Students taking 422 will have additional reading and projects to do. If you have taken at least three 300-level courses, you should enroll in 422. Fulfills the GEP Art/Lit requirement. Diversity course, Gender Studies course, Medieval, Ren & Reform Studies
Attributes: Diversity Course (New GEP), European Studies Course, GEP Art/Literature, Undergraduate

FRE 427 The Age of Louis XIV (3 credits)
A study of the growth of classicism and its various manifestations in the literary realm and the other arts. Selected works of Racine, Molière, Madame de LaFayette, Boileau, La Rochefoucauld, La Bruyère, Pascal, and La Fontaine will be studied. Fulfills the GEP Art/Lit requirement.
Attributes: Diversity Course (New GEP), European Studies Course, Gender Studies Course, GEP Art/Literature, Undergraduate

FRE 431 The French Enlightenment (3 credits)
A study of the origins of French Romanticism, its philosophical background, and its various forms of expression from Chateaubriand to Gerard de Nerval. Although principal emphasis will be placed on the study of the major genres, developments in music and the visual arts during the period will also be studied. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 434 French Romanticism (3 credits)
A study of the origins of surrealism and its philosophical background. Particular attention will be paid to the works of the founders, Breton, Artaud, Aragon, Soupault, Vitrac, Cocteau. Relationships with the visual arts, including film, will be studied. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 438 20th Cent Fr Theater to Pres (3 credits)
Study of the avant-garde theater from Jarry to Reza. Developments in content and structure, the influence of Antonin Artaud as well as metteurs-en-scene will be examined. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 451 Francophone Canada (3 credits)
Please see the description for FRE 351. Students taking 451 will have additional reading and projects to do. If you have taken at least three 300-level courses, you should enroll in 451. Fulfills the GEP Art/Lit requirement.

FRE 452 Francophone America (3 credits)
Please see the description for FRE 352. Students taking 452 will have additional reading and projects to do. If you have taken at least three 300-level courses, you should enroll in 452. Fulfills the GEP Art/Lit requirement.
FRE 460 La Francophonie (3 credits)
FRE 461 Caribbean Francophone Liter (3 credits)
This course will teach students to read and appreciate contemporary francophone literature of Martinique, Guadeloupe and Haiti by familiarizing them with the colonial and post-colonial history of the region, its cultural richness and its literary modes. Students will read works in different genres by major authors of the French Caribbean. Fullfills the GEP Art/Lit requirement. Latin American Studies.
Attributes: Africana Studies Course, GEP Art/Literature, Undergraduate

FRE 462 Contempry Francophone Cinema (3 credits)
This course will teach students to read and appreciate contemporary francophone literature of Martinique, Guadeloupe and Haiti by familiarizing them with the colonial and post-colonial history of the region, its cultural richness and its literary modes. Students will read works in different genres by major authors of the French Caribbean. Fullfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

FRE 466 The Francophonie Press (3 credits)
An introduction to the press of the French-speaking world. The work of the course may include library and internet research, extensive readings in French-language newspapers and magazines, viewings of television news, round-table discussions of current events and regular writing assignments. The course aims to familiarize students with the contemporary Francophone world and its information media. It is also designed to improve students' general language skills in French. Prerequisite FRE 301 or FRE 302.
Attributes: Undergraduate

FRE 470 Topics in French (3 credits)
The purpose of this course is to explore specific topics within the literatures and/or cultures of the French-speaking world. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. Prerequisite FRE 301 or FRE 302.
Attributes: Undergraduate

FRE 471 Economic and Business French (3 credits)
An introduction to business notions and to social, economic and political problems in the francophone business world. The primary focus will be on France, although other French-speaking countries in Europe and elsewhere may also be covered. The course will emphasize the acquisition and use of fundamental economic and business concepts and vocabulary as tools for understanding the francophone business environment and communicating appropriately in a business setting.
Prerequisite FRE 301 or permission of the instructor.
Attributes: Undergraduate

FRE 490 Internship (3 credits)
FRE 491 Internship (3 credits)
FRE 493 Independent Research in French (3 credits)
FRE 494 Independent Research in French (3 credits)

German

GRM 101 Beginning German I (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice low/mid-level according to ACTFL – American Council on the Teaching of Foreign Languages. This course is reserved for beginning students who have limited experience with the German language. Fullfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of GR101
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the German 102 Placement, German 201 Placement, German 202 Placement or German 301 Placement attributes may not enroll.
Attributes: Undergraduate

GRM 102 Beginning German II (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice mid level according to ACTFL – American Council on the Teaching of Foreign Languages. This course is reserved for beginning students who have limited experience with the German language. Fullfills the GEP non-native language requirement.
Prerequisites: GRM 101 or German 102 Placement with a score of 1 or German Language Placement with a score of GR102
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the German 201 Placement, German 202 Placement or German 301 Placement attributes may not enroll.
Attributes: Undergraduate

GRM 113 First Year German III (4 credits)
GRM 150 First Year Seminar in German (3 credits)
GRM 201 Intermediate German I (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. A review of grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice high/intermediate low level according to ACTFL – American Council on the Teaching of Foreign Languages. Fullfills the GEP non-native language requirement.
Prerequisites: GRM 102 or German 201 Placement with a score of 1 or Language Placement with a score of GR201
Restrictions: Students with the German 202 Placement or German 301 Placement attributes may not enroll.
Attributes: Undergraduate
GRM 202 Intermediate German II (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. A review of grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the intermediate low/mid-level according to ACTFL – American Council on the Teaching of Foreign Languages. Prerequisite: Fulfills the GEP non-native language requirement.
Prerequisites: GRM 201 or German 202 Placement with a score of 1 or Language Placement with a score of GR202
Restrictions: Students with the German 301 Placement attribute may not enroll.
Attributes: Undergraduate

GRM 301 German Conversation (3 credits)
This course is designed to help students improve their oral communication skills in German through participation in interactive tasks. Much attention will be paid to the practice of new vocabulary. Discussion of grammar and communicative strategies will be integrated as needed in order to facilitate students’ attempts at various rhetorical functions, such as describing, narrating, explaining, defining, expressing and supporting opinions, and tailoring the discourse to the audience and context. Fulfills the GEP non-native language requirement.
Prerequisites: GRM 202 or German 301 Placement with a score of 1 or Language Placement with a score of GR301
Attributes: Undergraduate

GRM 302 German Composition (3 credits)
This course is designed to improve students’ ability to communicate in written German and to develop the writing skills they will need to succeed in advanced German courses. Skills are developed through a process-oriented approach to writing, including steps related to vocabulary generation, organizing an outline, writing a draft, editing and revising, and writing a final version.
Prerequisites: GRM 301 or German 302 Placement with a score of 1
Attributes: Undergraduate

GRM 303 From Bismark to Hitler (3 credits)
The period spanning 1871 to 1945 in Germany is a tumultuous period of transition in the country’s history. This course is intended to deepen the students’ knowledge of German history, literature, culture and politics. Readings, discussions and analysis both of a series of literary texts, as well as background readings on the time period. Fulfills the Art/Literature requirement of the GEP. Prerequisite: GRM 301 or departmental approval. This course is taught in German.
Prerequisites: Language Placement with a score of GR303
Attributes: GEP Art/Literature, Undergraduate

GRM 305 The Faust Legend (3 credits)
A study of the Faust legend in German and world literature. Goethe’s Faust will be analyzed in depth. The concept of the Faustian as expressed in other literature, as well as in the opera and film, will be studied. Fulfills the GEP Art/Literature requirement. Taught in English, does not satisfy the German major or minor requirements.
Attributes: GEP Art/Literature, Undergraduate

GRM 306 Advanced German Conv & Comp (3 credits)
The purpose of this course is to improve the student’s oral and written command of German by further developing the four linguistic skills on an advanced level. Prerequisite: GRM 301 or departmental approval.
Prerequisites: GRM 302 or German 301 Placement with a score of 1
Attributes: Undergraduate

GRM 309 German Civilization & Culture (3 credits)
A survey of the culture and civilization of Germany and other German-speaking countries, their history, politics, economic and social aspects, art, and folklore through the reading of literary texts. Emphasis is placed on modern trends. Fulfills the GEP Art/Literature requirement.
Attributes: GEP Art/Literature, Undergraduate

GRM 310 Selections in German Lit I (3 credits)
An introduction to German literature with selected readings from the works of principal writers from various periods. Fulfills the GEP Art/Literature requirement of the GEP.
Attributes: GEP Art/Literature, Undergraduate

GRM 320 Contemporary German Cinema (3 credits)
German Cinema as a mode of present-day artistic expression. Viewing and analysis of contemporary German movies by outstanding directors dealing with key issues in modern Germany. Fulfills the GEP Art/Literature requirement.
Attributes: GEP Art/Literature, Undergraduate

GRM 321 Getting to Know the Germ Media (3 credits)
The course will strengthen oral and written communication in German through discussion and analysis of the press, Deutsche Welle (German direct news broadcasts) using a variety of online news sources as well as German TV culture. The focus will be on contemporary culture and current events. Prerequisite: GRM 301 or departmental approval.
Prerequisites: Language Placement with a score of GR321
Attributes: Undergraduate

GRM 330 German Business I (3 credits)
It is true that the world is increasingly more globalized, particularly with respect to business and economic issues. Therefore, it is essential, even for those not directly involved in the business world, to be familiar with its workings and language. Yet it is equally true, despite globalization, that linguistic, cultural and economic differences persist and play an important role in the business world. It is the aim of this course to offer students insights into Business German from a micro point of view. Initially, we will have a general overview of the German economy, before embarking on a more detailed exploration of German business writing (cover letter, resumes, business correspondences), as well as common German business practices. Particular emphasis will be placed on vocabulary building. Prerequisite: GRM 301 or departmental approval.
Prerequisites: GRM 302 or GRM 1321
Attributes: Undergraduate

GRM 331 German Business II (3 credits)
The course deals with the multifaceted German business world on an advanced level. Emphasis will be placed on business correspondence, and the necessary oral proficiency skills required for successful commercial transactions. Prerequisite: GRM 301 or departmental approval.
Prerequisites: GRM 302 or GRM 1321 or Language Placement with a score of GR331
Attributes: Undergraduate

GRM 370 Topics in German Culture (3 credits)
The course will survey the most significant aspects of German culture through time. It is designed to give a broad overview of important cultural movements and personalities. We will discuss the highlights of selected areas in the culture of the German-speaking countries: in art, architecture, literature, music, history, politics and science. In particular, we will study representative figures of these areas, especially those who have had an impact on European and world culture.
Attributes: Undergraduate
GRM 396 German AP Course (3 credits)
GRM 401 Medieval German Literature (3 credits)
GRM 402 From Enlightenment to Realism (3 credits)
Readings, discussion, and analysis of a series of literary texts, as well as background readings on the period spanning the German Enlightenment to the beginning of German Realism (1750-1850). Fulfills the GEP Art/Literature requirement.
Attributes: GEP Art/Literature, Undergraduate

GRM 403 From Bismarck to Hitler (3 credits)
The period spanning 1871 to 1945 in Germany is a tumultuous period of transition in the country’s history. This course is intended to deepen the students’ knowledge of German history, literature, culture and politics. Readings, discussions and analysis both of a series of literary texts, as well as background readings on the time period. Fulfills the GEP Art/Literature requirement.
Prerequisites: Language Placement with a score of GR403
Attributes: GEP Art/Literature, Undergraduate

GRM 404 Mod in Lit of Early 20th Cent (3 credits)
Readings, discussion, and analysis of selected works from Hauptmann to Mann. Focusing on the economic, social, and political issues of the pre-World War II era. Fulfills the GEP Art/Literature requirement.
Attributes: GEP Art/Literature, Undergraduate

GRM 405 Lit of Ger-Speaking Countries (3 credits)
Reading, discussion, and analysis of selected works by major authors, focusing on the social and cultural trends of the times. Fulfills the Art/Literature requirement of the GEP. Prerequisite: GRM 301 or departmental approval.
Attributes: GEP Art/Literature, Undergraduate

GRM 406 Phantms, Spirits & the Uncanny (3 credits)
This course explores the fantastic in German literature, utilizing examples from Romanticism to the present. The fantastic will be investigated with respect to its function within individual works of literature as well as within its socio-historical context. Fulfills the GEP Art/Literature requirement.
Attributes: GEP Art/Literature, Undergraduate

GRM 420 MultiKulti: German Migrant Lit (3 credits)
This course focuses on themes and texts of important “migrant authors” of Germany from the 20th and 21st centuries. Students will meet authors and texts that embody the struggles and successes of immigrants to Germany. It is designed to expose students to an array of selected German texts that are relevant to today’s way of life in Germany. Students will learn to analyze and interpret several works of literature, in relation to the historical and social events of the time. Fulfills the Diversity overlay.
Attributes: Diversity Course (New GEP)

GRM 423 German Short Story (3 credits)
Readings, discussion and analysis of representative short stories in the post-45 German-speaking world. Fulfills the GEP Art/Lit requirement.
Attributes: European Studies Course, Undergraduate

GRM 470 Topics in German (3 credits)
GRM 490 Internship (3 credits)
GRM 491 Internship (3 credits)
GRM 493 Independent Research (3 credits)
GRM 494 Independent Research (3 credits)

Italian
ITA 101 Beginning Italian I (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice low/mid-level according to ACTFL – American Council on the Teaching of Foreign Languages. This course is reserved for beginning students with no experience with the Italian language. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of IT101
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the Italian 102 Placement, Italian 201 Placement, Italian 202 Placement or Italian 301 Placement attributes may not enroll.
Attributes: Undergraduate

ITA 102 Beginning Italian II (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice mid/high level according to ACTFL – American Council on the Teaching of Foreign Languages. Fulfills the GEP non-native language requirement.
Prerequisites: ITA 101 or Italian 102 Placement with a score of 1 or Language Placement with a score of IT102
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the Italian 201 Placement, Italian 202 Placement or Italian 301 Placement attributes may not enroll.
Attributes: Undergraduate

ITA 111 Adult Learner Beginning ITA I (3 credits)
Fundamentals of grammar and pronunciation. Extensive oral drill and practice in conversation based on graded readings. Audio-visuals and language laboratory sessions. Fulfills the GEP non-native language requirement.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ITA 112 Adult Learner Beginning ITA II (3 credits)
Fundamentals of grammar and pronunciation. Extensive oral drill and practice in conversation based on graded readings. Audio-visuals and language laboratory sessions. Fulfills the GEP non-native language requirement.
Prerequisites: ITA 1015 or ITA 111
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate
ITA 113 First Year Italian III (4 credits)
ITA 150 First Year Seminar in Italian (3 credits)
ITA 201 Intermediate Italian I (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice high/intermediate low level according to ACTFL – American Council on the Teaching of Foreign Languages. Fulfills the GEP non-native language requirement. 
Prerequisites: ITA 102 or Italian 201 Placement with a score of 1 or Language Placement with a score of IT201
Restrictions: Students with the Italian 202 Placement or Italian 301 Placement attributes may not enroll.
Attributes: Undergraduate

ITA 202 Intermediate Italian II (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar, pronunciation, and writing will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the intermediate low/mid-level according to ACTFL – American Council on the Teaching of Foreign Languages. Fulfills the GEP non-native language requirement.
Prerequisites: ITA 201 or Italian 202 Placement with a score of 1 or Language Placement with a score of IT202
Restrictions: Students with the Italian 301 Placement attribute may not enroll.
Attributes: Undergraduate

ITA 206 The Roman Experience (3 credits)
This month-long, full-immersion course will improve students’ command of Italian as it provides an enriching cultural experience. Students will discover what it means to live amidst ancient ruins, baroque basilicas, and artistic treasures as they navigate the eternal city. Through daily excursions and task-based activities students will acquire practical skills as they are immersed in Roman art, cuisine, culture and history. In particular, we will examine forces that have shaped the world we have inherited through units on the Jesuits in Rome. Fulfills the GEP Art/Lit requirement. Pre-requisite ITA 102 (for ITA 206) and ITA 301 (for 306). Both courses count toward the minor and major in Italian, and for the major in Italian Studies.
Prerequisites: ITA 102
Attributes: GEP Art/Literature, Undergraduate

ITA 240 Ital BegCult&Civilization Tour (3 credits)

ITA 301 Italian Conversation (3 credits)
This course is designed to help students improve their oral communication skills in Italian through participation in interactive tasks. Much attention will be paid to the practice of new vocabulary. Discussion of grammar and communicative strategies will be integrated as needed in order to facilitate students’ attempts at various rhetorical functions, such as describing, narrating, explaining, defining, expressing and supporting opinions, and tailoring the discourse to the audience and context. Fulfills the GEP non-native language requirement.
Prerequisites: ITA 202 or Italian 301 Placement with a score of 1 or Language Placement with a score of IT301
Attributes: Undergraduate

ITA 302 Italian Composition (3 credits)
This course is designed to improve students’ ability to communicate in written Italian and to develop the writing skills they will need to succeed in advanced Italian courses. Skills are developed through a process-oriented approach to writing, including steps related to vocabulary generation, organizing an outline, writing a draft, editing and revising, and writing a final version. Prerequisite: ITA 301 or permission of the instructor. This course satisfies the GEP writing-intensive requirement.
Prerequisites: ITA 301 or Italian 302 Placement with a score of 1 or Language Placement with a score of IT302
Attributes: Undergraduate, Writing Intensive Course- GEP

ITA 303 Advanced Italian Conversation (3 credits)
The purpose of this course is to improve students’ oral command of the language by means of an intensive practical presentation of the structures and stylistics of the language. We shall read both literary texts and short newspaper articles. Conducted in Italian. Prerequisite: ITA 301 or permission of the instructor.
Attributes: Undergraduate

ITA 304 Advanced Italian Composition (3 credits)
The purpose of this course is to improve students’ written command of the language by means of an intensive practical presentation of the structures and stylistics of the language. We shall read both literary texts and short newspaper articles. The course will be organized thematically around two main areas: issues in contemporary society and Roman literary and historical landscapes. Conducted in Italian. Prerequisite: ITA 301 or permission of the instructor.
Attributes: Undergraduate

ITA 306 The Roman Experience (3 credits)
The purpose of this course is to improve students’ oral and written command of Italian through an intensive full-immersion presentation of the structures and stylistics of the language. The course is organized thematically around two main areas: issues in contemporary society and Roman literary, artistic and social landscapes. Students will read twentieth-century writers’ appreciation of Rome, and newspaper articles on local cultural and social issues. While visiting sites described in the readings, interviewing the denizens on local issues, and observing the art and architecture that has left its imprint on western civilization as we know it, students will be asked to comment on their observations both in writing and in group conversation. They will acquire a very personal appreciation of the meraviglie di Roma and will formulate oral and written analyses on social, historical and artistic subjects. Conducted in Italian. Prerequisite: ITA 301 or permission of the instructor. Fulfills the GEP Art/Lit Requirement.
Prerequisites: ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 302 Italian Composition (3 credits)
This course is designed to improve students’ ability to communicate in written Italian and to develop the writing skills they will need to succeed in advanced Italian courses. Skills are developed through a process-oriented approach to writing, including steps related to vocabulary generation, organizing an outline, writing a draft, editing and revising, and writing a final version. Prerequisite: ITA 301 or permission of the instructor. This course satisfies the GEP writing-intensive requirement.
Prerequisites: ITA 301 or Italian 302 Placement with a score of 1 or Language Placement with a score of IT302
Attributes: Undergraduate, Writing Intensive Course- GEP

ITA 303 Advanced Italian Conversation (3 credits)
The purpose of this course is to improve students’ oral command of the language by means of an intensive practical presentation of the structures and stylistics of the language. We shall read both literary texts and short newspaper articles. Conducted in Italian. Prerequisite: ITA 301 or permission of the instructor.
Attributes: Undergraduate

ITA 304 Advanced Italian Composition (3 credits)
The purpose of this course is to improve students’ written command of the language by means of an intensive practical presentation of the structures and stylistics of the language. We shall read both literary texts and short newspaper articles. The course will be organized thematically around two main areas: issues in contemporary society and Roman literary and historical landscapes. Conducted in Italian. Prerequisite: ITA 301 or permission of the instructor.
Attributes: Undergraduate

Prerequisites: ITA 301
Attributes: GEP Art/Literature, Undergraduate
ITA 309 I giovani e l'Italia di oggi (3 credits)
This course offers a unique perspective on contemporary Italy by placing the young generation at the center of study. Students will improve their communication skills while exploring a variety of narratives—songs, short stories, film, music, poems and newspaper articles—written by, for, or about Italian culture; the course will therefore introduce the analytical tools necessary for literary and film analysis. Political engagement, school life, adolescence, and generational conflicts are among the themes we will discuss. Class activities will provide students the opportunity to express and debate their personal views, which will guide the development and refinement of oral and written proficiency. The expansion of vocabulary and the study of grammar will be incorporated into the course. Prerequisite: ITA 301 or permission of instructor.

Prerequisites: ITA 301 and ITA 302

ITA 310 Italian Stylistics (3 credits)
This course introduces the fundamental principles and techniques of literary analysis in each of the major genres (lyric poetry, short story, theatre, epic poetry, novel), while presenting a sampling of masterpieces and authors from across the Italian literary tradition. By introducing students to the major writers and movements of Italian literature from the thirteenth through the twentieth centuries, we will examine the work of different styles and themes, with specific attention to historical and cultural frameworks. We will pay close attention to the vocabulary used in literary study, as well as to linguistic and stylistic difficulties in textual analysis. Prerequisite: ITA 301 or permission of instructor. Fulfills the GEP Art/Literature requirement.

Attributes: GEP Art/Literature, Undergraduate

ITA 311 Italian Conversation & Comp I (3 credits)

ITA 312 Italian Conversation & Comp II (3 credits)

ITA 315 Italy Through Art (3 credits)
In this language and culture course students refine their skills while learning about Italy through the medium of art. The approach encourages the development of a critical understanding of individual works by introducing students to the visual language of art. As a survey course, the subject content is chronologically wide ranging, extending from Magna Grecia to the Novecento, and includes a variety of media, including painting, sculpture and architecture. Among the artists covered are Cimabue, Giotto, Donatello, Masaccio, Piero della Francesca, Botticelli, Leonardo, Raffaello, Michelangelo, Cellini, Giorgione, Tiziano, Tintoretto, Caravaggio, Canalietto, Guardi, Canova, Modigliani, and De Chirico. By analyzing a variety of cultural artifacts, students will build vocabulary and use advanced grammatical structures. We will also read critical articles on art history and study the University’s Art collection, which includes replicas of Michelangelo’s most famous sculptures. The course is complemented visits to the Barnes Foundation and the Philadelphia Museum of Art. Conducted in Italian. Prerequisite: ITA 301 or permission of the instructor. Fulfills the GEP Art/Lit Requirement.

Attributes: European Studies Course, GEP Art/Literature, Undergraduate

ITA 320 Italian Through Film (3 credits)
Course aims to improve students’ speaking and listening skills and their understanding of Italian culture by viewing and discussing Italian film. Conducted in Italian. Prerequisite: ITA 301 or permission of instructor.

Attributes: Undergraduate

ITA 330 The Ita Bus Wrld & Its Lang (3 credits)
This course explores the language and culture of the Italian business world at an intermediate-high to advanced level. Besides developing writing and speaking skills—such as writing c.v., business letters and job descriptions; practicing job interviews, business meetings and presentations—the course analyzes socio-economic issues such as the position of women in the work force, the globalization of the markets of the European Union, and business etiquette through the analysis of Italian articles, the internet and visual materials (TV and movies). Conducted in Italian. Prerequisite: ITA 301 or permission of the instructor.

Attributes: Undergraduate

ITA 340 Italian Culture & Civilization (3 credits)
A survey of the culture of Italy, its geography, history, politics, outstanding personalities, arts, literature, economic and social problems, sciences, and education. Conducted in Italian. Fulfills the GEP Art/Literature requirement.

Prerequisites: ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 345 Art Fashion: la moda italiana (3 credits)
The goal of this course is to facilitate future educators in the teaching of foreign language and to allow those students, who are Education Majors and Minors, to fully comprehend how the multi-dimensional world of bilingualism plays and will continue to play a very important role in the future of this country. This course will examine the intricacies of acquiring a second language through the pedagogical years and into adulthood and will be taught in Italian. It will also examine the communication skills of Italian students learning English and of American students learning Italian. Emphasis shall be placed on the characteristics of interaction within the contexts that facilitate second language acquisition. Students will explore social, environmental and cultural differences and the roles they play in promoting or impeding L2 fluency and pronunciation. Theories and methodologies will be discussed, language classes observed and, eventually, students may have the possibility to teach specific grammar points in first year classrooms. Conducted in Italian. Fulfills the GEP Art/Lit requirement.

Prerequisites: (ITA 301 and ITA 302) or (Language Placement with a score of IT345)
Attributes: GEP Art/Literature

ITA 350 Topics & Meth for Teaching Ita (3 credits)
The goal of this course is to facilitate future educators in the teaching of foreign language and to allow those students, who are Education Majors and Minors, to fully comprehend how the multi-dimensional world of bilingualism plays and will continue to play a very important role in the future of this country. This course will examine the intricacies of acquiring a second language through the pedagogical years and into adulthood and will be taught in Italian. Conducted in Italian. Fulfills the GEP Art/Lit requirement.

Prerequisites: Language Placement with a score of IT350 or ITA 301
Attributes: Undergraduate
ITA 360 Modern Italian Culture (3 credits)
The purpose of this course is to study some of the principal characteristics of contemporary Italian culture. The course explores such topics as regionalism, the formation of a national language, the question of national identity, terrorism, the separatist movements, gender relations, feminism, and popular culture. It studies Italian cultural trends in Italy today, outlines their history over the last one hundred years, and explores the future of Italian culture and society. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT360 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 365 Italian Society and the Media (3 credits)
The goal of this course is to develop advanced-level oral/aural and reading/writing skills while addressing key aspects of contemporary Italian culture through the consideration of exclusively authentic materials, such as Italian newspaper and magazine articles, Italian TV broadcasting, and Italian internet sites. We shall also learn how to critique the written and visual Italian media, as well as how to navigate Italian websites. Students will choose readings and topics initially within a given list of categories and, later, among a virtually endless variety of internet sources. Among the topics we may address are: style, fashion and design; geography, art and tourism; the environment; immigration and racism; the position of young people and women in Italian society; current Italian and international events from an Italian perspective. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT365 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 370 Topics in Italian (3 credits)
The purpose of this course is to explore specific topics within the literatures and/or cultures of the Italian-speaking world. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT370 or ITA 301
Attributes: Undergraduate

ITA 380 Ita Journeys from Marco Polo (3 credits)
This interdisciplinary course investigates Italy’s dual role as the home of legendary travelers and the destination for tourists over the centuries. Through a variety of texts—travel diaries, letters to kings and queens, maps, travel guides and film—we will explore the reality and metaphor of travel in the lives and works of pilgrims, poets, explorers and artists. We will consider three historical periods: the age of discovery (ca. 1300-1600), the grand tour (ca. 1600-1800) and the age of global tourism (ca. 1800-present). The course concludes with a virtual tour of various regions of contemporary Italy. As a final project, students will author their own travel guide to the Italian city (or cities) of their choice. Recommended for students who wish to further their cultural and linguistic preparation before studying abroad, this content-based language course emphasizes the vocabulary and idiomatic expressions necessary for travel in Italy. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT380 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 396 Italian AP Course (3 credits)

ITA 401 Early Ita Cinema-Stage to Scm (3 credits)
This course traces the birth and development of silent film, the transition to sound, and film under fascism, with emphasis on film’s relationship to theatre, literature and social and cultural history. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT401 or ITA 301
Attributes: Undergraduate

ITA 402 L’Italiano al Cinema (3 credits)
This course investigates major films as both aesthetic and cultural objects. It will introduce major directors, movements, and genres in Italian cinema from World War II to the present. We will study both “film d’autore” (Visconti, De Sica, Fellini, Scola, Risi, Monicelli) and “nuovi registi” (Belloccio, Giordana, Muccino). We will analyze typically Italian historical drama, “commedia all’italiana” and postmodern pastiche and explore contemporary social issues such as regional, ethnic and gender diversity. We will read literary sources, screenplays and film criticism. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT402 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 410 Major Italian Authors (3 credits)

ITA 420 From Novel to Film (3 credits)
This course studies representations of Italian society from unification (1860) to the present in literary works and films. We shall consider films by contemporary Italian filmmakers (Visconti, Damiani, Rossi, Fratelli, Taviani), and the literary works on which they are based, including works by D’Annunzio, Pirandello, Levi, and Sciascia. While comparing cinematographic and literary techniques, we shall explore ideological and cultural currents, such as Romanticism, Risorgimento, Realism and Neo-realism. Topics discussed will include: the problems of unification; regionalism and separatism between industrial north and rural south; solitude and marginalization; the search for an identity. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT420 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 425 Art&Madman:Renaissance&Reform (3 credits)
What separates genius from madness? Is creativity inspiration or insanity? This interdisciplinary course examines tales of psychosis, violence and the making of artistic masterpieces. We will explore the lives and works of artists and poets, such as Sandro Botticelli, Leonardo Da Vinci, Michelangelo Buonarotti, Vittoria Colonna, Benvenuto Cellini, Galileo Galilei, Caravaggio and Artemisia Gentileschi. A variety of works [poetry, prose, painting and sculpture] will be studied against the backdrop of the crisis of the Italian Renaissance. We will look closely at Counterreformation intellectual debates, religious dissent and persecution. At the center of our inquiry is the figure of the artist—genius, madman, or both? This course will be complemented by guest speakers and a trip to the Philadelphia Museum of Art. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: ITA 301 or Language Placement with a score of IT425
Attributes: GEP Art/Literature

ITA 430 Imges of Rome:Papl Rome - Pres (3 credits)
This course will interpret the symbolic and political importance of Rome in literary works and film. The course is organized historically: from the struggle over Rome within the Risorgimento movement to fascist and war-torn Rome; from the 50’s Rome of reconstruction to the economic boom of the 1960’s, to the socio-political problems of a new multicultural city in the 80’s and 90’s. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT430 or ITA 301
Attributes: GEP Art/Literature, Undergraduate
ITA 435 Rebels and Revolutionaries (3 credits)
The course aspires to provide an understanding of the culture of Baroque, Enlightenment and Risorgimento Italy and of its influence on contemporary Italian culture (especially as regards definition of concepts of gender, language and national identity). It considers a variety of genres —novels, poems, essays and plays—in the context of ideological and cultural currents. Audio-visual materials (videos, movies, cd roms) will be used and a variety of subtexts and interdisciplinary relationships will be explored, especially with history, art and philosophy. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT435 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 440 Profane and Sacred Love (3 credits)
The course aspires to provide an understanding of the culture of Medieval and Renaissance Italy and of its influence on contemporary Italian culture. It focuses on how power and gender relationships are reflected in the literature—canzoni, sonetti, ballate, novelle. The works studied belong to the tradition of Courtly Love, Neo- Platonic love and the literature of the Renaissance courtisans and follows the evolution of concepts of sacred and profane love in Italian literature from the thirteenth to the sixteenth centuries. The course considers a variety of subtexts and interdisciplinary relationships especially with history and art history. Audio-visual materials (videos, movies, cd roms) will be used to bring home to the students the sights and sounds of this vibrant age. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT440 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 444 The Medici Court (3 credits)
For the Medici, art and propaganda went hand in hand. This interdisciplinary course investigates the city and family that nurtured artists and humanists [including Brunelleschi, Fra Angelico, Donatello, Botticelli, Poliziano and Michelangelo]. Tracing the rise and fall of the dynasty, we will consider how the Medici fashioned an enduring image of princely power though architecture and music. We will study a variety of texts, including painting, sculpture, poetry and intimate letters exchanged between family members. This course will be complemented by visiting the Medici Collection at the Philadelphia Museum of Art. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT440 or ITA 301
Attributes: GEP Art/Literature, Undergraduate

ITA 445 The Birth of a Nation: Italy (3 credits)
This course encourages a critical approach to the study of Italian unification in its aesthetic, cultural, and political dimensions as well as their repercussions on present-day Italian society and culture. The making of Italians, as Massimo D'Azelegio famously put it, would engage the best Italian minds for the following 150 years. The divisions between North and South, between Church and State, between the government and the people were created or compounded by the making of Italy. The course studies the debate on Italian Unification and the development of an Italian identity in a variety of historical artistic and literary sources, including diaries, letters, treatises, paintings, sculptures, poems and short stories.
Prerequisites: Language Placement with a score of IT450 or ITA 301
Attributes: Undergraduate

ITA 447 Topics in Italian (3 credits)
The purpose of this course is to explore specific topics within the literatures and/or cultures of the Italian- speaking world. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. Fulfills the GEP Art/Lit requirement.
Attributes: Undergraduate

ITA 450 Italy in Age of Grand Tour (3 credits)
This course focuses on travel through Italy as an educational experience and cultural initiation and aims to improve students' reading, writing and speaking skills in Italian, while familiarizing them with culturally important sites and encouraging them to think critically about the notion of the Grand Tour. Conducted in Italian Pre-requisite: ITA 301 or permission of instructor.
Prerequisites: Language Placement with a score of IT450 or ITA 301
Attributes: Undergraduate

ITA 455 Women's Voices (3 credits)
We will investigate the relation between the emergence of a self- professed woman novelist and the changing ideologies concerning the moral and intellectual nature of women and their role in society. We will not only study the way prominent women intellectuals helped shape the debate on women's condition and on women's writing, but also their original contribution to the interpretation of twentieth century history (e.g. Fascism, the Resistance, the Second World War and the Holocaust). Among the literary theoretical issues we will encounter: the relationship of genre to gender, of gender to writing, and the role of gender values in historiographical representation. We shall read autobiographical and historical novels, as well as essays and non-fictional prose. The course will be complemented by a film and a lecture series. Conducted in Italian. Fulfills the GEP Art/Lit requirement.
Prerequisites: Language Placement with a score of IT455 or ITA 301
Attributes: GEP Art/Literature, Undergraduate
ITALIAN STUDIES

IST 150 Ita Cinema-Neoreal to Present (3 credits)
This course investigates major Italian films as both aesthetic and cultural objects. It offers an introduction to Italian cinema from the 1940’s to the Present, and also to Italian social and cultural history of that time. It introduces major directors, movements, and genres in Italian cinema, focusing on movies that not only are influential masterpieces, but also offer incisive interpretations of their cultural and social milieus, including regional, ethnic and religious diversity; gender diversity; social tensions and class issues. Visconti, De Sica, Fellini, Scola, Belloccchio, Giordana are among the directors we study.
Attributes: First-Year Seminar, GEP Art/Literature, Undergraduate

IST 350 Mangia! Flavors of Italy (3 credits)
The expression “Mangia, mangia!” is commonly associated with American stereotypes of Italians. But is the perceived Italian love of food the same in the United States and in Italy? Is it an issue of quantity or quality? Of socio-economics, politics, or education? Is it global, local or both? In this interdisciplinary course, we will explore the role of food in Italian culture and in the shaping of Italian identity, in Italy and abroad. We will trace its evolution through a variety of texts: literature, works of art, music, and film, as well as family recipes. Guest lectures made by Italian chefs in Philadelphia, food tastings, and a visit to the Italian Market, will enrich the course. Fulfills the GEP Art/Lit requirement

IST 360 Italian Identities (3 credits)
In this course, taught in English, we will explore the complex nature of Italian Identities, focusing on race, sex and gender roles, religion, food, art and science. Fulfills the GEP Art/Lit requirement. Does not count toward a minor in Italian. Counts towards a major in Italian Studies and it may count toward the major in Italian, with permission of the Chair of Modern and Classical Languages.
Attributes: GEP Art/Literature, Undergraduate

IST 370 Topics in Italian Studies (3 credits)
The purpose of this course is to explore specific topics within the Italian-speaking World. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. Classes are taught in English.
Attributes: GEP Art/Literature, Undergraduate

IST 375 Shadow State: Mafia in Italy (3 credits)
This course explores the nature of organized crime in Italy, its origins, its economic aspects, its connection with politics, its reality beyond stereotypes, and finally, the way it is portrayed in Italian Arts and literature. No pre-requisites required. Does not count toward a minor in Italian. May count toward the major, with permission of the Chair of Modern and Classical Languages. Fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

JAPANESE

JPN 101 Beginning Japanese I (4 credits)
Proficiency-based instruction will encourage the development of speaking and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice low/mid-level according to ACTFL – American Council on the Teaching of Foreign Languages. This course is reserved for beginning students with no experience with the Japanese language. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of JP101
Restrictions: Enrollment is limited to Undergraduate Day Division level students.
Attributes: Asian Studies Course, Undergraduate

JPN 102 Beginning Japanese II (4 credits)
Proficiency-based instruction will encourage the development of speaking and listening comprehension, with some focus on understanding Japanese characters. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice mid level according to ACTFL – American Council on the Teaching of Foreign Languages. Prerequisite: Fulfills the GEP non-native language requirement.
Prerequisites: JPN 101 or JPN 101 or Language Placement with a score of JP102
Restrictions: Enrollment is limited to Undergraduate Day Division level students.
Attributes: Asian Studies Course, Undergraduate
JPN 201 Intermediate Japanese I (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice high/intermediate low level according to ACTFL – American Council on the Teaching of Foreign Languages. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of JP201 or JPN 102
Attributes: Asian Studies Course, Undergraduate

JPN 202 Intermediate Japanese II (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the intermediate low/mid-level according to ACTFL – American Council on the Teaching of Foreign Languages. Prerequisite: JPN 201 or equivalent.
Prerequisites: JPN 1211 or JPN 201
Attributes: Asian Studies Course, Undergraduate

JPN 211 Second Year Japanese I (3 credits)
JPN 212 Second Year Japanese II (3 credits)

JPN 301 Japanese Conversation (3 credits)
This course is designed to give the student the necessary practice in spoken and written Japanese with special emphasis on the more difficult modern Japanese grammatical constructions and idioms. Prerequisite: JPN 301 or equivalent.
Prerequisites: Language Placement with a score of JP301 or JPN 202
Attributes: Asian Studies Course, Undergraduate

JPN 302 Japanese Conversat & Compos II (3 credits)
This course is designed to give the student the additional practice in spoken and written Japanese with increased emphasis on the more difficult modern Japanese grammatical constructions and idioms. Prerequisite: JPN 301 or equivalent.
Prerequisites: JPN 1311 or JPN 301 or Language Placement with a score of JP302
Attributes: Asian Studies Course, Undergraduate

JPN 310 Selections in Japanese Lit I (3 credits)
Introduction to Japanese Literature and its history. Selected readings of plays, essays, novels, short stories and poetry. Taught in Japanese. Fulfills the GEP Art/Lit requirement
Prerequisites: Language Placement with a score of JP310 or JPN 301
Attributes: Asian Studies Course, GEP Art/Literature, Undergraduate

JPN 311 Selections in Japanese Lit II (3 credits)
JPN 330 Japanese Film and Culture (3 credits)

Russian

RUS 101 Beginning Russian I (4 credits)
Proficiency based instruction will encourage the development of speaking and listening comprehension as well as reading and writing. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice low/middle level according to ACTFL – American Council on Teaching Foreign Languages. This course is reserved for students with no experience in the Russian language. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of RU101
Restrictions: Enrollment is limited to Undergraduate Day Division level students.
Attributes: Undergraduate

RUS 102 Beginning Russian II (4 credits)
Proficiency based instruction will encourage the development of speaking and listening comprehension as well as reading and writing. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice mid level according to ACTFL – American Council on Teaching Foreign Languages. Fulfills the GEP non-native language requirement.
Prerequisites: RUS 101 or Russian 102 Placement with a score of 1 or Language Placement with a score of RU102
Restrictions: Enrollment is limited to Undergraduate Day Division level students.
Attributes: Undergraduate

RUS 201 Intermediate Russian I (3 credits)
Proficiency based instruction will encourage the development of speaking and listening comprehension as well as reading and writing. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice high level according to ACTFL – American Council on Teaching Foreign Languages. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of RU201
Attributes: Undergraduate

RUS 202 Intermediate Russian II (3 credits)
Proficiency based instruction will encourage the development of speaking and listening comprehension as well as reading and writing. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is aimed at developing the novice intermediate low/mid-level according to ACTFL – American Council on Teaching Foreign Languages. Pre-requisite: RUS 201 or equivalent. Fulfills the GEP non-native language requirement.
Prerequisites: RUS 201 or Russian 202 Placement with a score of 1 or Language Placement with a score of RU202
Attributes: Undergraduate

RUS 301 Russian Conv & Comp I (3 credits)
This course is designed to give the student the necessary practice in spoken and written Russian with special emphasis on the more difficult modern Russian grammatical constructions and idioms. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of RU301
Attributes: Undergraduate
RUS 302 Russian Conv & Comp II (3 credits)
This course is designed as a follow-up to RUS 301, to give the student additional practice in spoken and written Russian with increased emphasis on difficult modern Russian grammatical constructions and idioms. Pre-requisite: RUS 202 or equivalent.
Prerequisites: RUS 1311 or RUS 301
Attributes: Undergraduate

RUS 310 Selections in Russian Lit I (3 credits)
Introduction to Russian literature and its history. Selected readings of plays, essays, novels, short stories and poetry. Fulfills the GEP Art/Literature requirement. Pre-requisite: RUS 202 or equivalent.
Prerequisites: Language Placement with a score of RU310
Attributes: Undergraduate

RUS 311 Selections in Russian Lit II (3 credits)
A continuation of RUS 310. Fulfills the GEP Art/Literature requirement.
Prerequisites: RUS 1311 or RUS 310
Attributes: Undergraduate

RUS 370 Topics in Russian (3 credits)

Spanish

SPA N001 Non-Credit: Spanish Special Top (1 credit)

SPA 101 Beginning Spanish I (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is reserved for beginning students with no experience with the Spanish language. This course is not open to native or heritage speakers of Spanish. Fulfills the GEP non-native language requirement.
Prerequisites: Language Placement with a score of SP101
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the Spanish 102 Placement, Spanish 201 Placement, Spanish 202 Placement or Spanish 301 Placement attributes may not enroll.
Attributes: Undergraduate

SPA 102 Beginning Spanish II (4 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. Prerequisite: SPA 102 or equivalent. This course is not open to native or heritage speakers of Spanish. Fulfills the GEP non-native language requirement.
Prerequisites: SPA 101 or Spanish 102 Placement with a score of 1 or Language Placement with a score of SP102
Restrictions: Enrollment is limited to Undergraduate Day Division level students. Students with the Spanish 201 Placement, Spanish 202 Placement or Spanish 301 Placement attributes may not enroll.
Attributes: Undergraduate

SPA 111 Adult Learner Beginning SPA I (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is reserved for PLS students with no experience with the Spanish language. This course is not open to native or heritage speakers of Spanish. Fulfills the GEP non-native language requirement.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

SPA 112 Adult Learner Beginning SPA II (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in the classroom. This course is reserved for PLS students with no experience with the Spanish language. This course is not open to native or heritage speakers of Spanish. Fulfills the GEP non-native language requirement.
Prerequisites: SPA 110 or SPA 111
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

SPA 113 First Year Spanish III (4 credits)

SPA 115 1st Year Span II (Non-Begins) (4 credits)

SPA 117 1st Year Span III (Non-Begins) (4 credits)

SPA 201 Intermediate Spanish I (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar, pronunciation, and writing will accompany active student participation in task-oriented group work in the classroom. Prerequisite: SPA 201 or equivalent. This course is not open to native or heritage speakers of Spanish. Fulfills the GEP non-native language requirement. With some limitations, this course may count toward the Latin American Studies minor.
Prerequisites: SPA 201 or Spanish 201 Placement with a score of 1 or Language Placement with a score of SP201
Restrictions: Students with the Spanish 202 Placement or Spanish 301 Placement attributes may not enroll.
Attributes: Latin American Studies Course, Undergraduate

SPA 202 Intermediate Spanish II (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar, pronunciation, and writing will accompany active student participation in task-oriented group work in the classroom. Prerequisite: SPA 201 or equivalent. This course is not open to native or heritage speakers of Spanish. Fulfills the GEP non-native language requirement.
Prerequisites: SPA 201 or Spanish 201 Placement with a score of 1 or Language Placement with a score of SP202
Restrictions: Students with the Spanish 301 Placement attribute may not enroll.
Attributes: Latin American Studies Course, Undergraduate

SPA 210 Intermediate Spanish I (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in classroom. This course is reserved for PLS students. Prerequisite: SPA 111 or equivalent. Fulfills the GEP non-native language requirement.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

SPA 211 Intermediate Spanish II (3 credits)
Proficiency-based instruction will encourage the development of speaking, reading, writing and listening comprehension. Instruction of basic grammar and pronunciation will accompany active student participation in task-oriented group work in classroom. This course is reserved for PLS students. Fulfills the GEP non-native language requirement.
Prerequisites: (SPA 211 or SPA 1211)
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate
SPA 212 Second Year Spanish II (3 credits)

SPA 301 Spanish Conversation (3 credits)
This course is designed to help students improve their oral communication skills in Spanish through participation in interactive tasks. Much attention will be paid to the practice of new vocabulary. Discussion of grammar and communicative strategies will be integrated as needed in order to facilitate students’ attempts at various rhetorical functions, such as describing, narrating, explaining, defining, expressing and supporting opinions. This course is not open to native or heritage speakers of Spanish. Fulfills the GEP non-native language requirement. With some limitations, this course may count toward the Latin American Studies minor.
Prerequisites: SPA 202 or Spanish 301 Placement with a score of 1 or Language Placement with a score of SP301
Attributes: Latin American Studies Course, Undergraduate

SPA 302 Spanish Composition (3 credits)
This course is designed to improve students’ ability to communicate in written Spanish and to develop the writing skills they will need to succeed in advanced Spanish courses. Skills are developed through a process-oriented approach to writing, including steps related to vocabulary generation, organizing an outline, writing a draft, editing and revising, and writing a final version. This course is not open to native or heritage speakers of Spanish. Prerequisite: SPA 301 or permission of the instructor. This course satisfies the GEP Writing Intensive requirement component. With some limitations, this course may count toward the Latin American Studies minor.
Prerequisites: SPA 301 or Spanish 302 Placement with a score of 1 or Language Placement with a score of SP302 and ENG 101
Attributes: Latin American Studies Course, Undergraduate, Writing Intensive Course- GEP, Writing Centered Course

SPA 303 Spa Conv for Heritage Speakers (3 credits)
This course is designed for Hispanic/Latino students whose family origin is a Spanish-speaking country and who speak Spanish in their households. The course aims to build vocabulary and develop oral and writing skills through the study of culture and topics of current interest from throughout the Spanish-speaking world. This course is open only to native and heritage speakers of Spanish. With some limitations, this course may count toward the Latin American Studies minor.
Prerequisites: Spanish 303 Placement with a score of 1 or Language Placement with a score of SP303
Attributes: Latin American Studies Course, Undergraduate

SPA 304 Sp Comp for Heritage Speakers (3 credits)

SPA 306 Spanish Conv & Composision II (3 credits)

SPA 310 Intro to Lit of Sp-Spkng Wrld (3 credits)
Through literature we can explore both the culture of a people and the universal themes and struggles that unite us. The experience of literature is enhanced when one has the framework for understanding literary works in their contexts. The purpose of this course is to introduce students to the reading and discussion of literature in Spanish. Students will read selections in both prose and verse. Authors and texts will vary but will represent the literatures of Latin America and Spain. This course is part of the Latin American Studies Program and as such will present a majority of works from Latin America. Satisfies the Art/Lit requirement. Latin American Studies.
Prerequisites: SPA 302 or SPA 303 or Language Placement with a score of SP310
Attributes: GEP Art/Literature, Latin American Studies Course, Undergraduate

SPA 311 Introduc to Spanish Literature (3 credits)
This course introduces students to major literary works and also “non-canonical” texts of Spain’s literature. Through a representative sampling of short stories, poems, essays, and plays, students are introduced to the analysis of the principal literary movements from medieval times to contemporary Spain. The course also examines non-canonical genres like comic, graphic novel, and flash fiction. Fulfills the GEP Art/Lit requirement.
Prerequisites: SPA 302 or SPA 303
Attributes: GEP Art/Literature, Undergraduate

SPA 312 Span Conversation & Comp II (3 credits)

SPA 320 Cur Evnts in the Sp-Lang Media (3 credits)
This course is designed to help students advance their communication skills in Spanish as well as their critical thinking skills as they research and discuss current issues in Latin America, as reported in the Spanish-language media. Topics will fall under a wide range of categories, such as ecology and the environment, social issues, international and domestic politics, culture (both popular and “high”), business and economics, and science and technology. Primary sources of information include Spanish-language online journals, radio and television broadcasts. Latin American Studies.
Prerequisites: SPA 302 or SPA 303
Attributes: Undergraduate

SPA 330 Spanish for Business (3 credits)
This course will acquaint the student with business terminology and phraseology used in Spain and Latin America. Business letters will be composed and answered in Spanish. Special information on such fields as advertising, foreign trade, transportation, money, banking, and finance will be presented and studied in Spanish. Problems of grammar and style will be studied as the need arises. Prerequisite: SPA 301 or 303.
Prerequisites: SPA 301 or SPA 303
Attributes: Undergraduate

SPA 331 Span for Internatnl Business (3 credits)
This course is principally for students who are majoring in the Haub School of Business. This class will assist students in a career in Business or International Relations. Comparisons will be made among the business practices of different Spanish speaking countries. All activities will be in Spanish. Prerequisite: SPA 301 or 303.
Prerequisites: SPA 301 or SPA 303
Attributes: Undergraduate

SPA 340 Advanced Spanish Conversation (3 credits)
The purpose of this advanced level course is to help students improve their oral Spanish by engaging in a variety of interactive tasks. Students will build on their current knowledge of Spanish grammar and vocabulary and will be encouraged to take linguistic risks. They will be given opportunities to create sustained discourse and to communicate in various contexts in order to accomplish a variety of communicative functions. This course is not open to native or heritage speakers of Spanish. Prerequisite: SPA 301.
Prerequisites: SPA 1321 or SPA 1331 or SPA 1341 or SPA 302 or SPA 310 or SPA 311 or Language Placement with a score of SP340
Attributes: Undergraduate

SPA 341 Advanced Spanish Composition (3 credits)
This advanced level course is designed to build on students’ current Spanish writing skills. The course is aimed at improving students’ ability to communicate in written Spanish in various writing contexts. Students’ writing skills are developed through a process-oriented approach to writing. Prerequisite: SPA 302 or 303.
Attributes: Undergraduate
SPA 342 Advanced Spanish Grammar (3 credits)
This course will provide a detailed review of Spanish grammar, analyzed on both theoretical and applied levels. We will consider discursive, lexical and syntactic topics related to the Spanish language that represent areas for linguistic analysis and are usually problematic for advanced English-speaking learners of Spanish. This course is designed to help students begin to develop skills in linguistic analysis as well as improve their knowledge about and use of Spanish grammar. This course will benefit students who are majoring or minoring in Spanish as well as students who are specifically considering careers in which Spanish will play a central role. Emphasis will be placed on the role of linguistics and grammatical competence in language teacher education. Students will consider how these topics affect the relationship between their understanding of grammatical structures and their actual oral and written proficiency. This course also counts for a Linguistics minor. This course is not open to native or heritage speakers of Spanish. Prerequisite: SPA 302 or permission of instructor.
Prerequisites: SPA 302
Attributes: Undergraduate

SPA 350 Intro to Latin Amer Cultures (3 credits)
The purpose of this course is to orient students to the diverse peoples and places of Latin America. Students will use Spanish to discuss the geography, history, politics and cultures of the region. Some attention will be paid to current issues in Latin America, as reported in online news sources from the region. Prerequisite: SPA 302 or 303 (the latter as pre or co-requisite). This course satisfies the Non-Western Area Studies requirement. Latin American Studies.
Prerequisites: SPA 302 or SPA 303 or Language Placement with a score of SP350
Attributes: Latin American Studies Course, Non-Western Studies (GEP), Undergraduate

SPA 351 Intro to Spanish Cultures (3 credits)
The purpose of this course is to orient students to Spain’s rich and diverse cultural heritage, varied terrain and dynamic history. Students will also discuss current issues and events, as reported in Spanish online news sources. Prerequisite: SPA 302 or 303 (the latter as pre or co-requisite). Students may not count both 351 and 356 for credit toward a Spanish major or minor. Both may be taken but only one may count for major/minor credit. The other may count for elective credit, and SPA 356 can satisfy the GEP Art/Lit requirement.
Prerequisites: SPA 302 or SPA 303 or Language Placement with a score of SP351
Attributes: Undergraduate

SPA 352 Modern to Postmod City in SpCulture (3 credits)
Cities are the stage of social and political changes at the same time that these events transform the urban space. On occasion, alterations are sudden and traumatic such as the devastation and reconstruction after a war. However, transformations are most often caused by economic and social factors which are subtle and happen over a long period of time. For these reasons, the city has captivated the imagination of writers and filmmakers alike. This course examines representations of Spanish cities from the nineteenth to the early twenty-first century. The course will be divided into three periods in which Spanish society and its main cities underwent important changes. The first analyzes the incipient modernization of the society during the second half of the nineteenth century and early twentieth century. The second focuses on the years after the Civil War, examining the socioeconomic hardships of the 40s and 50s, the reconstruction of the urban space, and the rural immigration to Madrid and Barcelona due to the shift from an agricultural to an industrial economic model. Finally, the third period signals the incorporation of Spanish society into the global world during the last thirty years. The new democracy not only implied new rights, but also opening up to the free market and rampant capitalism which transformed the structure of society and cities. Fulfills the Art/Lit requirement.
Prerequisites: SPA 302 or SPA 303
Attributes: GEP Art/Literature, Undergraduate

SPA 355 Rio de la Plata: Study Tour (3 credits)
This course is a study tour of different geographical points of the Southern Cone region (South America): Montevideo, Colonia and Punta del Este (Uruguay), Buenos Aires and Iguazú Falls (Argentina). The aim of the course is to improve students’ knowledge of Latin American socio-political, historical and cultural reality—of the Southern Cone region, in particular—, through the study of the history, geography and sociology of the region, as well as through the study of its literature, music, painting, and other artistic manifestations. Lectures, visits to museums and cultural sites, films, and meetings with local personalities will be part of our activities. Students will be able to focus on a field of interest in their research papers, sharing their findings with the class in oral presentations. Lectures, readings, journals, discussions, oral presentations, exams and papers will be in Spanish. This course counts toward a minor or major in Spanish, or it can be used as an elective course. Prerequisite: Fulfills the Art/Lit requirement. Latin American Studies.
Attributes: GEP Art/Literature, Undergraduate

SPA 356 Spain: Study Tour (3 credits)
Spain is one of the most dynamic countries in Europe today. It’s a mixture of the old and new. Some of the major influences of the ancient and contemporary worlds will be studied through history, literature, film, art, architecture, regional languages, politics, economic development and music. The highlight of the course is the experience in Spain itself. Prerequisite: SPA 301 or 303 or permission of the instructor. Students may not count both 351 and 356 for credit toward a Spanish major or minor. Both may be taken but only one may count for major/minor credit. The other may count for elective credit. Fulfills the Art/Lit requirement.
Prerequisites: SPA 301 or SPA 303
Attributes: GEP Art/Literature, Undergraduate
SPA 360 Spanish in the Community (4 credits)
This service-learning course focuses on cultural, social, historical, linguistic, and political issues relevant to Latin communities in Philadelphia. The course is designed to promote solidarity with Latinos, learn about cultural norms and values, reflect on issues of social justice prevalent in these communities, and develop oral and written proficiency in Spanish. Class materials include both written and community texts, presentations, film and news media. Active participation in both the community and the classroom are key components of the course. In addition to classes on campus, each student will carry out three hours per week of work at a designated service placement site in a Latin community in or near Philadelphia. This class focuses on learning how to "read the texts" of your service experience, how to read the texts of concepts and theories and how to make connections between the two.
Prerequisite: SPA 302 or 303. This is a Service Learning course. Latin American Studies.
Prerequisites: SPA 302 or SPA 303
Attributes: Latin American Studies Course, Undergraduate

SPA 361 Faith, Just & SpSpking Com II (4 credits)

SPA 370 Topics in Spanish (3 credits)
The purpose of this course is to explore specific topics within the literatures and/or cultures of the Spanish-speaking world. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. Prerequisite: SPA 302 or 303.
Prerequisites: SPA 302 or SPA 303 or Language Placement with a score of SP370
Attributes: Undergraduate

SPA 375 Translation (3 credits)

SPA 380 Intro to Spanish Linguistics (3 credits)
This course is an introduction to the study of language and principles of Spanish linguistics including: the sound system (phonetics and phonology), the formation of words (morphology), sentence structure (syntax), as well as word and sentence meaning (semantics); in addition, we will discuss linguistic change throughout time (historical linguistics), linguistic variation in geographical space (dialectology) and within society (sociolinguistics), language use for communication (pragmatics), language learning (second language acquisition), and language teaching (pedagogy and applied linguistics). This course also counts for a Linguistics minor. Prerequisite: SPA 301 or 303.
Prerequisites: SPA 301 or SPA 303 or Language Placement with a score of SP380
Attributes: Undergraduate

SPA 396 Spanish AP Course (3 credits)

SPA 401 Topics in Latin Am Cultures (3 credits)
This course is a focused study of select aspects of Latin American cultures. It is designed to help students build a framework for understanding some of the geographical, historical, social, and political circumstances that have shaped Latin American realities and cultural manifestations. The course will take a thematic approach, and topics will vary. Prerequisites: SPA 302 or 303 and at least one other SPA course at the 300 or 400 level. It would be helpful though not required that the student have some kind of introduction to Latin America prior to or concurrent with this course. Latin American Studies.
Attributes: Non-Western Studies (GEP), Undergraduate

SPA 402 Topics in Spanish Cultures (3 credits)
This course provides an in-depth look at select aspects of Spanish cultures and civilization. It also provides a framework for understanding these cultural manifestations within their geographical, historical, political and social contexts. The course will take a thematic approach, and topics will vary. Prerequisites: SPA 302 or 303 and at least one other SPA course at the 300 or 400 level. It would be helpful though not required that the student have some kind of introduction to Spain prior to or concurrent with this course.
Attributes: Undergraduate

SPA 410 Old Wrd to New Wrd Hsp Lit (3 credits)
SPA 411 Mod Wld to Pres Wld in Hsp Lit (3 credits)
SPA 420 Major Latin American Authors (3 credits)
An in-depth study of selected texts by major authors in different genres (poetry, fiction, essay, and theater) with special emphasis on the interrelationship of genre, form, and content. Fulfills the GEP Art/Lit requirement. Latin American Studies.
Prerequisites: Language Placement with a score of SP420
Attributes: GEP Art/Literature, Undergraduate

SPA 421 Shrt Mod Latn Am Novel & Film (3 credits)
Analyzing these “novelas” we study the (re)construction of national identity through the modern literary discourse in particular, and the question of the development of Latin American identities, in general.
Goals: throughout our literature readings and analysis we intend to answer questions such as how do these narrative texts articulate a discourse of Latin American identity; how is Latin America culturally different; what makes it culturally "the other" in relation to Occidental hegemonic cultures; should we talk about Latin American identity or/ and regional/ national identities. Ways of approaching the identity questions may be: studying technical innovations that disarticulate the traditional realistic discourse of the novel of XIX century; seeing the ways these texts re-textualize the social history of Latin-America, like for example the testimonial novel; studying some examples of magical realism and the fantastic as forms of constructing/ textualizing our identities; mapping Latin American region, cities/country; studying the ways that Latin American people are constructed in this narrative, as well as their cultures, reaching the political, ideological, social subtexts of these novels. Possible authors: Gómez de Avellaneda, Bombal, Onetti, R. Castellanos, E. Garro, Sábato, Fuentes, Vargas Llosa, Carpentier, García Márquez, Rufio, Benedetti, M. Traba, Peri Rossi, Cortázar, Galeano, T. Mercado, Giardinelli, A. Gorodischer, L. Heker, S. Molloy, G. Gambaro, I. Verolín, among others. Fulfills the GEP Art/Lit requirement. Latin American Studies.
Attributes: Undergraduate
SPA 422 Cult, Dictshp & Exile: 1973-85 (3 credits)
In this course we study different aesthetic discourses of the dictatorship period between 1973 and 1985, in the Latin American Southern Cone. According to the theories of Jameson and Terdiman, among others, we consider these discourses as an arena of social and ideological struggle. We will elucidate the ways in which these cultural texts register and articulate that struggle in relation to the social and political situation of the region. In addition, we will consider the different ways social imaginary is refracted in those aesthetic products, reconstructing the ideologies within their subtexts. Some of the following cultural expressions of the period are selected to be studied in this course: Movies/Videos: Un lugar en el mundo, Los ojos de los pájaros, Missing, La historia oficial (The Official History), La noche de los lápices, Death and the Maiden, School of Assassins, Machuca. Literary Texts: narrative by Partnoy, Galeano, Traba, Benedetti, Valenzuela, Dorfman; poetry by Benedetti, Rosencof, Gelman, La canción de los presos (Anonymous). Lyrics: by D. Viglietti, M. Sosa, V. Jara, L. Gieco, Sting, among others. Fulfills the GEP Art/Lit requirement. Latin American Studies.
Prerequisites: SPA 310 or SPA 350
Attributes: GEP Art/Literature, Latin American Studies Course, Undergraduate

SPA 423 Latin Am Modern Short Story (3 credits)
This course includes the reading of short stories and nouvelle within the boundaries of a social and ideological framework. The (re)construction of national identities through modern narrative discourse and the development of a Latin American identity in general will be discussed in this course. Authors: Darío, Quiroga, Felisberto Hernández, Borges, Biy Casares, Mujica Láinez, Cortázar, Onetti, Poniatowska, Rufio, Carpenter, García Márquez, Galeano, Haroldo Conti, L. Padura Fuentes, R. Arenas, Irma Verónin, M. L.Valenzuela, R. Ferré, Zoé Valdés, A. Somers, Benedetti, Peri-Rossi, etc. Students’ tasks may include: journal of critical readings; mid-term and final exams; final research paper. This course fulfills the GEP Art/Lit requirement. Latin American Studies.
Attributes: GEP Art/Literature, Undergraduate

SPA 424 Discourse of Lat Am Modernity (3 credits)
This course will focus on the use of the poetic discourse of Latin American Modernity as a means of constructing identity, from an aesthetical-ideological perspective. We will analyze this poetic discourse beginning with Modernism on through the Transitional Period and the Vanguard, ending with the poetry of social issues of the 70s. This course fulfills the GEP Art/Lit requirement. Latin American Studies.
Attributes: GEP Art/Literature, Undergraduate

SPA 425 Imagery of the Conquest (3 credits)
Most official histories of early contact between Europeans and Amerindians in Latin America will present a Eurocentric version of American reality. This course will explore Amerindian and mestizo perspectives as expressed through a variety of texts, such as narrative, poetry and song, illustrations and painting, maps, uprisings, and other forms of expression. The objective is to better understand pre-Colombian civilizations and the effects of European colonization on Amerindian cultures. The course will analyze how Amerindian and mestizo subjects authorize their voices, represent their own unique identities, and respond to the cultural changes brought about through conquest and colonization. Prerequisites: SPA 302 or 303 and at least one other SPA course at the 300-400 level. It would be helpful though not required that the student have some kind of introduction to Latin America prior to or concurrent with this course. This course fulfills the GEP Art/Lit and the Non-Western Studies requirements. Latin American Studies.
Attributes: GEP Art/Literature, Non-Western Studies (GEP), Undergraduate

SPA 426 Culture in Revolution (3 credits)
In this course students will become familiar with three main milestones of Latin American history and culture in the 20th century: the Mexican, Cuban and Nicaraguan Revolutions. Beginning with a discussion of the concept of “revolution” and a brief historical introduction to these periods, we will focus specifically on the cultural policies of the new regimes, with particular emphasis on the literacy campaigns derived from those policies. Students will also become familiar with the different cultural manifestations of those periods, including literature, visual arts, and popular music. Prerequisites: SPA 302 or 303; and either SPA 310, 350 or 355 or permission of instructor. This course fulfills the GEP Art/Lit requirement. Latin American Studies.
Prerequisites: (SPA 310 or SPA 350 or SPA 355)
Attributes: GEP Art/Literature, Undergraduate

SPA 427 Iden & Power in Am:1350-1650 (3 credits)
In this interdisciplinary course, students will use both primary and secondary sources to examine the construction of identities and the relations between different kinds of power—for example, military, social, political—among three distinct peoples who built imperial states in the Americas: the Aztec, the Inca, and the Spanish. The first part of the course will address each of these three cultures in the era leading up to the Spanish exploration and conquest of the Americas. In the second part of the course, students will analyze changes in the construction of identity and power wrought by European-indigenous contact. This course fulfills the GEP Art/Lit requirement. Latin American Studies.
Attributes: GEP Art/Literature, Undergraduate

SPA 430 Nar of Euro Explor & Con in Am (3 credits)
SPA 431 Commonplaces of Colonial Exp (3 credits)
In this course students think about how various spaces became places through human experience in Colonial Spanish America. They engage in reflective discussion about the physical conditions, value systems, beliefs and politics that created such places and, in some cases, have changed their meaning over time. They explore the dynamics of spaces endowed with different values by different peoples at different times. Through these discussions students think about some commonplaces of colonial experience, as well as the experience of colonial legacies and colonial places in the 21st century. Prerequisites: SPA 302 or 303 and at least one other SPA course at the 300 or 400 level. It would be helpful though not required that the student have some kind of introduction to Latin America prior to or concurrent with this course. This course fulfills the Art/Lit and the Non-Western Area Studies requirements. Latin American Studies.
Prerequisites: SPA 302 or SPA 303
Attributes: GEP Art/Literature, Non-Western Studies (GEP), Undergraduate

SPA 440 Major Spanish Authors (3 credits)
A study in depth of one or two major authors; the choice to be determined by the instructor. This course fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate

SPA 441 Love, Cortshp & Vio in Med Lit (3 credits)
SPA 442 Passions Hrt & Soul in Imp Snp (3 credits)
SPA 443 Gender, Sexility & Soc Conflict (3 credits)
Reading, discussion, and analysis of selected works in 16th and 17th century Spanish drama. This course fulfills the GEP Art/Lit requirement.
Attributes: GEP Art/Literature, Undergraduate
SPA 440 Don Quixote (3 credits)

SPA 445 Lit Spn of Ignatius of Loyola (3 credits)

SPA 446 Romanticism and Realism (3 credits)

SPA 447 The Gen of 1898 & Modernismo (3 credits)
A seminar course on some of the authors of this generation, Unamuno, Machado, Maria Martínez Sierra, and the impact of Modernismo on Spanish literature. This course fulfills the GEP Art/Lit requirement.

Attributes: GEP Art/Literature, Undergraduate

SPA 448 The Posguerra Generation (3 credits)
An in-depth study of the contemporary figures of Spanish literature from the Spanish Civil War to Franco’s death. Emphasis will be placed on the new trends in the novel and the theater. This course fulfills the GEP Art/Lit requirement.

Attributes: GEP Art/Literature, Undergraduate

SPA 449 Spanish Literature and Film (3 credits)
Films by contemporary Spanish directors (Buñuel, Saura, Camus, Erice) based on literary works from the 19th and 20th centuries (Galdós, Unamuno, Lorca, Delibes) comparing cinematographic techniques with their literary counterparts. Emphasis will be placed on a theoretical approach as well as the socio-political context of the respective works. This course fulfills the GEP Art/Lit requirement.

Attributes: GEP Art/Literature, Undergraduate

SPA 450 Spain into the 21st Century (3 credits)
A seminar on the cultural changes which have taken place in Spain since Franco’s death in 1975, as they are reflected in the contemporary novel, short story, and film. The objective of the course is to give a comprehensive understanding of the "New Spain" which has emerged in the last thirty years of Democracy. Our approach will be a critical analysis of the works paying attention to literary and cultural trends, themes and techniques within the context of the socio-political times. Readings, class discussions, oral presentations, and papers will be totally in Spanish. This course fulfills the GEP Art/Lit requirement.

Attributes: GEP Art/Literature, Undergraduate

SPA 451 Narrative cine la Esp democrat (3 credits)
This course examines narrative and film in Spain from the demise of the Franco dictatorship (1975) until today. In doing so, the course focuses on cultural and aesthetic renovations such as the cinema of Pedro Almodovar in the “movida madrileña” and the new representations of Spanish youth in the 1990s with the “generación Kronen.” This course also analyzes additional approaches for understanding Spanish culture through the social cinema of Fernando León de Aranoa, and the role of Franco’s traumatic dictatorship in today’s society. Finally, we will examine the current socioeconomic crisis in Spanish society and how it affects younger generations.

Prerequisites: SPA 302 and (SPA 310 or SPA 350 or SPA 355) and PHL 154

Attributes: Ethics Intensive (New GEP)

SPA 452 Hist. on Screen: Hist/Culture (3 credits)
This course examines Spain’s history and culture through the analysis of historical films. The course begins with an introduction to the concept of History and a definition of historical films. After this introduction the course will focus on some key historical periods of Spanish history such as the Conquest of America with Iciar Bollain’s feature film También la lluvia; the rise and decay of the Spanish empire in Alatriste by Augustin Diaz Yanes; and the Spanish Civil War with the analysis of José Luis Saénz de Heredia’s Raza, among others. The class also deals with cultural issues that have affected Spain throughout its history focusing on issues of national and regional identity such as, for instance, the separatist movement of part of Basque Country’s society and the terrorist group ETA in the documentary La pelota vasca by Julio Médem. In addition to introducing students to key moments and aspects of Spanish history and culture, this course invites students to think critically about History’s objectivity and how historical events are often shaped to satisfy current political projects. Other underlying issues will be reflected on whether film may be considered History. Fulfills the GEP Art/Literature requirement.

SPA 455 Women in Spanish Literature (3 credits)
Feminist interpretation of major works of a given period of Peninsular or Latin American literature. Choice to be determined by instructor.

Prerequisite: SPA 310. This course fulfills the Art/Lit requirement.

Attributes: GEP Art/Literature, Undergraduate

SPA 456 Women’s Voices in 20th Cen Fic (3 credits)

SPA 460 A Ling Approach to Oral Com (3 credits)
In this course, we will analyze communication from a linguistic perspective and also focus on the development of advanced oral communication skills. Drawing on current research in the field of linguistics (including discourse analysis, cross-cultural communication, semantics, pragmatics, etc.) we will explore various aspects of "communication" as well as study methods used to investigate oral communication. Significant class time will also be devoted to the continued development of students' own communicative competence and oral language proficiency. Students will engage in activities aimed at developing their interpersonal and presentational communicative skills. This course will be beneficial to students who are majoring or minoring in Spanish as well as those who plan to use Spanish for personal or professional reasons outside the classroom. Because of its emphasis on communication skills for non-native speakers, this course is not open to native or heritage speakers of Spanish. This course also counts for a Linguistics minor. Prerequisite: SPA 302.

Prerequisites: SPA 302

Attributes: Undergraduate

SPA 461 Methods for Teaching Spanish (3 credits)
This course is designed for students who are potentially interested in teaching Spanish at the university, secondary or elementary levels. We will explore general aspects of Spanish phonology, morphology, syntax, and semantics as they bear upon teaching the Spanish language. Topics discussed include second language acquisition, pedagogical theory, materials preparation and language teaching methodology. This course also counts for a Linguistics minor. Prerequisites: SPA 302 or 303; and SPA 380.

Prerequisites: (SPA 380) and SPA 302 or SPA 303

Attributes: Undergraduate
SPA 466 Spanish Dialectology (3 credits)
In this course, students will become familiar with the range of dialect features exhibited in the Spanish spoken in Spain, Latin America, and the US. We will also discuss the relationship between language and dialect, examine the role of the standard language in both written and oral usage, and identify the factors that have contributed to the diversity of the Spanish language. This course also counts for a Linguistics minor.
**Prerequisites:** SPA 302 or 303, Latin American Studies.
**Attributes:** Latin American Studies Course, Undergraduate

SPA 467 Lang Contact & Pol in U.S. (3 credits)
This course is designed to engage students in a review critical analysis of the history and politics of language contact within the context of the United States. Given the demographic shifts in population taking place currently in the U.S., the course will focus primarily on the contact between Spanish and English. We will discuss bilingualism and the characteristics of language contact, language ideologies, language planning and policy, official English movements, and bilingual education. We will examine the language of hegemony used to maintain the dominance of English vis-a-vis Spanish (and other languages) present in our society. We will also do some comparative study connecting this reality to what is happening with Spanish in other situations of language contact. This course also counts for a Linguistics minor. Prerequisite: SPA 302 or SPA 303
**Attributes:** Diversity requirement. Latin American Studies.

SPA 468 Spanish Phonetics & Phonology (3 credits)
This course consists of a theoretical investigation of the phonetic/phonological system of the Spanish language. Practical emphasis will be placed on aspects of the Spanish sound system that are typically problematic for the native speaker of English learning Spanish. The course will also consist of an investigation of some of the more salient features of Spanish dialectology at the phonetic and phonological levels. This course also counts for a Linguistics minor. Prerequisite: SPA 302 or 303.
**Prerequisites:** SPA 302 or SPA 303
**Attributes:** Undergraduate

SPA 470 Topics in Spanish (3 credits)
The purpose of this course is to explore specific topics within the literatures and/or cultures of the Spanish-speaking world. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. Prerequisites: SPA 302 and at least one 300-level SPA course in culture or literature (such as 310, 350, 351, 355 or 356) or instructor’s approval.
**Prerequisites:** SPA 302 or Language Placement with a score of SP470
**Attributes:** Undergraduate

SPA 480 Topics in Spanish Linguistics (3 credits)
The purpose of this course is to explore specific topics within the field of linguistics as they relate to the Spanish language. Topics will vary according to the semester in which the class is offered; check the semester listing for current topic. This course also counts for a Linguistics minor. Prerequisite: SPA 302 or 303.
**Prerequisites:** SPA 302 or SPA 303
**Attributes:** Undergraduate

SPA 490 Spanish Internship I (3 credits)
This course is a practicum in which the student applies his/her communication skills in Spanish in a work environment related to his/her professional area. The majority of the work for this course is that performed at the internship site. The student is responsible for securing the internship site and will meet with the professor prior to the semester in which the internship is to take place in order to discuss the course requirements and expectations. During the practicum, the student will reflect upon his/her experience at the internship site in written assignments and in regular meetings with the professor. At the end of the semester, the student will submit a final paper or will deliver a final presentation based on his/her internship experience. This course is intended as an advanced course for Spanish majors or minors who have completed the other course requirements for the major or minor.
**Prerequisites:** SPA 302 or 303.
**Attributes:** Undergraduate

SPA 491 Spanish Internship II (3 credits)
This course is a practicum in which the student applies his/her communication skills in Spanish in a work environment related to his/her professional area. The majority of the work for this course is that performed at the internship site. The student is responsible for securing the internship site and will meet with the professor prior to the semester in which the internship is to take place in order to discuss the course requirements and expectations. During the practicum, the student will reflect upon his/her experience at the internship site in written assignments and in regular meetings with the professor. At the end of the semester, the student will submit a final paper or will deliver a final presentation based on his/her internship experience. This course is intended as an advanced course for Spanish majors or minors who have completed the other course requirements for the major or minor.
**Prerequisites:** SPA 302 or 303.
**Attributes:** Undergraduate

SPA 493 Independent Research in Span I (3 credits)
Prerequisites: SPA 310; and 350, 351, 355 or 356; and 380. Also, non-heritage speakers of Spanish need to have taken SPA 302.
**Attributes:** Undergraduate

SPA 494 Independent Research in Spn II (3 credits)
Prerequisites: SPA 310; and 350, 351, 355 or 356; and 380.
**Attributes:** Undergraduate

### Chinese Language and Culture Minor
Requirements for the minor are: 6 courses (18 credits), including the following, with one course in Chinese culture, which may be taken in English, from a pre-approved list.

### Francophone Studies Major
**Learning Goals and Objectives**

*On completing the major in Francophone Studies, students will:*

**Goal 1.** Have a nuanced understanding of the Francophone world as a whole, viewed through multiple disciplinary perspectives.
Objective 1.1: Students will be able to display knowledge of the formal structures of La Francophonie.

Objective 1.2: Students will demonstrate an ability to apply theoretical frameworks, intellectual standards or analytical techniques from at least two distinct disciplines to issues in the Francophone world.

Goal 2. Have an understanding of the colonial and postcolonial history of France and at least one other region in the Francophone world.

Objective 2.1: Students will be able to speak in general terms about the historical background and the postcolonial evolution of metropolitan France and at least one other French-speaking region of the world.

Objective 2.2: Students will demonstrate an ability to speak and write knowledgeable about colonial and postcolonial relations between at least one Francophone region and metropolitan France.

Goal 3. Have an understanding of one significant culture of a major Francophone region, including its relations with mainstream French language and cultural traditions.

Objective 3.1: Students will demonstrate an ability to speak knowledgeable about one significant Francophone culture outside of France.

Objective 3.2: Students will be able to explain the cultural relations of at least one Francophone region with France.

Goal 4. Be able to use French effectively as a vehicle for communication.

Objective 4.1: Students will demonstrate that they can narrate and describe in spoken French with few major errors.

Objective 4.2: Students will demonstrate that they can compose substantive written texts in French with few major errors.

Objective 4.3: Students will be able to pursue research, gather data, do analysis and report results and conclusions by using French as a tool of investigation and as a means of communication.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

GEP Electives
A varying number of courses, typically nine to twelve.

Major Concentration
The Francophone Studies major is an interdisciplinary program designed for students interested in the language, literature and culture of France, but also the art, history, philosophy and political systems of the wider French-speaking world. The major is also appropriate for students interested in multiple academic disciplines and cross-discipline perspectives. The Francophone Studies major requires 10 courses:

• All students must complete FRE 315, The Francophone World (or a substitute course in French/Francophone culture/civilization)
• A minimum of four additional courses in French language, culture or literature, of which two will be at the level FRE 301-FRE 320 and two will be at the level FRE 321 or higher.
• The other five courses may be in English and will be chosen from at least two of the three categories listed below.

French Major

Mission
In a complex, increasingly interdependent world community, the French program helps students become articulate, knowledgeable and culturally aware global citizens in accordance with the values and traditions of Saint Joseph’s University and of the Society of Jesus. We actively pursue this mission by:

• Fostering proficiency in French
• Promoting an appreciation for the richness and complexity of language in general
• Deepening students’ understanding of cultural diversity
• Encouraging student engagement in active, collaborative and critical learning in the French-language classroom
• Emphasizing learner-centered pedagogy and care for the individual

On completing the major in French, students will:

**Goal 1: Effective communication in the target language (TL)**

**Outcome 1.1:** Students will narrate and describe in the TL in spoken form in all major time frames using connected discourse of paragraph length with general clarity of lexicon and a moderate level of detail.

**Outcome 1.2:** Students will compose written texts in the TL that summarize, evaluate or describe concrete or abstract items, notions, events or persons, in major time frames in paragraph length discourse, with a lexicon relevant to the topic.

**Goal 2: Critical and interpretive thinking in the target language (TL)**

**Outcome 2.1:** Students will interpret and analyze the main ideas, relevant facts and details about works of literary, cinematic and/or artistic expression in the target language (TL).

**Outcome 2.2:** Students will be able to pursue research, gather data, do analysis and report results by using TL as a tool of investigation and as a means of communication.

**Goal 3: Knowledge of the target language (TL) culture(s)**

**Outcome 3.1:** Students will be able to describe accurately in the TL with moderate detail some aspect of the TL cultures (perspectives, products, and/or practices)

**Outcome 3.2:** Students will compare and contrast in the target language similarities and differences between the students’ own cultures and those of the target language (TL).

**Goal 4: Inclusion and diversity**

**Outcome 4.1:** Students will articulate and defend multiple perspectives on diverse human beliefs, abilities, experiences, identities, or cultures in a global context.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

**General Education Signature Courses**
See this page about Signature courses (p. 26). Six courses

**General Education Variable Courses**
See this page about Variable courses (p. 26). Six to Nine courses

**General Education Overlays**
See this page about Overlays (p. 27).

**General Education Integrative Learning Component**
See this page about Integrative Learning Component (p. 27). Three courses

**GEP Electives**
A varying number of courses, typically nine to twelve.

**Major Concentration**
The French major emphasizes the acquisition of competence in spoken and written French, a sound understanding of the structures of modern French, and the ability to understand and analyze literary texts and cultural notions from a variety of periods. All courses are offered in French.

Course requirements for the major in French are as follows:

- Three courses numbered 202 to 320
- Seven courses numbered 321 or higher

Students in French are strongly encouraged to participate in a study abroad program in France, Quebec, Canada; or Senegal (or another country). Please see Study Abroad. Courses from other institutions must be pre-approved by the Associate Dean of Humanities in consultation with Dr. Burr, the study abroad coordinator in French.

**Study Abroad Courses**
For summer study at the Université Laval in Quebec, Canada; and semester-long programs in Paris, France; and Dakar, Senegal, see Study Abroad.

**French Honor Society**
The department has an active chapter of Pi Delta Phi, the National French Honor Society. A yearly initiation ceremony is held during the spring semester. Qualified students are encouraged to apply; please contact the French faculty for more information.

**French Minor**
Completing the French Minor requires taking six courses (18 credits) numbered FRE 202 or higher. For further information, please contact Dr. Kristin Burr.

**German Major**

**Learning Goals and Objectives for the Major in German**

**Goal 1: Effective communication in the target language (TL)**

**Outcome 1.1:** Students will narrate and describe in the TL in spoken form in all major time frames using connected discourse of paragraph length with general clarity of lexicon and a moderate level of detail.

**Outcome 1.2:** Students will compose written texts in the TL that summarize, evaluate or describe concrete or abstract items, notions,
events or persons, in major time frames in paragraph length discourse, with a lexicon relevant to the topic.

**Goal 2:** Critical and interpretive thinking in the target language (TL)

**Outcome 2.1:** Students will interpret and analyze the main ideas, relevant facts and details about works of literary, cinematic and/or artistic expression in the target language (TL).

**Outcome 2.2:** Students will be able to pursue research, gather data, do analysis and report results by using TL as a tool of investigation and as a means of communication.

**Goal 3:** Knowledge of the target language (TL) culture(s)

**Outcome 3.1:** Students will be able to describe accurately in the TL with moderate detail some aspect of the TL cultures (perspectives, products, and/or practices)

**Outcome 3.2:** Students will compare and contrast in the target language similarities and differences between the students’ own cultures and those of the target language (TL).

**Goal 4:** Inclusion and diversity

**Outcome 4.1:** Students will articulate and defend multiple perspectives on diverse human beliefs, abilities, experiences, identities, or cultures in a global context.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. **Diversity, Globalization or Non-western Area Studies,**
2. **Ethics Intensive,** and
3. **Writing Intensive.** Overlay requirements are part of the forty-course requirement.

**General Education Signature Courses**

See this page about Signature courses (p. 26). Six courses

**General Education Variable Courses**

See this page about Variable courses (p. 26). Six to Nine courses

**General Education Overlays**

See this page about Overlays (p. 27).

**General Education Integrative Learning Component**

See this page about Integrative Learning Component (p. 27). Three courses

**GEP Electives**

A varying number of courses, typically nine to twelve.

**Major Requirements**

Requirements for the German Major are: two language courses (GRM 201-GRM 202 or higher) and eight approved courses in the language of the major at the 300 or 400 level. The German Major has become popular in combination with either a Minor or another Major in the Arts, in the Sciences, or in Business. They offer a variety of international career opportunities. All courses for the German Minor and Major concentrate on German culture, literature, film, and business. All courses are offered in German. The approval of the Department of Modern and Classical Languages is needed both for the Minor and the Major. For further details and scholarship opportunities, please contact Dr. Thomas Buckley.

**German Honor Society**

The department has an active chapter of Delta Phi Alpha, the National German Honor Society. Qualified students are encouraged to apply. Please contact the German faculty for more information.

**Study Abroad**

Students of German are strongly encouraged to participate in a study abroad program for one year, one semester or a summer in a German-speaking country either within an academic program or as an intern in a German company or other organization.

**German Minor**

Requirements for the German Minor are: six courses beginning at the intermediate level GRM 201 or higher. These courses are chosen in consultation with the German advisor. For further details and scholarship opportunities, please contact Dr. Thomas Buckley.

**Italian Major**

**Learning Goals and Objectives for the Major in Italian**

**Goal 1:** Effective communication in the target language (TL)

**Outcome 1.1:** Students will narrate and describe in the TL in spoken form in all major time frames using connected discourse of paragraph length with general clarity of lexicon and a moderate level of detail.

**Outcome 1.2:** Students will compose written texts in the TL that summarize, evaluate or describe concrete or abstract items, notions, events or persons, in major time frames in paragraph length discourse, with a lexicon relevant to the topic.

**Goal 2:** Critical and interpretive thinking in the target language (TL)

**Outcome 2.1:** Students will interpret and analyze the main ideas, relevant facts and details about works of literary, cinematic and/or artistic expression in the target language (TL).

**Outcome 2.2:** Students will be able to pursue research, gather data, do analysis and report results by using TL as a tool of investigation and as a means of communication.

**Goal 3:** Knowledge of the target language (TL) culture(s)

**Outcome 3.1:** Students will be able to describe accurately in the TL with moderate detail some aspect of the TL cultures (perspectives, products, and/or practices)

**Outcome 3.2:** Students will compare and contrast in the target language similarities and differences between the students’ own cultures and those of the target language (TL).
Goal 4: Inclusion and diversity

Outcome 4.1: Students will articulate and defend multiple perspectives on diverse human beliefs, abilities, experiences, identities, or cultures in a global context.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

GEP Electives
A varying number of courses, typically nine to twelve.

Major Concentration
Course requirements for the major in Italian are as follows:

10 courses (30 credits), including ITA 201 and ITA 202 and eight courses at the 300 level or higher. 201/202 are waived if the language placement process determines that the student ought to begin studies in Italian in a course at a higher level.

The remaining ITA credits must include ITA courses at the 300 or 400 levels.

Italian Honor Society
The department has an active chapter of the National Italian Honor Society, Gamma Kappa Alpha. A yearly initiation ceremony is held during the spring semester. For more information, including requirements and an application, please visit the Italian Program homepage: http://www.sju.edu/academics/cas/mcl/languages/italian/honors.html.

Italian Studies Major
After completing the major in Italian Studies, students will be able to:

Goal 1: Communicate effectively in both spoken and written Italian

Objective 1.1: Successfully manage in spoken Italian a variety of uncomplicated communicative tasks in straightforward social and academic situations

Objective 1.2: Write compositions and summaries related to work and/or school experiences; narrating and describing in different time frames when writing about everyday events and situations.

Goal 2: Demonstrate knowledge of the grammatical structure of modern Italian

Objective 2.1: Narrate and describe in spoken Italian with general clarity of grammatical structures

Objective 2.2: Compose written texts in Italian with general clarity of grammatical structures

Goal 3: Develop modes of analysis and ways of critical and interpretive thinking that may be applied to a variety of career paths

Objective 3.1: Interpret the main ideas, relevant facts and details of authentic Italian language texts that are narrative and/or descriptive and that employ standard linguistic conventions for written expression.
Objective 3.2: Pursue research, gather data, do analysis and report results by using Italian as a tool of investigation and as a means of communication.

Goal 4: Demonstrate familiarity with theoretical frameworks that help to integrate the study of Italy and Italian culture into research in other fields.

Objective 4.1: Demonstrate knowledge of a selection of Italian texts and cultural artifacts (specific to their chosen area of concentration from classical times to the present) and the historical contexts in which they were created.

Goal 5: Demonstrate knowledge of contemporary Italian culture and current events.

Objective 5.1: Understand and explain significant cultural phenomena of the Italian-speaking world, including the value of Italian as a world language.

Goal 6: Respect diversity and difference both in the context of their own culture and globally.

Objective 6.1: Accurately describe with moderate detail—simply in Italian and with a more sophisticated expression in English—some aspect of the cultures (perspectives, products, and/or practices) of the Italian-speaking world.

Objective 6.2: Compare and contrast—simply in Italian and with a more sophisticated expression and greater level of detail, in English—similarities and differences between American cultures and those of the Italian speaking world.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Overlays
See this page about Overlays (p. 27).

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

GEP Electives
A varying number of courses, typically nine to twelve.

Major Concentration
The requirements for the Italian Studies major are 10 courses, of which 6 must be ITA courses at the 200, 300, or 400 level (conducted entirely in Italian). The remaining 4 courses may be conducted in English, and are interdisciplinary courses spanning a variety of disciplines, including Art, English, History, Music, Linguistics, Philosophy and Classics, including the following:

Study Abroad Courses
For study at SJU in Rome and Florence, Italy, see Study Abroad.

Spanish Major

**Learning Goals and Objectives for the Major in Spanish**

**Goal 1:** Effective communication in the target language (TL)

**Outcome 1.1:** Students will narrate and describe in the TL in spoken form in all major time frames using connected discourse of paragraph length with general clarity of lexicon and a moderate level of detail.

**Outcome 1.2:** Students will compose written texts in the TL that summarize, evaluate or describe concrete or abstract items, notions, events or persons, in major time frames in paragraph length discourse, with a lexicon relevant to the topic.

**Goal 2:** Critical and interpretive thinking in the target language (TL)

**Outcome 2.1:** Students will interpret and analyze the main ideas, relevant facts and details about works of literary, cinematic and/or artistic expression in the target language (TL).

**Outcome 2.2:** Students will be able to pursue research, gather data, do analysis and report results by using TL as a tool of investigation and as a means of communication.

**Goal 3:** Knowledge of the target language (TL) culture(s)
Outcome 3.1: Students will be able to describe accurately in the TL with moderate detail some aspect of the TL cultures (perspectives, products, and/or practices)

Outcome 3.2: Students will compare and contrast in the target language similarities and differences between the students’ own cultures and those of the target language (TL).

Goal 4: Inclusion and diversity

Outcome 4.1: Students will articulate and defend multiple perspectives on diverse human beliefs, abilities, experiences, identities, or cultures in a global context.

The Spanish major emphasizes the learning of both spoken and written Spanish, a sound understanding of the linguistic structures of modern Spanish, an appreciation for cultures of the Spanish-speaking world, and the ability to analyze literary texts from a variety of periods. Students may choose from a variety of offerings in Latin American or Peninsular literature, film, culture, language, and Spanish linguistics. All courses are offered in Spanish. See individual faculty members for more information.

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

Any approved Latin American Studies course outside of Modern and Classical Languages

Other courses that specifically focus on some aspect of the Spanish-speaking world may be approved as an IL course if deemed appropriate by the Spanish major advisor. Beginning with the class of 2016, Spanish majors will be required to complete an ACTFL certified proficiency test. A fee (to be paid directly to the testing service) will be required. For more information, refer to: http://www.languagetesting.com/academic.cfm and follow the links to Tests–Speaking–OPI. See Dr. Heather Hennes or Dr. Carmen Faccini for more information about the major.

GEP Electives
A varying number of courses, typically nine to twelve.

Major Concentration
Requires 10 SPA courses (30 credits) including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPA 202</td>
<td>Intermediate Spanish II (depending on placement)</td>

</tr>
</tbody>
</table>

The remaining SPA credits must include at least 2 4xx level SPA courses

¹ Heritage speakers of Spanish having completed SPA 303 complete a SPA elective in place of SPA 302.
² A student may count only one of these two courses toward the major or minor.

Study Abroad
Spanish majors and minors are strongly encouraged to study abroad in a Spanish-speaking country of their choice. The Center for International Programs (http://www.sju.edu/academics/centers/cip/studyabroad) provides information on SJU-approved programs in Argentina, Chile, Central America, and Spain, as well as programs in other Latin American countries, for which students may petition credit. Modern and Classical Languages faculty also offer Study Tour Courses to Argentina/Uruguay and Spain. Study Tours offered by other departments have included destinations such Bolivia, Cuba, the Dominican Republic and Nicaragua. Study Tours offered by other departments do not count toward the Spanish major or minor, (except as Integrative Learning courses for the major) but they do complement students’ interests in Spanish. Students who are interested in studying abroad should meet with Dr. Elaine Shenk, the Spanish Program Coordinator for Study Abroad.
Spanish Honor Society

The department has an active chapter, Omicron Phi, of the National Spanish Honorary Society Sigma Delta Pi. A yearly initiation ceremony is held in the spring semester. Qualified students are encouraged to apply; please contact the Spanish faculty for more information.

Spanish Minor

Requires 6 SPA course (18 credits) including:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPA 202</td>
<td>Intermediate Spanish II (depending on placement)</td>
<td>3</td>
</tr>
<tr>
<td>SPA 301</td>
<td>Spanish Conversation (depending on placement)</td>

</tr>
<tr>
<td>or SPA 303</td>
<td>Spa Conv for Heritage Speakers</td>
<td></td>
</tr>
<tr>
<td>SPA 302</td>
<td>Spanish Composition (^1)</td>
<td>3</td>
</tr>
</tbody>
</table>

\(^1\) Heritage speakers of Spanish having completed SPA 303 complete a SPA elective in place of SPA 302.

The remaining SPA credits must include SPA courses at the 300 and 400 levels. See Dr. Enrique Téllez-Espiga for more information about the minor.
**MUSIC, THEATRE AND FILM**

**Department Overview and Mission**

Built on the praxis of analysis and creation, the Department of Music, Theatre & Film offers a wide range of courses in two major degree programs – the B.A. in Music, and the B.A. in Theatre & Film (with a concentration in either Theatre, Musical Theatre, or Film/TV). In addition, the Department offers stand-alone minors in Music, Theatre Studies, and Film/TV, as well as being a partner department in the Music Industry minor. At the core of all degree programs are the shared values of historical insight, analytical rigor, technical proficiency, and creative expression.

Within each of its disciplines, the Department offers a breadth of courses that not only equip students with the tools to understand and evaluate an existing body of work, but also teach the necessary technical skills to bring their own work to fruition while fostering both creativity and engagement in the world around them. The curriculum aims to prepare students for careers in their respective fields or for further study at the graduate level, but perhaps more importantly, to give graduates a foundation of organizational, analytical, technical, and creative tools from which they might launch any future endeavor.

**Associate:** Deron Albright, M.F.A.; Renee Dobson, M.F.A.; Suzanne Sorkin, Ph.D
**Assistant:** Elizabeth Morgan, Ph.D.; Michael Wellenreiter, M.F.A.
**Visiting:** Catherine A. Hughes, Ph.D.

**Chair:** Sorkin

**Undergraduate Majors**
- Music (p. 361)
- Theatre & Film (p. 362)

**Undergraduate Minors**
- Music (p. 361)
- Film/TV (p. 360)
- Theatre (p. 364)

**MTF 141 Guitar Class for Beginners (1 credit)**
This class is intended as an introduction to acoustic and classical guitar techniques employed in contemporary guitar styles. The focus of this course will involve learning basic open chords, learning to read and play music on the guitar, bar chords, and basic fingerstyle technique. The course will also cover the fundamental music theory necessary for playing songs and basic fret board knowledge.

**MTF 142 History of Rock and Pop (3 credits)**
This course examines the history of popular music in the English-speaking world from the mid twentieth century to the present day. Genres examined include swing, doo-wop, rock and roll, soul, funk, disco, heavy metal, and punk.
**Attributes:** GEP Art/Literature

**MTF 143 Music in Film (3 credits)**
This course focuses on the ways music functions in narrative film. In the first weeks, students will develop analytical skills to describe the ways music can enhance, comment on, undermine, and direct a viewer’s interpretation. The remainder of the semester will follow a generally chronological structure, focusing on influential composers and directors, theoretical writings, and the wide variety of twentieth-century and twenty-first musical styles used in soundtracks. Class discussions and writing assignments will guide students in the study of the interlocking histories of music, film, politics, and culture. This course is designed for all students. Previous musical training is not required.
**Attributes:** GEP Art/Literature

**MTF 150 First Year Seminar (3 credits)**

**MTF 151 Music Fundamentals (3 credits)**
A study of elements of music including notation, rhythm, scales, intervals, melody, harmony, and form. To facilitate reading skills, class exercises in ear training are included. Previous musical training unnecessary.
**Attributes:** GEP Art/Literature

**MTF 152 Music Appreciation (3 credits)**
This course is a survey of music from the Middle Ages to the Twentieth Century. Emphasis is placed on the elements of music, styles of major historical periods, and the lives and works of representative composers. **Restrictions:** Enrollment is limited to PLS/HDC or Undergraduate Day Division level students.

**MTF 153 Vocal Performance (1 credit)**
In this course you will learn to professionally train your singing voice through breath management, phrasing, diction, performance practice, and accurate musicianship. Students will receive one individual sixty minute lesson each week. This course may be repeated for credit. Prerequisite: Students should be able to read music. An audition and permission of the instructor is required.

**MTF 154 Piano Performance (1 credit)**
Students will receive one individual piano lesson each week, between 30 and 60 minutes in length. This course may be repeated for credit. Prerequisite: Students must be able to read music. An audition and permission of the instructor are required.

**MTF 155 Instrumental Performance (1 credit)**
Students will receive one individual instrumental lesson each week, between 30 and 60 minutes in length. This course may be repeated for credit. Prerequisite: Students must be able to read music. An audition and permission of the instructor are required.

**MTF 156 Intro to World Music (3 credits)**
This course introduces students to the traditional music of cultures around the world, including music of India, Indonesia, Latin America, Africa, and the Middle East. Students will learn to listen critically and to articulate their observations about the music of numerous regions and societies.
**Attributes:** Diversity Course (New GEP), Undergraduate

**MTF 157 Western Music Hist: MidAge-1750 (3 credits)**
This course considers the history of Western music from the Middle Ages to the end of the Baroque Period, focusing on the relationship between historical, social, and cultural currents and the development of music. Students will acquire a framework for thinking critically about music and articulating their observations, and they will learn to recognize the musical characteristics of important styles, genres, and historical periods.
**Attributes:** GEP Art/Literature, Writing Intensive Course- GEP
MTF 158 Western Music: 1750 to Present (3 credits)
This course considers the history of Western Music from the second half of the eighteenth century to the present day, focusing on the relationship between historical, social, and cultural currents and the development of music. Students will acquire a framework for thinking critically about music and articulating their observations and learn to recognize the musical characteristics of important styles, genres, and historical periods. This course welcomes students who have not taken MTF 157, Western Music History: The Middle Ages to 1750.
Attributes: GEP Art/Literature

MTF 159 Contemporary Music (3 credits)
An investigation of the chief developments in the concept and style of music which have occurred in the Twentieth century.

MTF 161 Introduction to Theatre (3 credits)
This course examines major traditional and modern plays with emphasis upon the styles and conventions which govern the relationship between drama and its audience; relevance of these styles to the work of actors, directors, and designers.
Attributes: GEP Art/Literature

MTF 162 History of Broadway Musical (3 credits)
This course provides a basic overview of the historical developments of musical theatre as an uniquely American art form, and the study of the structures and genres from early Twentieth Century influences through the “Golden Age” of musicals to contemporary musical theatre.
Attributes: Undergraduate

MTF 170 Special Topics & Indep Study (3 credits)
Student majors may pursue investigation of topics beyond those listed in the catalog. Major GPA of 3.0 required, as is prior approval by the chair and faculty mentor. Course number dependent on relevant level of coursework.

MTF 181 Filmmaking Methods (3 credits)
An introduction and overview to the complete production cycle. Each class session is dedicated to a different department – writing, producing, directing, design, cinematography, grip and electrical, location sound, editing, digital post, audio post, marketing and distribution - designed to both introduce and involve students in the breadth of the production experience.
Attributes: GEP Art/Literature

MTF 191 Introduction to the Film (3 credits)
This course is an introduction to the study of cinematic form and style, taking cinema to be located at the confluence of art, industry and technology. This course examines the cultural meanings of cinema as well as its aesthetic construction, including such elements as narrative structure, cinematography, design, editing and sound. Selections from historical and contemporary films will be viewed and analyzed.
Attributes: GEP Art/Literature

MTF 192 History of Narrative Film & TV (3 credits)
Providing an overview of significant works that exemplify film and television as visual media, this course is a survey of movements and makers that helped shape the evolution of screen narrative. Storytelling techniques and trends will be explored from early, spectacle-driven serial films through the postmodern, CGI-driven productions of today.
Attributes: GEP Art/Literature, Undergraduate

MTF 241 Basic Conducting (3 credits)
This course will focus on the basic technical aspects of conducting a musical ensemble. Emphasis will be placed on learning how to communicate musical ideas to an ensemble using traditional conducting gestures. Included in the course will be the study of patterns, phrasing, and rehearsal techniques. Prerequisite: MTF 251 Music Theory I.
Prerequisites: (MTF 251)

MTF 242 Music & Gender (3 credits)
This course examines issues concerning gender and music making in many different historical periods and cultures. Among the topics studied are representations of men and women in opera and other musical works, feminist music criticism, androgyny and music, and the roles of men and women in the production, performance, and consumption of music. The musical traditions covered include current American popular music, Chinese opera, Western art music from the Middle Ages to the present day, jazz and the blues, and American musicals.

MTF 251 Music Theory I (3 credits)
This course introduces the student to the practice of tonal harmony. Students will learn the principles of chord construction and voice leading, examine the ways in which chords function in tonal music, and be able to compose effective progressions in four-part vocal style. Prerequisite: MTF 151 Music Theory I or permission of the instructor. Students must demonstrate to the instructor a familiarity with treble and bass clef notation and basic rhythmic notation.
Prerequisites: MTF 151
Attributes: GEP Art/Literature

MTF 252 Music Composition I (3 credits)
This course introduces the student to the practice of tonal harmony. Students will learn the principles of chord construction and voice leading, examine the ways in which chords function in tonal music, and be able to compose effective progressions in four-part vocal style. Prerequisite: MTF 251 Music Theory I or permission of the instructor. Students must demonstrate to the instructor a familiarity with treble and bass clef notation and basic rhythmic notation.
Prerequisites: MTF 251
Attributes: GEP Art/Literature

MTF 253 Choral Music (3 credits)
A study and performance of choral music with emphasis on vocal development and performing technique. Prior choral experience unnecessary. Participation in concerts and a term paper required. Prerequisite: Participation for one semester in University Singers prior to enrollment.

MTF 254 Jazz in Performance (3 credits)
A study and performance of the repertoire of the contemporary jazz ensemble with emphasis on the history of contemporary "BIG BAND" jazz and the mastery of its performance technique and stylistic interpretation. Participation in the fall and spring concert series and several short papers required. Prerequisite: Participation in the Jazz Band in the fall semester prior to enrollment.
Attributes: GEP Art/Literature

MTF 255 Ensemble Performance (1 credit)

MTF 257 American Music (3 credits)
This course examines music produced in the United States from the early Colonial period to the present day. Students will consider a variety of styles, with an emphasis on folk, art, and African-American music.
Attributes: GEP Art/Literature
MTF 258 Major Composers (3 credits)
Major composers courses are semester-long studies of a single composer and his or her contributions to music history. Students read a biography of the composer and study several of his or her pieces in detail. Examples of courses in the Major Composers series include Ludwig van Beethoven and Johann Sebastian Bach. 
Attributes: GEP Art/Literature

MTF 261 Theatre Performance Practicum (3 credits)
Rehearsal and performance of a campus theatre production (produced by SJU Theatre Company and directed by a faculty director) with the student in the role of actor or stage manager. Comprehensive study of both the rehearsal and performance processes. In order to register for the course, the production must be the third campus production in which the student has served as cast member or stage manager. Departmental approval is required in order for the student to register for the course. 
Attributes: GEP Art/Literature, Undergraduate

MTF 262 Production Practicum (3 credits)
A practical application of theatre production studies where the student works as a stage manager or run crew chief on a production produced by the Department of Music, Theatre & Film under the guidance of a faculty Director. 
Attributes: Undergraduate

MTF 263 Acting I (3 credits)
Study of the fundamentals of the acting process based upon Stanislavsky's system of acting. Course culminates in scene study preparation and performance of contemporary scenes. 
Attributes: GEP Art/Literature

MTF 264 Acting II (3 credits)
Exploration of various methods and styles of acting; further development of techniques of voice, movement, characterization, script analysis, emotion memory, comic timing, and monologues. Extensive laboratory work in scene performance. Prerequisite: MTF 263 Acting I. 
Prerequisites: MTF 263
Attributes: GEP Art/Literature

MTF 265 Directing for the Stage (3 credits)
Study of the basic techniques of play direction, including composition, picturization, play selection, auditions and casting, blocking and staging, including historic perspectives on notable directors. This course culminates in student-directed scenes from modern and contemporary plays. 
Attributes: GEP Art/Literature

MTF 266 Theatre History (3 credits)
This course examines the history of theatre from the Ancient Greek period through contemporary theatrical forms of the 21st century, focusing on major periods of theatre development including the Italian Renaissance, the Elizabethan age, Restoration Drama as well as the modern European and American theatre movements. Prerequisite: MTF 161 Introduction to Theatre. 
Attributes: Undergraduate

MTF 267 Theater Design (3 credits)
An introduction to theatrical production design. Instruction on the development of a basic ground plan and a basic light plot. Lighting and scenic design will be discussed and demonstrated. Prerequisite: MTF 161 Introduction To Theatre. 
Attributes: GEP Art/Literature

MTF 268 Musical Theater Performance (3 credits)
Practice in performance techniques used in musical theatre auditions as well as practice in scene study from the musical theatre repertoire. 
Attributes: GEP Art/Literature

MTF 269 Musical Theatre Dance Styles (3 credits)
A performance/studio course in dance in which a variety of basic technique in musical theatre dance styles are examined including basic jazz as well as stylistic interpretations of select prominent music theatre choreographers (Jerome Robbins, Bob Fosse, Michael Bennett, etc.). 
Prerequisites: MTF 268
Attributes: GEP Art/Literature

MTF 270 Special Topics & Indep Study (3 credits)
Student majors may pursue investigation of topics beyond those listed in the catalog. Major GPA of 3.0 required, as is prior approval by the chair and faculty mentor. Course number dependent on relevant level of coursework.

MTF 281 Producing & Business of Film (3 credits)
This hands-on course addresses the inner workings of creative producing: business structures, project origination, building a team, acquiring production resources, budgeting and scheduling, managing day-to-day production and incorporating marketing tools. Additionally, the course will address how different business models may affect films’ content, style, themes and inclusiveness. 
Restrictions: Enrollment is limited to Undergraduate Day Division level students.

Attributes: GEP Art/Literature

MTF 282 Screenwriting I (3 credits)
An intensive workshop in writing for the screen, focusing primarily on the short form. Through the study of character and conflict, structure and setting, and rudimentary rehearsal and performance of draft scene-work, students will develop their own short pieces, culminating in a revised script and a visualized shooting plan ready to move into production. 
Attributes: GEP Art/Literature, Writing Intensive Course- GEP

MTF 283 Screenwriting for TV and Web (3 credits)
Building on the skills developed in Screenwriting I (MTF 282), each student will first develop his or her own series concept, show bible, and pilot. Students will then work in groups to script episodes for selected shows. Top work will be selected for production in MTF 286 Episodic TV/Web Series Production. Prerequisite: MTF 282 Screenwriting I – The Short or ENG 344. 
Prerequisites: MTF 282
Attributes: GEP Art/Literature, Undergraduate, Writing Intensive Course- GEP

MTF 284 Digital Filmmaking (3 credits)
An introductory creative film production workshop that focuses upon visual storytelling, camera operation, digital editing and sound. Students will develop their personal creativity as they complete film projects in narrative and documentary modes, incorporating elements and techniques from music and theatre. Students will also view relevant selections from historical and contemporary films. 
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Film Studies, Music, Theatre Film or Theatre Studies. Enrollment is limited to Undergraduate Day Division level students.
Attributes: GEP Art/Literature
MTF 285 Short Film Production (3 credits)
Building on the skills developed in Digital Filmmaking (MTF 284), this course is an intermediate-level collaborative workshop in producing the short film. There is a particular emphasis upon theoretical and technical lighting and camera operation, shot structure, and production design. Working in small groups, students will rotate crew positions on various projects, while still retaining significant creative input into each work. Prerequisite: MTF 284 Digital Filmmaking.
Attributes: MTF 284

MTF 286 Episodic TV/Web Series Production (3 credits)
Building on the skills developed in Digital Filmmaking (MTF 284) and working from a show developed in Writing for Television (MTF 283), this course is a collaborative workshop in producing an episodic series. Students will rotate crew positions on each episode of the show, producing installments suitable for campus and public broadcast. Prerequisites: MTF 284

MTF 287 Commercial TV/Web Series Production (3 credits)
Building on the skills developed in Digital Filmmaking (MTF 284), this course is a collaborative workshop in the production of commercial and industrial projects. In small groups, students will work to produce a set of advertisements, PSAs and other client-based media. Prerequisite: MTF 284 Digital Filmmaking
Attributes: Undergraduate

MTF 291 American Film (3 credits)
Taking up a significant genre, era, or issue in American Filmmaking, this course is a selected study of the interplay of technology, commerce, art, idea and audience — and specifically how American cinema has reflected the broader cultural milieu. Examples of course focus include Classic Hollywood Cinema, The Silent Era, Musicals, The 1970s, Westerns, American Indies and the War Film. No Prerequisites, MTF 191, Introduction to Film recommended. May be repeated for credit under rotating iterations. Attributes: MTF 284 Digital Filmmaking

MTF 292 European Cinemas (3 credits)
A selected study of cinematic movements and filmmakers from European nations, specifically in how they both reflect and exemplify the culture in which they are produced. Possible areas of study include German Expressionism, Russian Formalism, the French New Wave, Italian Neo-Realism, New German Cinema and British Social Realism. No Prerequisites, MTF 191, Introduction to Film recommended. May be repeated for credit under rotating iterations. Attributes: MTF 284 Digital Filmmaking

MTF 293 Asian & Pacific Cinemas (3 credits)
A selected study of cinematic movements and filmmakers from Asia and the Pacific Rim, specifically in how they both reflect and exemplify the culture in which they are produced. Possible areas of study include the cinemas of Japan, China, Hong Kong, India and Australia. MTF 191, Introduction to Film recommended as pre-requisite; may be repeated for credit under rotating iterations. Attributes: MTF 284 Digital Filmmaking

MTF 294 Global Cinemas (3 credits)
A selected study of emerging cinematic movements and filmmakers from around the globe, that have pushed beyond the boundaries of established cinematic norms and innovated what film can be in its relation to culture and society. Possible areas of study include the cinemas of the Middle East, Africa and Latin America. No Prerequisites, MTF 191, Introduction to Film recommended. May be repeated for credit under rotating iterations. Attributes: Diversity Course (New GEP), GEP Art/Literature, Non-Western Studies (GEP), Undergraduate

MTF 295 Major Figures (3 credits)
A critical and analytical examination of the work of selected directors and producers who have had a profound impact on the evolution of contemporary cinema. Possible figures of study include Chaplin, Welles, Hitchcock, Ford, Truffaut, Kurosawa, Hawks, Kubrick, Spielberg and Scorsese. No Prerequisites, MTF 191, Introduction to Film recommended. May be repeated for credit under rotating iterations. Attributes: GEP Art/Literature

MTF 296 Documentary Cinema (3 credits)
A critical and analytical examination of how documentary films are conceived and produced, as well as how they purport to design and deliver "the truth." Possible areas of study include the early century work of Flaherty and Riefenstahl, the Direct Cinema movement of the Maysles and Wiseman and the contemporary work of Michael Moore and Errol Morris.

MTF 297 Music Theory II (3 credits)
This course serves as a continuation of MTF 251 Music Theory I. Topics include diatonic harmony, formal design, and an introduction to chromatic harmony. Students will further develop their skills in both written theory and ear-training. Prerequisite: MTF 251 Music Theory I.

MTF 298 Music Composition II (3 credits)
In this course, advanced vocalists take weekly lessons with a member of the studio faculty, learning four-six solo works from three different historical periods, including the twentieth or twenty-first century. They also participate in University Singers. In addition to their lessons, individual practice, and choir, students are required to give an outreach performance in a community venue, such as a nursing home or hospital. MTF 359 is open only to advanced singers who have already completed three semesters of studio lessons at SJU and who have the permission of the instructor to enroll.
MTF 355 Adv Ensemble Performance (3 credits)
In this course, advanced instrumentalists or vocalists participate in three chamber groups, coached by member(s) of the music faculty. They learn three different musical works, including at least one from the twentieth or twenty-first century, and participate in the studio recital. In addition, students are required to give an outreach performance in a community venue, such as a nursing home or hospital. MTF 355 is open only to advanced performers who have already completed three semesters of Ensemble Performance at SJU and who have the permission of the instructor to enroll.  
Attributes: GEP Art/Literature

MTF 357 Music Theory III (3 credits)
This course serves as a continuation of MTF 351 Music Theory II. Topics include borrowed chords, modulation to distant keys, enharmonic relationships, and chromatic harmonic. Emphasis on part-writing, composition, and analysis. Prerequisite: MTF 351 Music Theory II.  
Prerequisites: MTF 351  
Attributes: GEP Art/Literature

MTF 358 Advanced Musical Composition (3 credits)
MTF 359 Adv Instrumental Performance (3 credits)
In this course, advanced instrumentalists take weekly lessons with a member of the studio faculty, learning three solo works from three different historical periods, including the twentieth or twenty-first century. They also participate in a collaborative ensemble with another student musician. In addition to their lessons and individual practice, students are required to give an outreach performance in a community venue, such as a nursing home or hospital. MTF 359 is open only to advanced instrumentalists who have already completed three semesters of studio lessons at SJU and who have the permission of the instructor to enroll.

MTF 363 Styles of Acting (3 credits)
An advanced acting course that explores scene study performance of complex scenes including classic works (Shakespeare, Moliere) and plays from the modern period (August Strindberg, Tennessee Williams and Sam Shepard). Prerequisite: Acting II (MTF 264) or permission of the instructor.  
Attributes: GEP Art/Literature

MTF 370 Special Topics (3 credits)
Special Topics courses are upper-level classes on a variety of subjects in Music History. These courses synthesize score analysis, close reading of musicological literature, critical listening, and discussion in a stimulating seminar environment. Prerequisites: MTF 251 Music Theory I, MTF 157 Music History: The Middle Ages to 1750 and MTF 158 Music History: 1750 to the Present Day.  
Prerequisites: MTF 157 and MTF 158 and MTF 151 and MTF 251  
Attributes: GEP Art/Literature, Writing Intensive Course- GEP

MTF 381 Episodic TV/Web Series Prod (3 credits)
Building on the skills developed in Digital Filmmaking (MTF 284) and working from a show developed in Writing for Television (MTF 283), this course is a collaborative workshop in producing an episodic series. Students will rotate crew positions on each episode of the show, producing installments suitable for campus and public broadcast.  
Prerequisite: MTF 284 Digital Filmmaking.  
Prerequisites: MTF 284  
Attributes: Undergraduate

MTF 382 Screenwriting II (3 credits)
Building on the work of Screenwriting I (MTF 282), this course will focus on the development and composition of a feature film script. Students will both study the feature form in the work of established writers and complete a revised draft of their own feature script. May be taken as an Independent Study. Prerequisite: MTF 282, Screenwriting I-The Short.  
Prerequisites: MTF 282  
Attributes: GEP Art/Literature

MTF 383 Directing for Film/TV (3 credits)
An advanced workshop in the practices and techniques of screen directing. Students will explore script breakdown, visualization and storyboarding, casting and working with actors, blocking and set-direction through the analysis, direction and production of class projects. Course may be taken as an Independent Study. Prerequisite: MTF 282 Screenwriting I – The Short and MTF 284 Digital Filmmaking.  
Prerequisites: MTF 284 and MTF 282
Attributes: GEP Art/Literature

MTF 384 Advanced Lightg, Camera, Design (3 credits)
An advanced workshop in shaping the aesthetics of the image. Considering the image as a confluence of both production design and cinematography, students will explore how what is in front of the camera creates meaning as much as how it is lit and captured. Alongside the theoretical and technical skill of lighting and camera operation, students will perform script analysis for aesthetic direction and design, as well as working beyond illumination toward the art of cinematography.  
Prerequisite: MTF 284 - Digital Filmmaking.  
Prerequisites: MTF 284 or ART 173
Attributes: GEP Art/Literature

MTF 385 Sound Design (3 credits)
An advanced workshop in the skills of film sound recording, editing and mixing. This course examines the fundamentals of sound gear and technology, location and soundstage recording techniques, and the creation of film soundtracks, including dialogue editing, sound effects, automated dialogue replacement (ADR), music editing and mixing to picture. Prerequisite: MTF 284, Digital Filmmaking.  
Prerequisites: MTF 284

MTF 386 Edit & Digital Post-Production (3 credits)
An advanced workshop in the necessary skills of post-production and the required workflow of moving a project toward delivery. Topics include advanced techniques in non-linear editing, the demands of various video formats, digital video effects, compositing, color correction and delivery across multiple platforms. Course may be taken as an Independent Study. Prerequisite: MTF 284, Digital Filmmaking.  
Prerequisites: MTF 284  
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Film Studies, Music, Theatre Film or Theatre Studies.  
Attributes: GEP Art/Literature

MTF 387 Music Video Production (3 credits)
Building on the skills developed in Digital Filmmaking (MTF 284), this course is a collaborative workshop in the production of original music videos. Following production of “demo” videos, students will pitch video concepts to actual musicians and work to produce videos suitable for public broadcast.  
Prerequisites: MTF 284
MTF 388 Documentary Workshop (3 credits)
An advanced workshop in the planning and production of documentary film. Students will conceive and execute a project of their own design while exploring such issues as collaborative design and production, cross-cultural investigation, documentary ethics and empowerment, and community and individual representation. Prerequisite: MTF 284, Digital Filmmaking.
Attributes: GEP Art/Literature

MTF 389 Animation Workshop (3 credits)
An advanced workshop in various techniques of 2D and 3D animation. Students will conceive and execute a project of their own design using methods ranging from traditional cell animation, to stop-motion, rotoscope, clay and the digital realm.
Prerequisites: MTF 284

MTF 391 Film Theory & Criticism (3 credits)
An advanced course in the study of the critical trends and theoretical positions that have influenced, enlightened and framed the creation and critique of cinema throughout its first century. Prerequisite: MTF 191, Introduction to Film.
Prerequisites: (MTF 191)

MTF 392 Special Topics in Film (3 credits)
A study of film/tv in either production or studies beyond those listed in the catalog. Film& Theatre major or minor, or permission of instructor required.

MTF 393 Prof. Film Production Workshop (3 credits)
A participatory workshop in the production of a professional media project. Projects will be selected by merit or university need, produced and directed by the instructor, and funded through the department and university. Students will have the opportunity to work on a live set and participate according to their ambition, ability and experience. May be taken as an Independent Study.
Prerequisites: MTF 282 or MTF 284 or MTF 181
Restrictions: Enrollment is limited to students with a major, minor, or concentration in Film Studies, Music, Theatre Film or Theatre Studies.
Attributes: GEP Art/Literature

MTF 470 Special Topics & Indep Study (3 credits)
Student majors may pursue investigation of topics beyond those listed in the catalog. Major GPA of 3.0 required, as is prior approval by the chair and faculty mentor. Course number dependent on relevant level of coursework.

MTF 491 Internship (3 credits)
Junior and Senior MTF majors may broaden their perspective by completing an approved internship in Music, Theatre, or Film/TV. Students are expected to spend six to eight hours per week on site, and to maintain a weekly journal of their experiences and to secure a report by their immediate supervisor at mid semester and upon completion of the work. Prior approval by the chair is required.
Attributes: GEP Art/Literature

MTF 492 Internship in Theatre (3 credits)
Junior and Senior MTF majors may broaden their perspective by completing an approved internship in Music, Theatre, or Film/TV. Students are expected to spend six to eight hours per week on site, and to maintain a weekly journal of their experiences and to secure a report by their immediate supervisor at mid semester and upon completion of the work. Prior approval by the chair is required.

MTF 493 Independent Research (3 credits)
Students pursuing advanced independent projects, especially those in connection with departmental or university honors, may register for these courses under the direct mentorship of department faculty. Prior approval of both faculty mentor and chair required.
Attributes: GEP Art/Literature

MTF 495 Senior Project I (3 credits)
A student majoring in either Music or Theatre & Film must execute a supervised senior project with acts as a capstone experience on their work in the department. Working closely with their faculty mentor, the student will prepare a major piece of creative or critical work (composition, performance, film, screenplay, or thesis) inclusive of a public presentation in an appropriate venue. Depending on the scope and nature of the project, students will complete the work in either one or two semesters decided in consultation with the faculty mentor and with permission of the chair.
Attributes: Undergraduate

MTF 496 Senior Project II (3 credits)
A student majoring in either Music or Theatre & Film, must execute a supervised senior project which acts as a capstone experience on their work in the department. Working closely with their faculty mentor, the student will prepare a major piece of creative or critical work (composition, performance, film, screenplay, or thesis) inclusive of a public presentation in an appropriate venue. Depending on the scope and nature of the project, students will complete the work in either one or two semesters decided in consultation with the faculty mentor and with permission of the chair.
Attributes: GEP Art/Literature

Film and TV Minor

Departmental Educational Goals and Objectives

Goal 1: Development of Creative Voice and Abilities

Objective 1.1: Students will develop the ability to create performing arts works that express their creativity and unique voices.

Objective 1.2: Students will develop the ability to craft well-organized, reasoned, critical, and thoroughly-researched written and oral work.

Goal 2: Development of Critical and Rhetorical Skills

Objective 2.1: Students will develop the ability to craft well-organized, reasoned, critical, and thoroughly-researched written and oral work.

Goal 3: Knowledge and Analysis of Significant Works

Objective 3.1: Students will develop an awareness and analytical understanding of significant and diverse creative and theoretical works within the performing arts, and the cultural and historical contexts in which they were produced.

Goal 4: Knowledge of Professional Practices

Objective 4.1: Students will acquire the creative, technical, and analytical tools to begin professional work in the field or to pursue graduate studies.

Goal 5: Development of Social and Ethical Awareness

Objective 5.1: Students will develop an understanding of social issues, ethics and inclusivity within the performing arts.
Goal 6: Development of Collaborative and Service Skills

Objective 6.1: Students will engage, share and collaborate as creative citizens by completing performing arts projects that include campus, local, national and/or international communities.

(6 courses total)

Students wishing to minor in Film/TV may do so by fulfilling the following requirements:

<table>
<thead>

Select five additional Music courses selected from the offerings in Theory, Composition, History, and Advanced Performance

One Semester participation in a department-sponsored performance ensemble or private studio

If a student places out of Music Fundamentals, with a score of 4 or 5 on the AP Music Theory exam, he/she will enroll in Music Theory I to meet this requirement.

Music Major

Departmental Educational Goals and Objectives

Goal 1: Development of Creative Voice and Abilities

Objective 1.1: Students will develop the ability to create performing arts works that express their creativity and unique voices.

Objective 1.2: Students will acquire skills in creative inquiry, analysis and self-reflection.

Goal 2: Development of Critical and Rhetorical Skills

Objective 2.1: Students will develop the ability to craft well-organized, reasoned, critical, and thoroughly-researched written and oral work.

Goal 3: Knowledge and Analysis of Significant Works

Objective 3.1: Students will develop an awareness and analytical understanding of significant and diverse creative and theoretical works within the performing arts, and the cultural and historical contexts in which they were produced.

Goal 4: Knowledge of Professional Practices

Objective 4.1: Students will acquire the creative, technical, and analytical tools to begin professional work in the field or to pursue graduate studies.

Goal 5: Development of Social and Ethical Awareness

Objective 5.1: Students will develop an understanding of social issues, ethics and inclusivity within the performing arts.

Goal 6: Development of Collaborative and Service Skills

Objective 6.1: Students will engage, share and collaborate as creative citizens by completing performing arts projects that include campus, local, national and/or international communities.

The Music Minor (6 courses plus one semester of performance)
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

All students are required to take one course in Art History.

In addition students must choose two courses from the following list of options:

- Any course in Modern and Classical Languages at or above 300.
- Any course in History at or above 200.
- Any course in English at or above 200.
- Any course in Sociology at or above 200.
- Any course in Philosophy at or above 200.
- Any course in Political Science at or above 300

Music Electives
Select two of the following: 6

- MTF 142 History of Rock and Pop
- MTF 156 Intro to World Music (if not selected above)
- MTF 159 Contemporary Music
- MTF 162 History of Broadway Musical
- MTF 241 Basic Conducting
- MTF 242 Music & Gender
- MTF 252 Music Composition I (if not selected above)
- MTF 253 Choral Music
- MTF 254 Jazz in Performance
- MTF 257 American Music (if not selected above)
- MTF 258 Major Composers
- MTF 268 Musical Theater Performance
- MTF 352 Music Composition II
- MTF 353 Advanced Vocal Performance
- MTF 354 Advanced Piano Performance
- MTF 355 Adv Ensemble Performance
- MTF 357 Music Theory III (if not selected above)
- MTF 358 Advanced Musical Composition
- MTF 359 Adv Instrumental Performance
- MTF 370 Special Topics

1 If a student places out of Music Fundamentals, this requirement is met by taking Music Theory I, II, and III.

2 A combination of four semesters of participation in a department-sponsored performance ensemble or private studio.

Ensembles include: Jazz Ensemble, University Singers, Concert Choir, Chamber Music

Private Studios include: Guitar, Piano, Violin and Voice

Theatre & Film Major

Departmental Educational Goals and Objectives

Goal 1: Development of Creative Voice and Abilities

Objective 1.1: Students will develop the ability to create performing arts works that express their creativity and unique voices.

Objective 1.2: Students will acquire skills in creative inquiry, analysis and self-reflection.

Goal 2: Development of Critical and Rhetorical Skills
Objective 2.1: Students will develop the ability to craft well-organized, reasoned, critical, and thoroughly-researched written and oral work.

Goal 3: Knowledge and Analysis of Significant Works

Objective 3.1: Students will develop an awareness and analytical understanding of significant and diverse creative and theoretical works within the performing arts, and the cultural and historical contexts in which they were produced.

Goal 4: Knowledge of Professional Practices

Objective 4.1: Students will acquire the creative, technical, and analytical tools to begin professional work in the field or to pursue graduate studies.

Goal 5: Development of Social and Ethical Awareness

Objective 5.1: Students will develop an understanding of social issues, ethics and inclusivity within the performing arts.

Goal 6: Development of Collaborative and Service Skills

Objective 6.1: Students will engage, share and collaborate as creative citizens by completing performing arts projects that include campus, local, national and/or international communities.

Requirements for the Theatre & Film Major

The traditional undergraduate programs include 40 courses distributed across three components: A General Education component divided into Signature Courses, Variable Courses, and an Integrative Learning requirement; a Major and Divisional component; and Free Electives. In addition to course requirements as specified in each area, students must complete one certified course in each of the following overlay areas:

1. Diversity, Globalization or Non-western Area Studies,
2. Ethics Intensive, and
3. Writing Intensive. Overlay requirements are part of the forty-course requirement.

General Education Signature Courses
See this page about Signature courses (p. 26). Six courses

General Education Variable Courses
See this page about Variable courses (p. 26). Six to Nine courses

General Education Integrative Learning Component
See this page about Integrative Learning Component (p. 27). Three courses

As part of the GEP, all majors in Theatre & Film will select three courses total from at least two of the following three categories:

- ART: Art Studio Course
- ART: Art History Course
- COM: Communications Studies Course
- ENG: Dramatic Literature Course
- CSC: Computer Science Courses
- CAS: Chair-approved CAS course in Cinema Studies presented from the perspective of an independent discipline (i.e. Sociology, Psychology, Political Sciences, etc.)

GEP Electives

11-13 courses, depending on how many required courses in variable core and choice of major concentration.

The Theatre & Film Major

10 courses

Each student is required to take the following four Theatre & Film/TV common courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MTF 161</td>
<td>Introduction to Theatre</td>

1 MTF 263 Acting I may be replaced by MTF 265 Directing for the Stage or MTF 267 Theatre Design for Film/TV Track.

2 See course description below for explanation of the department’s capstone experience.

3 If a student will be writing a Thesis for their Senior Project, s/he is required to take MTF 391- Film Theory and Criticism; if s/he will be writing a feature screenplay, s/he is required to take MTF 382 – Screenwriting II – The Feature.
ORGANIZATIONAL DEVELOPMENT AND LEADERSHIP

Master of Science in Organizational Development and Leadership
Felice Tilin, Ph.D. Graduate Program Director
Merion Hall, Suite 280, 610-660-1575 ftilin@sju.edu

Program Mission Statement
The mission of the Saint Joseph’s University Master’s of Science in Organization Development and Leadership is to educate adult graduate students to create more effective and healthy human systems in an inclusive world community. Students learn to foster sustainable change in individuals, groups and organizational systems by applying theories, principles and research in the fields of organization development, adult learning, organizational psychology and organizational dynamics.

In order to achieve this mission the Master’s of Science in Organization Development and Leadership has four concentration areas: Concentration in Adult Learning and Training, Concentration in Organizational Psychology and Development, Concentration in Organization Dynamics and Leadership, and Concentration in Organizational Leadership.

Order of Taking Courses
Students should take the Foundation Courses at the beginning of their studies and must complete these courses before taking the 700 Level Advanced Courses. Advanced courses are taken as the last series of courses. Refer to course descriptions for specific course prerequisites.

Degree Requirements
To earn the Master of Science in Organization Development and Leadership with a concentration, students must satisfactorily complete 12 courses/36 credits. Two courses (six credits) may be transferred as long as they are in accord with program requirements and university standards. Transcripts must be submitted prior to matriculation.

Academic Advising
Advising is an important factor in enhancing the quality of each student’s experience in his or her concentration. Students who would like to discuss their course of study and/or who have questions on prerequisite courses or degree requirements should contact the Program Director, Dr. Felice Tilin, at the Graduate Organization Development and Leadership Office at 610-660-1575, email her at ftilin@sju.edu. Advising is readily available to counsel participants in the selection of courses and completing program requirements.

Graduate Programs
- Master of Science in Organizational Development and Leadership with a Concentration in Adult Learning and Training

- Master of Science in Organizational Development and Leadership with a Concentration in Organizational Psychology and Development
- Master of Science in Organizational Development and Leadership with a Concentration in Organizational Dynamics and Leadership
- Master of Science in Organizational Leadership - Online (p. 373)

ODL 200 Career & Personal Development (3 credits)
This course takes the student through a systematic and integrative process of examining eight research-supported “critical factors for success” as they apply to oneself and one’s career. This course will be partially didactic, while being primarily small group oriented, experiential and self-reflective. No prerequisites.
Attributes: Undergraduate

ODL 300 Organizational Development (3 credits)
A behavioral science perspective on the causes and outcomes of individual and group behavior in organizations, and of the behavior of organizations. Topics will include motivation, attitudes, interpersonal processes, leadership, and macro-organizational behavior. Prerequisite: PSY 100 or permission of instructor.
Prerequisites: (PSY 1005 or PSY 1001 or PSY 100 or PSY 101 or PSY 1011)
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ODL 310 Group & Team Dynamics (3 credits)
Almost all of our behavior takes place in the presence of other people. A number of small group practitioners and researchers have presented explanations for the why and how of individual behavior in group and team settings. Through the vehicle of the class as laboratory students will experientially examine a number of theories and concepts about individual behavior in group/team settings. Students through class discussions will learn to observe, understand, examine and influence team and group development. Prerequisite: PSY 100 or permission of instructor.
Prerequisites: PSY 1005 or PSY 1001 or PSY 100 or PSY 101
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ODL 320 Leadership & Development (3 credits)
In this course, participants will review and discuss current applicable social science literature in an attempt to answer some of the following questions: Who is a leader? What is leadership? Does effective leadership originate in a person or in a set of actions or behaviors? What do we know about developing leaders? How do the constraints of organizations inhibit or facilitate leadership development? What is your current leadership style? These and related questions will be examined by class members through lectures, case studies, self-assessments, and experiential activities. Prerequisite: PSY 100.
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ODL 330 Issues in Organizational Development (3 credits)
Selected issues in the field such as change agency, emotional intelligence, assessment, group and interpersonal processes, job enrichment, selection, and placement will be discussed. Small groups, role-playing, and other experiential exercises will clarify important concepts in the field. Prerequisite: ODL 300.
Prerequisites: ODL 300
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate
ODL 340 Coaching & Consulting (3 credits)
Roles, functions, tools and settings that define a consulting psychologist will be explored with an emphasis on the corporate world. Small groups, role-playing, videos and other experiential exercises will clarify and supplement readings, research and discussion. Prerequisites: PSY 100 or permission of the instructor.
Prerequisites: ODL 300 and ODL 320
Attributes: Undergraduate

ODL 350 Organizational Research (3 credits)

ODL 400 Cap Proj - Org Development (3 credits)
This course serves as a senior-level, research-based capstone in which organizational development students complete a research project typically developed in the Issues in Organizational Development course. Students will present and orally defend their research project to the Organizational Development and Leadership faculty. Prerequisite: ODL 330.
Prerequisites: PSY 2725 or ODL 330
Restrictions: Enrollment is limited to PLS/HDC level students.
Attributes: Undergraduate

ODL 600 Adult Learning: Theory & App (3 credits)
Course introduces students to adult education theory that focuses on how adults learn, application of adult education theory, skills required in the delivery of adult learning programs and an introduction to group process. Students have an opportunity to develop a professional learning theory and model. Students also discover their learning style and how style impacts their ability to use their theory and model. Use of feedback as a tool for learning allows students to realize how to improve their facilitation approach. ALT Concentration Requirement
Restrictions: Enrollment is limited to Graduate level students.

ODL 605 Performance Consulting (3 credits)
Course presents to the Organization Development and Leadership professional the practical tools necessary to measure and evaluate the effectiveness of learning and change programs. A specific technology is presented in a step-by-step approach, which links the collaborative consulting process with performance assessment. The course focuses on increasing students’ ability to communicate and work with leaders in their organizations. ALT and OPD Concentration Requirement
Restrictions: Enrollment is limited to Graduate level students.

ODL 610 Adult Learning Methods (3 credits)
Major delivery methods and techniques that foster adult learning are discussed and demonstrated. Key elements are discussed that allow students to effectively facilitate adult learning methods that enhance individual and group learning. Emphasis is placed on student participation that fosters experiential learning. Impact of communication style on delivery effectiveness is also discussed. Some methods include case studies, role-plays, small groups, games, simulations, questioning techniques and icebreakers. ALT Concentration Requirement.
Prerequisite: ODL 600.
Prerequisites: ODL 600
Restrictions: Enrollment is limited to Graduate level students.

ODL 615 Learning Design & Implem (3 credits)
Major steps in creating and designing adult education learning programs are discussed. Students develop a program that demonstrates their understanding of the key components of instructional design. Specific topics include collaborative relationships with customers/management, needs assessment, analyzing data, writing learning objectives, cost effectiveness of programs, selecting and sequencing content, developing learning materials and constructing evaluative instruments. ALT Concentration Requirement.
Restrictions: Enrollment is limited to Graduate level students.

ODL 618 e-learning Design (3 credits)
Technological innovations are increasingly being used in training and development programs. Through the lens of adult learning theory, students will assess online learning needs, develop online modules, create online communities of learning and become familiar with the language and best practices associated with eLearning program development. (Pre-requisite: ODL 600 or permission form Director).
Prerequisites: ODL 600
Restrictions: Enrollment is limited to Graduate level students.

ODL 620 Psych Assessments (3 credits)
The psychological theories and practices underlying a wide variety of instruments used in assessing individual and group behavior in organizations will be examined. Issues and topics will include employee selection, performance, ability, attitude and development. Participants learn how to critically evaluate measures to answer organizational issues. OPD Concentration Requirement
Restrictions: Enrollment is limited to Graduate level students.

ODL 625 Psych of Executive Coaching (3 credits)
Executive Coaching has become a staple within many organizations. Executive Coaching is essentially a purposeful, relational intervention based in psychosocial concepts that leads to new and more complex level of functioning in one party. This course primarily assists the student in further development of their coaching skills and models while also examining coaching models, underlying constructs, skills and relevant coaching research. OPD Concentration Requirement, or ODL 680.
Restrictions: Enrollment is limited to Graduate level students.

ODL 630 Ldshp & Team Development (3 credits)
Course focuses on theories and practices required in leading and developing teams. Issues of leadership behavior, interpersonal relations, group roles and stages of development are examined in an experiential laboratory. OPD Concentration Requirement.
Restrictions: Enrollment is limited to Graduate level students.

ODL 635 Positive Org Pscy& Scholarship (3 credits)
This course will provide you with a grounding in the theories and applications of positive organizational and organizational psychology. The core premise of this course is that leadership and personal scholarship excellence are fundamentally tied to creating/enabling organizational contexts that build human strengths as well as unlock the positive and generative dynamics of vibrant human communities. This course will help you to create, foster, and develop organizations where people learn to thrive and perform at their best.
Restrictions: Enrollment is limited to Graduate level students.
ODL 640 Talent Dev & Mgt in Modern Org (3 credits)
An overview course that focuses on the emerging trend of talent management with a specific focus on how talent development, learning and training aligns with organizational strategy. Topics include areas like coordinating individual's goals and organizational goals, positioning the learning function, and positioning yourself for a leadership position through talent development.
Restrictions: Enrollment is limited to Graduate level students.

ODL 642 Facilitating Adult Learning (3 credits)
Adult learning, as it relates to training/organization development, involves a combination of facilitation and presentation skills. Course focuses on strategies that increase students' ability to interact with individuals and groups in these areas. Impromptu and planned presentations are audio taped and videotaped for students to receive constructive feedback. Facilitation techniques include managing question-and-answer sessions, dealing with resistive participants, and getting stalled sessions/groups going.
Restrictions: Enrollment is limited to Graduate level students.

ODL 644 Ldshp Dev Methods for Training (3 credits)
An introductory experiential course that acquaints the learner with the role and activities of being a leader in an organization. Management styles as well as key practices such as planning, decision making, change, conflict, motivation, group dynamics and control are discussed through interactive exercises.
Restrictions: Enrollment is limited to Graduate level students.

ODL 646 Career Dev Theory & Practice (3 credits)
Course provides students with an experiential understanding of the process of career development. Through a primarily experiential approach, where students craft their own career vision, students have an opportunity to engage key concepts in the field of career development. In addition, topics such as assessment, gender, choice, interventions and career management are experienced and discussed.
Restrictions: Enrollment is limited to Graduate level students.

ODL 647 Appreciative Inquiry (3 credits)
Appreciative Inquiry (AI) is a methodology (and philosophy) for system intervention. Instead of examining what is wrong with a system and devising ways to fix it, AI discovers what is right with a system and engages stakeholders to amplify and build upon that positive core and spurs innovation. Prerequisite: ODL 605 for ALT and OPD Concentrations, No Pre requisites for ODL Concentration
Restrictions: Enrollment is limited to Graduate level students.

ODL 648 Conflict & Negotiation (3 credits)
ODL 650 Organizational Leadership (3 credits)
This course provides a foundation for leadership competencies and characteristics necessary for guiding organizations. Students will use self-awareness tools grounded emotional intelligence developed especially for organizational leaders. Students will deepen their understanding of traditional and contemporary leadership research, theories and practices; and, explore the organizational contexts where work, management and leadership happen. Students will examine the responsibility that comes with leadership through readings, lectures, small group interactions and an online self-development process. This foundational course provides the framework for other online course work by establishing a community of learners.
Restrictions: Enrollment is limited to Graduate level students.

ODL 655 Change & Culture (3 credits)
Studying an organization's culture is essential to any successful change effort. This course will enable students to study organizational theories, systems thinking, and the relationship between cultural issues and successful change implementation. They will experiment with taking on the role of a change agent through simulations, case studies, and studying the culture and changes in their own work place.
Restrictions: Enrollment is limited to Graduate level students.

ODL 660 Strategic Leadership (3 credits)
Consulting, advising, educating and coaching leaders necessitates a knowledge and understanding of the learning process and how that translates into strategy for changing any human social environment. In Strategic Leadership you will get a chance to broaden your knowledge and expand your leadership development toolkit as a leader and an educator of leaders. Specific strategies are considered and students begin to explore new ways of looking at leadership and their own behaviors in order to successfully implement strategies. Students have will have the opportunity to engage with a group of other students in an action research project and participate in a skill weekend where they reflect on the assumptions underlying their leadership actions.
Restrictions: Enrollment is limited to Graduate level students.

ODL 665 Leading Teams (3 credits)
A big part of organizational life takes place in groups. This course focuses on theories of group dynamics and development and the application to team membership and leadership. Facilitating teams, assessing the development of a team, influencing groups, group roles and group decision-making processes and the dynamics of creating effective virtual teams will all be explored. Students will work in teams in this class and will integrate class learning with their work experience on teams.
Restrictions: Enrollment is limited to Graduate level students.

ODL 666 Social Media & Learning (3 credits)

ODL 670 Strategic Leader Ethics & Values (3 credits)
Thinking strategically about your own development and the development of others is critical to your personal development and your ability to develop others. Leading at the next level requires knowledge and understanding of organizational vision, mission, values, ethics and communication. You will explore the impact of ethics and values on decision-making and organizational effectiveness. Students have the opportunity to focus on a particular area of organizational life and explore the impact of communications, perceptions, behaviors, culture, and current events on the outcomes of projects and initiatives. Pre-Requisites ODL 650 and ODL 655 or permission from Director. Pre-Requisites: ODL 655 and ODL 650
Restrictions: Enrollment is limited to Graduate level students.

ODL 675 Implementing Change (3 credits)
Course aids students in designing and effectively implementing change programs and projects while achieving and sustaining performance. Students have an opportunity to create a change model from both experience and research. Major issues impacting change will be discussed including understanding resistance and techniques to overcome resistance to change.
Restrictions: Enrollment is limited to Graduate level students.
ODL 680 Coaching & Mentoring Skills (3 credits)
This interactive course provides students with the opportunity to learn coaching skills. Specific topic areas include giving and receiving feedback, identifying and understanding communication style preferences, learning how to listen for the "real issues." This course is aligned with the competencies of the International Coach Federation (ICF) and can be applied to professional coaching portfolio hours.
Restrictions: Enrollment is limited to Graduate level students.

ODL 685 Sem in Global Organ Issues (3 credits)
Learning to work across the boundaries of culture, opinions, language, ideas and time zones takes practice, experience, empathy and a sense of adventure. This Seminar in Global Leadership is offered in that spirit to give graduate students the opportunity to do a deep dive into other environments, exposure to multinational organizations like the United Nations, NGO’s, Schools, corporations, health systems etc. and to both study and get first hand exposure to training and leadership development functions, and what it takes to manage, facilitate and develop positive human development strategies from a multinational perspective. We will look at global learning and leadership at the individual, organization, national, regional and global levels.
Restrictions: Enrollment is limited to Graduate level students.

ODL 686 Global Leadership (3 credits)
There is no better way to learn about cultural diversity and working in a multinational society than to actually travel to another country. The Study Tour Course includes 9 days in another country and pre work to prepare for the trip and post tour projects. This is a deeply experiential program with a focus on cultural diversity in a variety of education, business and social justice settings. The students will get a chance to network and learn from professionals in other countries.

ODL 688 Social Media & Learning (3 credits)
The course will examine the relationship between learning and social media. Current trends and use of social media in training, education, marketing, product development, data collection, customer service, and networking are some of the topics that will be covered. Students will discuss and evaluate uses of social media in informal social networking and formal knowledge management learning settings. Students will critique their own organization’s culture and values around learning and social media and the challenges and opportunities they pose.

ODL 690 Creative Problem Solving (3 credits)
Creative problem solving is an essential skill for people working in complex organizations. Creative thinkers reflect on the assumptions underlying actions and consider new ways of looking at and living in the world. They use methods to identify new alternatives. This course is a comprehensive guide for making worthwhile, influential and creative contributions at work. Students have an opportunity to identify and overcome personal and organizational barriers to develop breakthrough thinking.
Restrictions: Enrollment is limited to Graduate level students.

ODL 695 Org Change: A Gestalt Approach (3 credits)
This course will focus on the Gestalt Model in organizational change consulting. Students will learn a powerful new perspective that recognizes behavior and interactions of systems, rather than individuals, creating new and dynamic possibilities for intervention. A theoretical and practical framework will be taught for high-impact consulting in organizations, exploring critical dilemmas and offering opportunities to practice new skills. This course will benefit students who wish to understand and develop process consultation skills while learning a new framework for managing change. Approved by International Coaching Federation (ICF) for coach accreditation hours. Prerequisite: ODL 605 for ALT and OPD Concentrations, No Pre requisites for ODL Concentration
Restrictions: Enrollment is limited to Graduate level students.

ODL 700 Org Dev Theory & App (3 credits)
Course presents an overview of the fundamental components of organization development. Case studies are discussed and analyzed to demonstrate the fundamental components of OD. Practical skills and approaches are studied, such as change techniques and strategies, influence methods in dealing with leaders and consulting/learning models. Focus of course helps students implement successful learning or change programs in their organization. Topics of discussion include developing sponsorship, action research methods, survey feedback approaches, and dealing with conflict. Prerequisite: ODL 650 and 655 or Permission from Director.
Prerequisites: ODL 650 and ODL 655
Restrictions: Enrollment is limited to Graduate level students.

ODL 705 Facilitating Org Development (3 credits)
This course includes an overview of how skilled facilitation helps individuals and groups learn and change within organizations. This course is part of a yearlong journey in which students immerse themselves in learning new skills to lead change. Students have an opportunity to practice organization development skills and learn new methods in helping individuals and groups learn to change. Participants learn to effectively use their own behaviors to influence others in creating work environments that foster collaborative, open problem solving, dealing with differences and participative decision making. (Prerequisites for ALT and ORG Psych: All Core Courses).

ODL 710 Interven Skills: Strat & Desgn (3 credits)
Students have an opportunity to complete a project demonstrating action research methodology. Course centers on understanding how to use interventions and the impact that interventions can have within an organizational setting. Students have an opportunity to design and facilitate interventions both in class and in their organization to assure the successful implementation of change and/or that individual learning takes place within their project. Prerequisite: ODL 705
Prerequisites: ODL 705
Restrictions: Enrollment is limited to Graduate level students.

ODL 750 Change Leader:Facilitating Chg (6 credits)
This is a 6-credit Residency specifically required for students signing up for the online ODL program. The course is designed to be a transformative experience that builds on all of the preceding courses. It will provide real-time community interaction, face-to-face feedback, and opportunities to lead change experiments. During this residency, students learn how to close the gap between knowing and doing through specific teaching and learning strategies. The program is organized into a series of clinics focusing on areas like facilitative leadership, team leadership, implementing change, and power and authority dynamics. Prerequisite: ODL 650 or permission form Director.
Prerequisites: ODL 650
ODL 770 Special Topics in ODL (3 credits)

ODL 775 Capstone Seminar (3 credits)

ODL 780 Research Design & Eval (3 credits)
The course helps students design and evaluate research in their respective organization or field of study. Methods are presented for application to work situations. Topics include: the similarities and differences between theoretical and applied research, use of data-gathering techniques, writing of research reports and evaluation methods for change, learning, and research projects. Prerequisite: Completion of Foundation Courses. Required for ALT and OPD concentration. Restrictions: Enrollment is limited to Graduate level students.

ODL 785 Advanced Seminar (3 credits)
A capstone course and the last course taken in the Organization Development and Leadership Graduate Program. Course provides students the opportunity to complete a professional paper on a topic/issue of their choice utilizing research methods and statistics. Students also complete an independent/group project leading to the design and facilitation of a learning or change project. Prerequisite: ODL 780. Prerequisites: ODL 780 (may be taken concurrently) Restrictions: Enrollment is limited to Graduate level students.

Master of Science in Organizational Development and Leadership with a Concentration in Adult Learning and Training

Program Objectives
The Adult Learning and Training Concentration (ALT) focuses on Talent Development and Leadership. This enhances career development and is designed for leaders who are building careers in Organizational Change and for Adult Educators, Talent Managers, Trainers Facilitators, Curriculum Designers, Instructional Designers, Technical Trainers, Consultants, Health Education Professionals, and individuals in career transitions. Students will develop skills and knowledge in designing and facilitating talent development and training programs and utilizing experiential and adult learning methods to lead others and facilitate learning experiences. Learning objectives for the Master’s Degree Concentration in Adult Learning and Training are to:

• Learn how to lead others by developing competencies such as self-awareness, self-management, communication, organizational awareness and managing others.
• Analyze learning and performance needs
• Consult with employers and clients to develop talent by implementing learning strategies, training programs, coaching programs and workshops
• Design interventions and instructional approaches that meet objectives
• Increase self-awareness about personal learning and professional development
• Facilitate programs based in adult learning principles, methods and techniques
• Measure outcomes and evaluate performance improvement

Admission Requirements
Students seeking admission to the Organization Development and Leadership Graduate Program with a concentration in Adult Learning and Training must have a baccalaureate degree from an accredited college or university. In addition, applicants must have two or more years of professional work experience. Applicants with an undergraduate GPA below 2.8 may have to submit Graduate Record Examination (GRE) or Miller Analogies Test (MAT) scores and request provisional status for admission. Applicants should submit and online graduate application form and all required documents outlined in the admissions section for Graduate Arts and Sciences.

ODL Concentration in Adult Learning and Training

Goal 1: Students will gain knowledge and apply the history, theories, values, ethics, processes and practices of Organization Development to their workplace, communities and/or personal lives.

Objective 1.1: Students will display the ability to conduct assessments, build relationships, and intervene for positive human impact at the individual, group, and organization levels of system

Objective 1.2: Students will practice and assess the use of dialogical models, feedback, coaching and simulations designed to transform individuals and effect change in organizations.

Objective 1.3: Students will examine the influence of organizational culture on behavior change.

Goal 2: Students will develop interpersonal and leadership competencies for lifelong learning in themselves and others.

Objective 2.1: Students will use recommended models of leadership (e.g., emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.) to document growth in self-awareness.

Objective 2.2: Students will demonstrate self-awareness through learning activities, critical reflection and demonstrating knowledge grounded in current research and models of leadership development like emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.

Objective 2.3: Students will be able to describe and/or demonstrate knowledge of the relationships between learning, leadership, and change.

Goal 3: Students will respect, value and demonstrate academic research and writing

Objectives 3.1: The student will complete a thesis or capstone using APA style applicable to the workplace or academic discipline.

Concentration in Adult Learning and Training
The Master of Science in Organization Development and Leadership with a Concentration in Adult Learning and Training consists of twelve 3-credit courses. The thirty-six credits are distributed as follows:

* These courses require either pre requisites or permission from the Director.

**ODL Elective Option: Health Administration**

An option exists for selected students working in the health care industry who require more knowledge and skills in the Organizational Development and Leadership field. Students who wish to pursue graduate courses in Health Administration and who enrolled in the Master of Science program in Organizational Development and Leadership may choose the following courses in place of Elective courses offered. Students must meet the admission requirements for Health Administration. All Foundation and Advanced Courses would be required with any four of the following courses taken in place of Elective courses. Course substitution is permissible under certain circumstances and advisor approval.

**Master of Science in Organizational Development and Leadership with a Concentration in Organizational Dynamics and Leadership**

**Concentration in Organizational Dynamics and Leadership**

**Program Objectives**

The Organizational Dynamics and Leadership Concentration is designed to enhance the capability of executives, middle managers, project managers, sales managers, human service directors and supervisors, educational leaders, government officials, supervisors, military officers, and HR administrators in cultivating their ability to lead. The Concentration is designed for busy professionals who have a clear understanding of their educational objectives. The curriculum of the program focuses on the human side of business with training in organizational behavior, leadership development, and personal growth. A variety of management models and tools are studied: including: Emotional and Social intelligence, leadership styles, team development, cultural competence, power and authority dynamics and effective communication.

Learning objectives for the Master’s Degree Concentration in Organizational Dynamics and Leadership are to:

- Emphasize leadership competencies such as self-awareness, inspirational leadership, influence and managing conflict by developing the ability to learn and value others knowledge and experience.
- Enhance students’ knowledge of psychology and education to successfully initiate, execute, and implement strategic and operational goals by creating positive work environments.
- Learn skills and knowledge to translate vision, both professional and personal, into reality by broadening the student’s comfort zone through self-assessment.

**Admission Requirements**

Students seeking admission to the Organization Development and Leadership Graduate Program Online with a must have a baccalaureate degree from an accredited college or university. In addition, applicants must have six or more years of professional work experience in organizations. Applicants with an undergraduate GPA below 2.8 may have to either submit a work resume that shows a substantial post-undergraduate work history or submit Graduate Record Examination (GRE) or Miller Analogies Test (MAT) scores.
Applicants should submit an online graduate application form and all required documents as outlined in the admission section for Graduate Arts and Sciences.

**ODL Concentration in Organizational Dynamics and Leadership**

**Goal 1:** Students will gain knowledge and apply the history, theories, values, ethics, processes and practices of Organization Development to their workplace, communities and/or personal lives.

**Objective 1.1:** Students will display the ability to conduct assessments, build relationships, and intervene for positive human impact at the individual, group, and organization levels of system

**Objective 1.2:** Students will practice and assess the use of dialogical models, feedback, coaching and simulations designed to transform individuals and effect change in organizations.

**Objective 1.3:** Students will examine the influence of organizational culture on behavior change.

**Goal 2:** Students will develop interpersonal and leadership competencies for lifelong learning in themselves and others.

**Objective 2.1:** Students will use recommended models of leadership (e.g., emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.) to document growth in self-awareness.

**Objective 2.2:** Students will demonstrate self-awareness through learning activities, critical reflection and demonstrating knowledge grounded in current research and models of leadership development like emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.

**Objective 2.3:** Students will be able to describe and/or demonstrate knowledge of the relationships between learning, leadership, and change.

**Goal 3:** Students will respect, value and demonstrate academic research and writing

**Objectives 3.1:** The student will complete a thesis or capstone using APA style applicable to the workplace or academic discipline

The Master of Science in Organizational Development and Leadership with a Concentration in Organization Dynamics and Leadership consists of twelve 3-credit courses. The thirty-six credits are distributed as follows:

**ODL Elective Option: Health Administration**

An option exists for selected students working in the health care industry who require more knowledge and skills in the Organizational Development and Leadership field. Students who wish to pursue graduate courses in Health Administration and who enrolled in the Master of Science program in Organizational Development and Leadership may choose the following courses in place of Elective courses offered. Students must meet the admission requirements for Health Administration. All Foundation and Advanced Courses would be required with any four of the following courses taken in place of Elective courses. Course substitution is permissible under certain circumstances and advisor approval.

**Master of Science in Organizational Development and Leadership with a Concentration in Organizational Psychology and Development**
Concentration in Organizational Psychology and Development

Program Objectives

The Organizational Psychology and Development Concentration strengthens the ability of Organization Development Practitioners, Human Resource Professionals, Project Leaders, Managers, Change Agents, Internal and External Consultants, Mental Health Professionals and individuals in career transition to develop assessment, planning, facilitation and consulting skills in guiding and implementing change in self, groups and organizations. Learning objectives for the Master's Degree Concentration in Organizational Psychology and Development are to:

- Collaborate with sponsors/clients by helping to assess their needs
- Collect and act on quantitative and qualitative data that identifies organization and individual strengths and weaknesses.
- Learn new skills to create strategies that align individual and departmental goals with organizational objectives
- Leverage internal/external resources to deliver excellent client services by concentrating on the work issues and problems that matter
- Develop measurements that help clients focus their behaviors on achieving specific outcomes.

Admission Requirements

Students seeking admission to the Organization Development and Leadership Graduate Program with a concentration in Organizational Psychology and Development must have a baccalaureate degree from an accredited college or university. In addition, applicants must have four or more years of professional work experience in organizations. Applicants with an undergraduate GPA below 2.8 may have to submit Graduate Record Examination (GRE) or Miller Analogies Test (MAT) scores and request provisional status for admission.

Applicants should submit an online graduate application form and all required documents as outlined in the admission section for Graduate Arts and Sciences.

ODL Concentration in Organizational Psychology and Development

Goal 1: Students will gain knowledge and apply the history, theories, values, ethics, processes and practices of Organization Development to their workplace, communities and/or personal lives.

Objective 1.1: Students will display the ability to conduct assessments, build relationships, and intervene for positive human impact at the individual, group, and organization levels of system

Objective 1.2: Students will practice and assess the use of dialogical models, feedback, coaching and simulations designed to transform individuals and effect change in organizations.

Objective 1.3: Students will examine the influence of organizational culture on behavior change.

Goal 2: Students will develop interpersonal and leadership competencies for lifelong learning in themselves and others.

Objective 2.1: Students will use recommended models of leadership (e.g., emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.) to document growth in self-awareness.

Objective 2.2: Students will demonstrate self-awareness through learning activities, critical reflection and demonstrating knowledge grounded in current research and models of leadership development like emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.

Objective 2.3: Students will be able to describe and/or demonstrate knowledge of the relationships between learning, leadership, and change.

Goal 3: Students will respect, value and demonstrate academic research and writing

Objectives 3.1: The student will complete a thesis or capstone using APA style applicable to the workplace or academic discipline

Master of Science in Organizational Leadership - Online

Concentration in Organizational Leadership - Online
Program Objectives
The Concentration in Organizational Development and Leadership (Online) is designed to enhance the capability of executives, middle managers, project managers, sales managers, human service directors and supervisors, educational leaders, government officials, supervisors, military officers, and HR administrators in cultivating their ability to lead. The Concentration is designed for busy professionals who have a clear understanding of their educational objectives. The curriculum of the program focuses on the human side of business with training in organizational behavior, leadership development, and personal growth. A variety of management models and tools are studied: including:

- Emotional and Social Intelligence, leadership styles, team development, cultural competence, power and authority dynamics and effective communication

Learning objectives for the Organization Development and Leadership Master’s Degree Online are to:

- Emphasize leadership competencies such as self-awareness, inspirational leadership, influence and manage conflict by developing the ability to learn and value others’ knowledge and experience.
- Enhance students’ knowledge of psychology and education to successfully initiate, execute, and implement strategic and operational goals by creating positive work environments.
- Learn skills and knowledge to translate vision, both professional and personal, into reality by broadening the student’s comfort zone through self-assessment.

Admission Requirements
Students seeking admission to the Organization Development and Leadership Graduate Program with a concentration in Organization Development and Leadership (Online) must have a baccalaureate degree from an accredited college or university. In addition, applicants must have six or more years of professional work experience in organizations. Applicants with an undergraduate GPA below 2.8 may have to either submit a work resume that shows a substantial post-undergraduate work history or submit Graduate Record Examination (GRE) or Miller Analogies Test (MAT) scores.

Applicants should submit an online graduate application form and all required documents as outlined in the admission section for Online Graduate Arts and Sciences Programs.

ODL Concentration in Organizational Dynamics and Leadership
Goal 1: Students will gain knowledge and apply the history, theories, values, ethics, processes and practices of Organization Development to their workplace, communities and/or personal lives.

Objective 1.1: Students will display the ability to conduct assessments, build relationships, and intervene for positive human impact at the individual, group, and organization levels of system

Objective 1.2: Students will practice and assess the use of dialogical models, feedback, coaching and simulations designed to transform individuals and effect change in organizations.

Objective 1.3: Students will examine the influence of organizational culture on behavior change.

Goal 2: Students will develop interpersonal and leadership competencies for lifelong learning in themselves and others.

Objective 2.1: Students will use recommended models of leadership (e.g., emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.) to document growth in self-awareness.
Objective 2.2: Students will demonstrate self-awareness through learning activities, critical reflection and demonstrating knowledge grounded in current research and models of leadership development like emotional intelligence, situational leadership, whole brain theory, neuroscience, etc.

Objective 2.3: Students will be able to describe and/or demonstrate knowledge of the relationships between learning, leadership, and change.

Goal 3: Students will respect, value and demonstrate academic research and writing

Objectives 3.1: The student will complete a thesis or capstone using APA style applicable to the workplace or academic discipline

Curriculum

Foundation Courses
The Foundation Courses are designed to ensure that all students in the program have a common body of knowledge and experience in consultation, facilitation, and. All five Foundation courses are required.

PHILOSOPHY

Department Overview and Mission

Philosophy is a creative and critical exploration of the meanings and values by which we live our lives. Philosophers inquire, in a disciplined yet free and unrestricted manner, into matters indispensable to our humanity and to human flourishing in society, politics, and culture. By attempting to understand reason itself, and in specifying the conditions under which reality can be known truly, philosophers examine the fundamental presuppositions and the normative foundations of human practices such as language, law, science, art, education, ethics, and religion. To enter into philosophy is to find a new way of wondering and speaking about those things that matter most to us as human beings—love and friendship, work and creativity, suffering and death, identity and diversity, God and the mystery of evil, freedom and responsibility, and the possibility of living a good and meaningful life.

Philosophy in the GEP

To achieve the aims of philosophy in the University’s GEP, all students are required to take two philosophy courses: one course that deals with morality, PHL 154 Moral Foundations, and one course that deals with philosophical themes critical to reflection upon the nature of humans as persons. This second course can be chosen from among a number of courses in the Philosophical Anthropology area. In addition, students may choose to take a philosophy course to satisfy the GEP signature requirement in the Faith and Reason area.

Jesuit Tradition Signature GEP Course: PHL 154 Moral Foundations

A critical study of the various ways in which agents, actions, and social practices are evaluated from the moral point of view, as this has been articulated in major Western ethical theories. Tools for this study include an introduction to philosophical reasoning, and concepts basic to the moral point of view, such as rights, duties, virtue and character. Theories studied include but are not limited to Consequentialism, Deontologism, and Natural Law. This course is a prerequisite for any Ethics Intensive course as well as for the required course in the Philosophical Anthropology area.

Variable GEP Course: PHL NNN: Philosophical Anthropology

The requirement of a course in Philosophical Anthropology reflects the conviction that humans are beings who seek to explain to themselves who they are. To paraphrase St. Augustine, if no one asks me what a human being is, I know; if I want to explain it to a questioner, I do not know. The self-knowledge required to meet the challenge posed by Augustine’s questioner may be achieved by courses satisfying one or more of three criteria: the metaphysics of the person, individual and society, and the meaning of life. The possession of this self-knowledge is a prerequisite for achieving the Ignatian ideal of cura personalis, care that is fitting for a human being in particular.

Professor: James W. Boettcher, Ph.D.; Joseph Corabi, Ph.D.; Joseph J. Godfrey, S.J., Ph.D.; Vincent A. McCarthy, Ph.D.
Assistant: Eric Weislogel, Ph.D.; Ginger A. Hoffman, Ph.D.; Julie M. McDonald, Ph.D.; Patrick Casey, Ph.D.
Visiting: Eric Hoffman, Ph.D., J.D.

Visiting-Online: Brice R. Wachterhauser, Ph.D.
Chair: McDonald

Undergraduate Major

• Philosophy (p. 385)

Undergraduate Minor

• Philosophy (p. 387)

PHL 101 Human Person (3 credits)

PHL 150 First Year Seminar (3 credits)

Various first-year seminars are offered each year by philosophy faculty. Attributes: First-Year Seminar, Undergraduate

PHL 154 Moral Foundations (3 credits)

A critical study of the various ways in which agents, actions, and social practices are evaluated from the moral point of view, as this has been articulated in major Western ethical theories. Tools for this study include an introduction to philosophical reasoning and concepts basic to the moral point of view, such as rights, duties, virtue and character. Theories studied include but are not limited to Consequentialism, Deontologism, and Natural Law. Satisfies the GEP Jesuit tradition course requirement. Attributes: Signature Course (New GEP), Undergraduate

PHL 170 Special Topics in Philo (3 credits)

PHL 201 Knowledge and Existence (3 credits)

Three basic problems concerning reality and the quest to know reality: 1) the origin, validity, and limits of human knowledge; 2) Graeco-Christian, modern, and contemporary approaches to being and causality; and 3) the problem of God. Does not satisfy the GEP variable course requirement in the Philosophical Anthropology area. Prerequisites: PHL 1031 or PHL 1035 or PHL 154 Attributes: Undergraduate

PHL 220 Logic (3 credits)

A study of the logic of ordinary language: the functions of language, forms of argument, fallacies, definition; analysis of propositions and deductive reasoning; inductive reasoning, analogy and scientific hypothesis testing. An introduction to symbolic logic is provided. Techniques are developed for translating arguments in ordinary language into a canonical language that highlights their logical form. The predicate and propositional calculi are used to establish the validity of simple arguments. Does not fulfill the philosophy GEP. Prerequisites: PHL 1031 or PHL 1035 or PHL 154 Attributes: Undergraduate

PHL 240 Symbolic Logic (3 credits)

The study of the semantic and syntactic properties of propositional and predicate logics- natural deduction systems of the first order. Some results in meta-logic (such as the soundness and completeness proofs for particular systems) may be addressed, and attention may also be paid to the properties of axiomatic deductive systems in contrast to systems of natural deduction. The usefulness of formal systems for studying the property of validity in natural language arguments will also be addressed, in part by learning techniques for “translating” arguments from one language to the other. Does not fulfill the philosophy GEP. Prerequisites: PHL 1031 or PHL 1035 or PHL 154 Attributes: Undergraduate
**PHL 250 Philosophy of Death (3 credits)**
A study of the reality of death as the boundary of human experience. The course explores the meaning of death and its relationship to the meaning of life, examines evidence for and against the thesis that death is the end of human existence, and considers implications for selected contemporary issues (e.g., death with dignity, medical definition of death). This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 1031 or PHL 1035 or PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Undergraduate

**PHL 252 Philosophy of Karl Marx (3 credits)**
An analysis and evaluation of the early writings of Karl Marx. Topics to be stressed include the metaphysical roots of Marx’s concept of human beings, the causes and effects of alienation, economic determinism, and the rise of philosophical communism. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 1031 or PHL 1035 or PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Undergraduate

**PHL 253 Hume, Darwin, Marx, and Freud (3 credits)**
This course takes up four giant thinkers – Hume, Darwin, Marx, and Freud – men who changed their respective fields in radical ways. David Hume provided a bold philosophy of human understanding based on the empirical method of investigation. A century later Charles Darwin used the empirical method to develop his theory of evolution via natural selection, which revolutionized knowledge of human origins and the relatedness of all species. Karl Marx used empiricism to reconcile human history in economic terms and to predict a social revolution in class structure. Sigmund Freud applied empirical investigation to neurological problems resulting in the discoveries of psychoanalysis. We will ask, how do each figure overturn the knowledge tradition of his time to redescribe human functioning? This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Undergraduate

**PHL 254 Phil & the Democratic Body (3 credits)**
For centuries philosophers have tried to understand what it means to be human by analyzing various aspects of the human condition. Unfortunately, the fact that we are embodied beings has not yet received adequate treatment. This course is an attempt to correct many years of philosophical avoidance of the body. We will not begin our inquiry with the assumption that human consciousness is just a given and is the same in all human beings. Rather, we will begin with an analysis of various forms of embodiment and consciousness as affected by the types of bodies that we have and social attitudes towards these bodies. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Undergraduate

**PHL 255 Hume, Darwin, Marx, and Freud (3 credits)**
This discussion will center on careful textual study of primary sources in philosophy/theology that deal with the analysis of human “fallenness” and self-recovery. A key element that will emerge is the role of the will: not just the theoretical freedom of the will, but the necessity to make a specific act of the will, namely to will to be one’s authentic self. Focus on works of Augustine, Kierkegaard, and Heidegger. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Undergraduate Level 3, Undergraduate

**PHL 256 Freedom and Determinism (3 credits)**
A metaphysical and epistemological analysis and evaluation of the various philosophical positions on the determinism-free will issue. Various kinds of determinism (hard, soft, theological, etc.) will be critically examined, and various ways of arguing in support of free-will (from choice, deliberation, remorse, etc.) will be assessed. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 1031 or PHL 1035 or PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Undergraduate

**PHL 257 Philosophy and Liberation (3 credits)**
What do we mean by “liberation”? Liberation from what? Liberation for what? What role does philosophy play in the quest for liberation? This course will explore the meaning of liberation in a variety of contexts (biological, psychological, economic, political, spiritual), paying special attention to what it might mean for students and the university. In particular, we will be looking for those places where the philosophical, the political, and the spiritual intersect in the event of liberation. Emphasis will be on Latin American philosophies and theologies of liberation, focusing on the thought of Xavier Zubiri, Ignacio Ellacuria, and Enrique Dussel. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 154

**Attributes:** Philosoph Anthropol (New GEP)

**PHL 258 The Authentic Self (3 credits)**
This course will center on careful textual study of primary sources in philosophy/theology that deal with the analysis of human “fallenness” and self-recovery. A key element that will emerge is the role of the will: not just the theoretical freedom of the will, but the necessity to make a specific act of the will, namely to will to be one’s authentic self. Focus on works of Augustine, Kierkegaard, and Heidegger. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Philosophy Level 3, Undergraduate

**PHL 259 Philosophy of Human Nature (3 credits)**
In this course we shall inquire into the nature of human beings by reading and discussing major philosophical texts from the western intellectual tradition along with essays written by contemporary philosophers. In particular, we shall explore such topics as the nature of human rationality, knowledge and belief, immortality, virtue, free will, self-deception, the mind-body problem, and physicalism vs. dualism with respect to human persons. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 154

**Attributes:** Philosoph Anthropol (New GEP), Undergraduate

**PHL 262 Freedom, Citizenship, Culture (3 credits)**
This course will survey recent trends in political philosophy with special attention to competing conceptions of political freedom, civic identity and responsibility, and the political significance of community and cultural diversity. Does our political freedom depend primarily upon securing the negative liberties celebrated in the classical liberal tradition? Does it also require adequate social rights, democratic self-determination and/or active and ongoing participation in the political process? How should claims of freedom be balanced alongside the need to promote the common good, political solidarity and unity, and a sense of common belonging? How should the demands of citizenship be weighed against commitments arising from membership in sub-state cultural groups and other forms of human community? This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

**Prerequisites:** PHL 154

**Attributes:** Ethics Intensive (New GEP), Philosoph Anthropol (New GEP), Undergraduate
PHL 264 Topics in Moral Psychology (3 credits)
This course will explore human moral judgment, decision making, and behavior. Included are examinations of issues about whether the psychological processes involved in human moral practice are innate, about the respective roles of emotion and reasoning in moral judgment, and about the extent to which cultural forces shape our moral beliefs. Following the lead of much of the field in recent years, our focus will be primarily on working out the philosophical implications of recent scientific investigation on the topics. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP)

PHL 266 Rel. & Phil in Amer. Identity (3 credits)
From the founding of the American nation under the influence of Puritanism to the rise of Transcendentalism in the nineteenth century, philosophic and religious propositions have decisively shaped the American character. This course examines several important episodes in American thought in order to determine what makes Americans different from other sorts of people, what habits of thought inform their decisions, and what principles govern their understanding of the relation between religion and public life. This course typically involves making two off-campus visits to historical sites in Philadelphia. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP), Undergraduate

PHL 268 The Self: East and West (3 credits)
Philosophers East and West, ancient and modern, have struggled with the question: What does it mean to be a Self? What does it mean to be genuinely myself in the world in which I find myself? And what are important erroneous as well as “accurate” ideas that have practical consequences in the experience of myself? The course is intended to be an introduction to, and survey of, four philosophical notions of the Self, from East and West, from antiquity to recent times: Buddhism, Confucianism, Stoicism and Existentialism. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP), Undergraduate

PHL 269 Plato & Waking Life: on Being (3 credits)
In 399 B.C., Socrates famously said, “The unexamined life is not worth living.” He made that statement in Plato's work The Apology. In addition to The Apology, we will read Plato’s Republic, where Plato presents his idea of the best possible state, both internally and externally. In the second half of the course we will start by watching a 2002 animated film, Waking Life, by the contemporary director Richard Linklater. We will delve into further topics that present and question modes of conscious being. All the materials of the course are connected with each other via the metaphysical notion of conscious existence and the degree to which it provides access to reality. A question to consider in both parts of the course: Is it possible to grasp reality through self-examination? This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Attributes: Philosoph Anthropol (New GEP)

PHL 270 Special Topics in Philosophy (3 credits)

PHL 272 Human Intelligence (3 credits)
There are few things in the modern developed world that get as much attention as human intelligence. Yet, for all the attention that intelligence receives, most people have thought surprisingly little about it: What is intelligence? Can it be learned? Is it possible for us to measure intelligence, and if so how? This course will examine these issues in depth, consider empirical findings, and explore philosophical issues that these findings and a variety of everyday practices surrounding intelligence raise. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP)

PHL 274 From Athens to Philadelphia (3 credits)
This course investigates how a city like Philadelphia was built and to consider how a city can be built justly. This involves inquiring into the nature of cities and city life in the United States and attempting to formulate criteria for a just city. Attention will be given to topics of urban planning, to philosophical theories of justice, and to the Great Migration, the movement in the 20th century of African-Americans from the rural south into cities of the northern states. Students will be required to make several trips into Center City in Philadelphia as part of this course. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Ethics Intensive (New GEP), Philosoph Anthropol (New GEP)

PHL 276 Philosophy of Cornel West (3 credits)
While much attention has been given to King as an activist, little has been written about his philosophical development and the further implications of his philosophical positions. Much of what King preached, wrote, taught, believed, and lived has its origin in his engagement with philosophy. In his writings one can see him struggle with such thinkers as Marx, Hegel, Kant, Nietzsche and others as he attempts to make sense of and transform the human condition. King's struggle against the dehumanization of African Americans and the poor often led him to an interesting synthesis of theology and philosophy. For this reason we must also address the philosophical and emancipatory aspects of the works of Paul Tillich, Reinhold Niebuhr, Howard Thurman, and Walter Rauschenbusch. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.

PHL 278 Philosophy of MLK (3 credits)
While much attention has been given to King as an activist, little has been written about his philosophical development and the further implications of his philosophical positions. Much of what King preached, wrote, taught, believed, and lived has its origin in his engagement with philosophy. In his writings one can see him struggle with such thinkers as Marx, Hegel, Kant, Nietzsche and others as he attempts to make sense of and transform the human condition. King's struggle against the dehumanization of African Americans and the poor often led him to an interesting synthesis of theology and philosophy. For this reason we must also address the philosophical and emancipatory aspects of the works of Paul Tillich, Reinhold Niebuhr, Howard Thurman, and Walter Rauschenbusch. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
PHL 280 Life and Death (3 credits)
The focus of the course is primarily metaphysical. The course begins with an examination of what it means to be alive. Historically, this is a question that has had philosophical and scientific roots, and we will examine both. Early ideas about life included the view of life as breath, a view that persists etymologically in words such as “spirit”. We will survey these ideas leading up to Enlightenment debates between vitalism and mechanism. After completing this survey, we will consider what is meant by a life, as a process extended in time. This leads directly to a consideration of human life, and the life of a person. In the death part of the course, we will deal with some fairly standard issues, including the Harm Thesis, and the question of whether it is ever or always rational to fear (or at least want to avoid) death. In addition, conceptions of the afterlife will be considered, in light of points previously made concerning the nature of a life in general. The conditions that would make for a meaningful afterlife will be considered in light of the question of what makes for a meaningful life in the first place. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP)

PHL 282 People, Animals, and Ethics (3 credits)
This course will evaluate the ethical issue of whether humans have a moral obligation to protect the rights and welfare of nonhuman animals. Determining this will require a philosophical exploration of whether nonhuman animals have any rights in the first place and, if so, what these are. The course will also explore the nature and origin of ethics in human societies (including the possibility that precursors to ethical behavior can be found in some animal groups), and thereby raise the question of whether human moral practices constitute a radical departure from so-called natural behaviors. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP)

PHL 284 Phil & Personal Relationships (3 credits)
This course is a philosophical exploration of relationships between individuals, particularly friendship and love, but including sex, marriage, and family, as well as any other ways in which individuals relate. Building on theories of philosophers and other social scientists, this course may consider, for example, what makes personal relationships valuable, how personal life relates to social context, how personal relationships like love and friendship have changed over time, how gender, race, age and other differences figure in personal relationships. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP), Undergraduate

PHL 286 Philosophy of Mental Illness (3 credits)
This course will explore philosophical questions at the heart of the fields of psychiatry, clinical psychology, and other mental health professions. Broadly, we will identify and critically evaluate assumptions that underlie labeling and treating certain individuals as “insane”/“mentally ill.”/mentally disordered.” We will use conceptual tools within the philosophy of mind, philosophy of science, philosophy of medicine, and moral philosophy to consider questions such as: What is insanity? Is it a disease or illness, “just like diabetes”? What is a disease in the first place? How do we define a “good” or “healthy” human life? What are the ethical implications of labeling people as mentally disordered? Might so-called mental disorders be better described as forms of “neurodiversity,” to be celebrated instead of cured? This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Philosoph Anthropol (New GEP)

PHL 288 Minds & Souls (3 credits)
This course surveys both the main issues and theories in contemporary philosophy of mind as well as traditional and contemporary conceptions of the soul. It philosophically examines the difference between these distinct approaches, and will inquire: Why have soul theories been largely eclipsed by other approaches until relatively recently? Why are a few philosophers taking another look at soul theories? How do broader worldview considerations inform the debates? The topic of “singularity” will also be covered. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Attributes: Philosoph Anthropol (New GEP)

PHL 292 People, Animals, and Language (3 credits)
Modern humans emerged about a hundred thousand years ago, which is only an instant in the several-billion-year history of life on earth. Yet, in that short time we became the dominant species and radically changed the natural order. One proposed answer to the question of how humans rose to prominence so rapidly and decisively is the faculty of language. But what is the origin of this faculty? Darwin’s 1871 book The Descent of Man argues that humans descended from other species not only biologically but also psychologically. That is, all of the mental abilities thought to make our species special—consciousness, cognition, emotion, morality, and language—evolved. These abilities did not come on the scene suddenly with the appearance of Homo sapiens but instead existed in varying degrees in our nonhuman and prehuman ancestors. Following Darwin’s lead in looking for the origin of language in animal communication including gestures, singing, and calls, researchers have continued to explore these links. In our course, we will start by examining the general connections between the minds of nonhuman species and humans, and then we will focus on the evolution and importance of human language. Readings include several chapters from Darwin’s Descent of Man; Sapiens: A Brief History of Humankind by Yuval Noah Harari; Kanzi: The Ape at the Brink of the Human Mind by Sue Savage-Rumbaugh; and The First Word: The Search for the Origin of Language, by Christine Kenneally.
Attributes: Undergraduate
PHL 302 Philosophy of Race (3 credits)
Race plays a prominent role in our social existence, even in what some have called a “post-racial society,” and has for centuries. In this course, we will take a philosophical approach to understanding a set of related questions about race. What is the origin and basis for racial concepts? Is race socially constructed, or does it have a biological basis? Does racial discourse serve to further entrench racial divisions? How does racial oppression relate to other forms of oppression such as class- and gender-based oppression? What is “privilege”? What could it mean to say that a person has moral obligations deriving from harms which s/he has not personally brought about, and do persons ever have such obligations? We will also investigate issues such as affirmative action, racial solidarity, and the ways in which racial oppression differentially affects men and women. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 154
Attributes: Africana Studies Course, Diversity Course (New GEP), Philosoph Anthropol (New GEP), Undergraduate

PHL 304 African Philosophy (3 credits)
Introduction to African philosophical approaches to: the problems of God, causality and chance, freedom, fate and destiny, the concepts of spirit, the philosophical wisdom of the African proverbs and the implications of Africa’s history for philosophy, with applications to Western thought. Selected Readings from modern African novels, essays in anthropology, traditional philosophical, religious and literary texts, and essays by contemporary African philosophers.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Africana Studies Course, Undergraduate

PHL 306 Indian Philosophy (3 credits)

PHL 308 Asian Philosophies (3 credits)
This course will examine the concepts of self, nature, and society in the Asian philosophical paradigms as they have been articulated in the philosophy of India, China and Japan, and contemporary Asian Philosophies.
Prerequisites: PHL 154
Attributes: Asian Studies Course, Non-Western Studies (GEP), Philosoph Anthropol (New GEP), Undergraduate

PHL 310 Philosophy of Art (3 credits)
An examination of the philosophical questions arising from the human activity of creating and appreciating art (of all kinds: visual, musical, literary, etc.). Questions can include: the relation of perception and aesthetic appreciation to knowledge; the relation between emotion and belief; the relation between artist/creator, audience/spectator, and art work. How is art distinguished from nature as possible object of aesthetic appreciation? Must art even be aesthetic? If not, how is the category ‘art’ defined, and by whom?
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Philosoph Anthropol (New GEP), Undergraduate

PHL 311 Philosophy of Law (3 credits)
Philosophy of Law examines some of the philosophical questions raised by law and legal systems, such as the nature and limits of law, the relation between law and morality, the challenges in applying the principles of constitutional, contract, criminal and tort law, and specific issues such as civil disobedience, equality and liberty, rights and responsibility, and punishment and excuses.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Ethics Intensive (New GEP), Philosoph Anthropol (New GEP), Undergraduate

PHL 314 Topics in Phil & Medicine (3 credits)
This course examines critical philosophical questions that arise from the practice of medicine and medical research. Central topics include: confidentiality; informed consent; research on humans and non-human animals; stem cell and genetic research; reproductive and end-of-life issues; and the just distribution of health care resources. May be taken to satisfy the Ethics Intensive course requirement.
Prerequisites: PHL 154
Attributes: Undergraduate

PHL 316 Food and Justice (3 credits)
It’s indisputable that there are complex moral issues related to food: How should we respond to the problems of global hunger in the 21st. century? How should we respond to the fact that millions of children and adults on our planet are severely malnourished, if not facing starvation? Are our current means of food production sustainable? And do they threaten the health and well-being of future generations? What moral challenges are raised by the use of biotechnology in food production and processing? How can we provide safe, acceptable, nutritious food for all persons in such a way that is respectful to the welfare of all sentient beings? May be taken to satisfy the Ethics Intensive course requirement.
Prerequisites: PHL 154
Attributes: Ethics Intensive (New GEP), Undergraduate

PHL 318 Psycholinguistics (3 credits)
This course is an introduction to the study of how language is represented in the human mind and what processes are involved in language use, including producing, comprehending, and storing both spoken and written language. Together, we will explore questions such as the following: How do humans store and recognize words? How do we analyze speech? What processes are involved when we speak and read? We will study spontaneously-occurring speech errors and misperceptions and carry out experimental investigations on language production and comprehension. This course is open to students from all academic majors and there is no prerequisite.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Undergraduate

PHL 320 Business, Society, and Ethics (3 credits)
This course will discuss ethical issues in the practice of business. Topics will typically include ethical issues in marketing, finance, human resources, the environment, product liability, global sales and labor practices, etc. The course will address these issues in business practice through the lenses of traditional ethical theories. May be taken to satisfy the Ethics Intensive course requirements.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Ethics Intensive (New GEP), Undergraduate

PHL 322 Philosophy of Science (3 credits)
Methodological problems of observation, discovery, testing; the realistic import of models and theoretical entities; the use of paradigms in science; revolutionary periods in science; the relationship between science and philosophy; scientific determinism; science and human values.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
PHL 324 Philosophy of Social Sciences (3 credits)

This course will investigate a variety of philosophical issues surrounding sports. The main focus will be on ethical topics such as the use of performance enhancing drugs, the appropriateness of institutions surrounding college athletics, and the use of government funds to subsidize stadiums and arenas for professional sports franchises. These issues will be investigated by employing common methods in moral philosophy, informed by empirical research in economics and a variety of other scientific disciplines.

Prerequisites: PHL 154
Attributes: Ethics Intensive (New GEP)

PHL 326 Philosophy of Sports (3 credits)

This course will examine in light of the classic texts. Social Teaching. Contemporary issues of the working poor and economic justice is a virtue necessary for all societies and communities. But what God calls individuals and communities to be just. Philosophers argue that PHL 332 Economic and Social Philosophy (3 credits)

Undergraduate

Attributes:

Prerequisites: PHL 154

PHL 328 Philosophy and Evolution (3 credits)

After examining the theory of evolution via natural selection, the course will cover two important philosophical debates provoked by Darwin’s theory. First, by situating human beings within a purely natural context, evolutionary theory aroused the wrath of theologians, who looked to God as the source of creation of both man and nature. An important part of the argument is over teleology, the ancient theory that everything in nature has a purpose, and the course takes up the teleological argument for the existence of God and the Darwinian refutation of it. This issue leads to considering the role of religion in a post-Darwinian world.

Second, by situating human beings within a purely natural context, Darwin’s theory called into question the specialness of humans in relation to animals. The debate here is whether nonhuman animals can be considered to possess cognition, language, and morality, or whether humans alone have these abilities.

Prerequisites: PHL 154 or PHL 1031 or PHL 1033
Attributes: Philosoph Anthropol (New GEP)

PHL 330 Social and Political Phil (3 credits)

This course serves as an introduction to major works in the history of social and political philosophy. With a survey of important figures and texts from pre-modern, modern and contemporary periods, the course will address basic philosophical questions about the individual, society and the political order. These questions include: In what sense is the political order a community? What is the philosophical basis and justification of law and political authority? What are the social and political implications of a commitment to human freedom and equality? What is justice? What are the necessary social conditions for realizing freedom, justice and human flourishing?

Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Ethics Intensive (New GEP), Philosoph Anthropol (New GEP), Undergraduate

PHL 332 Economic and Social Philosophy (3 credits)

God calls individuals and communities to be just. Philosophers argue that justice is a virtue necessary for all societies and communities. But what does justice, especially social justice, mean? The concept has a history which this course will examine by a careful reading of classic texts of Old Testament, New Testament, Aristotle, Aquinas, Locke, Marx, and Catholic Social Teaching. Contemporary issues of the working poor and economic globalization will be examined in light of the classic texts.

Prerequisites: PHL 1031 or PHL 1035 or PHL 154

PHL 334 Ethics and Criminal Justice (3 credits)

This course will address ethical issues in the criminal justice system at both the theoretical and applied levels. Typical theoretical issues addressed might include the following: the relationship between law and morality; theories of punishment; conditions for the moral and/or legal responsibility of individuals; notions of procedural justice. Typical applied ethics issues might include the following: limits on the police use of deception and of deadly force; search and seizure rules; plea bargaining; mitigation and excuse defenses (e.g. insanity); mandatory sentencing, especially life without parole; capital punishment.

Prerequisites: PHL 154
Attributes: Ethics Intensive (New GEP)

PHL 336 Violence and Non-Violence (3 credits)

This course will focus on two levels: philosophical reflection on the moral dimensions of violence and nonviolence in general, and analysis of some specific moral issues concerning the resort to violence. Issues include the morality of war, especially under current conditions, and criminal punishment. Theories of nonviolence, and practical alternatives to violence, will be examined.

Prerequisites: PHL 154
Attributes: Ethics Intensive (New GEP), Undergraduate

PHL 338 Vio & Recncilin in N. Irelnd (3 credits)

The course will examine violence and reconciliation in Northern Ireland from both a philosophical and sociological perspective. The instructors will pay special attention to both the socio-historical roots of “The Troubles” and the moral context of discourses of retribution and forgiveness. During the stay in Northern Ireland, SJU students are guests of Corrymeela, an ecumenical community committed to the work of reconciliation by providing a “safe and shared space” where people can meet as Protestants and Catholics, British and Irish, rich and poor, and through open dialogue and interaction grow in trust with one another.

Students, during the second week of the stay, will be expected to live with a family in Belfast and work at a cross-cultural community site.

Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Ethics Intensive (New GEP), Undergraduate

PHL 340 Topics in Political Philosophy (3 credits)

This course will examine recent developments and debates in social and political philosophy. The emphasis of the course will be on contemporary discussions of a problem or set of problems, though some attention may be paid to the treatment of these problems in the history of philosophy. Topics to be examined might include political legitimacy, human rights, private property and distributive justice, just and unjust war, cosmopolitanism and patriotism, global justice, social unity and solidarity, toleration, multiculturalism, and the role of religion in politics.

Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Undergraduate

PHL 342 Dimensions of Freedom (3 credits)

Political philosopher Hannah Arendt claims that the ability to forgive and the ability to make and keep promises are at the center of human freedom, the capacity to interrupt automatic processes and begin something new. The experience of imprisonment will be an important focus of class discussion, and a starting point to examine multiple dimensions of human freedom. These include: negative vs. positive freedom; freedom of action vs. inner freedom (thought, imagination, will); political freedom vs. political oppression; the extent to which freedom in any of these senses is a good, worthy of the value we tend to give it. For each dimension, we will also ask what inner and/or external conditions limit or even preclude its exercise.

Prerequisites: PHL 154 or PHL 1031 or PHL 1033
Attributes: Philosoph Anthropol (New GEP)
PHL 350 God in Recent Philosophy (3 credits)
The course examines three different conceptions of God: [1] Popular Theism: God conceived as similar to a human person — though incorporeal, unobservable, and possessed with superhuman attributes. This is the view of God held by most traditional theists. [2] Perfect Existence Theism: in which God is not a being of any kind, not even a personal being, even though personal language can be used in speaking of God. This is the view of God espoused by Thomas Aquinas; and [3] Panentheism: God conceived as inclusive of rather than independent of the world; the relation between God and the world being like the relation between the mind and its body. This view has been defended by Charles Hartshorne. In the case of each form of theism, questions arise as to how it deals with the problem of evil: how its view of God squares with the fact that the world contains vast amounts of moral and physical evil. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154 and THE 154
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 351 Reason, Faith, and Relativism (3 credits)
Intelligent, sincere, and equally well-informed people often strongly disagree. This seems especially true when it comes to religious beliefs. In that context, people will often appeal to "faith," which some construe as belief without good reason. It is therefore important to ask what counts as good reason for holding a belief, and whether all beliefs are subject to the same standard. If two individuals hold contradictory beliefs, then certainly one of them is wrong, but might both be justified in holding those beliefs? If so, does this imply that truth is relative? This course deals with the general topic of rational belief formation in a world that is religiously, ideologically, and culturally diverse. Satisfies Signature core course requirement in Faith and Reason.
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 352 Kierkegaard, Nietzsche, Dostoevsky (3 credits)
Against the backdrop of classical metaphysics and human rationality, the sources and early development of existential themes are developed. Selected readings from Kierkegaard (Either/Or, Fear and Trembling), Nietzsche, (Thus Spoke Zarathustra, Beyond Good and Evil), and Dostoevsky (Notes from the Underground). Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 353 Phil, Science, and Religion (3 credits)
A consideration of important issues in philosophy and philosophy of religion within the historicizing context of the scientific world-view of the times. Simultaneously, the course will consider the implications of the current (and changing) scientific world-view (genetics, astronomy, physics) for philosophical and religious reflection, including the idea of God. Philosophically as well as scientifically, the course will take its point of departure in Darwin and come back to consider the radical implications for philosophy and religion prophetically seen by his contemporary Nietzsche. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and (THE 154 or THE 221)
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 354 Philosophy of Religion (3 credits)
Philosophical analysis of some of the following topics: religious experience, testimony, belief, human destiny, evil, knowledge of and language and arguments about God. Readings from classical and contemporary sources. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and (THE 154 or THE 221)
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 355 Phil Iss in Christian Doctrine (3 credits)
This course will investigate the coherence and plausibility of some of the most central teachings of Christianity. A sampling of potential topics includes: heaven and hell, the Trinity, Original Sin, the Atonement, and the Incarnation. There will also be a discussion of different methods of deciding when a teaching is essential to Christianity, and an exploration of various alternative interpretations of the doctrines. Satisfies Signature core course requirement in Faith and Reason.
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 356 Religious Diversity (3 credits)
Religious diversity is an inescapable fact. It is hard to imagine anyone’s thinking his or her religion (should be or she have one) to be the only one that exists or the only one capable of evincing commitment and devotion. The diversity of religions raises questions that are practical as well as theoretical. The fact of religious diversity has elicited various philosophical reactions, ranging from exclusivism, to relativism to inclusivism. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and THE 154
Attributes: Faith-Reason Course (New GEP), Honors Course, Undergraduate

PHL 357 Uses & Abs of Jesus in Modrnty (3 credits)
A representative survey of important 19th and 20th century philosophical and theological writings about Christianity and Jesus of Nazareth as Christ, with particular attention to the role of philosophy of religion and theology within modernity. The course will address a variety of statements and standards for articulating the meaning and identity of Jesus as Nazareth as: the Jesus as history, the Christ of faith, and the Christ-idea and archetype in Western tradition. And it will give special attention to the ways in which the texts chosen both reflect and transform the cultural, philosophical and religious contexts within which they appear. Satisfies Signature core course requirement in Faith and Reason.
Attributes: Faith-Reason Course (New GEP), Honors Course, Undergraduate

PHL 358 Atheism & Prob of God (3 credits)
After a study of the classical arguments concerning God’s existence, the course examines examples of 19th century atheism (Feuerbach, Marx, Nietzsche) and belief (Kierkegaard, Dostoevsky), and 20th century atheism (Sartre, Camus) and belief (Rahner, Marcel). Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and (THE 154 or THE 221)
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 359 Existence of God (3 credits)
This course will focus on arguments for and against the existence of God. It will begin by examining the ontological, cosmological, and design arguments for the existence of God. Included will be a discussion of purported evidence for the existence of God from modern biology and cosmology. It will then examine arguments against the existence of God based on human and animal suffering, followed by arguments against the existence of God arising from the scarcity of credible miracle claims. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and (THE 154 or THE 221)
Attributes: Faith-Reason Course (New GEP), Undergraduate
PHL 360 Philosophy of God in Aquinas (3 credits)
This course will examine the philosophical writings of Thomas Aquinas on the existence and nature of God. Topics include the procedure of philosophical theology, the methodological problem of attaining true knowledge of God, Aquinas’s “five ways” of demonstrating the existence of God, and arguments for the various “attributes” of God: simplicity, perfection, goodness, infinity, ubiquity, unchangeableness, eternity, and oneness. Aquinas’s innovative method of analogical predication will be employed to offer a philosophical interpretation of core theistic assertions that God has life and knowledge that God wills and loves, that God exercises providence both justly and mercifully, that God is all-powerful and perfect happiness. This course may be taken to satisfy the major requirement for a course in the ancient or medieval period. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 1031 or PHL 154
Attributes: Faith-Reason Course (New GEP), Undergraduate

PHL 362 Faith & Reason in Kantian Phil (3 credits)
This course begins with an examination of two types of traditional arguments for the existence of God: those based on putative grounds of reason and those based on putative grounds of experience. The questionable success of such proofs will raise several questions: what is the nature of human reason, what is the nature of faith as a distinct epistemic attitude, and how should we think about the relation between them? We shall then pursue Kant’s systematic answers to these questions with the hope that they will give us a workable and empowering alternative to the arguments studied earlier in the course. Possible further topics for the course include (1) the possibility of understanding the history of arguments for God’s existence as a progressive development of reason’s awareness and articulation of its needs, and (2) the application of Kant’s analysis of reason to some fundamental claims and themes of the Christian religion in order to show how they can be understood as having a basis in reason. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and THE 154
Attributes: Faith-Reason Course (New GEP), Undergraduate, Writing Intensive Course- GEP

PHL 364 God, Evil and Hiddenness (3 credits)
This course will examine recent arguments against the existence of God based on the problem of evil and the problem of divine hiddenness. (The problem of evil is the problem of reconciling God’s existence with the presence and severity of suffering in the world, and the problem of divine hiddenness is the issue of understanding why God would provide so few clear and dramatic signs of his presence.) Although no prior mathematical knowledge will be presupposed, as part of the process of understanding the arguments students will also be expected to master some basics of probability theory. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and THE 154
Attributes: Faith-Reason Course (New GEP)

PHL 365 Christianity and Evidence (3 credits)
This course will investigate several topics surrounding Christianity and evidence. The course is divided into two sections. The first is an exploration of the question of whether we have good evidence for Christianity. Included in this first unit will be a discussion of both scriptural evidence and the evidence provided by purported miracles in the modern world. The second section will examine the relationship between belief and evidence, in an attempt to understand whether Christian belief (and religious belief more generally) should be based on evidence in the same way as many other kinds of beliefs. Satisfies Signature core course requirement in Faith and Reason.
Prerequisites: PHL 154 and (THE 154 or THE 221)
Attributes: Faith-Reason Course (New GEP)

PHL 366 Violence and Non Violence (3 credits)

PHL 367 Postmodernism & Religious Faith (3 credits)

PHL 370 Special Topics in Philosophy (3 credits)

PHL 395 Junior Seminar (3 credits)

PHL 401 Ancient Philosophy (3 credits)
What is the nature of ultimate reality? What standards must our beliefs meet if they are to qualify as knowledge? Is the soul distinct from the body, and what sort of trait is virtue? These are among the most basic questions of philosophy, and they took shape originally in the ancient world of Greece and Rome. This class provides a critical survey of the questions and possible answers provided by the founders of the western philosophical tradition. Philosophers discussed include the Presocratics, Socrates, Plato, Aristotle, the Stoics.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Ancient Studies Course, Undergraduate

PHL 402 Plato and Aristotle (3 credits)
A focused examination of the major ethical, metaphysical, and political theories of Plato and Aristotle. The class will cover the ideas of these two philosophers on such topics as the nature of virtue, the soul, change in the physical world, substance, the best political regime, and the relation between political activity and philosophy.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Ancient Studies Course, Undergraduate

PHL 404 Love & Frndshp in Ancnt Wrld (3 credits)
This course explores a number of descriptions of love and friendship found in works of literature and philosophy from ancient Greece and Rome. Two topics in particular will be studied in these works on love and friendship. The first is the connection between friendship, justice, and politics that is asserted in a number of ancient works. The second is the presentation of erotic love as a form of divine madness that can be both dangerous and beneficial. Some authors to be read include Sophocles, Euripides, Plato, Aristotle, Cicero, and Catullus. This course may be taken to satisfy the GEP variable course requirement in the Philosophical Anthropology area.
Prerequisites: PHL 1031 or PHL 1035 or PHL 154
Attributes: Ancient Studies Course, Philosoph Anthropol (New GEP), Undergraduate
PHL 408 Augustine, Politics, Self (3 credits)
